The bank clearings in the principal centres of Canadian commerce for the nine months ending September 31st, were the largest for the same period of any of the past several years. The five cities in which clearing houses have been established, and from which reports have been received during the past four years show aggregate clearings during periods of nine months as follows:

Nine months 1897	$778,033,187
" " 1896	738,974,306
" " 1895	743,827,938
" " 1894	694,945,526

The establishment of the St. John Clearing House a year ago, which in the past nine months gave clearings amounting to $22,822,956, makes the total for 1897, $800,856,143. The clearings in the past two years have been distributed among the different cities as follows:

BANK CLEARINGS FOR NINE MONTHS.

Cities.	1897.	1896.
Montreal	$426,176,170	$377,609,794
Toronto	255,822,060	250,483,285
Winnipeg	47,808,694	40,928,846
Halifax	46,641,929	45,238,348
Hamilton	24,407,290	24,714,033
St. John, N.B.	22,822,956	....
Total	$800,856,143	$738,974,306

Montreal has long been the financial and commercial metropolis of the Dominion, and appears to be steadily strengthening its position. In the first nine months of 1896 the bank clearings at Montreal formed 51.9 per cent. of the aggregate, while in the past nine months they were 53.2 per cent. of the total clearings. The improved business conditions in Manitoba and the North-West are shown, in part, by the fact that Winnipeg has made the greatest relative increase in clearings, having gained 16.8 per cent. over the same period of the previous year. Montreal stands next in the matter of increase, with a gain of 12.8 per cent. The Halifax clearings are 3.1 per cent. greater than those of the corresponding nine months in 1896, while Toronto gained 2.1 per cent., and Hamilton 1.2 per cent. in the same period. Although the gain in the case of some of the cities has been small, the comparison of the results in the two years is, on the whole, very satisfactory. There is every reason to look for a continuation of the good trade movement, and even a more favorable showing at the close of this year.

MARINE CASUALTIES.

One wonders whether the ratio of accidents at sea is increasing faster than the ratio of increased shipbuilding, when he reads the report of Lloyds' on the marine losses of the last quarter. This shows an uncommonly large number of losses of ships. The three months' losses amount to 254 vessels of 212,094 tons, whilst the quarterly average of the preceding year was only 177,000 tons. The number of vessels broken up and condemned is less than usual, which still further increases the proportion of vessels lost through accident. Coming to the melancholy heading "Missing Ships," we note that there are twenty-nine vessels of 29,550 tons, against last year's quarterly average of seventeen vessels of 13,000 tons. Out of the total of 254 lost ships, 123 were wrecked. Of the others, eleven were lost in collision, seven were burnt, and thirty-one were abandoned at sea. Although two-thirds of the losses were sailing ships, these did not represent half the tonnage, and of the wrecked vessels two-thirds of the tonnage was steam.

A consideration of the fact last mentioned causes the remark by the London *Spectator*, that it indicates that a number of steamers are weak in the engine-room, a thing specially the case with what are popularly known as "tramp" steamers. There is another reason to be found, doubtless, for the late unusual loss, and that is in cargo shifting and in deck loads. In spite of all that legislation has done, says that journal, it is certain that there is only too much room for reform in the inner details of the working of a large percentage of our mercantile marine, namely, that which secures heavy insurances. "The writer of these lines has seen vessels come in with decks loaded in the most disgraceful manner, and much worse, from an insurance point of view, are the things that cannot be seen."

The whole system is one that calls for remedy and reform, but the difficulty of the task is acknowledged. Who shall say what the proper complement of men is for the engine-room? It is exceedingly difficult work to determine what is the proper complement for the engine-room. Who is to ensure the observance of regulations on shipboard, supposing underwriters to frame them? Still, while so much loss occurs as these quarterly returns indicate, the *Spectator* thinks it well to agitate the subject, so as to instil wholesome fear into people who remain pretty safe, though sailors may drown and marine offices have an extraordinary run of ill-luck.

TORONTO TRADE FIGURES.

Exports at Toronto last month were smaller than in September, 1896, but imports larger, both of dutiable and free goods. The figures were: Total imports last month, $1,962,638; exports, $342,702; aggregate foreign trade, $2,305,340. For the previous September imports were $1,704,943; exports, $411,684; aggregate, $2,116,627. The principal items of dutiable import were these:

DUTIABLE IMPORTS.

	Sept., 1897.	Sept., 1896.
Cotton, manufactures of	$90,079	$ 90,433
Fancy goods, laces, etc.	67,312	47,239
Hats, caps and bonnets	49,497	43,341
Silk, and manufactures of	107,429	49,734
Woolen manufactures	263,500	247,648
Total dry goods	$577,817	$478,395
Brass and manufactures of	$ 8,892	$ 7,576
Copper "	342	329
Iron and steel "	119,604	91,842
Lead "	8,349	989
Metals, and composition	17,574	6,901
Total metal goods	$154,761	$107,637
Books and pamphlets	45,584	45,257
Bicycles	$9,226	9,607
Coal, bituminous	9,203	25,054
" anthracite (free)	117,906	136,754
Drugs and medicines	20,802	17,345
Earthen, stone and chinaware	24,514	18,161
Fruit, all kinds, and nuts	14,370	11,714
Glass and glassware	24,693	23,756
Jewelryand watches	33,598	25,883
Leather and manufactures of	19,409	19,253
Musical instruments	10,331	9,983
Oils, paints and colors	14,726	18,296
Paper and manufactures of	41,582	29,377
Spirits and wines	6,850	7,250
Wood and manufactures of	9,234	13,196

The principal items among free imports last month were: Hard coal, $117,906; hides and skins, $106,467; steel rails, $117,913; crude India rubber, $15,551; dyes and chemicals, $23,917; tea, $50,621; coffee, $12,636; wool, jute cloth, cotton, broom, corn and settler's effects.

EXPORTS, PRODUCE OF CANADA.

Produce ot	Sept., 1897.	Sept., 1896.
The Mine	$ 55	$ 51
" Fisheries	95	90
" Forest	6,356	46,389
" Field	22,364	65,505
Animals, etc.	195,843	185,487
Manufactures	77,301	85,693
Total	$302,014	$383,215

FOREST RESERVES.

Large areas of land covered with wood of excellent mercantile value belong to the Federal Government in Western Canada. An inspector has recently been sent to this district to report upon the practicability of devising regulations that will best preserve these forests. The aim of the Government is to maintain permanent timber reserves. The policy advised is to withdraw the heavy timber belts from settlement, to preserve the young growing trees, and to foster a growth for the future. With this end in view, it is stated that guardians will be immediately appointed to protect the reserves, particularly at Moose and Turtle mountains, from fire, and to prevent the cutting of the young trees by the settlers, but who will be allowed to take the matured, the dead and fallen trees. It is the purpose to expend money to lay out a proper fire guard, a considerable sum having been appropriated last session for this purpose. On the tops of these reserves are numerous small lakes. These will all be connected with wide roads, which when completed, will form a complete barrier to the progress of a fire. The open space and the lakes should effectually prevent any further ravages and act as a reliable fire break.

PAPER-MAKING IN BRITISH COLUMBIA.

There is in British Columbia an abundance of material for pulp and paper-making, which, when exploited, should give excellent results. A company has recently been registered in England under the name of the British Columbia Wood Pulp and Paper Co., Limited, with a nominal capital of £65,000, divided into 35,000 7 per cent. preference shares of £1 each, and 30,000 ordinary shares of £1 each. This company proposes to acquire the works of a small paper mill established some years ago at Alberni, on the Somass River, in the Pacific Province, This mill was erected to convert rags into paper, and as material was scarce and expensive, the venture was not overly profitable. That the new company intends to supply the local market with paper is not the most interesting feature of its plans. An expert who has been looking over the ground, points out that "there exists in China and Japan a good demand for wood pulp, which, owing to the absence of suitable wood, these countries are unable to manufacture. British Columbia could supply the markets of these countries with pulp and paper as profitably as any country in the world." It is the opinion of the same authority, according to the *British and Colonial Stationer and Printer*, that British Columbian mechanical woodpulp can be produced at 22s. per ton, or that British Columbian sulphite will cost only £4 per ton. If this estimate be correct, paper-making in British Columbia should be a profitable industry.

MOLSONS BANK.

The meeting of proprietors of this bank, which took place in Montreal on Monday last, was the forty-second annual event of the kind. It had to consider a report for the current year, the tenor of which could scarcely have disappointed the expectations of a reasonable business man. And the conclusion was foregone that the report should be adopted, as was done. This bank, whose paid capital is $2,000,000, has now a rest of $1,500,000, built up out of long-continued earnings, the addition for the current year being $100,000. Its deposits exceed ten millions, and its circulation is almost up to the legal limit. The stockholders have reason to congratulate themselves on receiving a dividend and bonus equal to nine per cent. on their shares, and the conditions shown by the present statement may encourage them to hope for like returns hereafter.

We observe that the bank has concluded to open a branch in the City of Quebec, and has secured suitable premises for the purpose, which are to be occupied this autumn. The Molsons has already more than twenty branches in Ontario and Quebec and the North-West, and there is a certain appropriateness in its opening in the ancient capital. We have already referred to the choice, some months ago, of Mr. W. Molson Macpherson, as president of the bank, in succession to the late J. H. R. Molson. The new president in his address referred to the hasty and ill-considered action of depositors in the City and District Savings Bank in practically creating a run, by withdrawing deposits on false and trivial pretexts. This, he contended, showed the necessity of banks holding large available reserves, in case of any such untoward though unjustifiable movement.

LONDON AND CANADIAN LOAN AND AGENCY COMPANY, LIMITED.

This company has had a fairly satisfactory year's business, and shows a slight improvement in the outcome of it, as compared with the previous twelve months. The directors' report, too, partakes of the more buoyant tone which now pervades Canadian real estate circles. Money has been coming in well this year, in their experience, and they have been able to dispose of a number of properties which lay upon their hands, as well as to have offers for others, which they do not care to accept.

Following the considerable decrease effected in the obligations of the company last year, a further reduction has been made by the payment of $746,155 in debentures and certificates, while those issued and renewed were $736,447 in amount. It is clear that the company was not eager for new business, for it accepted only 30 per cent. of the loans offered it. We observe that, owing to the continued illness of Sir Casimir Gzowski, he has vacated the presidency, and Mr. G. R. R. Cockburn has been elected to succeed him.

GRAND TRUNK AND CENTRAL VERMONT.

Control of the Central Vermont Railway has been secured by the Grand Trunk Railway of Canada, which has long had intimate traffic relations with the former road. An adjourned meeting of the first mortgage bondholders of the Central Vermont was held in Boston on Tuesday last, to take action on a reorganization plan submitted by the committee appointed for that purpose a year and a-half ago. Thomas Hill presided, and 150 were present. It was stated that the physical condition of the road required an outlay of $1,000,000. The bondholders' committee reported negotiations with the C.P.R. and other roads. The main point at issue was whether the bondholders would agree to accept 85 per cent. of their present holdings of 5 per cent. bonds in new fours, the interest on the same to be guaranteed by the G.T.R. under a traffic contract, whereby the Grand Trunk agrees that if the net income of the new company will not pay interest on the first mortgage bonds and series "A" bonds, it will make good the deficiency, provided it is not required to pay more than 30 per cent. of the gross receipts from traffic interchanged with the new company. On a motion that the propositions of the bondholders' committee be accepted and authority given for the carrying out of the agreement, the vote stood $2,771,400 in favor, $676,800 against. As a two thirds vote governs, the plan was accepted.

A SUGAR SELLING ARRANGEMENT.

No commodity has given merchants more trouble and annoyance than sugar. Wholesale merchants have invested large sums of money in refined sugars, and are put to great expense in distributing them over the country, receiving anything but adequate returns for their expenditure and labor. For years Canadian wholesale merchants have attempted to agree in some arrangement by which the severity of competition would be diminished. Some years ago an agreement was made between the refiners and the wholesale merchants, by which the former refused to sell sugars to those who did not adhere to a uniform price list. This arrangement was broken down by the action of several prominent firms in withdrawing from the Guild. Since this time the wholesale merchants of different cities have united in limited price regulations. As our readers are aware the wholesale grocers of Toronto have for some time sold sugar in Toronto at uniform rates. It was found impossible to extend the uniformity in values beyond the city limits, because of the competition of the wholesale merchants of Hamilton, Kingston, and other competing trade centres This naturally resulted, as we have before pointed out, in a very unfair discrimination against the Toronto retailers.

Efforts have been made recently to secure an arrangement which would result in an equalization of prices based upon refiners' quotations and freight rates. The refiners have been asked to co-operate with the wholesale merchants in this undertaking. It is understood that they have hesitated in making any arrangement with the trade, possibly deterred by the legislation passed at the recent session of Parliament, which gives the Governor in Council power to place any "article on the free list, or so reduce the duty on it as to give to the public the benefit of reaonable competition," when such article has become subject to a combination to unduly enhance its price.

The announcement is made this week that in future the wholesale trade will be allowed a discount of 2½ per cent. on all purchases up to 250 barrels, and on all lots ranging from 250 barrels and over, the discount will be 3½ per cent. cash in fourteen days. At the same time it is announced that the wholesale houses have arrived at an understanding to sell sugars at uniform price lists. Whether the two arrangements are parts of one agreement is not yet plain. This much, however is certain, that without the support of the refiners, no arrangement can be successful. The wholesale merchants are quoting granulated sugars at 4 5-16. and yellow at 3 9-16 cents per pound in Toronto, which is a very small margin above refiners' prices. The scheme is too new, and its details too imperfectly known to justify any opinion as to its probable effect upon the interests of the trade and the public.

MARKETING WHEAT.

The wheat harvest of 1897 is being marketed more rapidly than is usual. The farmers of Manitoba, in the absence of farm granaries, have not the same opportunities of holding grain that the Ontario farmers possess, nor are their energies taxed in the same way with root crops and fall sowing in the early autumn. As a rule early in offering their grain to the merchants, with exceptionally favorable harvest weather and the attraction of high prices, the farmers of Manitoba and the Territories have this year exceeded their past records in this connection. It is estimated that about one-third of the Manitoba wheat crop of 1897 has already been marketed. Between 3,500,000 and 4,000,000 bushels of wheat are stored in interior elevators at various country points, nearly 1,250,000 bushels are in the Fort William elevators, and an equal quantity has been shipped east from that port since the movement of new grain began, making a total of about 6,000,000 bushels that have been marketed by the western farmers. The shipments to the Fort William elevators are averaging about 100,000 bushels a day. The wheat crop of Ontario is coming from primary hands more slowly; merchants estimate that deliveries to date amount to between 15 and 20 per cent. of the total yield. The quality of the first offerings was very inferior, and was a disappointment to merchants. But later offerings have shown a steady improvement. From the other Provinces, reports are received that wheat crop deliveries are in excess of the usual quantity offered at this season of the year.

—A branch of the Bank of Ottawa will be opened about November 1st in the new Temple Building on Bay street, Toronto. The manager will be, we understand, Mr. R. Blaikie Kessen, formerly accountant at the Winnipeg branch of the same bank.

THE CHEESE MARKETS.

The season is drawing to a close. A number of the cheese boards are discussing the advisability of closing down, as the factorymen have in a number of instances contracted for the balance of the season's make. Shippers are not encouraging dairymen to continue their cheese operations, as in past seasons the cold weather setting in has made it difficult to cure October, November and December cheese with success. Canada can afford to export no cheese that is not of first quality Energies ought then to be turned to the manufacture of creamery butter, which should offer a profitable field for the winter's work. In the past week we have had reports of 14 board meetings, at which 40,411 boxes of cheese were offered, as compared with 56,853 boxes boarded at 20 meetings last week. The shipments from Montreal for the week ending Oct. 9th were 60,739 boxes, as against 115,813 boxes the corresponding week last year. Shipments to date are 1,556,208 boxes, against 1,284,033 boxes to date a year ago. We append our usual table of transactions:

Boards.	Date of meeting.	No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price. Cts.	Date of next meeting.
Brockville	Oct. 7	..	3,181	....	$8\frac{3}{4}$-$9\frac{1}{4}$	......

DRESSING SHOP WINDOWS.

There are some merchants in Canada who make the most of their shop windows as a means of bringing trade, but the number of such merchants is limited. Anyone who has had the opportunity of inspecting shop windows in the United States, Great Britain, or the Continent, must have realized that Canadian merchants—with a few worthy exceptions—do not make the most of their opportunities in this respect. Comparing the English and French plans of dressing windows, the *Drapery World* says:

"In Paris the main object appears always to be to make everything perfectly clear and distinct by treating the window in as simple a manner as possible, sometimes even very nearly approaching severity. A point is made of some special article which forms, so to say, the 'motive' of the display, and it is laid out in a sort of design, rather sparsely perhaps than otherwise, but with a general effect which is decidedly both striking and attractive. One very rarely sees a window so full of goods in Paris as one is accustomed to in London, and yet the tone and character of the business are fully expressed in what there is, and the quality and finish of the goods well represented—although by a judicious choice of articles and taste in the arrangement of them, it is intended to just leave enough to the imagination to stimulate curiosity instead of satisfying it."

Canadian merchants are too apt to follow the English tradesman's fault of over-crowding the windows without the partial redeeming feature of skill in arrangement. The aim of the window-dresser should be to assist the may-be purchaser, and not to bewilder him with a mass of materials and variety of patterns. Many other suggestions might with advantage be made as to the window-dresser's art, if newspaper paragraphs did not, like store windows, lose force by over-crowding.

FOR GROCERS AND PROVISION DEALERS.

According to cables, Naples walnuts, new crop, are offered for shipment at 42s. 6d.

New Orleans advices reported that grinding would be started on several plantations this and next week.

The stock of raw sugar in the four ports of the United Kingdom is 65,000 tons, against 137,000 tons this date last year.

This week will be a big one in the history of Manitoba and Northwest cattle trade. Sunday, Tuesday, and Wednesday's shipments of Gordon & Ironside will total 2,500; Mullins & Wilson sent out yesterday a train of fifteen cars, gathered at Moose Mountain and Carmen; Senator Cochrane's shipment of a train load went out yesterday from the local yards, the cattle being from near Lethbridge; McMillan's train load was collected from Pincher Creek. Mr. H. A. Mullins reports cattle in splendid condition.—*Winnipeg Free Press, Oct. 6th.*

Dry weather in Argentine is reported and rains, it is said, will not save the crop. The *Corn Trade News* reduces its estimate from 80 to 40 million bushels, and some cables say, it is doubtful if there will be any surplus for export. This report is subject to confirmation.

A Caribou, Maine, merchant arranged a mirror in his store recently for the purpose of apprehending those who were wont to steal from his counters. It worked to a charm, and the small thieves regard him with awe as the man who can see out of the back of his head.—*N. E. Grocer.*

Cables received from Smyrna state that recent rains have seriously interfered with the curing of the crop of figs. One report states that the output will not exceed 65,000 loads, and others state that the production may fall below that of last year.—*N.Y. Journal and Bulletin of Commerce.*

Mr. C. E. Henry, the well-known apple buyer, says the Sarnia *Observer*, has purchased and will ship about 1,000 barrels this season. He estimates the crop of sound apples, fit for shipment, within a radius of fifteen miles about Tilsonburg, to be about 3,000 barrels. The average price is $1.75.

Montreal advices report the arrival at that port of the Mediterranean steamer "Avlona" with currants and Valencia raisins, while the "Bellona," the second direct ship, is expected from Patras and Denia by the 30th inst. The quotations for new dried fruit, given in our Montreal market report, will be found of interest.

The rice harvests in the Southern States, according to the *Planter's Journal*, is now progressing without interruption, and while some fields of Providence rice were ruined by the drouth, the bulk of the crop is giving fair yield, and the increased price is more than making amends for that which failed. Hereafter rice culture will be second only to cane growing in South Louisiana.

FOR DRY GOODS MERCHANTS.

Among the fashionable combinations are scarlet and bright blue, black and white, mauve and yellow, orange and gray, pink and green, turquoise and pale pink.—*D. G. Economist.*

Narrow satin and taffeta ribbon used for braiding and the innumerable rows of velvet ribbon put on gowns, silk waists, and girls' frocks, keep the trimming qualities of ribbon prominently to the fore.

Advices from Barnsley say of the linen market that manufacturers report little improvement. A slightly better tone is apparent in the home market, and buyers operate more freely. Light household linens in all qualities move freely, and towellings are in fair demand. Table linens in the lower-price lines sell fairly well, but good quality damask and handloom cloths are very dull. Bed linens meet a steady sale Coarse fabrics, drabbets and smock goods fully maintain their position. Demand for the United States is very limited, and for South America there is no more doing in fine drills and cloths.

Fourteen girls employed in the spinning room of the cotton mill [at St. Stephen, N.B.] went out on strike against a reduction in their wages amounting to six cents per day, and placing their pay at seventy-eight cents per day. So far the other departments are not affected, but should the strikers remain out a week longer, it may cause half the mill to shut down. The manager hopes to overcome such a condition by securing yarn from other mills should the strike continue. He states that the reduction is made to make wages correspond with those paid in other factories. The mill has excellent prospects for continuing work with a full crew all winter, notwithstanding reports that have been published to the effect that it was about to shut down.—*St. Croix Courier.*

President G. C. Hopkins, of the New York Cotton Exchange, has advices from 200 correspondents in the cotton States in regard to the condition and prospect for the growing crop. The reports as a rule indicate that there will be no top crop, except to a limited extent in some bottom or clay lands. President Hopkins says that he sees nothing at present to warrant an immediate improvement in values, but should the crop prove as moderate as indicated by his returns, cotton during the season should sell considerably higher. The reports do not indicate a crop of over 9,500,000 bales at the outside. The conditions this year are almost the reverse of last season. Last year, after a very hot and dry spell, beneficial rains fell about the 20th to the 25th of August, which enabled cotton to take on fruit, and with a favorable autumn, turned a disastrous outlook into a fairly average yield. This season the hot and dry weather commenced early in August, after an unusual amount of rain. The hot weather and the serious drouth lasted until about the middle of September, the rain coming nearly a month later than last year, and for this reason their advices report that there is no possibility of a top crop except in a few localities on the bottom and clay lands.

THE FORESTRY QUESTION.

There are evidences that the importance of doing something to conserve our forest wealth is making itself felt among Canadians. And more, the influence exerted upon climate and the fertility of large portions of a country by denudation of forests is obtaining entrance to the minds of many more than the few observant men and students of the subject, who have long ago tried to secure attention to it.

In the October issue of the *Canadian Bankers' Association Journal* is a paper on "The Forestry Question in North America," by Mr. John Bertram, which gives some interesting information as to the manner in which the forestry question is being studied in other countries. Germany, as we know, has long possessed a school of forestry, and has devoted money and labor to afforestation for a long number of years, with the result that now great revenue is derived from the timber so planted. France, too, has an ancient school of forestry. And the United States have appointed commissions of enquiry into the subject and are about to acquire areas of burnt-over land for afforesting purposes.

Canada, like the United States, has long been wasteful of her timber and careless as to the future of her forest wealth. "In the early history of the country, trees were looked upon by the settler as an encumbrance." But now, "lumbermen are beginning to be concerned about the future supply of logs." Speaking of the beautiful and valuable forests of the southern portion of older Ontario and the Bruce peninsula, once all so thickly wooded, but in which the farmers "waged a strenuous warfare against the trees," Mr. Bertram says:

"Mr. Thos. Southworth, Clerk of Forestry for Ontario, in his second valuable report issued this year, gives some instructive statistics as to the proportion of woodland to total acreage in the old settled counties, and dwells upon the fact that the farmers have not hitherto shown a proper appreciation of the desirability of replanting. In the County of Middlesex, in the western district, the total acreage is 757,522, with 153,825 reported as woodland, or 20.3 per cent.; the county of York, in the central district, comprises 536,621 acres, with 38,040 woodland, or 7.1 per cent.; in the east, Frontenac has 673,561 acres, with 81,662 woodland. or 12.1 per cent. The percentage of woodland in France is 17, in Germany 26, Spain 7, Holland 7, British Isles 4. . . According to a return laid before the Provincial Assembly in 1893, Ontario had under license to lumbermen 21,000 square miles of pine lands, and 24,410 square miles of such lands estimated as unsold, this being exclusive of 89,000 square miles north of the height of land, which has little pine, but a large quantity of spruce. In this great area under license, as the timber is cut some of the land passes into the hands of settlers, but a large proportion is not fit for settlement, and it has suffered the fate of being burnt over, leaving an unsightly wilderness of dead trees and charred stumps."

"If the average lumberman were asked," we quote again from this interesting paper, "what should be done with this area of rocky and broken land after fire had passed over it, his answer would probably be that it is useless. On these lands a crop of young poplar, birch, and other deciduous trees, useless for the lumberman, immediately springs up, but closer investigation shows that after the poplar, etc., has covered the ground, young pine principally, but also spruce and other conifers, appear, and having the shade afforded by the previous growth and also the open air, the exact conditions for reproducing a valuable pine forest are fulfilled. There commences then a struggle for existence amongst the new growth which can only end in one way: by the conifers, in such favorable circumstances, asserting their superiority, and finally killing out the growth which sheltered their young life and provided the conditions under which they could grow into valuable forest trees. In districts where the fire has been kept away, pine forests in all stages of growth can be seen, a perfect object lesson to any student of forestry. To preserve this young pine a strict system of fire protection is necessary, and it is here that the wisdom and foresight of the Ontario Government has shown itself. A system of fire ranging has been established, which only requires to be enlarged and brought under strict discipline to be perfectly effective."

THE SHARE MARKET.

The stock markets at the beginning of the week were fairly active, both in Montreal and Toronto, with a firmer tendency. On Monday, for example, some of the leading stocks were considerably in demand and showed decided strength. Canadian Pacific and Montreal Street Railway were both higher than the previous Saturday and closed at the advance. Some sales of Dominion Coal bonds were made at 103, and the preferred stock at 102¾, going to 104½ on Wednesday. Royal Electric, Colored Cotton, and Richelieu were all asked for and obtained at steady prices. Heat and light bonds sold at 85; Montreal Telegraph brought 175 on Wednesday in Montreal. In Toronto the cheerfulness of tone was disturbed on Thursday by the lowered London markets, cause, an advance in the Bank of England rate. New York advices, too, showed that prices of securities were unsettled there; what with a mayoralty election coming on, and a yellow fever scare in progress, the bears have the best of it. Bank shares were quiet yesterday in Toronto, only few transactions in loan company shares, and a fair number in Pacifics, Montreal Gas, Cable, and War Eagle mine.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Oct. 14th, 1897, compared with those of the previous week:

CLEARINGS.	Oct. 14.	Oct. 7.
Montreal	$14,259,128	$14,601,837
Toronto	8,887,831	9,052,107
Halifax	1,305,226	1,442,966
Winnipeg	3,005,830	3,116,663
Hamilton	703,888	818,060
St. John	573,868	627,216
	$28,735,771	$29,658,849

Aggregate balances this week, $4,513,667; last week, $5,104,174.

—At last the receipts of Canadian wood at British ports, which were so long plenteous, and in excess of the demand, have begun to decline. A Liverpool timber circular of 1st October, shows that only 40 vessels of 45,000 tons arrived last month at that port, whereas 43 vessels of 46,000 tons arrived in the previous October. But the Liverpool timber and lumber arrivals of the year 1897 from Canada thus far have been 459,000 tons, against 410,000 and 316,000 tons respectively to like date in 1896 and 1895. Deliveries of timber at Old Country ports are affected by the federated engineers' strike. Stocks have accumulated until they are too heavy, and prices have with difficulty been maintained. However, say Farnworth & Jardine, with the exception of spruce, the price of which declined all month, there has not yet been much decline in value. There is too much birch, too much spruce, and too much pitch pine in Liverpool; the stock of pine boards, too, is excessive, and oak is over-abundant.

—It is the opinion of London *Money* that the Grand Trunk four per cent. debentures are worth holding or buying for a further improvement towards 107 to 108, and that any investor whose bank will assist him in the matter should be able to make sure of a decent profit on £2,000 or £3,000 stock. Seeing the absolute dearth of 4 per cent. investments, and having regard to the fact that scores of Home Railway ordinary stocks only return a yield of 3⅛ to 3⅝ per cent. at current prices, a debenture paying 4 per cent. (quarterly) of a company in which upwards of twenty millions has been sunk in ordinary stock, ought to be in favor at anything below par. Grand Trunk four per cent. debenture stock is certainly as secure as East and West India Dock 4 per cents., which stand now at 110. "It has never defaulted, while the great recovery in the guaranteed and the first preference shares to 66½ and 48½ shows that something satisfactory is expected at the meeting."

—Writing of American railway methods, and the declining confidence of British investors in the shares of such roads, the *Economist* says, that while "there are very many honorable exceptions, the methods of railway management and book-keeping are frequently so discreditable that the strong disinclination of British investors to again interest themselves as shareholders in American railroad undertakings is at once intelligible and praiseworthy. It will be quite time enough to reconsider their attitude when the reality and permanence of the industrial revival can be properly tested, and when it can be shown that the dubious practices indulged in by so many of the controlling 'bosses' in the past, have been replaced by healthier and more reputable conditions."

—The handsome premises in the Canada Life building on King street, Toronto, will be occupied, probably by the close of the month, by a branch of the Bank of Nova Scotia. It will be in charge of Mr. J. Pitblado recently manager of the branch of the same bank at Charlottetown, Prince Edward Island.

Meetings.

MOLSONS BANK.

The forty-second annual general meeting of the shareholders of the Molsons Bank was held in the board-room of that institution in Montreal at 3 o'clock on Monday, 11th October. The president, Mr. W. M. Macpherson (Quebec), occupied the chair, and among those present were Messrs. S. H. Ewing, vice-president; J. P. Cleghorn, W. M. Ramsay, Henry Archbald, S. Finley, H. Markland Molson, directors; Thomas Kirby, J. Try-Davies, James Wilson, R. W. Shepherd, George Durnford, John Crawford, John Molson, Fred. Molson, David Crawford, and C. E. Gudewill.

The president having called the meeting to order, requested Mr. James Elliott, the local manager, to act as secretary, and after that gentleman had read the advertisement convening the meeting, the president named Messrs. David Crawford and J. Try-Davies to act as scrutineers.

The general manager, Mr. F. Wolferstan Thomas, then read the annual report of the directors, as follows:

REPORT.

Since we last met you it has been our misfortune to have suffered by death the deprivation of the services of our president, the late Mr. John H. R. Molson. Eulogy of him is hardly necessary, as he had long held a prominent place in public estimation. A man of scrupulous integrity, conservative in his dealings, deliberate and sagacious in formation of an opinion, resolute and fearless in its execution. As a benefactor, he will be greatly missed. His generosity in aiding works of benevolence and education have been conspicuous in a liberal age.

"The directors of the Molsons Bank beg to submit to the shareholders the forty-second annual report of the bank for the year ending 30th September.

"The net earnings of the year, after making ample provision for bad and doubtful debts, amount to $259,177.51, which have been distributed by two semi-annual dividends of 4 per cent. each and a bonus of 1 per cent., making $180,000 in all.

"The surplus left of $79,177.51, together with the balance of $62,652.17, carried over from last year, making altogether the sum of $141,829.68, was distributed as follows: $100,000 carried to the rest, bringing that account up to $1,500,000. $15,000 was applied on banking premises recently acquired, and $26,829.68 remains at credit of profit and loss account to be carried forward to next year.

"The branches of the bank have all been inspected once or oftener during the year, and we are pleased to be able to say that the staff, as a whole, continues to work faithfully, and with every desire to forward the welfare of the bank.

"We have experienced for some years the want of a branch in the city of Quebec, and this year a suitable property was secured at a very moderate price. Alterations in the building are now being made, and we hope to be open for business this fall.

"The vacancy on the board has been filled by the late president's nephew, Mr. H. Markland Molson, who has enjoyed a long experience in practical banking, which cannot fail to be of service on the board."

GENERAL STATEMENT OF THE AFFAIRS OF THE MOLSONS BANK ON THE 30TH SEPTEMBER, 1897:

Liabilities.

Capital paid up............		$ 2,000,000 00
Rest account ..	$ 1,500,000 00	
Rebate in full on notes discounted.	80,000 00	
Profit and loss account	26,829 68	
84th dividend..	80,000 00	
Bonus of one p.c. to shareholders... ..	20,000 00	
Dividends unclaimed.	870 00	
		1,707,699 68
Interest, exchange, etc., reserved ....$	127,415 28

Bills past due (estimated loss provided for)...... ..	96,511 12	
Real estate other than bank premises..	70,835 84	
Mortgages on real estate sold by the bank..	2,014 55	
Bank premises at head office and branches	190,000 00	
Other assets ..	25,571 19	
		11,379,195 77
		$16,694,978 08

PROFIT AND LOSS ACCOUNT.

Balance at credit of profit and loss account, 30th Sept., 1896..		$ 62,652 17
Net profits for the year, after deducting expenses of management, reservation for interest, accrued on deposits, exchange, and provision for bad and doubtful debts		259,177 51
		$321,829 68
Appropriated as follows:		
83rd dividend at rate of 8 per cent. per annum, 1st April, 1897....	$ 80,000 00	
84th dividend at rate of 8 per cent. per annum, 1st October, 1897..	80,000 00	
1 per cent. bonus, 1st October, 1897	20,000 00	
Rest account..	100,000 00	
Applied on bank premises recently acquired....	15,000 00	
		295,000 00
Leaving at credit of profit and loss account, 30th September, 1897..........		$ 26,829 68

THE PRESIDENT'S ADDRESS.

The president then said: Gentlemen,—You have heard the annual report read by the general manager. I do not know that I can say anything further than that I should like to make a few remarks in reference to the loss of our late president, Mr. John Henry Molson. His loss will continue to be felt, as his high business talents and experience were always of the greatest service to the bank. I am sure we all concur in feelings of the deepest sympathy to Mrs. Molson, in her sorrow. Among the founders of the bank is his name, and he gave it his most valuable advice, and the pride he took in it can well be understood, when he had the satisfaction of seeing it rise to such prominence, with the rest amounting to 75 per cent. of the capital, and the stock quoted in the market at close on 200. You have now heard the annual report, which is one I hope you will consider satisfactory, inasmuch as it enables us to pay an annual dividend of 8 per cent., and a bonus of 1 per cent. We have also increased the rest by $100,000, and have carried a substantial amount to the credit of profit and loss. To the general manager and the staff of the bank are due the pleasing results of the year's work. The year has been one of anxiety to banks generally, as owing to the depression of trade, caused largely by the tariff changes, not only in Canada, but in the United States, it has been found very difficult to keep the funds of the bank fully occupied; but the indications are that better times are before us. The crops of the country have been most plentiful, and our exports have been exceedingly heavy, with every likelihood of continuance. The extraordinary action of a large number of depositors in the City and District Savings Bank, in withdrawing their deposits, practically creating a run on that bank, without the slightest cause, shows the necessity of banks holding large available securities. You will observe that we are carrying very full reserves this year, larger, in fact, than we have ever had before. I have no doubt the run on the City and District Savings Bank has practically ceased, for, as I have said, there was no cause for it. I beg to move, seconded by the vice-president, Mr. S. H. Ewing, the adoption of the report. We shall be very pleased to answer any questions that the shareholders may ask.

THE DISCUSSION.

Mr. John Crawford, on behalf of the shareholders, tendered congratulations to Mr. W. M. Macpherson on his election to the honorable and responsible position of president of the Molsons Bank and he also thanked the directors for their judicious election of Mr. H. Markland Molson to the board. The eulogium passed upon the character of the late president, Mr. John H. R. Molson, was all that could be desired. At all times the deceased gentleman had it uppermost in his mind to place the bank in a position that it should be invulnerable or impregnable, to outside attacks. Mr. Crawford then went on to remark that the report and the financial statement spoke for themselves. There could be no two opinions as to the satisfactory conclusion of the year's transactions.

The president replied to a number of Mr. Crawford's remarks and enquiries.

Mr. S. H. Ewing seconded the motion for the adoption of the report, which was unanimously concurred in.

Mr. John Crawford then moved: "That the thanks of the shareholders are due, and are hereby tendered, to the president, vice-president, and directors of the bank for their attention to its interests during the year just closed." And in doing so he complimented the general manager and the staff on their loyal services.

Mr. James Wilson heartily seconded the motion, endorsing what Mr. Crawford had said respecting the general manager.

The resolution was unanimously carried.

The president and Mr. S. H. Ewing responded to the vote of thanks, after which the general manager briefly remarked that himself and staff were paid for their services, and in discharging them they did their duty to the best of their ability. They, therefore, did not require thanks; but they would like that when the shareholders talked with their friends in public, they would talk well of them; that would be sufficient thanks.

The scrutineers then reported that the old board of directors had been re-elected, viz., Messrs. Henry Archbald, J. P. Cleghorn, S. H. Ewing, S. Finley, W. M. Macpherson, H. Markland Molson, and W. M. Ramsay.

At a subsequent meeting of the directors, Mr. W. M. Macpherson was re-elected president, and Mr. S. H. Ewing, vice-president.

LONDON AND CANADIAN LOAN & AGENCY CO., LIMITED.

The twenty-fourth annual meeting of the above company was held at the company's offices, 103 Bay street, on Wednesday, 13th inst., at 12 o'clock noon.

There were present, among others: Mr. George R. R. Cockburn, vice-president; Sir W. P. Howland, Dr. Larratt W. Smith, Rev. Dr. Moffatt, Dr. R. D. Moffatt, Rev. Dr. Warden, and Messrs. Thos. Long, Donald Mackay, James Henderson, David Higgins, William Gordon, C. C. Baines, C. S. Gzowski, jr.; John Aitken, H. L. Hime, F. Arnoldi, Q.C.; L. R. Wood, and A. J. Somerville.

In the absence, through illness, of the president (Sir Casimir S. Gwowski), the vice-president occupied the chair. Mr. J. F. Kirk acted as secretary of the meeting. The annual report was read and adopted, as follows:

REPORT.

Your directors beg to submit the twenty-fourth annual report of the company, and accounts for the year ending 31st August, 1897.

Applications for loans were received during the year to the amount of $1,145,962 on properties estimated as worth $2,300,732, and loans were approved and effected to the extent of $337,595 on property valued by the company's own appraisers at $683,652.

During the year debentures and certificates have been issued and renewed amounting to	$736,447 22
While the amount of debentures and certificates paid off was	746,155 77
Making a reduction in liabilities of the company of	9,708 55

Your directors have carefully scrutinized all applications for loans, rejecting all but the safest business.

The rate of interest obtainable on first-class mortgage securities shows a gradual decrease, and as loans mature, or as borrowers exercise their privilege of paying off mortgages, it has been found necessary, in order to retain desirable loans, to renew at a lower rate of interest. On the other hand, the rate paid by the company for borrowed money also shows a decrease.

The farmers in Ontario have had good crops this season, and prices for all farm products are greatly improved since last year. The good wheat crop in Manitoba, and the high price being obtained therefor, are having on all agricultural and mercantile interests an encouraging effect, in which this company's business will fully participate. The payments on mortgages, both in Ontario and Manitoba, since last report, continue to be satisfactory.

Special efforts have been made by your directors during the year to dispose of property that has been brought to sale through default in payment of mortgages. Although it was found, during a great portion of the year, very difficult to effect sales, still a considerable quantity of property has been sold at fair prices, and there is unmistakable evidence of a great improvement in the demand since last harvest. Your directors hope to obtain even more satisfactory results during the coming year.

C. S. Gzowski,
Toronto, Oct. 5th, 1897. President.

AUDITORS' CERTIFICATE.

To the President and Directors of the London and Canadian Loan and Agency Company, Limited:

Gentlemen,—We have completed the audit of the books and accounts of the company for the year ending 31st August, 1897.

We have also examined the mortgages and debentures, and other securities or loans, together with the various statements thereof, and find that they agree with their respective entries in the ledger, and we hereby certify to the correctness of the accompanying statements of "Assets and Liabilities," and "Revenue Account," for the past financial year. We are, gentlemen, yours faithfully,

J. J. Woodhouse,
David Higgins,
Auditors.

Toronto, Oct. 6th, 1897.

Assets.

Loans on mortgages and interest	$3,540,481 48
Properties Account—	
Company's offices and buildings in Toronto	75,000 00
Company's offices and buildings in Winnipeg	45,000 00
Other real estate vested in the company	35,381 67

		$ 4,190 45
Net interest, etc., received and accrued to 31st August, 1897		205,410 07
1896.		
August 31st—By balance carried to next year		$ 6,926 53

J. F. Kirk, Manager.

The following directors were declared elected: Col. Sir Casimir S. Gzowski, Mr. G. R. R. Cockburn, Sir W. P. Howland, Mr. Donald Mackay, Lord Strathcona and Mount Royal, Dr. Larratt W. Smith, Mr. James Henderson, Sir Sandford Fleming and Mr. Thomas Long. At a subsequent meeting of the newly-elected board, Mr. George R. R. Cockburn was elected president, and Mr. James Henderson, vice-president.

PRESIDENTIAL ADDRESS AT THE BANKERS' ASSOCIATION.

We present below copious extracts from the important address delivered before the Bankers' Convention at Niagara Falls the other day, by Mr. F. Wolferstan Thomas, general manager of the Molsons Bank, president of the Canadian Bankers' Association, regretting that we have not space for the whole of the lengthy address, which would fill four pages of The Monetary Times.

Prefacing his remarks with an allusion to the comparatively brief period during which the Canadian banking system has attained a development and a successful working which have attracted the admiring attention of other peoples, Mr. Thomas went on to say:

"And now, in reviewing the events of the past year, and commenting on matters of general concern, let me speak as for myself alone, and on my own responsibility, this being the one occasion when the holder of the presidential office is afforded opportunity for so doing. Should I not go so far afield as my predecessors, it will be that events within our own immediate purview conspire to engage a very full attention."

Referring to the financial and commercial outlook a year ago, by reason of the aspect of the silver question in the States, he continued: "The number of small banking concerns in the United States is appalling, and before a currency system shaped in any large degree like our own, adopted in lieu of the present one, can exhibit the necessary elements of safety and flexibility, we foresee that there must be a principle of concentration applied to the banking system of the United States, under which fewer but stronger institutions will supply the financial needs of the country, and be the issuers of the remodelled currency.

RELATIONS WITH THE UNITED STATES.

We have faith in the ultimate adoption of a single standard by our neighbors, and with it a process of gradual redemption of greenbacks and treasury notes, and the replacing of these by a circulation issued by the banks, not the Government, free of any tax, and under safeguards not very different from our own. As bankers we are vitally concerned in the adjustment of questions such as these, and benefited by a rehabilitated trade across the border; but we should be better pleased to witness that trade revive under a tariff, framed more for simple revenue, less for the protection of monopolies, and still less aimed at injuring the export trade of Canada, than the one recently adopted by our neighbors. There is an unfriendliness in the very word retaliation, even in its business sense, which makes me slow to adopt its use in any advice which I may tender from this place. But national self-preservation is a strong and natural instinct, and applied to such questions as how best to deal with hindrances to the export of lumber, coal and cattle, coupled with alien labor restrictions, I am forced to confess a feeling that our Government would follow a perfectly justifiable course in adopting measures to offset by discriminatory tariff legislation, the injury to the particular interests above named.

FORESTRY.

Speaking of our forests, the areas from which we get our exportable timbers are each year decreasing, partly through the ignorance of settlers, who regard every tree as a standing menace to the country's progress, and largely to the destruction caused by forest fires. Whilst population is needful, we cannot close our eyes to the reckless waste of timber, at one time deemed inexhaustible. Our Departments of Crown Lands throughout the provinces should weigh well the value of the various sections of country which they offer to intending settlers, separating those suitable for farming purposes from those useful principally for their timber growths, preserving the latter under proper regulations, and by means of forest guardians. The forests of all newly-explored districts, and those in the West soon to be opened up, should be so protected. The wisdom of leasing Government lands for the purposes of exploration on a large scale, even where the *bona-fides* is apparent, and the operators men of experience from abroad, is to my mind an unsolved question. We see that the Ontario Government have recently leased some 00,000 acres to a foreign mining syndicate, for a term of years for development, and the result we shall watch with anxiety. In cases such as this, heed should be given to the protection of timber lands through which passage is effected, in order that depredations may be prevented, and only mature timber touched. The forests play a large part in our material development, and there should be a due proportion of forest growth throughout the agricultural districts. In the older provinces, particularly, if a generous yield is to be expected from the soil, it is essential that it should have its timely and sufficient rainfall, and that the growing grains may have protection from devastating winds, results which can only be secured by having wooded areas adjacent to all arable lands. This is corroborated in the statements in the public press emanating from the director of the Experimental Farms, Dr. Wm. Saunders (who last week returned from his annual inspection) respecting the farms at Indian Head, N.W.T., and Brandon, Man., to the effect that "at both these North-west farms evidences of the benefit to crops of shelter from tree belts have been very manifest this year, these fields influenced by shelter having given from five to twenty bushels of grain more per acre than the same varieties sown near by, or on similar soil, and with similar cultivation, but beyond the influence of these protective agencies. The shelter belts of forest trees not only break the force of the winds, but act also as snow collectors, and thus produce conditions of moisture in the spring very beneficial to the growing crops." We need, therefore, legislation not only to conserve the forests already standing, but to encourage the owners of lands, whether individuals or corporations, to replant with timber those sections which have been unwisely or carelessly denuded of it.

GOVERNMENT COMPETITION.

It may be asked, why do not the banks complain of the competition of the Government in this matter? It may be replied that although the banks on this side of the Atlantic might not be justified in urging a complaint, it is to be noted that as between the banks in the Mother Country, and the Home Government, the feeling has expressed itself in words to the effect that "State competition in banking has already been carried quite far enough." This may have had more especial reference to a new feature, viz.: to "savings bank postal orders," and to the fear that Government were about to permit their savings bank clients to treat their accounts akin to drawing accounts, instead of expecting them to continue cumulative by reason of the depositors' thrift, and be virtually dormant on the drawing side. However these things may be, banks might well urge against Government a grievance which has existed ever since legislation, beginning with 1868, made $5 bills and multiples thereof, the lowest denomination which the banks in issuing circulation could put into the hands of the public. If it be true that our banking system is second to no other, and that one of the functions of banking is the emission of a circulating medium, which, in our case, legislation has declared shall be a first charge upon all banking assets, besides being supported by a special redemption fund, surely it is a violent interference with the natural development of banking, to cut short this absolutely safe circulating medium at the limit of a $5 bill. I have before me the Government return for July, wherein I find general banking assets of $338,000,000, a double liability fund of $62,000,000, as security and by preference, for a present outstanding circulation of $33,000,000. In other words, the public have $12 of security for every dollar of circulation issued by the banks. How anomalous then, this restriction, which deprives the banks of power to issue $1s, $2s, and $4s, when the Banking Act gives them power to issue notes for $1,000 each and over. No wonder, then, that banks with authority to issue $12,000,000 of circulation, stop short at five millions, and, similarly, banks with power to issue $6,000,000, remain below $3,000,000. Let us, when the time comes for reconsideration of our charters, be prepared to press our claims vigorously for a restoration of those rights which were deemed natural and fundamental before Government entered the sphere of banking. Granting it to be a moot point, how far it is within the sphere of Government to so engage in banking, and willing for the time being that they should continue to retain to themselves the issue of such notes as are held by the banks as reserves, we contend that they should abandon the issue of the smaller notes altogether.

SHORTENING CREDIT.

I should like to see a shortening of credit terms by the wholesale trade of the country. The present system of long credit is at fault, for it tempts men to live not upon the profits of the goods, but upon the sales of the goods themselves, until insolvency ensues, to the detriment of trade and banking interests.

THE MINT.

The report of the Executive Council has alluded to the discussion which took place at the last session of the Federal Parliament, on the introduction of a bill to establish a mint in Canada, and to the expression of opinion on the part of bankers that the time had not come for so large an undertaking, in view of the heavy expenses involved in its proper conduct and equipment, and the profit presently accruing to us from our subordination to the royal mint in England. A very handsome seignorage comes to us annually from our silver and copper coinage minted there, as the two following illustrations from the Auditor-General's Blue Book of 1896 clearly show:

Silver Coinage—	
104,610 std. oz. silver and 1-8 brokerage	$ 65,195
Royal Mint charges..	4,200
Express and insurance charges on coin silver delivered at asst. rec.-general's offices, Toronto, Halifax, St. John, Winnipeg, and Montreal	1,120
	$ 70,515
Face value of coinage....	140,000
Profit	$ 69,484

Copper Coinage—	
Metal and coinage	2,554
Express and insurance charges to Toronto, Halifax, St. John, and Montreal	321
	2,876
Face value of coinage	10,000
Profit ....$	7,123

It is known to bankers, and the general public should take note of the fact, that there is no profit on a gold coinage. The necessary alloy which it contains being only 2 per cent., leaves no profit on working, when the loss on redemption of light coins is brought into calculation. This being so, we should not hurriedly, and through false appreciation of the circumstances, curtail our present advantages.

Recalling the interest shown by the Bankers' Association in 1894 in legislation affecting bankrupts, and in the provision of methods for prompt and inexpensive distribution of estates, discouraging reckless trading, and making it a difficult matter for a fraudulent debtor to re-enter business circles, Mr. Thomas said: "Should similar legislation again engage our attention, and a demand for it continues to be made in certain sections of the press, it must be our aim to render the discharge clauses introduced very stringent in their nature, and to insist upon satisfactory evidence being produced to the judge in insolvency that the debtor has not failed to keep a proper set of books, or to fully dispossess himself of his estate to his creditors. The banks will also need to see in any enactment which Parliament may consider, that their interests are not discriminated against unduly. Under the administration of former insolvency laws it was claimed that the judges in the ordinary courts, by reason of overwork, could not bestow the needed attention upon insolvency cases. To obviate a recurrence of this, should legislation be again brought forward, I should favor the creation of special judges, of experience in commercial jurisprudence, to devote their whole time to insolvency proceedings."

BRITISH MARKETS.

The Liverpool wood circular of Farnworth & Jardine, dated Liverpool, 1st October, 1897, says:

"We have little change in our market to report; imports generally have been more than ample, the deliveries to some extent have been affected by the engineers' strike, and stocks of several of the leading articles have accumulated, and are now too heavy; prices have been difficult to maintain, but with the exception of spruce deals there has not been much decline in value.

"CANADIAN WOODS.—*Pine Timber.*—Waney and square have been imported more moderately, still quite sufficient for the demand; the deliveries of waney have been large, but square is neglected, and stocks of both are ample; there is no change in values to report. Red pine of large dimensions for special requirements has been in better demand, but small inferior wood is difficult of sale. Oak of good quality has moved off freely; prices have ruled steady, but the stock is too heavy. Elm is in fair request, but the stock is sufficient. Pine deals, boards, etc., have again come forward much too freely; the deliveries have been fair, but the stock is most excessive; sales have been very difficult to effect even at reduced values.

"NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The arrivals have again been too heavy, and although the deliveries appear large, a considerable quantity has again gone up to Manchester unsold, and which does not show in the present excessive stock; values have continually declined throughout the month, latest sales being at the lowest price touched this season; prospects for a more moderate import for the remainder of the season are more encouraging, and this is quite necessary to maintain even present low rates. Pine deals are seldom enquired for.

"UNITED STATES OAK.—Imports have been small; the demand continues quiet, and stocks are sufficient; prices rule low. *Oak Planks.*—Of wagon scantling the arrivals have not been excessive, but there is no improvement to report in the demand, and the stock, although consisting of a large proportion of inferior grades, is still too heavy, and prices are low. The total stock is about 409,000 cubic feet.

"Oregon and British Columbian Pine.—From British Columbia a cargo consisting largely of planks has been imported; the demand is slow, and stocks are ample; no change in values to report.

"Pitch Pine.—The arrivals during the past month have been 7 vessels, 5,893 tons, against 2 vessels, 3,141 tons, during like period last year. Of hewn the import has been 70,000 feet; the consumption has been light; the stock is ample. Of sawn we have had a heavy import and a fair consumption; the stock is moderate. Deals and boards have again been imported on a large scale; there has been a fair consumption, but the stock is excessive."

Commercial.

TORONTO MARKETS.

Toronto, Oct. 14th, 1897.

Dairy Produce.—Receipts of dairy butter have not been large, especially of the better qualities. However, about enough of the best quality is coming forward to meet requirements. From some sections there is a disposition to increase shipments. The quality of the butter is on the whole improving, but odd shipments of summer make at times are sent forward from country points, which are very difficult to sell at any price. Creamery butter is offering more freely, due no doubt to a lighter demand for the export business. Prices are about as last reported. The cheese industry is elsewhere reviewed. An abundant supply of eggs is coming forward, in fact more than local consumption would warrant. Prices in the country are too high for an export business, and as shippers were turned from that market it is natural that the local trade should be overstocked. Good eggs are bringing 15 to 16c., and No. 2 stock 11 to 12c., while pickled eggs, which are coming into the market, are worth 12 to 13c. per doz.

Flour and Feed.—A fair demand continues for flour. Export enquiry is not, however, as brisk as it should be. Prices are holding steady. Straight roller, in car lots west, is quoted $3.90 per brl. Mill feed continues without change.

Grain.—For wheat there is fairly active demand, both on local and export account. It is estimated that one-third of the Manitoba yield has been marketed, while a fair percentage of Ontario wheat for the season of the year is in the hands of merchants. Barley remains quiet and prices are low. Buckwheat is steady. Rye is in good demand for export, several large shipments having been made. Oats are steady. Peas are somewhat easier.

The stocks in store at Port Arthur on Oct 2nd were 1,067,689 bushels, and there were received 726,020 bushels, and shipped 734,744 bushels, leaving in store on Oct. 9th, 1,058,965 bushels.

Groceries.—Trade conditions are very satisfactory. For general staple lines there is good demand. Sugars are firm and, as we elsewhere note, advancing. The dry fruit markets are very strong. In Greece, prices in the currant market show a slightly advancing tendency, caused by the decline in exchange, owing to the final declaration of peace with Turkey. The firm tendency of prices in Greece has been rather a surprise to most dealers here, who have expected a decline, after the usual early demands were satisfied. Steamers "Tergeste" and "Pontiac," with 3,000 tons, are due in New York the latter part of next week, followed by the "Powhatan' and "California," bringing together 2,000 tons, due the last day of this month. Mail advices from California state that the crop of walnuts, especially standards, is light this year and that there will be few to ship. The quality, however, is said to be exceptionally fine.

Hides and Skins.—There is no change in the local situation. Competition on the street for hides has been carried to absurd lengths by a couple of houses, each anxious to do the other injury, and merchants who are not interested in the feud have been compelled to follow the quotations made to butchers. Dealers are paying 8½c. for green hides, and offering cured at a fraction more. Chicago advices, Oct. 12, say: "Market firm; moderate inquiries for supplies; packers closely sold up and showing no disposition to hurry business. Recent sales include 12,000 heavy cows at 10 to 10¼c., and light do. at 10¼c. Native steers were at 11c., Texas at 10 to 10¼c., butt brands at 10c., Colorados and branded cows at 9¼c., heavy native cows at 10c., light at 10¼c.

Leather.—There has been little or no change in trade conditions since our last report. Business is of a "hand to mouth" character, manufacturers buying goods only as they are needed. Stocks of leather are not excessive, and by following a firm policy tanners should get better values.

Provisions.—The receipts of dressed hogs have been more liberal this week. Since the opening of the season the feeling has grown easier and prices have declined. Merchants are now quoting 6½c. per lb., but 6¾c. to 7c. was the prevailing price during the first part of the week. The demand for smoked meats has somewhat eased off. There is, however, an active trade in the heavier cuts of long clear bacon and barrel pork. Lard is in good demand, but prices are only fairly satisfactory.

Seeds.—Free offerings of red clover are coming forward, and it is thought there will be a surplus for export which must bring prices on a basis with American markets. Dealers at country points are quoting $3 to 3.20 per bushel. Alsike at $3 to 4.50 per bushel, according to quality, is also more liberally offered. Timothy continues in small supply with 90c. to $1.25, the market price for lots at outside points. As more than usual interest is centred in American markets, we give this report from New York, Oct. 13th. "Clover is quiet for export and a shade easier, after the late rally from the bottom prices on this crop of $3.15 per bushel and is now quoted $3.25, after sales of about 5,000 bags for export this season so far. The crop is good, and the season opened with the trade long of the market; and their unloading broke market to an export basis.

Wool.—The local situation remains without any change. For the few lots of fleece offered from the country, dealers are paying 20c. per lb. Only occasional lots are coming forward. Pulled wool is, if anything, more active, although no change of moment in the situation has taken place. At the London wool auctions this week inferiors were irregular and weak. New England merino sold for 1s. 1d. to the continent, and home buyers paid 1s. 9d. for Victorian washed fleece. Fine crossbreds were firm, and were taken by the home trade. Cape of Good Hope was in small supply, and unchanged. Punta Arenas stock was in poor condition, but it maintained the late advance, and was taken chiefly by the continent.

MONTREAL MARKETS.

Montreal, Oct. 13th, 1897.

Ashes.—Receipts continue small, and prices are rather firmer. For first sorts there is moderately good demand; seconds and pearls rather dull. We quote: First pots at $3.75 to 3.80; seconds, $3.30; pearls about $4.50 per cental.

Cements and Firebricks.—The sale of 1,500 barrels of English cement is reported at $2.10, and the general quotation is now advanced to $2.10 to 2.20, as the result of the firmer quotations in England, noted by us several weeks ago. Belgian cement is still unchanged at $1.85 to 1.95, but manufacturers are exacting higher figures for orders now being booked for forward delivery. The receipts for the week ending to-day are 2,350 barrels of English. Of firebricks the weekly receipts are 148,000; prices are steady at $16 to 21.00 per thousand.

Dairy Products.—The cheese market has made some gain in both activity and strength within the week, and export orders are more liberal. Fine Ontario makes are quoted at 9½ to 9⅝c.; Townships, 9¼ to 9⅜c.; Quebec, 9 to 9⅛c. per lb. The shipments for last week were 63,597 boxes, as against 110,000 boxes for the corresponding week of 1896; but the total of the present season to date is 280,000 boxes ahead of last year. The shipments of butter last week were small, only 2,439 packages. The English market is at such a level that export business is not profitable, and shippers are averse to paying beyond 18½c. for choice creamery, though for choice lots the local trade will still pay about 19c.; finest dairy brings 14 to 15c.; Western ditto., 12 to 13c. per lb. For fresh laid eggs, we quote 13 to 14c., and for candled, 11 to 12c. per dozen.

Dry Goods.—The weather continues very summer-like—the thermometer registering 72 in the open air on Monday—and is hardly favorable to the breaking into of retail stocks of fall and winter goods in any large degree, but the wholesale warehouses show quite a fair degree of bustle, and merchants, as a rule, express satisfaction with the volume of business passing. Sorting orders are small, as a rule, but they are coming in in goodly number, and roll up a very fair aggregate. Remittances are coming in pretty well; some houses say that September collections were ahead of their expectations, and good returns are looked for this month as well as in November. With regard to values of textiles we hear of nothing notably different from recent quotations.

Groceries.—The sugar refiners have acceded to the desire of the wholesale grocers for the re-establishment of a discount arrangement, which has been fixed at 2½ per cent. for quantities under 250 brls., and 3½ per cent. for lots of 250 to 500 brls.; but as against this, factory prices have been advanced slightly, standard granulated being now quoted at 4⅛c., and "German refined" at 3 13-16c.; yellows, 3⅜ to 3¾c. The steamer "Avlona" with full direct cargo of Valencia raisins, currants, etc., is in the river, and is expected in port this evening. The "Bellona," the second direct boat, has completed her loading at Patras, is due in Denia the 16th, and will be here about the end of the month. We give the following as pretty close jobbing quotations for new fruit;—Ordinary Valencias, 5c.; fine off stalk, 5½c.; selected, 6c.; best brands, ditto., 6½c.; layers, 7c. Filiatra currants, in brls., 5⅝ to 5¾c.; Provincials, brls., 5½c.; Patras, in cases, 6½c.; Vostizzas, cases, 7½c. Malaga, connoisseur clusters, $1.90 to 2; quarter boxes, 62½ to 65c.; dessert clusters, $2 10 to 2.20; Royal Buckingham clusters, $3.25 to 3.30. quarter boxes, $1.05; Royal Russians, $4.25 to 4 50; Royal Windsors, $4.75 to 5.00. Sultanas are dear, and for new stock now on spot quotations range from 9½ to 12½c. Austrian prunes are quoted, to arrive, at 6 to 6½c., but none are expected for a month yet. New imported candied peels are quoted at 12½c. for lemon; orange, 13½c.; citron, 19c.: domestic made, one cent less. Tarragona almonds, 8½ to 9c.: new Valencia shelled almonds are now in, and are quoted at 23c. for firsts, and 21c. for seconds. New shelled walnuts, to arrive, are quoted at 16c. In teas we hear of nothing new; transactions between houses are not at all numerous, but the market has not lost any of its firmness. Tapioca and sago are reported as rather stiffer, and the spice market retains its late gain in strength all round.

Hides and Tallow.—The hide market is unchanged in any particular since last week, though the Quebec demand is if anything a little slacker. Dealers are buying beef hides at 8c. for No. 1, and quoting 9c. for cured to tanners. Calfskins quote at 8c. for No. 1, and 6c. for No. 2; lambskins, 60c. each. For tallow there is very light demand, and 3 to 3½c. per lb. is still the quotation for rendered. Butchers only get 1c. for their rough tallow, where the weight per beast is under 30 lbs., and 1½c. for heavier weights.

Hops.—There is reported to be a little more doing, but prices remain about stationary, choice Ontario's being quoted at 12 to 14c. per lb. A recent sale of an extra nice lot of yearlings is reported at 7½c., but this is an exceptional case.

Leather.—There seems to be a good deal of activity in sole leather still, with evidence of much stiffness in values. The sale of a mixed lot of 6,000 sides of No 1 and 2 Spanish B A. is reported at 23c., and some large shipments have been made by a leading house to Quebec; the export movement is also fairly maintained. We hear of no notable transactions in black leather, stocks of which are in very narrow compass, with values well held. For dongolas there is steady demand, and the market has lost none of the advance lately noted. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf. American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—We learn of little new in these lines. The firmness in pig iron noted last week, is confirmed, some moderate sales of No. 1 Hamilton being reported at $16.50, and of Summerlee at $18. Galvanized iron is reported to be stiffening at home, and orders for import would likely be subject to some little advance. The booking of a 5,000 box order for coke tins is reported for delivery early next year, at present prices which would indicate confidence in the stability of the market. We quote:—Summerlee pig iron, $18.00 to $19.00; Carron, No. 1, $17.00; No. 3, $16.25; Ayrsome, No. 1, $16.50; No. 3, $16 00; Shotts, $17.25 to 17.50; Carnbroe, $16.50, to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, $15.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00; No. 2, ditto, $15.25; machinery scrap, $14 to 15.00; common do., $12 to 13.00; bar iron, Canadian, $1.35 to 1.45; British, $2.00 to 2.15; best refined, $2.40;

OILS, PAINTS AND GLASS.—There was no further advance made in leads, at the late meeting of the Grinder's Asssociation, as was expected, owing to the fact that two of the smaller grinders at Toronto and Ottawa declined to accede to the decision of the majority. It is claimed that the state of the market fully warrants the proposed advance, and dry lead is now hard to get, corroders being full of orders at the high prices. Owing to the strong statistical position of turpentine, prices have been jumped up a full three cents, single barrels being now quoted at 50c., and a further advance to 52c. is shortly probable. It is said that the crop is seriously short in the South, some 25,000 barrels less than last year, according to returns just made up, and that the Standard Oil people, who made a big speculation in turpentine several years ago, have again been buying up large lots. Linseed oil, which eased off a little in Britain, is again quoted very firm, and castor oil is stronger if anything. It is said American putty is being brought into the West in considerable quantity, and quotations are a little easier. We quote:—Turpentine, one to four barrels, 50c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels. 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 40 to 42c. per gal.; Gaspe oil, 36 to 38c. per gal.; steam refined seal, 48c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, $1.30 per 50 feet for first break; $1.40 for second break; third break, $2.90.

WOOL.—The market retains all its stiffness, and latest cable advices regarding the London sales, now in progress, report an advance of 10 to 12½ per cent. over figures of last series, and in some special lines, for which there was active American competition, the advance has reached 15 per cent. Stocks of Cape wools on spot have rarely been lower, one of the local importing houses having only about 10 bales on hand, and the other being practically sold out. They both have some moderate stock in store at New York, which they can handle to better advantage there. A cargo of Cape wool is now on the way for this market, but is still some weeks off. There is a little B.A. scoured on spot, quoted at 29 to 35c.; the very lowest in Cape is 15½c. Of domestic there is next to none here.

T. A. GALE, Inspector.

TEN DOLLARS A MINUTE!
This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the
METROPOLITAN
Life Insurance Co. of New York
Assets, ... $25,592,003 78
The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.
Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risks before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

HEAT AND PORTLAND CEMENT.

The results of a recent investigation of the action of heat on Portland cement are given by J. S. Dobie, in an interesting contribution to the Digest of Physical Tests and Laboratory Appliances. Over 200 briquettes were prepared for this purpose, some consisting of neat cement, while in other cases one part of cement was mixed with one, two or three parts of sand, the age of the pieces ranging from two months to four years. In making the tests the briquettes were heated in a gas furnace to a temperature of from 650 deg. to 1,775 deg. F. After removal from the furnace every briquette was found to have lost weight, while in the case of the neat specimens cracks were usually to be observed, these latter being less apparent in the other briquettes containing sand. After cooling, the briquette was tested for tensile strength, with a load applied at the rate of 400 pounds per minute; in all cases a marked decrease in tensile strength was noted, which seemingly was connected closely with the loss in weight of the sample. In other cases in which the reduction in weight showed that practically the whole of the water of crystalization had been driven off, the specimens had practically no breaking strength. The effect of different temperatures was, however, peculiar, since briquettes heated rapidly to 1,775 deg. F. showed a loss of strength out of proportion to their loss in weight; but when the heating was slow these two losses were closely proportional. After cooling, the briquettes of neat cement could be crumbled in the fingers; those containing sand disintegrated spontaneously on standing.—*Engineering.*

U. S. IRON INDUSTRY.

The revolution in the iron industry of the United States, which began with use of cheap labor in the South, to mine and reduce ores lying close to supplies of cheap smelting coal, and ended with the discovery and exploitation of vast deposits of high-class ore on the upper Great Lakes, close to cheap water transportation, to smelters close to cheap coal supplies on the lower lakes, is a most effective illustration of the economic limitation of the value of a protective tariff.

The iron industry in the United States never could have been built up without the aid of a generous protective tariff. It existed for two generations in the Middle States, under conditions of mining and transportation not more favorable than those in foreign countries, and with a much higher scale of wages for labor. The industry never could have been started, or would have been crushed out in infancy by foreign competition, had not this been shut out by a high tariff at the seaboard. Under this shelter the industry grew to the vast proportions of ten years ago, and in spite of its extent and vigor never could have continued to grow without it in the region to which up to that time it was practically limited.

But the pressure of domestic competition, the emulation to undersell and conquer profitable markets, pushed the iron industry to explore new sources of ore and new conditions of coal supply and transportation North and South. On one side it penetrated the mountains between the Ohio Valley and the Gulf slope, finding there cheap land, cheap labor, high-class ores, and near and abundant coal. These mines struck the first blow at high prices for iron in the United States, disturbing the conditions of the domestic markets in the West, and finally finding a market for their product, exported through Southern ports, in London and in Lancashire itself. The most remarkable revolution ever seen in an American industry, is that marked by the abundant exports of coarse iron products to British markets in the last year.

But this export movement never would have taken place but for the enormous development, only a little later, of the apparently exhaustless surface mines near the head of Lake Superior, and the marvellous improvement in transportation facilities to which it gave rise. The latest mining development is in the Mesaba district, where high-grade magnetic ore is scooped up with steam shovels from the surface, and loaded on cars run here and there on temporary tracks. This cheap mining has been supplemented with transportation so low that the price of ore delivered in Cleveland is less than the bare cost of carrying it ten years ago. As a result, two-thirds of the ore consumed in the United States comes from the upper lakes.

This it is which has sent the Southern ore abroad. Even five years ago the product of those mines found a profitable and steady market in the Middle West, from Cleveland to Chicago. Now it has been driven out by the ore from the upper lakes, and must seek a market, less lucrative, but still profitable abroad. It was this influence which broke up the Iron and Steel Trust and brought prices in this country so low that, even with absolute free trade, foreign competition would be impossible. The greatest industry in the country, owing its establishment to a protective tariff, has thus entirely outgrown need of it.—*New York Commercial Advertiser.*

ACTIVE SHOE TRADE IN THE STATES.

Duplicate orders have come in considerable numbers during the past month.. Reports from the salesmen are most encouraging. Some manuacturers state that in their opinion the next spring run will be the most prosperous since 1892. There is a striking inequality about the distribution of business. In one factory there have been made during the past month an average per day of 4,000 pairs, while in the near vicinity fully a half dozen manufacturers have been very quiet. Still, the September business as a whole in Lynn is believed to have been ahead of that of one year ago. This is the opinion of the makers of cartons. Among the cut sole and shoe supply concerns there is a feeling that business is growing better. The larger portion of September was quiet in this branch of trade. Shoe manufacturers some weeks ago bought heavily at old prices, and it is very difficult for them to make up their minds to pay the present figures. It is very clear that they will stand off just as long as possible, imitating the action of the jobber, who will not place his order for goods at present rates unless he is actually compelled to. The nearer one gets to the consumer the more difficult it is to secure an advance. The nearer shoe supply people get to raw material the more stiffly do they meet the advance in prices. It is the opinion of cut sole and shoe supply manufacturers that it will be a waiting game in the shoe business for some weeks. It stands to reason that shoe manufacturers will not pay the new prices until "the last gun fires." They want to feel assured that there will be no fluctuation, and that the advance will hold.—*Shoe and Leather Reporter.*

AMERICAN WOOLENS.

The week has been rather quiet in the men's wear department of the woolen business. The clothiers were buying very few heavy weights, though prices are firmer than ever. The important feature of the next fall opening will be that goods of the same quality of last year will have to be offered at such greatly increased prices, that a doubt exists in the minds of some commission merchants and mill agents, whether this condition will not necessitate their making practically an entirely new line of goods. They realize that the manufacturing clothier has got to have certain grades of goods at limited prices in order that he may make up his regularly graded stock.

It is not generally believed that the purchasing power of the public will, by that time, be so largely increased, as to justify the expectation that the consumer will be able to pay about 50 per cent. more than last year for his clothing. In other words, a worsted fabric, which was sold this fall at $1.50 a yard, and which the wholesale clothiers made into suits, for which were asked all the way from $9.50 to $14, according to the quality of trimming and tailoring, must, during the fall of 1898, cost not less than $2 a yard, in which event the suit cannot be produced and sold wholesale at a profit for less than from $12 for the very lowest grades of make and trim, to $10.50 for the best. In the first case, the suit could be, and was retailed, at from $12 to $18, while next fall the same qualities will have to be retailed at from $16 to $22. The wholesale clothier must have for fall and winter of '98, a worsted fabric around $1.50 a yard. It will not be possible to give him an all-worsted fabric at that price.

Now the question is, will the necessities of the case be sufficiently strong to overcome the clothiers' well-grounded prejudice against cotton mixed worsteds, and will they be willing to take a fabric with cotton at the back at $1.37½ to $1.50 a yard? It looks very much now as if there will be of necessity a great demand for this sort of fabric.—*Wool and Cotton Reporter.*

TWO IMPORTANT TRADE MARK DECISIONS.

Our news columns this week contain two recent decisions in trade mark cases which serve as fresh indications of the growing tendency of the courts to lean toward the broad equity rather than toward the narrower interpretation of law which its strict letter might justify. In one of these cases the words involved as a trade mark possess enough of natural descriptiveness to have caused them to be denied, under the common rulings of the courts a few years ago, any right of exclusive ownership or use. But in the present temper of the courts, it having been shown that these words were first adopted in good faith by a manufacturer to designate a new article, and value having been given to them by his effort in pushing that article into extended public use, the right of exclusive use of the words rests in him as against any imitators. Those ethical persons who contend against the granting of restrictive rights in the use of descriptive words, will suffer a shock from the restraining order against the use of the words "lavender salts" upon any preparation excepting that to which they were originally applied, and whose success has made them valuable. But the equities clearly point to the right of this manufacturer to be protected in the sale of an article, the demand for which he has created by a heavy outlay. It is creditable to the fair-mindedness of those who were enjoined, that the injunction was obtained practically without contest upon their part, and that they, as well as others, have readily desisted from what was doubtless a not carefully considered or duly premeditated offence.

The second decision, which applies to the design adopted by rival plaster manufacturers as a trade mark is equally broad, in that, while it recites no other evidence of attempted imitation, it takes strong grounds in favor of the exclusive right to the use of a trade mark by a manufacturer whose prior use of it had led to its having become a term for the oral designation of an article. So far as the eye is concerned, it does not appear that the resemblance between the packages of the contending manufacturers could be regarded as deceptive, and for this reason the lower court threw out the case. But the appellate branch goes farther into the question, and its decision at great length rehearses the equities as defined by numerous opinions, and reverses the judge below.—*Shipping List.*

—The copper-gold property at Kamloops, B.C., owned by John Cobbledick and others, is said to show $10 to $12 per ton of gold in addition to the copper. Shipping ore has been got from the surface down, and there is a seven-foot vein.

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE
NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

DECISIONS IN COMMERCIAL LAW.

Mutual Life Assurance Company of New York v. Anderson.—A. applied to the plaintiff's agent at Moncton for three policies of insurance for $1,000 each on his life. Upon their delivery by the plaintiffs to their agent, A. assigned them for $25 to B., who also paid the premiums. In a suit by the plaintiffs to set aside the policies on the ground that they were obtained by A.'s fraudulent misrepresentation, it appeared that A. took out the policies with the intention of raising money by an assignment of them, but that he intended the policies should be retransferred to him and be carried for his own benefit. The assignee, on the other hand, testified that A. parted with all his interest in the policies. Held by the Supreme Court of New Brunswick that the policies were not wager policies.

In *re* Saint John Building Society, Hayes' Case.—In this matter the liquidators applied to have the executors of one Edward Hayes, deceased, placed on the list of contributories, and for leave to add interest. It appeared that some time before Hayes died, his name was placed on the list of contributories, but the amount he was liable to contribute was never paid. Held by the Supreme Court of Canada that, under the Canada Winding-up Act, the court has authority to place executors on the list of contributories. It was ordered that the executors be placed on the list of contributories, but that under the circumstances no interest be allowed.

Davis v. City of Montreal.—The charter of the city of Montreal gives power to the city council to appoint and remove such officers as it may deem necessary to carry into execution the powers vested in it by the charter, the French version of the Act stating that such powers may be exercised "*a sa discretion*," while the English version has the words "at its pleasure." The Supreme Court of Canada decided that, notwithstanding the apparent difference between the two versions of the statute, it must be interpreted as one and the same enactment, and that the city council was thereby given full and unlimited power, in cases where the engagement had been made indefinitely as to duration, to remove officers summarily and without previous notice, upon payment of only the amount of salary accrued to such officer up to date of such dismissal.

Broughton v. Townships of Grey and Elma.—Where the council of a municipality assumed to pass a by-law under section 585 of the Consolidated Municipal Act of Ontario, for the construction, maintenance and repair of drainage works, and thereby to charge and assess lands in an adjoining municipality for benefit as for outlet, in order to raise the funds necessary to meet the cost of such works, the Supreme Court of Canada held, reversing the judgment of the Court of Appeal for Ontario, and of a Divisional Court, that as the drain only emptied into a natural stream extending into the adjoining municipality, the lands in such adjoining municipality purported to be affected by such by-law were not assessable for a liability thereunder to contribute towards the cost of the works, and so far as they were concerned, the by-law was *ultra vires* of the initiating municipal corporation; and that a person whose lands might appear to be affected thereby, or by any by-law of the adjoining municipality proposing to levy contributions towards the cost of such works, would be entitled to have the adjoining municipality restrained from passing a contributory by-law, or taking any steps towards that end, by an action brought before the passing of such contributory by-law,

JOHN BARBER.

Mercantile Summary.

Mr. G. E. Corbett, of Annapolis, Nova Scotia, writes us that he has sold out his coal business to George A. Vye, of Digby, in that province.

A great deposit of the peculiar earth used as a basis for mineral paint, has been found at Olinda, in the southern part of Essex county. Detroit parties are going to develop it.

The Dominion Elevator Company will build elevators with 12,000 bushels capacity at Red Deer and Leduc, Man., and the Manitoba Elevator Company will build one with 35,000 bushels capacity at South Edmonton.

American railroads generally show increased traffic month by month since June. The aggregate railroad earnings for the first week of October were 9.2 per cent. larger than last year, a trifle larger than in 1892, and more than half the entire mileage earned in September 14.8 per cent. more than last year, and 2 per cent. more than in 1896.

At the sale of the plant and stock of the Windsor brewery on Tuesday last, under a chattel mortgage, J. J. Guittard was the highest bidder, having offered $3,360. As this was the amount of the incumbrances against the property, the holders of the mortgage decided to accept his offer.

The Missisquoi and Rouville Mutual Fire Insurance Company has finished its sixty-second year. Its report, made up to close of August, shows 3,420 policies, covering $3,375,889. The losses of the year were forty in number, amounting to $11,163. Twenty-four of them were by fire and eighteen by lightning.

It might be instructive to some of the newspaper writers, and even the poets of Great Britain, who so misconceive the climate of Canada, to learn that on the very day, the 15th October, that the cable announced snow on the hills of Westmoreland, the temperature in Toronto, Canada, was 86 degrees in the shade.

In some reminiscences of the St. Lawrence route to the ocean, Mr. Maxwell, chief steward of the steamship "Laurentian," who has been 41 years in the employ of the Allan line, tells how, some years ago, when only the Allan line steamships ran to Montreal, the residents of Three Rivers used to have a general holiday on the arrival of the ship, and when she passed Three Rivers a cannon was fired in her honor. This old man declares that 25 years ago the port of New York had not as good a steamship service as Montreal now has.

That paper can be hung by machinery is the statement of *Lloyd's Weekly*, of London, which thus describes the process: The device has a rod on which a roll of paper is placed, and a paste reservoir with a feeder placed so as to engage the wrong side of the paper. The end of the paper is fastened to the bottom of the wall, and the machine started up the wall, being held in place by the operator. A roller follows the paper as it unwinds and presses it against the wall. When the top of the wall is reached, the operator pulls a string, which cuts the paper off from the roll.

The long-distance telephone is now complete between Woodstock and St John, via Fredericton.

There was a fire in Kingsville, Ont., which consumed the handsome western block on Main street. A bicycle works, a tin shop, and a hardware store were burned, and the Union block opposite was injured.

The movement of boots and shoes from Eastern United States factories surpasses all records for the first half of October, exceeding that of 1892 by 8 per cent., and the many demands for speedy delivery show heavy distribution of stocks.

The St. John *Telegraph* learns that Mr. G. A. Taylor, of the People's Bank of Halifax, has secured premises for an agency of this bank in Hartland, New Brunswick. This village is in Carleton county, on the N.B. railway, about 13 miles from Woodstock.

A factory for making tin fruit cans has been erected in Hampton, New Brunswick, which is in a good fruit-growing district, east and north of St. John. The machinery is in place, and as soon as the boiler house is completed, work will be commenced. The size of the building is as follows: Large furnace and stock room, 60x75 feet, three stories high; pickling room, 40x40, one story; and coal shed, 20x75. The proprietors have brought a manager from Brooklyn, N.Y.

"Richmond's proverbial luck in the case of fire was once again exemplified on Monday evening." This is the way a correspondent of the St. John's *News* puts the matter, in describing a fire which burned a large tenement house in that Quebec town while a gale was blowing. By the aid of the town reels and the volunteer firemen, the fire was confined to one house, though the whole place was threatened with destruction. Now, mark the correspondent's concluding sentence: "Mr. E. J. Dyson, the new town officer, had put in his time mending the hose and putting the fire apparatus in order, and lucky it was that he did so, as it had been in a frightful state." Here is a hint for town officers other than Mr. Dyson, of Richmond. Let town officers elsewhere copy his example, and look after hose and engine, too.

The mill hands employed at the Ottawa lumber mills propose to meet and discuss the Dominion Government regulation which forbids sawmills to dump their sawdust and other refuse into navigable streams. The operation of this law was last year suspended for twelve months in so far as it related to the Ottawa River, but it is to be put in force for 1898, and the objectors say: "the mills will not be able to run." But this is not the case; they can erect incinerators, as the W. C. Edwards mill on Rideau River, has done, and thus consume sawdust and slabs, until such time as more economical use be made of so enormous a waste. It is proposed now to memorialize the Government, praying that the Ottawa River be either exempted altogether, or that the law be suspended for another year. But it is pointed out that if the Edwards Company can comply with the law, there is no reason why the other lumbermen cannot do the like, and erect incinerators.

Self Proving Accounting

A system of accounts, self-proving in every particular, applicable to any business, large or small; is described and illustrated in complete detail in the Manual of the Self-Proving Accounting System. By the methods it provides all the vital facts of the business are gathered into the general ledger, so that it becomes a **perpetual balance sheet,** always up-to-date and **available at all times.** Tiresome digging after buried facts in order to show resources and liabilities or profit or loss, is entirely done away with. The daily labor of keeping the books is materially lessened. Periodic inventorying and closing the books, and the terrors of monthly trial balances, are entirely obviated. Any bookkeeper after reading the Manual may re-arrange his books on the principles outlined. Cloth, 328 pages, profusely illustrated. Price **$5.00,** carriage paid. Descriptive circulars on application.

WHEN WE RECOMMEND

Oxford

BOILERS and RADIATORS,

For hot water or steam, it is because we know they will give reliable satisfaction.

We guarantee their capacity and know that winter comfort and warmth is certain in any building where they are used.

No 3
OXFORD
HOT WATER HEATER
GURNEY FOUNDRY CO. LTD TORONTO

The Boilers are splendidly powerful, can be managed with ease by anyone, and are specially economical in the use of fuel.

The Radiators are standards of excellence all over the world, in artistic styles and countless sizes to suit all needs.

You'll never regret your choice of these Oxford lines —let us send you details and estimate.

The Gurney Foundry Co., Limited, TORONTO.

The Gurney-Massey Co., Limited, Montreal

Mercantile Summary.

THE mortgagees are in possession of the stock of J. H. Black, general storekeeper at Springfield. The Aylmer *Express* says that Mr. Black has left the place for parts unknown.

EDWARD MURPHY, a carriage builder of St. John, N.B., has been going behind for some time, and has been obliged to call a meeting of his creditors. A mortgage of $2,500, covering his real estate, etc., has just been recorded.

AN illicit whiskey still was captured at Bridgewater, N.S., last Friday. The still was in the cellar of Alonzo Zwicker, and was in full blast when the officers made their appearance. The still was hot. Three hundred and sixty gallons of wort was destroyed.

D. A. BISHOP & Co., a firm dealing in crockery, etc., at Truro, N.S., have made assignment of their estate, giving a first preference for $1,700, and also several other preferences for smal amounts. They are said to owe about $4,000 in all, while assets are estimated at about $1,500.

THE purchase of a controlling interest in the Vancouver Gas Works by Mr. Wm. Mackenzie, of Toronto, on behalf of a strong syndicate, is of interest and importance to our Province's mining, says the *Mining Critic*, in view of the necessarily close connection of successful gas production with coal mining.

THE Brantford Stoneware and Pottery Co. has closed down one department of its business, viz., the stoneware manufacturing department. It is stated that the new tariff "permits the importation of these goods from the United States, so as to be sold again cheaper than they can manufacture here. Thus the Brantford men are thrown out of work."

FROM Quebec city we hear of the failure of L. Laplante & Fils, a firm engaged in the manufacture of slippers in a small way. Liabilities are mainly local —The estate of Labrecque & Marcotte, wholesale dealers in fancy goods, lately failed, is to be wound up, and the stock has been sold by the assignee at 63 cents on the dollar to Amyot & Frere, wholesalers in the same line of business.

A STOREKEEPER, of Casselman, named P. Dorais, one of the unfortunate sufferers by the late bush fires, has communicated with his creditors through his lawyer, and asks them to accept 20 per cent. cash, on their claims. He loses his store premises and stock of about $3,000, and has only $1,000 insurance.——T. Barry, of Pembroke, Ont., who has been doing a small business in bankrupt stocks, etc., since 1893, has assigned.——W. A. Bennett, of Spencerville, Ont., originally a shoemaker, but for some years past dealing exclusively in agricultural implements, makes an assignment.

A MONTREAL firm dealing in hats and furs, Archambault & Rivet by name, are embarrassed, and a demand in insolvency has been made upon them. Rivet has assigned personally, but Archambault is contesting the demand. They owe about $2,300 ——W. Aubert de Gaspe, a small dry goods dealer in Point St. Charles suburbs, has assigned. He owes $2,500, and has assets of about $900, which will be largely eaten up by the landlord's claim. He has been previously unsuccessful.——L. C. Fortin, a small grocer, of the same city, has assigned, owing $1,060.——E. J. Martin, confectioner, owing under $1,000, has been put into bankruptcy.—— O. Corbeille & Co., who have been engaged in the hardware and paint line in the St. Gabriel suburbs for a dozen years, have been declared insolvent, and stock, etc., is to be sold. They over-invested in real estate, and got an extension in the spring of 1895, but have apparently never worked clear.

TWELVE enterprising men of Cumberland County, Nova Scotia, have acquired possession of half a million acres of timber lands in Newfoundland, which contains pine of old growth. The company, R. T. Smith and Dr. Smith of Parrsboro, W. T. Pipes, Rhodes & Curry, Mr. Lusby, J. L. Black and others, of Amherst. The mills are situated on the Exploits river, the shipping facilities are excellent. The lands were formerly owned by an English syndicate, to whom the present company paid in the vicinity of $100,000 for the property.

INFORMATION of a reliable nature has been received by the Rat Portage *News* to the effect that an offer has actually been made for the Sultana Mine and adjoining claims embracing the Ophir property. But the deal cannot be closed, it seems, until some clouds on the title of some of the claims outside of the Sultana have been removed, the purchasers wishing to secure a larger tract of territory than that embraced by the Sultana mine, "The amount offered is said to be between one and a half and two millions of dollars. It is understood that the parties who made the offer represent the Rothschilds, of London, Eng."

THE authorities of the Allan Steamship Line loaded and discharged no less than six vessels at the port of Montreal last week. The "Sarmatian" sailed for Glasgow on Tuesday morning and the "Livonian" for Liverpool the following morning, while the "State of California" left for Liverpool on Saturday morning. On Saturday and Sunday last three Allan liners left for the Old Country. At 6 30 the "Sardinian" left for Glasgow; at 7.30 the "Ormidale" left for London, and she was followed by the "Romanian" for Liverpool. These six vessels took on between them upwards of 40,000 tons of cargo in addition to live stock."

LATEST business casualities among country trades in the Province of Quebec are as follows. Michael Hayes, general merchant, Sheenboro', formerly at Rapide des Joachims, is reported to have assigned to the Court. Indiscriminate crediting seems to have been his besetting sin for he failed in 1885 and again in 1891. $18,000 of very poor book debts having marked his failure in '91.——J. P. Pothier, grocer, Batiscan, is insolvent, with an indebtedness of $1,200, and assets of $600. He will be wound up.——Louis Boulet, a laborer, of Beauport, who has been carrying a few hundred dollars worth of general stock, for the last several years, has been asked to assign, and is trying to arrange a compromise.—— G. Gagnon, shoes and groceries, at Thurso, offers creditors 50 cents on the dollar. ——H. Lamarche, a tinsmith at Windsor Mills, is reported as having left the country. He leaves no assets, and has several charges of selling liquor illicitly hanging over him.—— A voluntary assignment has been made by E. Cloutier, of Notre Dame du Lac, formerly a telegraph operator but who engaged in storekeeping several years ago.—— Israel Masse, general store, Notre Dame de L'Assomption, has failed. He is reported to have been of sporting proclivities, leaving the business management, more or less, to a clerk.——W. A. Richardson, hotel-keeper in Sherbrooke, whose affairs have been occupying the attention of creditors for several weeks past, and against whom a charge was brought of secreting goods, has now assigned. Liabilities are put at $9,000.—— C. Fortin, of Lake Megantic, a storekeeper and beer-bottler, lately burned out, is reported to have asked some indulgence from creditors in the way of a compromise.

Mercantile Summary.

KINGSTON debentures for $71,145 were sold at a premium which yielded $3,056. The highest bid was 107.

THURSDAY, November 25th, has been appointed by the Dominion cabinet a day of general thanksgiving.

WE hear of the transfer of Mr. D. R. Laird, agent at Summerside, P.E.I., of the Bank of Nova Scotia, who has been transferred to the agency of the same bank at Newcastle, N.B.

THE estate of James Lockhart, Sons & Co., woolen merchants, Toronto, has been wound up, and the assignee, Mr. T. J. Henderson, declares a first and final dividend of 43⅛ per cent. this week.

WE are informed that a branch of the Commercial Bank of Windsor has been opened at Berwick, King's county, Nova Scotia, on the Dominion Atlantic Railway. It is in charge of Mr. Frank D. Soloan.

SOME fifty thousand dollars in New Brunswick debentures are offered by the government of that province. They have 40 years to run; $35,000 worth are at 4 per cent., dated Nov. 1896, and $10,000 at 3½, dated at Oct. 1897, and $2,000 at 4, dated August 1897.

THE license, good-will and effects of the Grigg House, London, have been sold at 90 cents on the dollar to Dan McIntyre of Dorchester, for Martin O'Meara, London. The stock is valued at $10,277, and effects at $2,400. The supplies, valued at $2,000, were sold at 100 cents on the dollar.

A DISCOVERY that may well be called startling was made the other day by the warden of the penitentiary at Pittsburg, Penn. A number of the convicts shut up there have been making counterfeit 50-cent pieces within the walls of that building—good ones, too. He has found the moulds and the material for the "queer," but not the man who designed the scheme. There were confederates outside to dispose of the stuff.

"MANITOBA as it is To-day" is the title of a neat and plentifully-illustrated thirty-page folder, just issued by the Stovel Company, of Winnipeg. It contains a brief description of the resources and industries of the country, gives the homestead regulations, land offices, etc. Those who have friends in Britain should procure some of these little pamphlets to send home. Mr. W. D. Scott, corner Front and York streets, Toronto, has them.

A HOTEL keeper named W. A. Richardson was taken last week before Mr. Justice White, at Sherbrooke, Que., charged with secreting property from his creditors. He petitioned to be liberated on bail because he had abandoned his property for the benefit of his creditors. The petition was rejected, the law providing that a person arrested on a capias and then making an abandonment of his property can only be liberated on bail after four months.

NEW YORK diamond importers of diamonds from Amsterdam to the extent of $90,000 in August last, have been mulcted in extra duties The Attorney-General decides that diamonds brought into the States from another country not contiguous to Canada, must pay a discriminating duty of ten per cent. The duty on cut diamonds under the Wilson tariff then in force was 25 per cent., but as the Canadian tariff prescribed a duty of only 10 per cent. the diamond importers hoped to save $13,500. As it is, the owners have had to pay 10 per cent. duty in Canada, 10 per cent. discriminating duty, and heavy expenses besides.

$12,000 Reward

AS FOLLOWS:

The Dominion Bank offer a Reward of $5,000

for information which will lead to the conviction of any person concerned as a principal in the theft of about $20,000 from the bank's premises, in Napanee, on 27th or 28th August, 1897.

They also offer a reward of $5,000 for information enabling them to recover the money stolen, and in like proportion in case any part of such money is recovered.

They also offer a reward of $2,000 for the return of certain uncountersigned $10 bills, amounting in all to $10,000, stolen on the same occasion, and in like proportion in case only a part of such bills are recovered. The numbers of such bills are: **Nos. 46001 to 47000 —Series A. Dated 2nd January, 1888.**

Apply to Head Office of the Bank at Toronto, to either the General Manager or Inspector.

Dated Toronto, 21st October, 1897.

Mercantile Summary.

THE town of Collingwood offers $14,000 worth of Harbor Improvement Debentures for sale.

THE railway built by Mr. R. G. Reid from St. John's to Port aux Basque, Newfoundland, on the west coast, has been completed, the last spike having been driven on Saturday week. Mr. Reid's Clyde-built steamer, the "Bruce," was expected to begin trips to Sydney probably this day week.

THE Dominion Coal Company has contracted to ship 2,000 tons of duff coal to the Ferrona iron works. This, says the *Eastern Chronicle*, is for experimental purposes in the manufacture of coke, and particularly to ascertain whether or no the Cape Breton coals contain too much sulphur for this purpose. Dominion, Reserve and Caledonia coals will be used for three experiments.

NEWS of Saturday last from Shelburne tells of large catches of herrings off the Nova Scotia coast near that place, while on the coast of Halifax county the herring fishery has proved a failure this month. The Yarmouth *Times* of 15th inst. says that the only hope of the poor people on the shore was mackerel. Those are coming. To-day as high as 700, 600, and 500 fish to the flat were got at Portuguese and Herring Coves. Some of the fish weighed 3¼ lbs.

THE official report of Mr. Pratt, the Assessment Commissioner of Ottawa, as a result of the assessment of Ottawa finished the other day, is published. It shows an increase in population over last year of 2,187, making the capital's figure 53,727, and an increase in valuation of $984,915, making the valuation $22,922,450, or just short of $23,000,000. In addition there are ten to twelve millions of untaxed property in the city. Every ward in the city has grown in both population and wealth save Rideau ward.

STILL the facilities for storage of grain continue to be enlarged in Western Canada. This year is particularly noticeable in this respect. It is probably true that in Manitoba and the Territories 100 new elevators and warehouses have been erected, increasing the interior elevator capacity 2,500,000 bushels, while at Fort William the C.P.R. are building steel elevators to hold 1,500,000 bushels, and have just completed a second elevator at Owen Sound, described elsewhere.

THE estimate has been made that about one-half the wheat crop of Manitoba has been marketed, and it is certain that the quantity shipped east up to Monday last, is larger than at a corresponding date of previous years. In September, the daily aggregate of wheat delivered at points on the C.P.R. in that Province, was 200,000 bushels; this month it has ranged from 120,000 to 150,000 per day. The Winnipeg *Free Prcss* states that on Saturday, 16th October, there was in the interior elevators, according to the C.P.R. reports, 3,895,480 bushels of wheat, 2,600 bushels of oats, and 2,400 bushels of flax. At nine points including Brandon, Morden and Winkler, there was 100,000 to 160,000 bushels each; at fourteen points from 50,000 to 100,000. The prices paid last week for wheat, ranged from 71 cents at Regina and Moosejaw, to 76 cents at Portage la Prairie and Moosomin, and 78 cents at High Bluff on the main line. On the Souris branch from 72 to 77c. was paid at twelve points, all these being for No 1 hard. At Emerson 73c was paid for No. 2 hard, and on the Deloraine branch, from 70c. at Clearwater to 75c. at Gretna for No. 2 hard wheat.

DEBENTURES FOR SALE

$25,000

Catalogue and terms of sale will be issued in a few days.

SUCKLING & CO.,
Trade Auctioneers.

THE STRIKERS IN BRITAIN.

A writer in the *Textile Mercury*, a very influential and fair journal, relates the true causes of the struggle in the engineering works of the old country, which Mr. Keir Hardie now wants to make "a general strike, bringing the trade of the nation to a standstill." We trust that Keir will not realize his wish. It is already a question how Great Britain can keep her trade, which other nations, working longer hours, are taking from her. The following are the eight points which the writer of the article makes :

The trade unions have ordered the owners to employ full-priced mechanics to work certain machine-tools that can be worked by junior hands or laborers, and are so worked in other countries.

The trade unions have ordered the owners to work each machine-tool by a separate man, instead of one man working two or three machine-tools simultaneously, as is done in other countries.

They have ordered that a uniform rate of wages be paid in ealh trade, for good, bad, or indifferent hands.

They have ordered certain men to be discharged from the works because not members of the trade union.

They have ordered certain foremen to be discharged because not under the control of the trade union.

They have ordered the speed of turning out work from certain machines to be limited below their full capacity for the purpose of increasing the number of workmen necessary.

They have ordered that one mechanic shall not do any work of another trade, although competent to do it, and required to do so for the convenience and expedition of completing the special work in hand.

And now the trade unions are wanting to order the owners to pay the workmen nine hours' wages for eight hours' work, and to let their machinery stand idle for the remaining hour of each day.

Mercantile Summarv.

A meeting of the Bankers' Section of the Toronto Board of Trade was held yesterday afternoon. Mr. J. H. Plummer was re-elected president, and Mr. A. Kirkland, of the Bank of Montreal, vice-president.

Among the stocks sold by auction this week were that of W. E. Sitlington & Co., dry goods, Sarnia, at 45 per cent. discount, and the hard, ware stock of Lang & Meharry, Port Perry, realized 64 per cent.

The authorities of the Dominion Bank offer $5,000 reward for information which will lead to the conviction of the robbers of their Napanee branch, leading to the recovery of the stolen money, or a proportionate reward for any proportion of the money, and $2,000 for the recovery of the $10,000 worth of uncountersigned $10 bills stolen.

From a comparison of actual figures concerning the principal products of the United States exported during September, *Dun's Review* draws the conclusion that the total exports from that country for that month exceeded the total imports by about $55,000,000; and up to 16th October, the exports for this month were in a like ratio.

An assignment has been made by Wintermute & Co., general storekeepers at Cayuga. This business has made several changes within a few years. The present owner is Peter Wintermute. Last June he professed to have a stock of over $4,000, and accounts outstanding of $1,000. Against this he has liabilities of $2,500.——William Mowat, dry goods dealer, Napanee, assigned last week, with liabilities of $32,000. Since then creditors have agreed to accept 35 cents in the dollar.

It may be remembered that John Leece grocer, Hillsdale, assigned a few weeks ago, Now he offers creditors $250 for their claims of $1,200, this sum to be secured.——J. A. Simpson, cigar jobber, Guelph, offers creditors 30 per cent., payable in six months. This will probably be accepted.——Challand, Jenks & Co., manufacturers of aerated waters, Hamilton, want their creditors to be lenient, and they will pay in thirty days 50 per cent. of their liabilities of $1,800; they have nominal assets of $3,000.

It is very properly pointed out, in a bulletin of the Ontario Bureau of Mines, that every sort of man should not rush to the Michipicoten gold country. That district resembles, geologically, the Lake of the Woods district, but the differences make prospecting very hard work. Mr. Willmott, who examined the country for the Government, believes that it will well repay prospecting, and that in a few years gold mining will be established there on a profitable basis. It is a proper place for men who understand quartz mining, not for those who think they only need a pick and a pan.

A London grocer, named W. H. McCutcheon, has been getting behind in his payments for some time. Now he asks creditors to accept half the amount of their claims of $1,200. In the event of this proposal being carried out he will remove to less expensive premises.——In April, 1896, Walter H. Thomas succeeded J. M. Austin as a general storekeeper at Schreiber. He made no progress in worldly wealth, and being unable to buy goods, he assigns.——Another assignment is that of Baker & Dobson, who opened a jewellery store in Southampton in Feb. last. Afterwards they added bicycles to their stock. They had but little capital and soon found they could not both live on their slender profits.——Alfred Gregory removed from Windsor to Ingersoll in Nov., 1892, and bought the grocery stock of E. Chrysler. His trade has been small and he assigns. So does A. Master, a grocer at Windsor, who commenced business in 1895 with $1,400 capital, supplied by his father-in-law. Sports have lately occupied too much of his time.

George M. Pullman, head of the well known Pullman Sleeping Car Company, of the United States, died on Tuesday last. He was born in Chautauqua County, N.Y., March 3rd, 1831, and began life as a clerk in a country store. He went to Chicago in 1859 and at first engaged in the business of raising of buildings. While riding in an old-fashioned sleeping car near Buffalo, it occurred to him that there was a field for building comfortable sleeping coaches. From 1859 to 1863 he made a series of experiments on the Chicago and Alton and Galena roads. From these experiments he worked out detailed plans. Thus arose the great Pullman car system, and the model village named after himself. Mr. Pullman was identified with almost every public enterprise in Chicago. The industrial town of Pullman within the city limits of Chicago, now contains over 11,000 inhabitants. The deceased gentleman was wealthy, in fact the estimates of his wealth vary from $20,000,000 to $35,000,000. He did the travelling public good, and reaped a rich reward for his enterprise.

THE **BROWN BROS.** Limited.

Manufacturing Stationers, - Toronto.

SLOCAN

Dividend Paying and Producing Mines.

● ● ● ● Take a Block of Each

The "Goodenough." A dividend payer—A splendid investment, where security is desired. Likely to advance at once.

The "Jackson." A dividend payer—Shares in this mine will return a high rate on purchase money.

The "Tam O'Shanter." Write or call.—Investigate this. Has shipped several cars of ore.

We have a fourth. A dividend payer. Communicate. We confine ourselves to the Slocan district and handle stocks only in shipping and dividend paying mines. Those having funds for investment are invited to correspond.

LAUT, LEET & CO., Financial Agts.,
Temple Bldg., MONTREAL.

ASSIGNEES, TRUSTEES AND SOLICITORS

will find **The Monetary Times** particularly well adapted for advertising bankrupt stocks. Because it reaches the most likely buyers and more of them than any other publication.

THE SITUATION.

Canada being the borrower, it is natural that the $10,000,000 loan which Mr. Fielding has secured should be regarded from the debtor's point of view. The loan is a good one for the country, in proportion to the lightness of the burthen it imposes. In making the term of the loan fifty years, we are going on the principle of making posterity share the burden, the supposition being that posterity will also share the benefit. There is unfortunately no device by which the present generation can escape paying an amount, in the form of interest, more than equal to the loan, and, when this is done, the loan remains for posterity to pay. The creation of a public debt may be a necessity; it can never be desirable for its own sake. Great is the contrast between the present loan, which bears a fraction less than two and three-quarters per cent. interest, and the loans of former days, which bore six and seven per cent. interest. The contrast marks a change of conditions which has been going on for a whole generation.

A good portion of the new loan will be absorbed in subsidies to private persons who have undertaken public enterprises. What is thus given brings no direct return to form a fund to pay either debt or interest; any indirect return will come from taxes, which railway facilities may enable new settlements to pay. Money invested in large public works should, if possible, yield enough, sooner or later, to pay off the debt which the investment necessitates. When we undertook to build the canals, this was the theory on which we proceeded; but as time went on, the revenue from the works was cut down with a view to enticing foreign traffic to take the St. Lawrence route. The result was that we discriminated in favor of a foreign rival; while he had to pay only a fraction of the interest on the canal debts, in the shape of tolls, we had to pay full interest, including the difference in what we got from the foreigner in tolls and what the loan bore. Public subsidies to private persons undertaking public enterprises have, in the past, been regarded as necessary, if not unavoidable. The policy which multiplied bonuses is no longer regarded as sound; in the past, it has been thought to be the lesser of two evils. It was, perhaps, inevitable that subsidies should have their day; but it is already becoming plain to ordinary apprehension that the system cannot last for ever. As conditions change, so will the fiscal policy on which subsidies were founded. The State will get tired of enriching private individuals at the expense of the taxpayer; already there are signs that it has got to come, and it is desirable that it should not be long delayed.

A renewed demand for an insolvency law, now heard, may or may not be made in view of the approach of the next session of Parliament. The heaviest complaint against the present state of our law relating to insolvency comes from British creditors. They allege that the local creditor manages to get what is practically a preference, though on the face of it the law deals equally with all. This complaint is just now particularly strong. What the British creditor claims is that, in case of insolvency, the Canadian law should distribute the assets equally among all the creditors, and that no creditor should be permitted to obtain preferences of which others have no notice or knowledge. The greatest opposition to an insolvent law is focused in the Senate, where it is doubtful whether the present Government, with all its strength in the House of Commons, could carry an insolvency measure, unless it were understood that power to counterbalance the present majority by a creation of new members over and above the limit of the number now fixed could be exercised.

A member of the Canadian government, unnamed, is quoted as saying about recent tenders for the Atlantic mail service: "Our failure to obtain a single offer, on the terms of the advertisement, tends to show, that for the present, a weekly service from St. John, with vessels of good speed is impossible. In this way, it seems, the question of rival winter ports was expected to settle itself. The Minister quoted is made to add: "What we can do, though, is to make use of it (Halifax or St. John), heavier matter going by parcel post, and then send the bulk of our letters by way of New York." This, it will be noticed, does not settle the question between Halifax and Quebec, while transferring the European letter route to New York. If a mail service via Halifax would not pay with the subsidy offered, the assumption here is that no higher offer will be made. The foregoing statement is not made on any certain authority and cannot, meanwhile, be accepted as conclusive. A St. John journal says the Government will provide facilities for the shipment of grain at that port, and that they will include an elevator, a system of wharves, and possibly a dry dock. In this upper country, elevators are built on private account, this being the rule, not only in Ontario, but even in the far North-West, where they are very common.

John Spurgeon and Robt. Henning, of Cincinnati, profess to be aware of a rival of the Klondike gold fields, somewhere "north of the Peace River country," a delightfully indefinite description, made so confessedly with the design to defraud the Canadian Government of its dues. The gold is reported to be found in nuggets, six feet below the surface; and it is claimed that a few miners have been taking out gold there for years. The two men named claim to have taken out $10,000, in two months, last summer. It has long been known that gold exists in the Peace River, and there is nothing improbable in its being found in the streams to the north. When gold is to be found in so many places in Canada, some secluded spot, well inland, might be selected by the Government for making an experiment to ascertain what can be done in the way of Government exploitation. If the labor of criminals could be employed, the problem of what to do with the labor of such persons would be partially solved. But if defective organization, physical or mental, or both, be allied to crime, climatic causes would limit the experiment. The same limitation would apply to habitual drunkards, whom we might otherwise so employ. But it is possible that something could be done that would be a real public and private benefit.

M. Boucher, the French Minister of Commerce, is reported as having expressed the opinion that the Government of Washington will remove the present limit of $100 to the value of baggage which any passenger across the Atlantic can carry free. M. Boucher is reported to have characterized this limitation as barbarous. It is nevertheless true that there were grave reasons for the change. Atlantic passengers brought in personal luggage consisting of all sorts of articles, on which other and poorer people had to pay. The chance of smuggling for friends who were not Atlantic passengers was, it is believed, not always left unimproved. The practice of thus bringing into the country large amounts of goods, which the process made discriminately free, rose almost to the height of a national scandal; its injustice to all others who had to pay was the worst feature of the practice. The smuggler is sometimes the only agency by which the rigor of an excessive tariff can be relaxed. In this case the smuggler made only a discriminating relaxation, and made it in favor of the class best able to pay. Congress overshot the mark in making the limitation less than the reasonable needs of travellers call for.

Mr. Ernest Heaton is trying to discover some plan by which colonization of new districts can be carried on with more than ordinary energy, by some means of combination which looks to the obtaining of loanable capital for four per cent. He makes a number of suggestions, such as that the colonists should mutually guarantee the loans; that the Provincial Government or the county should do so. It is obvious that of the various plans only the first is co-operation; the others simply provide outside guarantees. Ontario lent $100,000 to Menonite settlers, Mr. Heaton reminds us, on the guarantee of outside persons in Ontario, and got the money back. But we are not all Menonites, and cannot all get similar guarantors. The experience of the Government of Canada, under the Union, with the Municipal Loan Fund is not favorable to the notion that the position of guarantor is necessarily one of no risk. In that case the Government was not originally responsible, but only manager of the fund; when it became responsible it lost heavily, though municipalities were responsible for the debts. Some of them simply would not pay when the Government was creditor.

CANADIAN COMMERCE AND THE BONDING SYSTEM.

From the full text of Mr. Blair's St. John speech, it is clear that he regards it as possible that the United States may some day go to the length of practical non-intercourse with Canada. He sees this in the blow, so far abortive, aimed at the freedom of the bonding system last session of Congress; and for such a future condition of commerce, he thinks it only prudent to take precautions, in the form of "a safe and perpetual roadway over our own territory, at all periods of the year." This is a revival of the original idea of the Intercolonial Railway, which is capable of being carried out in more ways than one. Mr. Blair was speaking to an audience which has set its heart on getting to St. John a share, if possible a large share, of the Canadian traffic which now passes through the United States, under privilege of the Bonding Act, which confers benefits on the United States, as well as Canada. In proportion as the danger of getting farther, commercially, apart from the United States, by no fault of ours, Mr. Blair thinks it necessary to draw the Imperial tie closer, though that tie may be the better for being impalpable. He recognizes that the solidarity of the Empire, under diversity of forms, may be put to a practical test, and he has a strong conviction that "there is no part of the great extended Empire that would not rise spontaneously when the moment came when Imperial interests were imperilled or England were in jeopardy."

On the question of the relative claims of the ports of Halifax and Quebec, Mr. Blair distinctly takes the ground that it is one which "the Government could not be expected to determine." He thinks that, by virtue of its shorter distance to Montreal by the C.P.R., the port of St. John will largely command the heavy traffic. And the Intercolonial runs to St. John as well as to Halifax, though the connection of that road with Montreal still requires to be completed. When this is done he feels confident the Intercolonial can be made a factor in Western freight carrying to St. John. True, it is 250 miles longer than the C.P.R. to Montreal, but this disadvantage of distance, he contends, is compensated by the easier grades on the Intercolonial, which equalize the time of the trains, so that the Government will be able to take contracts to carry freight from Montreal to St. John in 36 hours, the same as the C.P.R. The two roads, it is alleged, need not be injurious rivals, as they draw their traffic, to a large extent, from different parts of the country. St. John may compete for some of the traffic that Portland now gets. Mr. Blair warned his hearers against supposing that St. John is best situated for doing all kinds of carrying. He spoke strongly in favor of the fast line of Atlantic steamers. This means that Halifax is to be the winter port of the new Canadian line of steamers.

REACHING OUT FOR TRADE.

The Russian Government is realizing the importance of the adoption by Russian farmers of improved implements and machinery in their work of cultivation. In June last a committee was appointed by the Minister of Finance to examine the question of the duties with which all agricultural machinery and implements are charged on importation into Russia, and this committee has held several sittings, at which many witnesses on the subject were examined. The decision of the Russian Government has not yet been made known; but the British consul at St. Petersburg ventures the opinion that the duty will be entirely abolished on some machines and implements, that there will be a reduction of duties on others, and the free importation into Russia during the course of the next five years of certain machines not made in the country, such as sheaf binders, steam ploughs without engines, compound thereshing machines, hay scatterers, sorters with spiral cylinders, potato sorters, cream separators, brick-making machines, etc., and further, that machines and implements newly invented and adopted in use abroad be also allowed free importation into Russia during the next five years.

If Canadian manufacturers could sell agricultural implements to the value of $595,277 in foreign countries last year, competing with American and British manufacturers, they should be able to obtain substantial advantages from this new market if the proposed changes in the Russian tariff go into effect. A few agricultural implements of Canadian make have already found their way into Russia, the sales in 1896 amounting to a value of $23,535, and to $42,657 in the previous year. The grain products of Russia are very similar to those of Canada, and this should give to our manufacturers an inducement to look into the prospects of trade with that country.

BANKING RETURN.

We give below a condensation of the figures of the statement of Canadian banks for the month of September, It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.	Sept, 1897.	Aug., 1897.
Capital authorized	$73,258,684	$ 73,258,684
Capital paid up	62,279,925	61,959,547
Reserve Funds	27,233,999	27,070,799
Notes in circulation	$38,616,211	$34,454,386
Dominion and Provincial Government deposits	6,716,316	6,637,438
Public deposits on demand	76,137,117	74,949,375
Public deposits after notice	135,682,927	135,068,821
Bank loans or deposits from other banks secured	80,000	100,000
Bank loans or deposits from other banks nnsecured	3,304,066	3,858,637
Due other banks in Canada in daily balances	143,696	126,619
Due other banks in foreign countries	279,397	360,692
Due other banks in Great Britain	2,031,777	2,116,546
Other liabilities	456,158	359,491
Total liabilities	$263,446,774	$258,032,070
ASSETS.		
Specie	$8,750,689	$8,724,780
Dominion notes	17,586,188	17,613,363
Deposits to secure note circulation	1,779,454	1,880,678
Notes and cheques of other banks	9,093,759	7,909,618
Loans to other banks secured	28,500	29.677
Deposits made with other banks	4,094,247	4,598,522
Due from other banks in foreign countries	27,939,204	27,913,770
Due from other banks in Great Britain	12,462,134	12,249,663
Dominion Govt. debentures or stock	2,767,379	2,767,379
Other securities	27,802,361	27,356,818
Call loans on bonds and stock	17,314,047	16,606,104
	$..........	$127,750,372
Current loans and discounts	206,779,863	202,457,187
Loans to Dominion and Provincial Governments	1,353,197	1,297,002
Due from other banks in Canada in daily exchanges	172,376	165,951
Overdue debts	3,622,730	3,636,793
Real estate	2,062,722	2,047,917
Mortgages on real estate sold	567,829	564,170
Bank premises	5,677,406	5,641,285
Other assets	2,420,619	2,345,074
Total assets	$352,274,880	$345,805,354
Average amount of specie held during the month	8,743,943	9,492,800
Average Dominion notes held during the month	17,462,464	16,586,384
Greatest amount notes in circulation during month	39,077,427	34,928,862
Loans to directors or their firms	6,897,049	6,678,798

One striking point in this return is the advance of circulation in September by more than four millions over that of August. The greatest aggregate of circulation reached during last month was $39,077,000, which is about six millions more than the like September figure of either of two previous years. Deposits continue to increase, the handsome total of $211,820,000 being now reached. When commenting a month ago on the August return, we noticed the fact, that while business was generally good and grain moving freely at improved prices, the current loans and discounts were $2,000,000 less than in the previous month, and $5,000,000 less than in the previous August, and said "it may be that the September return will show the improvement." Accordingly, the September return does show a marked increase in current loans and discounts, namely, from $202,400,000 to $206,700,000. The totals of assets and liabilities are swelled by five or six millions each.

WITHOUT THE FARMERS' ASSISTANCE.

There is always a strong element among the farming classes ready to complain when merchants make a profit in handling farm produce or grain. Such organizations as the Patrons of Industry, the Grangers, and others of similar nature, have been brought into existence mainly through the idea that the merchants were becoming rich at the expense of the farmers. There is little evidence to support the contention that middle men in Canada have amassed fortunes in handling agricultural products, but in the instances where money has been made in this way it will usually be found to be the reward of a risk undertaken. Some one has been bold enough to break away from the beaten paths of trade, over-crowded with competitors, and risk his money in a new venture. If he should be successful, the first to begrudge him his gains are the men who refused to attempt the undertaking or to assist in it.

Numerous movements are now on foot to erect cold storage warehouses at different centres of the produce trade. The benefit of storage facilities must go primarily to the farmers, and yet they are unwilling to undertake any responsibility in connection with the establishment of a cold storage system. Recently a number of Halifax merchants in attempting to float a joint stock enterprise, to build premises having facilities suitable for the storage of fruit and produce, appointed provisional directors, who sent a prospectus and blank applications for stock to all the leading farmers of the Province of Nova Scotia. Not only did they not receive one subscription from the farmers; but they were not even treated with the courtesy of a reply from any of them. So far as Canada is concerned, the establishment of cold storage warehouses and shipping facilities is pioneer work. It is destined to become an enormous branch of industry, and when the initial difficulties are overcome must prove a source of considerable profit. The farmers will then be the first to complain that the owners of these facilities are making enormous profits out of the products of the farm.

BANK CLERKS AND OTHER CLERKS.

The arrest and trial before a magistrate of a young man, one of the staff, charged with being concerned in the robbery of the Napanee branch of the Dominion Bank, and his discharge by the magistrate after an examination lasting several days, have caused no little excitement and plentiful comment during the past week. Some of the comments made in print have been merely indiscreet, others are in our view positively harmful, tending as they do to encourage laxity in official relations, and to produce a wrongful estimate of the habits and duties of a young man of business.

Passing by the questions whether the evidence was sufficient to warrant the young man's arrest, whether the was properly or improperly dismissed from the service of the bank, there can be but one opinion in rightly constituted minds as to the unseemliness of the demonstrations made, both in Napanee and Belleville, it is said, in glorification of the clerk on his discharge.

Few, we should think, will be found to defend the playing of poker by members of the staff in a bank office, and the opening of the safe, late at night, to get coppers *to serve as counters in the game*. We have heard card-playing in a bank excused upon the plea that it tends to keep the youngsters of the staff away from worse places; and we are reminded it is often lonely for lads or young men in branches of banks in small towns away from their homes and relatives. We also know that their rooms at boarding houses are sometimes in winter too cold to read in or sit in, since their salaries do not permit the expense of a fire. Now it is perfectly true that all youngsters are not alike, and that, among bank clerks as among other people, where there is one who wishes to read and study after his day's work is over, there are half-a-dozen who wish for companionship and recreation. And it would be useless, even if it were wise, to attempt to compel the six to adopt the habits of the one, however much we may respect the student. But we do say, unhesitatingly, that the well-known fascinations of the game of poker are bad mental stimulants for the young servant of a bank. And whatever else is done or left undone, with respect to the regulation of card playing in bank premises, poker and betting should be forbidden.

It is proper here to insist upon the importance, to bank clerks as to every one else, of living within one's income. We may see almost anywhere instances of the danger of spending more than one receives—how it leads to deceit, unhappiness, and even crime. People tell us: "These poor devils of bank clerks are not well enough paid; they have to keep up appearances on four or five hundred dollars a year, no wonder they are hard up." Keeping up appearances is the very thing they have no right to do, if by that is meant pretending to means which they have not. A bank clerk is made of much the same sort of stuff as other people—it would be well for him sometimes if he could realize that he is really not of the superior clay that he believes. He is supposed to be well mannered, clear headed, and neatly dressed. These qualifications, if he is also honest, will likely prove sufficient to satisfy his employers and the public. If they do not satisfy "society," so much the worse for society.

The fact may as well be recognized that many of the young men of the present day have become possessed by the notion that a young fellow must be "a sport," while many more honestly think that it is of the last importance that he should mingle with the best society, and conform to its usages, its dress, its festivals. Now, it is not necessary to grudge anybody his *penchant* for society, if he can afford it. Nor would we for a moment oppose sport, by which we mean harmless recreation of an athletic kind—yachting, rowing, foot-ball, cricket, hockey, and anything that tends to physical development and harmless rivalry. But the prostitution of athletics, the cursed inroads of professionalism, betting, gambling—these are to be dreaded and deplored. Still more must we deprecate the notion that it is manly for a youngster to drink beer, to smoke, to play cards or billiards for money. Better far that he should keep aloof from any and all of these. The very fact that smoking and drinking intoxicants are forbidden to men who are training for physical effort should show him that these things are not necessary, if indeed they are not considered harmful.

The company to keep is another matter that the young man of to-day should be more particular about. Even those who thought most highly of the young bank clerk in Napanee were compelled with regret to acknowledge that some of his associates were of the kind which injure. It is as true to-day as it was in the days of the Greek poet and the great Roman apostle who came after him, that evil company doth corrupt good manners. There are many young fellows in Canadian banks and counting houses of good principles and moral habits who are apt to be led astray by the glamor of a false standard of what is manly and becoming. To these we would say: it is manly and becoming to do your work, to pay your debts, to keep good hours, and to qualify yourself for higher duties when they come. And this may be done consistently with attention to exercise and health. But it is not necessarily manly to ape the language or the habits of the professional horsey man or the slang of the prize ring, any more than it is becoming to imitate the employments or the hours of "dead game sports," speculators and gamblers.

TRADE DISCOUNTS.

There are some trade customs or methods of procedure in either shipping, pricing or accounting, which, having been perhaps, proper enough in their inception, have by lapse of time or change of circumstances, become exaggerated until they are no longer useful, but cumbersome, if not misleading. Of such would seem to be the system of "discounts off list," allowed by manufacturers. We in Canada are not so bad in this respect as the States people, who give most absurd discounts in certain lines of trade. There is a complex system of single, double, triple, quadruple, quintuple, and even in some cases, sextuple discounts from printed price lists. The system prevailing in hardware lines, for instance, where competition is so keen, has reached, says an American journal, "a height of absurdity which it is hard to believe can actually exist in any business conducted by sane persons." Alluding to the gas pipe trade as an example, the Philadelphia *Record* illustrates the folly of the system as under:

"Fifty-seven per cent. and six tens off" is a familiar quotation in this trade; and as we presume that the majority of our readers will not understand the meaning of this technical phraseology, we will do the arithmetical sum for their benefit. Thus an article is listed perhaps at $1, 57 per cent. off leaves 43 cents net; 10 per cent. off of 43 cents leaves 38.7 cents; 10 per cent. off of 38.7 cents leaves 34.83 cents; 10 per cent. off of 34.83 cents leaves 31.35 cents; 10 per cent. off of 31 35 cents leaves 28.22 cents; 10 per cent. off of 28.22 cents leaves 25.40 cents; 10 per cent. off of 25.40 cents leaves 22.86 cents—the net price of the article!

SOME TRADE SUGGESTIONS.

This week additional information has come to hand in regard to the recent shipments of Canadian fruit to the United Kingdom. The trial cannot be called a failure, although the fruit did not arrive at Covent Garden in the best condition, inasmuch as a close investigation has shown that the deterioration in quality was occasioned by causes which can easily be removed. The main trouble was the old-time enemy of Canadian exporters, faulty packing. While the packages were attractive in appearance, they were found to be too heavy, and lacking in facilities for ventilation. California fruit, as packed in New York for shipment abroad, is given plenty of air during the voyage by means of cleats nailed between the crates on ship-board, while the packages are not filled to their utmost capacity. The records of the Canadian shipment show the officials in charge of the storage facilities to have been careless, or the plant defective, in that an even temperature was not maintained during the voyage. It appears that sufficient provision had not been made for the fact that packing on board the ship would have the effect of raising the original temperature of the fruit. Canadian fruit-growers should not feel at all discouraged by the results of the shipment. A successful trade cannot be suddenly found in the markets of the United Kingdom, it must be won by continuous hard work which for some time may bring inadequate returns.

For thirty years or more tobacco has been grown in Essex County, Ontario. In the early sixties, a merchant of that district, Mr. Strong, purchased tobacco from the farmers and shipped it to Montreal by sailing vessel. Eli R. Denning, of Leamington, was one of the pioneers of the industry, each year distributing large sums of money to the tobacco growers of Western Ontario. About the year 1864, Lewis Wigle, of Leamington, began to trade in Canadian grown tobacco, and since that time his name has been prominently associated with tobacco culture. Last year the firm of which he is a member shipped sixteen carloads of tobacco, each containing 22,000 lbs. The change in the import and excise duties of tobacco by the Dominion Government has given increased interest to the cultivation of the plant in Canada. It is stated that Montreal manufacturers have been in Western Ontario purchasing tobacco, and have paid from nine to 22 cents per pound. A farmer at Olinda, in Essex, who raised fifteen acres, is said to have sold his tobacco for about $3,000. Another at Ruthven received 18 cents per pound for two acres. Another farmer, who grew a small quantity in his garden and orchard, is said to have received $165 for it. An average yield per acre is about 1,200 pounds. At the prices mentioned above, with a normal crop, the farmers who had tobacco for sale this autumn must have made good profits, as last year the crop was said to be remunerative when but five to seven cents a pound was paid for the yield. The estimated yield of tobacco in Essex county this year is placed at 500,000 pounds.

Since May, 1896, Dr. Andrew McPhail of the University of Bishops College, Montreal, has been attempting, under the instructions of the Government, to improve the conditions of the lobster packing industry. The result of his labors is published in a Blue Book under the name of "Discoloration in Canned Lobsters." For a number of years grocers have forwarded frequent complaints to the lobster packers that customers were returning the tins as unfit for food, through an appearance of "blackening," "smut," or described as being "sour," "fermented," or of an "acid' flavor. The annual aggregate loss in this way has been variously estimated at from $600,000 to $900,000, and the causes of this destruction were well worthy of investigation by the Government. Dr. McPhail has made apearently a most complete and valuable report. The causes of the deterioration and the remedy proposed is of too technical a description to be successfully summarized. A method of canning is commended, which, it is alleged, will remove the difficulties previously met with. Fish canned under this new process have met with the approval of English importers. A prominent London firm makes this suggestion:

> We should be glad to know if we should be able to print on our labels that lobsters packed under this new system would be guaranteed by the Canadian Government to be absolutely free from all obnoxious germs or poisonous matter of any kind, and we think if the system were advertised as a new one, backed up with this guarantee, it would remove a great deal of the prejudice which has been brought about through lobsters of indifferent qualities and also improperly processed having been sold.

Before committing itself to any guarantee of this nature the Government should receive further assurance of the success of the new method, and arrange for an adequate system of inspection of the lobster factories and the operations of the packers.

A DESOLATING FIRE.

Over a million dollars' worth of property, on which there is more than half a million of insurance, and what is worse, several human lives have been lost and several children and men injured, by the conflagration which on Sunday last swept more than two-thirds of the town of Windsor, Nova Scotia, out of existence. Windsor is situated on the tidal river Avon, on an arm of the Bay of Fundy, and has from 3000 to 4000 population. It was largely a wood-built place and had waterworks with an average pressure of 68 pounds; hydrants plentifully distributed, and hose equal to an ordinary emergency. But the fire of Oct 17th was no ordinary emergency. Accounts of its origin do not agree. Some say that it began in a barn; others aver that a drunken saloon-keeper set fire to his house and started it. At any rate the hurricane which was blowing at the time swept the flames along Water street which runs parallel with the river, then eastward along three parallel streets, King Street, Gerrish street and Stannus street, until scarce anything was left standing upon them. And so rapidly did the fire spread that people could barely escape from their dwellings, and the furniture they attempted to save was burned on the street, as indeed were lines of fire hose attached to the hydrants. For seven hours the flames raged, and the business portion of the town is in ruins All three bank offices, those of the Commercial Bank of Windsor, the branches of the Halifax Banking Co., and the People's Bank of Halifax, the custom house and post office, five churches, the public school buildings, the foundry and all the factories, five hotels and the merchants' stores, almost without exception, are gone. The area burned over is said to be a square mile in extent. Happily the buildings of King's College are untouched, being remote from the course of the fire. The station of the Windsor and Annapolis Railway, too, escaped, and about 140 dwellings more or less isolated. The Windsor Cotton Company's mill is also saved.

When the local fire appliances were no longer available, word was sent to Halifax, which responded by an early train with steam fire engines and hose that did much to stay the fire. The Halifax people and military authorities did more; they sent up tents to shelter the homeless people and food for them, as well as soldiers and engineers to smooth as well as might be the rough lot of the townsfolk, hundreds of whom were huddled, half clad, in an open field. Four hundred dwellings are said to be destroyed, and on many of the small dwellings there is no insurance. One statement of the insurance carried puts it at $582,000

Later advices tell of the curious progress of the fire. On the business part of the town, the flames cut a clean gap from the water's edge to the forests in the rear, a space a mile long and half a mile wide. All Water street from the Marine Block to the cycling club rooms with Stannus and Gerrish streets are gone. The weather had been very dry, and everything seemed to burn like tinder. All the wharves and warehouses on the water front between Albert and King streets were burned. There was, fortunately, no shipping to lose. The fire had advanced both north and south on the water front, and then swept to where Albert and King streets converged, over half a mile distant. It is found that the vaults of the Commercial Bank and the Halifax Banking Company are intact, but the People's Bank vault has not fared so well.

In estimating the money worth of the property destroyed, it is helpful to remember that in 1893 the assessed value of real estate in the town was $738,000, and of personal property $469,000, apart from property exempted valued at $400,000. The latest official valuation for taxable purposes was $1,617,750. Broad and excited statements of three millions loss are therefore exaggerated, and the loss is likely to be nearer one million than three. But it is pretty certainly a million or more. We have private information that the aggregate insurance losses were over seven hundred thousand dollars. A list of twenty-nine companies foots up $716,150. The lists published by the St. John papers of 18th inst., and by western journals were faulty. For example, the North British was put down as losing $12,000 where their loss is $61,000. The Western is a large loser but re-insured in part. Three non-tariff offices, the Quebec fire, the Acadia and the Halifax are down for large sums each, as the list will show.

LOSSES BY WINDSOR FIRE.

Western	$75,000	Carried forward	$575,650
North British	61,000	Union	9,000
Commercial Union	45,000	Ætna	16,000
Halifax, Fire Office	60,000	Hartford	6,000
Acadia	55,000	Atlas	14,500
Quebec	42,000	Northern	14,000
National	27,500	Phenix of Hartford	25,000
Sun	26,500	L. L. & Globe	10,000
British America	30,000	Connecticut	10,000
Norwich Union	25,000	I. C. North America	6,500
Queen	27,000	Lancashire	7,000
Royal	24,650	Caledonia	9,000
Phenix of London	25,000	Alliance	3,000
Guardian	22,000	Phenix of Brooklyn	7,000
Imperial	30,000	Scottish Union	1,000
	$575,650		$713,650

There has been a prompt and generous impulse on the part of other places to contribute to assist the Windsor people, so many of whom have lost their all. Halifax and St. John have done well

Montreal and Toronto have not shown any marked liberality. When St. John was overwhelmed by the conflagration of 1877 it is gratefully recalled by the *Telegraph* that Windsor, having then but 2,800 persons gave $4,320 in money and $500 worth of clothing and provisions to relieve the sufferers.

OUR AUSTRALIAN LETTER.

The first shipment of Canadian paper pulp arrived by the last steamer. It is too soon to learn what it may lead to, but it may be safely predicted that the trade will grow. However, the market for this article is limited, and it is useless for too many pulp mills to rush after orders. This much by way of warning.

Mr. Godbolt, of Toronto, came out a month ago as the representative of Messrs. J. & T. Bell, manufacturers of boots and shoes in Montreal. In a business way he has opened up several good accounts. If he had come here a couple of years ago he could have got more and larger orders, for American boots and shoes were then in demand, but the execution of some of the United States manufacturers has not been quite in keeping with their flamboyant promises, so the market is a bit shy of Americans just now. Still this Canadian representative has secured a good footing, and in one or two cases his orders were much larger than could have been expected. The firm, like all other Canadians, is unknown here, and it is showing some faith on the part of Australians to buy a pig in a poke, for they have to pay for the goods before they can see them. The fact that Canada has a recognized representative here helps to secure orders, as his vouching for the character of the Canadian firm is often asked for and accepted. Messrs. Bell & Co. have laid the foundation of an export trade in boots and shoes that will grow.

The record, however, is in another direction. Mr. Godbolt came here a confirmed bachelor, but he is going home a benedict. He has seen, loved and won a winsome Tasmanian, all in a calendar month. Here is a new danger to susceptible Canadians. If any Canadian girl objects to this matrimonial business, it may be of some comfort to know that it is to some extent reciprocal, for it is not unknown that a Canadian girl has come to Sydney and found a husband.

The bicycle business, chiefly that of the United States manufacturers, has had a set-back. A number of agencies for American bicycles that opened with a big boom have closed with a bang—generally that of the auctioneer's hammer. Their machines have been too light and weak for this country. The Canadians in this line are moving along, though. The Wellandvale Company of St. Catharines, is opening a warehouse in this city. It will also handle carriage wheels, and, no doubt, axes and farm implements. The North American Bent Chair Co. of Owen Sound, has a representative and several car lots of goods on the way to open a furniture depot here. I think the courageous efforts of these companies will prove as successful as have the experiments of other Canadians who have given similar attempts a fair trial.

With these signs of development there comes the necessity for your correspondent to caution and complain. The caution is that as Canadians come into competition here there is a danger that they may fall into the very bad practice of abusing each other's goods. This is stupid. If all Canada came they would not secure all the trade of these colonies. It is very hurtful to belittle Canadian products, because one of the obstacles to be overcome here is the natural conception that Canada is a crude country with little manufacturing experience and, therefore, unable to make first-class goods. Nothing is so likely to confirm this notion as the misrepresentations of Canadians themselves. The sale of one good Canadian article always helps the sale of another. The heads of Canadian firms here recognize this, but some of the newcomers and understrappers do not observe it. Canadian houses should insist that while pushing their own goods, every employee shall be prevented from slandering any other Canadian product.

The complaints are the old ones of Canadian exporters being dilatory in letters and shipments, and paying too little attention to details. A firm had an agent here, who had done some business for them; they wanted to increase it, and the agent was willing to undertake it on suitable terms. The Canadian house answered that some one was coming out to do so, but the coming was postponed from month to month. The last ship brought neither representative nor letters, and the Sydney man closed with a United States house that has kept an offer open for his acceptance for some time. As he was an exceptionally good man, this is a loss to Canadian trade. By and by, no doubt, he will get a letter from Canada, apologizing for the delay in replying to his letters and hoping that it has not affected their relations! There are the old complaints of failure to send bills of lading or invoices with goods, to notify if goods are shipped to order, through what bank the draft has been made, or if sent via England or New York, by what line or ship they were sent. All these things are annoying, and some of them are worse than that. If a consignee cannot produce his bill of lading, he can secure the delivery of his goods only upon giving a bank security for the full value.

In one shipment by last steamer it meant a deposit of three thousand dollars lying idle for perhaps three months. If this is not done the goods are put into a bonded warehouse, where the value is eaten up by costs, storage and charges. In another case a shipment came to an agent who was to remit for them in sixty days. There was no manifest, so he had to deposit the cost in a bank. Next he found the freight was forty per cent. more than he was led to expect it would be. His goods, therefore, cost him ten per cent. more than he anticipated, and the transaction will be a loss to him. I know of four cases of this sort. Primarily, no doubt, some Canadian bank or carrier was responsible for many of these neglects or overcharges, but manufacturers must see to it that every detail is properly attended to, by the right parties, that will ensure the correct delivery of the goods at this end. If they cannot do this then it is useless for them to attempt to do trade here. The most discouraging thing about the whole matter is that these blunders are frequently made by firms which have sent representatives out, and who ought to be well aware of the consequences that follow them.

United States firms have been pushing business here during the last year or two in order to regain trade that was lost in 1891 and 1892. Some of these efforts have been on conservative and safe lines, others have not. The latter class came to do business and they were bound to do it. They strove to get big prices, but they were going to sell anyway. They sold, but in the case of one Frisco firm which sold about half the trade done by the United States with this city, the unlucky shippers of the goods are now enquiring " where they come in." It is one thing to do business, and another to do it at some profit.

Colin MacArthur & Co., of Montreal, have been trying to induce Australians to buy Canadian wall paper. It was slow work through a commission house. Recently they sent out a good man and he has succeeded in his mission, for they have secured connections that ought to repay them for their enterprise. The designs and quality of the paper-hangings were always approved of, but special efforts were found necessary to overcome the prejudice against the narrow widths.

F. W.

Sydney, New South Wales, Sept. 13th, 1897.

THE GRAND TRUNK.

The report for the June half year presented by the directors of the Grand Trunk Railway Company at the meeting of shareholders in London, on the 14th inst., is very interesting. It bears throughout the mark of economy in administration and new methods. The economies have not been, however, of a degree or nature calculated materially to diminish the efficiency of the road. The outlay on the permanent roadway was £384,701, which was £14,196 more than in the corresponding period of 1896. The earnings of the Grand Trunk proper show an increase of £14,951 as compared with the first half of 1896. A striking feature of the report pointed out by the London *Economist* is that it reveals a smaller number of passengers carried, and a smaller volume of goods traffic, so that the increase in total revenue arises from more remunerative rates. Thus the average fare per passenger last half-year was 3s. 2d. against 2s. 11d. in 1896. In the same way the average freight receipt was 5s. 8½d. per ton, against 5s. 7¼d. in 1896. Combined with these more remunerative rates there has been a reduction in the train mileage run of 594,073 miles, or nearly 7 per cent. The result of these combined influences is that the average sum received from each train mile run was 4s. 1.66d., against 3s. 9.95d., an increase of 8 07 per cent. The reduction in the train mileage run has assisted the company to save £36,132 in the locomotive department. What effect this may have upon the efficiency of the plant is uncertain, as a part of the saving was made through a diminished outlay on repairs. A reduction of £36,730 was made in traffic expenses. By these economies the ratio of expenses to gross receipts is thus reduced from 71.34 per cent. to 67.49 per cent. Adding this saving to the increase in gross receipts, the addition to the net profit of the Grand Trunk proper for the half-year has been £70,628. There are no important changes in the net revenue account, the principal one being an increase of nearly £7,000 in the interest paid on the 4 per cent. debenture stock, owing to an issue of £450,000 of that stock during the half-year.

The subsidiary lines have proved, as usual, a drain upon profits, the Chicago and Grand Trunk entailing a charge of £50,073, and the Detroit, Grand Haven and Milwaukee, £20,085. After meeting the charges imposed by subsidiary lines, the balance of net profit is reduced to only £2,709. This compares with a debit balance of £82,062, so that the net improvement is £84,771, compared with the first half of 1896. The report points out that the improvement during the year ended 30th June last amounted to £157,008. At the end of 1896 the debit balance on revenue account was £267,683, and was made up of deficiencies in meeting interest charges during the years 1894, 1895 and 1896. The small profit balance for the past half year reduces it to £264,974.

It was stated by Sir Rivers Wilson, in his speech at the meeting, that the intention is to introduce new types of locomotives, and to increase the carrying capacity of freight cars. Five hundred new cars had been ordered. The new method, introduced in July last, by which a closer supervision was exercised in the matter of expenditure, introduced in July, was declared to be working satisfactorily. He had strong words of praise for the new manager, Mr. Hays, and for the prominent officers under him. He hoped and believed it would not be necessary to act on the new measure, which was to enable the capitalization of the revenue debit balance of the system. The serious decline in the revenue, he said, had been arrested; it had been proved to be only temporary. The road's deficit had been reduced since June of 1896 by £41,000, leaving £264,976 outstanding. The company at the present time have not a farthing of floating debt. He also announced that a large block of five and six per cent. terminable bonds, shortly falling due, would be replaced by lower interest bonds. The report was unanimously adopted.

DEATH OF MR. THOMAS PATON.

We have just heard of the death of a retired banker who was well known to a former generation of Canadian business men. Mr. Thos. Paton, formerly general manager of the Bank of British North America, died on the 10th of August last at Waikato, New Zealand, at the age of 91. Mr. Paton was amongst the first officers of the British bank sent out from England to this country, and after having been successively manager of its branches at Quebec and Montreal, he was appointed inspector about the year 1842. The inspector was at that time the head official of this bank on the western side of the Atlantic, and this position Mr. Paton held until his retirement from the service in December, 1869, his title having been changed to general manager some twelve or thirteen years previously. The deceased gentleman was a careful banker and a just administrator, with a fund of kindliness in his disposition.

"YUKON COMPANIES" ABROAD.

Recent visitors to London tell us that one of the features of "The Street" is the interest that is being taken in North-western America by reason of the fabulous stories that have reached England respecting the Yukon gold region. A Toronto merchant, who chanced to be a guest in a London club in September, relates that while sitting in one of the club rooms, reading, a London man whom he did not know came up to him and said: "Pardon me, sir, are you not Mr. Dash, of Toronto?" The reply being affirmative, the stranger went on; "Ah! well; you see we are getting up a company to mine and trade on the Klondike, and we want some one with a local knowledge. Will you accept a directorship? We intend, of course, to qualify you." Mr. Dash did not accept. The "local knowledge" remark indicates the strange ideas old country people have of distances on this continent. To have said that the Klondike is about as far from Toronto as London is, would have caused merely an amused smile upon the Londoner's countenance. And to explain to him that it is infinitely harder to get to the Klondike from here than to London from here, would have made no impression on his preconceived notions. Anyhow, "Klondike" companies and "Yukon" companies are increasing in number in London. There are already between twenty-five and thirty of them, registered. One or two of these are nominally capitalized as high as £250,000, there are several of £50,000 to £100,000, and others as low as £7,000 to £10,000. To know what these companies propose to do, and how they intend to do it, would be interesting, perhaps. We have had proposals on this side the ocean to enrol men by fifties or hundreds as a sort of Brotherhood of Adventurers, who should put their money into a so-called common stock (controlled and presumably handled by a board of brotherly directors, of course), and become eighteenth century Pizarros, exploring North-West instead of South America, and reporting their adventures and their "finds" to a fatherly manager in some city of Eastern Canada. But the idea does not seem to have found favor. It is extremely likely that next spring will see a lot of English people out here destined for the Klondike, and thinking they are going to find it something like Muskoka or Manitoba.

EFFICIENCY OF FIRE BRIGADES.

We so often hear of the carelessness and comparative impotence of volunteer fire brigades in small places in dealing with fires, that it is an agreeable task to call attention to an example of the contrary experience. A subscriber in Barrie submits the following facts with reference to a fire in that place on Tuesday last, and wishes them noted as an evidence of what can be done effectively by a volunteer fire brigade:

"At a fire, evidently started by burglars to cover up their tracks, at Ball's planing factory, this morning, 12th inst., the alarm was sounded at the fire chief's house at 4.30 a.m. A general alarm was instantly sounded from the central fire station, and from the first stroke of the bell the brigade were only four minutes in getting the water playing on the fire. Although the fire was pouring out of all the upper windows on the south side of the factory, yet so expert were the men and so well supplied with water, that in less than ten minutes the flames were under control and all danger of a general conflagration over. The wind was so high that had the fire spread to the frame buildings in the neighborhood, the loss would have been fearful. As it is, we have every reason to be proud of our fire brigade, and every fire insurance company doing business in this town should feel that their interests are well looked after."

SMUGGLING ON THE INCREASE.

The old saying that "it is an ill wind that blows no one good" is recalled in the case of the Dingley law. The high duties which were enacted by this legislation have resulted in serious injury to several important Canadian industries, and it gives some people a certain amount of satisfaction to know that the excess of the law is defeating, in part, the object which it was intended to accomplish. During the recent races at the Woodbine track the merchant tailors of Toronto received in several instances more orders for clothing from American visitors than they could fill within the limited time spent by the racing men in Toronto. These goods, made from materials imported under the Canadian preferential tariff, were purchased at considerably less than the price of similar goods in the cities of the United States. It is needless to say that the visitors had no intention of paying Uncle Sam any duty upon their purchases made in Canada. Doubtless the same sort of transactions are carried on in other Canadian cities with equal success. Some years ago when the United States government imposed an almost prohibitory duty upon clothes, not a few manufacturers of clothing, in Canada, acquired considerable wealth in a short time, although possessing but a limited local business. The prosperous tailors were in all cases conveniently situated on the channels of travel between Canada and the United States. It is likely that the same thing will occur while the tariffs of the two countries remain on their present basis. An evasion of the tariff laws of a foreign country, although not actively engaged in by Canadian merchants, but merely countenanced by them, is not calculated to improve business morals in this country. The border line is, however too long to be thoroughly guarded by customs officials, and high duties imposed by either Canada or the United States must be expected to be followed by extensive smuggling practices.

WATERWORKS FOR WINNIPEG.

A public meeting was held in Winnipeg on Friday evening last, to discuss a by-law under which it is proposed to raise $700,000 to construct waterworks in that city. Artesian wells are recommended as the source of supply, being less expensive and more reliable than the Assiniboine River, in the opinion of Mr. Hering and the city engineer. The report submitted provides for 65 miles of piping, of which 40 miles is proposed to be laid down at once, viz., as far as Pembina school, Nena street, and St. John's College. In view of the small number of persons at the meeting, and the importance of the subject, a central committee and ward committees were resolved upon to instruct the ratepayers as to the scheme. It was moved by Mr. E. L. Drewry and seconded by Mr. Persse, that in the event of the proposed by-law passing, the waterworks should be constructed by a commission.

FOR GROCERS AND PROVISION DEALERS.

The potatoes of Prince Edward Island are said to be not up to the usual standard in quality this year.

A report from Spain is to the effect that there will be few large olives in the new crop, and that the output of the very small sizes will also be very short. The bulk of the crop, it is said, will turn out 85 to 105.

Mail advices from Bordeaux state that the recent decline in the price of French prunes has been recovered. It is estimated that up to October 1st, 250,000 quintals of fruit had been brought into the market by the farmers.

It is stated that in California the raisin market is again showing an upward tendency, owing to renewed rains. Prices at which sales of three-crowns were made for early October delivery will not now, according to reports, be accepted.

A petition containing 17,000 names has been prepared, largely through the efforts of Mr. Dixon, treasurer of the Montreal Grocers' Association, asking the Dominion Government to appoint a chief fruit inspector for Canada, with half a dozen assistants.

Mr. W. Boulter, the well-known canning man, has just returned from a business tour of Western Canada. He disposed of a lot of canned goods in the Kootenay, that he never sold in British Columbia before, and he believes that Eastern Canada will yet do a tremendous business with the mining districts in the coast province.

The first cargo of molasses to be sent across the Atlantic ocean in bulk from the United States, was taken out from the port of Philadelphia by the British tank steamer "Petriana," chartered by parties in New York to carry about 600,000 gallons of syrup molasses purchased from the sugar trust and destined for London. The cost of cooperage, etc., will be saved, as it will be necessary only to pump the liquid into the vessel's tanks.

The Saskatchewan *Herald* does not like the new tobacco excise laws, and proceeds to say so in this fashion: "The miserable, squeezed-out Grit 25-cent plugs of tobacco have made their appearance in town. They don't look like tobacco, and even the Indians won't have them. Mr. Laurier promised to lighten the burdens of the dwellers in the West, and in this case he has kept his word; he has taken one-fifth ofi the weight of the tobacco they will have to carry when they buy a 25-cent plug."

The following circumstantial story is from the Portland *Oregonian*: "Just what medical qualities apple leaves possess, no one here appears to have any knowledge; but they evidently have such qualities, as Thomas Turner, a druggist of Tuler, Cal., has been in Ashland, and wants to purchase two tons of such leaves. He specifies that the leaves must be free from scale and in good condition (sprayed leaves are all right,) and he offers to pay 2¼c. per lb. for them, and to furnish the sacks. He says he wants them for medical purposes."

An average crop of potatoes is reported in Prince Edward Island, and the quality is unusually good. The tubers will go in large quantities to the United States, in spite of 25 cents per bushel duty. Prices in Boston are opening there fairly well, and the *Patriot* hears of some parcels of whites which realized $2.50 per barrel. Many vessels have been chartered to load at the various island ports for Boston. "White- and Hebrons are worth in Charlottetown 26 cents per bushel, and McIntyres about 20 cents. This, or a little over, will be the ruling price here this season. There is some enquiry for our potatoes in the West Indies."

Describing the marked contrast between the Louisiana rice crop as it promised earlier and as it looks now, the *Price Current* says: "All interested in rice were happy over the first information as to acreage and the general outlook. Later unsatisfactory rumors were circulated which crystallized into uncomfortable facts. Drought had materially depleted the yield and affected the quality [and later a storm did the business up]. Many fields did not produce sufficient to warrant the expense of harvesting. Reliable data forced the gloomy conviction that in lieu of the enormous crop predicted, not over 850,000 sacks could be counted on, being 150,000 sacks below an average crop."

Here are two illustrations of value to store clerks. The moral may be drawn without any explanation from us. A clerk in one of the branch stores of Lipton, the English grocer and provision dealer, was on one occasion so persuasive and convincing in his praise of a certain specimen of poultry, that he succeeded in selling the article to his employer, who ordered it sent to his residence. The clerk's astonishment when he found that his supposed customer was no other than Mr. Lipton himself, quickly changed to satisfied delight, upon receiving an increase of salary. Another instance, not quite so pleasant to the clerk, contains an important lesson. A few words of quiet instruction given by Mr. Wanamaker, of Philadelphia, as he walked through his store, met with the following reply: "Mr. Wanamaker, it is impossible to keep this department in the order that you wish." Mr. Wanamaker smiled and said nothing, but the following day a more efficient clerk held the place.

THE CHEESE MARKETS.

In the past week we have received reports of 19 board meetings, at which 64,190 boxes of cheese were offered, as compared with 40,411 boxes offered at 14 meetings the previous week. There is a deadlock between buyers and sellers, as evidenced by the absence of transactions. Quotations were a shade lower than those of a week ago, and merchants appear to be holding off from the market while on its present basis. Predictions are made that the strikes in the British industrial centres must have a depressing effect upon the cheese trade. For the week ending October 16th exports from Montreal, according to the compilation of Messrs. Cunningham and Lemessurier, amounted to 102,762 boxes, as against 104,979 boxes the similar week a year ago. The shipments to date are 1,659,070 boxes, as compared with 1,389,012 boxes to date last year.

WITH THE DRY GOODS TRADE.

A number of King street tailors have added departments for making women's "tailor-made" garments, and report the new ventures as bringing them more money than the older established business.

The Paris correspondent of the *Dry Goods Economist* writes:—Cloths are the most popular materials for the season upon which we are entering. They hold the first place in the selections of woollen goods laid in by the store, and the majority of the made-up costumes and outer garments are built up of cloths, such as vicuna, drap d'ete, moscovietta, amazon and drap cuir.

The consumption of flax is no more than it was forty years ago, the weight being shown as follows:—

Year.	Tons of Flax Consumed.		
	Native.	Imported.	Total.
1850	21,000	89,000	110,000
1895	12,000	100,000	112,000

Mr. Louis Simpson, manager of the Montreal Cotton Mills at Valleyfield, has applied to the town on behalf of the company, agreeing to construct an addition to its factory at a cost of $100,000 if a further exemption from taxation of 21 years is granted. He maintains in support of his request that the company's mills at Valleyfield have turned out during the past nine months one million more yards than during the corresponding period of 1896.

There are not at present many representatives of the Canadian wholesale houses in England, but the few who are there predict a good trade in this country, and are carefully selecting goods in anticipation of a brisk trade. The *Drapery World* of Oct. 9th notes the following recent arrivals: Mr. G. Rowat (Rowat, McMahon & Grainger), London, Ontario; Mr. R. Taylor Reid (Taylor & Bayne), Toronto Mr. H. Macartney (Gault Bros. & Co.), Montreal; Mr. E. Giguere (McCall, Shehyn & Co.), Quebec.

According to Mulhall's "Industries and Wealth of Nations," the British output in 1895 was not quite 400 million yards, of which 205 millions were exported; the value of output was about £13,000,000. Apart from competition, it is clear that the linen trade generally is declining, especially as regards home consumption, which averaged eight yards per inhabitant in 1840, and is now less than five yards. It is said that 60 per cent. of linen operatives die of lung disease, their span of life after entering the factory averaging only seventeen years.

The production of linen in the United Kingdom has been approximately as follows:—

Period	Millions of Yards Yearly.			
	England.	Scotland.	Ireland.	Total.
1791-1800	13	22	42	77
1821-30	24	60	90	174
1861-70	54	140	204	398
1891-93	42	130	172	344

A gentleman connected with Messrs. Coats, on being interviewed by a British drapery paper as to the combination of English thread-manufacturing concerns, expressed the opinion that the new concern would not go in for a cutting of prices but rather direct itself to putting what is called the cop trade on a sounder basis in regard to charges. The combination would be able to effect a saving in various ways, and, in view of the experiences of recent years in the thread trade, the directors would not enter upon a war of prices with the great Coats' combination. If they did, however, Messrs. Coats would no doubt revert to the same policy as when fighting Messrs. Chadwick, which resulted in bringing down the price of 200 yards cotton from 17s. 9d. to 12s. per gross.

Within the past several years remarkable strides have been made by Canadian manufacturers of women's cloaks and mantles. It used to be the opinion of the trade that Canadian-made jackets and capes were old-fashioned, and not articles in which a profitable trade could be done. With new blood in the business and the employment of adequate capital and modern methods, this has been changed, and to-day Canadian productions are serviceable, stylish, and very attractive. Messrs. John Northway & Son, Toronto, who are winning an enviable reputation in the trade, report that the newest feature in styles is the Russian blouse, with either a loose or tight back. In the beginning of the season jackets were rather long, 28 and 30 inches being the popular lengths, but 27 inches is now considered a more fashionable length, and the whole tendency of styles appears to be towards shorter lengths.

BOOT AND SHOE PARAGRAPHS.

The boot and shoe stocks of the estate of Quigley & Co., of Guelph and Berlin, were sold at Suckling's auction rooms; the Guelph stock, invoiced at $10,000, was bought by D. R. Rowan, of Guelph, for 70 cents on the dollar, and the Berlin stock by N. B. Gould, of Port Hope, for 54½ cents on the dollar.

Some of the sufferers by fire in Quebec months ago, are rebuilding. At the corner of Crown and Prince Edward streets the following firms hope to resume business by December: the Dominion Shoe Company, Blouin & Co., and Messrs. St. Pierre and Lapointe. The council will not exempt the factory of Mr. St. Pierre from taxes, as requested.

The claim is made by the United States Rubber Company that it has lost $100,000 a year through the action of the municipal reformers, who secured the removal of mud and snow from New York streets. Was not this an abandonment of the American policy of protection? The mud and snow would have given work to a great crowd of rubber makers, for people would have had to don rubber shoes to get through the slush. Maybe the U.S. Rubber Co contemplates an action for damages.

The Moseley Shoe Leather Company, to whom the council of St. Henri, near Montreal, agreed to advance a loan of $20,000, commenced last week preparations for the erection of their proposed manufactory. They will erect a two-story pressed-brick building, 170 x 40 feet, with two wings 25 x 40. The contract has been awarded, and it is expected that everything will be ready to commence manfacturing in January next.

BOOKS RECEIVED.

Ontario Game and Fishing Laws is the name of a little book recently issued by A. H. O'Brien, M.A. For the sportsman, this book, containing a complete digest of the whole law on the subject, Provincial and Dominion, is invaluable. All true sportsmen are desirous of observing the regulations that have been made for the preservation of fish and game. The statutes are so numerous and scattered, that until Mr. O'Brien completed this little work ignorance might, outside of the courts, be offered almost as a sufficient excuse for their occasional violation. Published by the Canada Law Journal Company, 59 Victoria street, Toronto. Price 25 cents.

Year Book of Canada.—It may be remembered that the statistician at Ottawa, Mr. George Johnson, F.S.S, deemed it necessary last year to almost apologize for having issued a Year Book which was too large. This year he is under no such necessity, for so far as memory serves, the present volume—this is the twelfth year of issue—is the smallest of the series in bulk. But it contains 464 well-filled pages, besides a dozen pages of index. Fifty pages are devoted to minerals, giving the production in three year periods, and a resume of the mining laws; 70 pages to trade and commerce; 63 to currency, banking and finance; smaller spaces to agriculture, education, insurance, temperance, etc., etc. We miss some things that were interesting in the compact summings up of certain subjects in former Year Books. But we can quite understand that there were weighty reasons why, as the compiler puts it, "compression has been the primary principle adopted in the preparation." The Government Printing Bureau has done the typographical work well.

—Not long ago the entire mineral product of British Columbia went to the United States in the form of ore. When smelting works were built in the province later, the silver-lead and the copper matte were still sent to the States for refining and further reduction. But now, the products from the earth are turned out in a higher state of completion. The works at Trail Creek have a refinery, and are shipping gold in fine bars; the Hall Mines Company is converting its product into blister copper, which goes direct to Wales. The *Engineering and Mining Journal* remarks that American ore-buyers will have to look sharply to their business since they have to meet the competition of a Welsh firm in Vivian & Sons, of Swansea, who are offering better prices for copper ore than hitherto paid by Americans, and will besides, advance 75 per cent. of the Vancouver assay value of consignments. They get a freight rate of $8.50 per ton from Vancouver to Swansea.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Oct. 21st, 1897, compared with those of the previous week:

Clearings.	Oct. 2t.	Oct. 14.
Montreal	$13,463,878	$14,259,128
Toronto	7,678,463	8,887,831
Halifax	1,317,248	1,305,226
Winnipeg	3,080,572	3,005,830
Hamilton	657,907	703,888
St. John	542,060	573,868
	$26,740,228	$28,735,771

Aggregate balances this week, $4,549,795; last week, $4,513,667.

—Mr. Edward Hooper, owing to advanced age, has decided to retire from the vice-presidency of the Canada Permanent Loan and Savings Company, of which he is one of the oldest shareholders. Mr. Hooper has been continuously a member of the board of directors of that company from the year 1862. On the retirement of the late Mr. Joseph D. Ridout, Mr. Hooper was elected president of the company, a position which he held for three years. When he retired from that position he was elected vice-president and has been elected to that position ever since. Mr. Hooper still remains a member of the board, and Mr. W. G. Gooderham, of the firm of Gooderham & Worts, Limited, has accepted the position of vice-president. Mr. Hooper was born in London, England, in 1808, and is consequently in his ninetieth year. Although physically somewhat infirm he retains his mental faculties unimpaired, and it is to be hoped may continue to do so for many years yet. During a long residence and a successful business career in Toronto, he has always had the confidence and the respect of the community. The business he established on King street west still bears his name.

—Montreal people may not relish, but they are likely to be stimulated, by the reflections cast at the shipping and elevating facilities of their port by recent writers and observers, Mr. Girdlestone, of Bristol, among them. We observe what is stated about the Prescott Elevator Company having contracted for three large steel tow barges to be used in conveying grain from Fort William to Montreal. These barges will have a capacity of 40,000 bushels each, but when the canals are deepened to 14 feet, the company will have barges constructed with a carrying capacity of 80,000 bushels. It is, besides, preparing to have floating elevators made for use in Montreal harbor, so that open steamers can be loaded with the greatest economy and expedition. The company has satisfied itself that grain can be sent to England by way of Montreal more cheaply than by New York. But it is doing more, it is taking steps to show the shippers that this can be done.

—The idea that it pays to secure good roads appears to be taking firm hold of many minds in Ontario. It has been stated recently by the provincial instructor in road-making, Mr. A. W. Campbell, that he has at the present time in hand more than fifty applications from rural municipalities, asking him to inspect and report upon the best way of improving their highways. This is good news, for the economy of good roads being once demonstrated and measures adopted to secure them, the whole community will feel the benefit. A remarkable fact in connection with the movement is that close upon $50,000 has been spent in road-making machinery throughout Ontario the past year. This looks as if the people were in earnest.

—In the city of Montreal and the suburban town of Westmount the transfers of real estate for the month of September last were 157 in number, amounting to $669,350 in value, as compared with 98 transfers and $306,009 in value in September previous. According to *Simpson's Real Estate Record*, there has been more interest manifested in real estate by a number of enquiries for properties of different kinds. In other respects also the month's business has been of an encouraging character. The volume is greater than in the corresponding month of any previous year, and the business has been widely distributed over the whole range of properties—investments, vacant and residential.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending Sept. 30, 1897.

			CAPITAL.					LIABILITIES.					
			Capital authorized.	Capital subscribed.	Capital paid up.	Amount of Rest or Reserve Fund.	Rate per cent. of last Dividend declar'd	Notes in circulation.	Bal. due to Dom. Molsons and Imperial Banks bonus of 1%, making dividend of 9%.

J. M. COURTNEY, *Dep'y Min. of Fin.*

QUEBEC PRIVATE ACTS.

The following are among the intended applications for private acts at next session of the Quebec Legislature, notice having been given :

To incorporate the town of Windsor.

To incorporate the Cie de Telephone de Beauce.

To incorporate the town of St. Lambert.

To repeal 50 Vict. chap. 77, W. E. Phillips, re estate Charles Phillips.

To amend the charter of the city of St. Henri.

To amend section 8, chapter 80, 56 Vic., respecting the schools commissioners of the town of Westmount.

To amend 60 Vict., chap. 77, North Shore Power Co.

To amend the charter of the city of Three Rivers.

To authorize the school commissioners of St. Henri to make a loan.

To authorize the maintenance of the viaduct of the Hotel Victoria Company.

To extend powers of the testamentary executors of O. McGarvey.

ENORMOUS EXPORTS BY THE UNITED STATES.

A comparison of exports from the United States in September, and in the nine months ended with September, are given by the *Shipping List*, thus :

September was another record-breaking month in the matter of exports. For the month the exports of breadstuffs amounted in value to $34,629,946, an increase as compared with September, 1896, of over 100 per cent. and an increase of about 300 per cent. over September, 1895.

The increase over September, 1894, was about 400 per cent. Other items of exports during September last, with the increase or decrease as compared with the same month in 1896, are given as follows :

Cotton, value $14,655,400; decrease, $2,200,000.

Mineral oils, $4,850,891; decrease therefore $650,000.

Cattle and hogs, $3,090,752; increase, $400,000.

Provisions, $12,835,422; increase, $2,200,000.

For the nine months ended September 30, 1897, the exports of breadstuffs, cotton, mineral oils, cattle and hogs and provisions, amounted to $399,145,945, an increase, as compared with the same period in 1896, of about $62,140,000, or more than 15 per cent.

—In a race between the "Campania" and "St. Louis" the last day out from New York, where they arrived Oct. 9, the Cunarder made 550 knots and the American liner 524 knots.

A cheque for $245,500 paid to the London Customs House for a cargo of 1,300 tons of tea, is said in London to be the largest single payment for duties ever made in the world's history.

—A French scientist has discovered that a residue produced in the manufacture of acetylene from calcium carbide is a valuable fertilizer and insecticide, being specially powerful as a destroyer of phylloxera.

AN AMERICAN BANKER'S TRIBUTE.

There were several American bankers at the meeting of the Canadian Bankers' Association at Niagara Falls last week, among them Mr. Jordan, assistant treasurer of the United States at New York, and Mr. Wm. C. Cornwell, president of the City Bank, Buffalo. In response to the toast "The Banking and Commercial Interests of Canada," the latter gentleman spoke of the satisfactory working and great merit of the Canadian banking system."

"The opening interest among our thinking people on the subject in 1891 has steadily continued, and the Baltimore plan was an outcome of that interest. And the Baltimore plan started the movement for currency reform, a movement which has steadily gained ground, and is to-day the most prominent question before the people of the United States.

"You of Canada have no reason to consider that question. You took it up twenty and thirty years ago, and by the perfecting of your banking system in the acts of 1870-1880, and 1890, you settled it for Canada, and you settled it right. Of course Canada with other countries of the world has felt the wave of depression which began to rise in 1890, but you have had no destructive panic like ours of 1893. This is due surely to the fact that you are upon an unmistakable gold basis. While you have suffered from depressed conditions of business and low prices, vanishing profit, agricultural distress, we have felt all these, and in addition the destructive effect of doubt as to our currency.

In other words, you have had no collapse like ours of 1893. You have no fiat money party, no silver craze, no fatuous yearning for international bi-metallism, and the reason that Canada is enjoying entire freedom from these diseases is due to the fact that currency all over British North America can be increased to any extent that the legitimate demands of business may require, while in the United States our only relief is the issue of national bank notes, which is such a slow process that the pressing demand for currency is always past before it can be got into the hands of the persons needing it; and in far and thinly-settled counties, currency never goes at all. If the people in our western and southern States could obtain money as reasonably and as expeditiously as the people of your Northwest Territories, we would hear no more of 16 to 1.

"To-day you are sharing with us in the advance of prosperity, and in that you are on a solid gold basis, and in that you are equipped with an adequate currency secure and elastic, you are much better prepared relatively than we, to be benefited permanently by the resumption of good times.

"I cannot conceive why, because a thing is British, if it is good, we should not adopt it. The prejudice against the Mother Country does not exist in America among the thinking business men. It is voiced by the yellow journal and the demagogue, but it is not the creed of the American citizen. In his heart he is proud of the Mother Country; he honors your noble Queen.

* * * * *

"We are North Americans, all of us—brothers and friends, not across the sea, but hand to hand, on the border, ready to share and rejoice in the sunlight of the prosperity surely beginning to dawn for all of us in this great and rich and glorious continent of North America, which we own together."

AMERICAN BUSINESS VIEWS.

Henry Clews says, under date, New York, Oct. 16, 1897: "Wall street has not yet recovered its equilibrium after the recent radical process of liquidation. The realizing of large holders has deprived the market of its most important element of strength, and the minor operators are left to meet the shock of vigorous bear attacks as best they may. * * * We recently showed that, on the 29th of September prices had, on the average, fallen from the standard of the 17th nine points; a comparison shows that since the 29th of September there has been a further average decline of 3¼ points; so that, within the past four weeks there has been a fall of 12¼ points. That is certainly a very substantial decline under any conditions, and especially under such as surround the present market. The fall was started less from a conviction that prices were inflated beyond the new intrinsic value imparted by the recovered condition of the country, than because speculation had run to such excesses as to threaten a serious breakdown unless the overdoing were checked and remedied. That check has been most vigorously applied; a vast amount of liquidation has been effected; there is no reckless buying, but rather an excess of caution; and the conviction is general that, when the present mood is past, prices will again materially recover.

At the moment, three influences are affecting the market unfavorably—the yellow fever, the election excitement, and the new phase of Cuban affairs. The latter is not calculated to precipitate any immediate action on the part of our Government.

In any event, each of these three factors has already been made to do duty for the pessimists much beyond what their intrinsic importance warrants. They have been used to force down prices to a point which it would seem must bring a turn in the market. The men who are holding back important buying orders have so far kept close rank; but, should one or two of them be tempted by the prevailing low prices, their action might easily precipitate a buying movement that would produce a sharp rally in prices. * * * In the meantime the condition of the railroads, which is the commanding consideration affecting the value of securities, passes as a silent factor. The earnings in all sections continue at the high rate recently established, and the September gross business will show phenomenal figures. When the market escapes from its present dumpy mood, these facts will receive due consideration and counteract the minor influences that, for some days past, have been invested with such exaggerated importance.

The advance in the Bank of England rate to 3 per cent. is what I foreshadowed some time ago, and from appearances it is more than likely to go to 4 per cent. at least very soon. The bank reserve is now $30,000,000 lower than it has been for a similar period since 1893; while its loans are $7,000,000 larger than for any October month in eight years. The immediate future moves of the Bank of England will be important factors at all the great money centres, and operators on this side will have to keep a watch thereon for their guidance.

Commercial.

TORONTO MARKETS.

TORONTO, Oct. 21st, 1897.

DAIRY PRODUCE.—Dairy butter of choice quality is in limited supply and prices are firmer. For choice dairy tubs merchants quote 16c., and 14 to 15c. for medium qualities, while large rolls are worth 16c. and pound rolls 17 to 18c. per lb. Creamery butter is more active. The cheese trade is elsewhere reviewed. There has been a fairly good supply of eggs coming forward, dealers quoting pickled, 13c.; held fresh, 15c., and fresh, 16c. per dozen.

GRAIN.—The wheat market is dull Little change has taken place in the trade during the past two weeks. Quotations have remained very steady, and few fluctuations have taken place. There is some enquiry for barley from the Old Country markets, both for feed and malting purposes. Rye is firm and in active demand. Oats are slower in movement, and prices have declined 1c. per bushel; the same may be said of peas. Buckwheat is in active request for export, and considerable shipments have been made to the United Kingdom. Trafton makes the exports from the Atlantic coast last week as follows: Flour, 278,200 barrels; wheat, 3,324,000 bushels; corn, 2,132,000 bushels.

GROCERIES.—For staple lines of groceries there has been a good demand during the week. Sugar values are steadier, as a result of the new selling arrangement, but orders appear to have fallen off somewhat. Large shipments of new Mediterranean fruit have been received ex. the steamer "Avlona." The quality of the Valencia raisins shows a distinct improvement over that of early arrivals. Cables from Sicily quote 16s. 3d. on currants for prompt shipment. A quantity of coffee has also come into the market this week, a part of the cargo of the steamer "Mozark."

HIDES AND SKINS.—The hide market, by the jealousy that exists between certain firms, is worse than unremunerative. Merchants are buying green hides at 9c. and selling them at the same price, which, of course, means considerable loss to the trade. Skins are also too dear, commanding 90c. There is at the present time little appearance that the trade will soon assume a normal basis. A Chicago despatch of the 19th inst. says: "The tone of the market was steady; buyers showed a moderate amount of interest, although not large buyers; prices unchanged, with hides for prompt delivery bringing outside prices. The close was at 11 to 11¼c. for native steers; Texas at 10¼ to 10½c.; butt brands at 10 to 10¼c.; branded cows at 9¼c.; Coloradoes at 9c.; heavy native cows at 10 to 10¼c., and light do., at 10 to¼ to 10½c."

PAINTS AND OILS.—There is a fairly active trade doing in general supplies for autumn and winter use. Shipments have been active and widely distributed. From Manitoba and the North-West reports of excellent trade conditions are coming. Linseed oil, turpentine and white lead are in good demand at advanced prices. Prepared paints are going out freely, and evidently farmers and others are taking advantage of the present opportunity to make needed improvements in their buildings. A recent advance in window glass is reported, which in the opinion of the trade is the forerunner of another rise in prices. Recent advices from Savannah indicate that the turpentine market is easing off.

PROVISIONS.—Fair deliveries of dressed hogs are being made, and all are readily taken at $6 to 6.10, the market quotation. Activity continues in the movement of products. A recent American report says "consumption at home, if not abroad, has continued to go from hams to bellies, as it has been doing the past year or two. Hams are now relatively cheaper than bellies, and yet demand is not stimulated thereby. Hog supplies have been disappointingly light, and prices have advanced West, in spite of packers setting on both the hog and product markets."

SEEDS.—Alsike clover seed is coming forward more freely, while red clover continues in unchanged supply. Values are steady and without change. For red clover, $3 to 3.20 is paid, and for alsike $3 50 to 4.50 per bushel. Timothy seed continues fairly active, dealers quoting 90c. to $1.25.

WOOL.—The local situation is quiet and without change. The fifth series of London wool auctions closed on the 12th inst. The next series will commence November 25th. The first series for 1898 will be held January 18th, and the second series for that year March 15th. The first Melbourne sales opened October 13th. In sympathy with Sydney, an advance of ½d. over the close of the last season was at once established. Later the advance was quoted at three farthings. The sales of the week are: 3,404,000 pounds domestic and 1,210,000 pounds foreign, against 4,978,000 pounds domestic and 3,028,500 pounds foreign last week, and 2 874,000 pounds domestic and 770,000 pounds foreign for the same week last year.

MONTREAL MARKETS.

MONTREAL, Oct. 20th, 1897.

ASHES.—Receipts continue light, and the market may be called rather firmer. Some

Paper Garments for Women

TO REPEL THE WIND AND RETAIN THE NATURAL WARMTH OF THE BODY.

makers are said to be holding out for $4 for first quality of pots, but $3.80 to 3.85 is about the usual quotation; seconds, about $3.30, and pearls, $4.40 to 4.50.

CEMENTS AND FIREBRICKS.—Business in cements is good. Receipts of Belgian for the week ending to-day have been 14,200 brls., and 600 brls. of English, all of which have been distributed from ship. Shipments are somewhat behind what they should be, owing to a lack of available freight space, and some considerable scarcity is looked for. Belgian manufacturers have followed the example of British makers, and have advanced prices equal to threepence a barrel; this with higher freights has caused local dealers to advance Belgian to $2 for small lots, with a range down to $1.85, at which latter figure a 1,000-brl. sale is reported; English makes are quoted at $2.10 to 2.20. Receipts of firebrick 76,000; prices are steady at $16 to 21.

DAIRY PRODUCTS.—The cheese market may be called from ⅛ to ¼c.weaker than at last writing, and at the moment orders for buying from the other side are not very numerous. Last week's exports, however, were quite heavy, 40,867 boxes going to London, 40,011 boxes to Bristol, 13,500 boxes to Liverpool, 6,000 boxes to Glasgow, and smaller lots to Belfast and Leith, making a total of 102,762 boxes, and bringing the total for the season to date, up to 1,601,789 boxes. The present export demand for butter is quiet, shippers claiming that they cannot operate profitably at present quotations, which are a shade lower than a week ago. We quote fine creamery 18 to 18½c.; Townships dairy 14 to 15c.; Western, 12 to 13c. Last weeks shipments of butter were 16,307 pkgs. Eggs still come in pretty freely; we quote boiling stock, 14 to 15c.: best candled, 12 to 14c. per dozen.

DRY GOODS.—City retailers are disposed to complain that the continued open weather is retarding sales, and letters from Quebec city and some of the larger Western towns are of similar tenor, but wholesalers report that country sorting orders are coming in quite freely, both by mail and from travellers. Very fair orders are also being booked for certain lines of spring goods, such as English prints, tweeds, etc., also for carpets, curtains, and sundry other lines, and business as a rule is quite a bit ahead of last fall. Samples of new Canadian prints won't be shown till November. Collections are keeping up very fairly, and show improvement on September month, which, on the whole, panned out better than was anticipated.

GROCERIES.—The distribution continues of a satisfactory character, with special briskness in dried fruits, at very firm prices in all lines. The cargo of the "Avlona" has already been well distributed. The second and last direct steamer, the "Bellona," calls at a larger number of Mediterranean ports, and will have a more assorted cargo. She is scheduled to sail from Cadiz to-day, so that it will probably be the 8th or 10th prox. before she reaches Montreal. Refiners report the demand for sugars as well maintained, and quotations are firm at the late slight advance, factory prices being 4⅛c. for standard granulated, in ordinary wholesale lots; round lots, 4 1-16c.; German refined, 313-16c.; yellows from 3⅜ to 3¾c. Molasses holds a pretty strong position, it being calculated that the supply for regular trade purposes is some 2,000 puncheons short of last year. Quotations are 25c. for Barbadoes in car lots, 26c. in single puncheons, and Porto Ricos a cent higher. In teas there is not a great deal more doing; there is more enquiry for low grade blacks between houses, with some fair lots under negotiation, but it seems rather hard to get buyer and seller together. Late Japan cables report a firm and active market there.

HIDES AND TALLOW.—Receipts of beef hides are somewhat larger with the advancing fall, but supplies are readily placed, and there is no accumulation in warehouses. Outside markets are apparently dull, Chicago being reported at 9¼c., but no change has been made in local figures, which are on the basis of 8c. paid by dealers for No. 1, and 9c. the quotation to tanners. Calfskins, 8 and 6c. per lb.; lambskins, 60 to 65c. each. Tallow in poor demand at 3 to 3½c. per lb. for rendered.

HOPS.—There is apparently quite a difference between the views of growers and buyers, and the latter are holding off from any active buying. From 12 to 13c. seems about the general quotation for new Canadians, an extra choice lot might bring 14c. Yearlings, dull, at 6 to 7c. per pound.

LEATHER.—The demand is quieter, as boot and shoe men are getting towards the end of the season for the manufacture of fall foot wear, and in some cases are preparing for stocktaking; some of them, however, report they are fairly busy on sorting orders. Prices in all lines of leather keep up very firmly, and there is really some scarcity of black leathers on spot, tanners writing that they can do better by shipping to England. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30

to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.: Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—Further advance is noted in iron piping, one inch being now quoted at $4.10, as against $3.90 last week. All hot water radiators are also advanced one cent per square foot. No noteworthy transactions are reported for the week in either Scotch or domestic pig iron, though some fair deals in domestic brands are under negotiation; quotations in this line are rather firmer. The asking mill price for Canadian bars is $1.40, though car lots could probably still be done at $1.35. Lead is easier at home, but is scarce on spot, and local prices are steady at the advance. We quote:—Summerlee pig iron, $18.00 to $19.00; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $16.50, to $17.00, ex-store; Siemens pig No. 1, none; No 2 Siemens, $15.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.25 to 15.50; machinery scrap, $1400 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.35 to 1.45; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5 90 to $6 00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.75 to 3.90; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16½c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

Oils, Paints and Glass.—The movement in these goods is very fairly sustained. The strong advance in turpentine, noted last week, is well held, but no further rise in price has been developed, though such has been generally expected. One large glass importing house is reported as putting up quotations 10 cents, making first break $1 40, second ditto $1 50, but no general advance has been established; in other lines there is nothing new.. We quote:—Turpentine, one to four barrels, 50c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels. 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 40 to 42c. per gal.; Gaspe oil, 36 to 38c. per gal.; steam refined seal, 48c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, $1.30 per 50 feet for first break; $1.40 for second break; third break, $2.90.

JAMES LOCKIE, President. JOHN SHUH, Vice-President.
ALFRED WRIGHT, Secretary.
T. A. GALE, Inspector.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risks before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY

BANK DEPOSITS AND BICYCLES.

A conversation with the president of a savings bank in a Michigan town the other day developed some new information in regard to the bicycle. "In a small town, like the one in which I live, the savings bank men may easily become personally acquainted with practically every depositor, and I make it a point to take full advantage of that circumstance. Consequently I am often advised with concerning the financial affairs of our depositors, which, though intrinsically small, are of vast importance to them. This makes it all right for me to question depositors now and then about their savings. Early last spring I noticed that a number of mechanics who had long been in the habit of making regular deposits, and whom I supposed had steady employment, became decidedly irregular in their visits to the bank. Others stopped depositing altogether, and still others who continued to deposit regularly, put in less each time than formerly. Naturally I began to make enquiries, and more than three-quarters of those I spoke to confessed that their surplus money was being used to meet installment payments on bicycles instead of finding its way to the savings banks. I suppose our bank's deposits must have fallen off some thousands of dollars from this cause, though I haven't taken the trouble to make a careful estimate. In the whole country installment payments for bicycles must have decreased the total savings banks' receipts by very large amounts, though, of course, there have probably been compensatory deposits from workmen in bicycle shops in towns where such establishments are located."—*Milling World.*

SHYSTER LAWYERS AND LIABILITY CLAIMS.

The measure of the shyster lawyer, who makes life unpleasant, not to say miserable, for the liability companies, has been well taken by the *Insurance Herald* in the following :

Do you know what a shyster lawyer is ? If not, apply to any liability man and the information will be furnished gratis, accompanied by some side observations which will be found emphatic and interesting. The snide lawyer of Chicago is a greasy, seedy-looking individual, with a shiny coat, a white lawn tie, an oily way, and sometimes a silk hat of ancient vintage. He may have started in life with intentions honorable enough, but the wolf came gnawing at the door, and there were no clients to stave him off. So, dropping conscience to the breeze, the man becomes a "shyster," locates his den in a dusty, dirty, dingy part of the city, and sails forth to get clients by hook or by crook; to borrow, beg and steal. He haunts the police courts, and for the price of a drink stands ready to defend anything, from a plain drunk and disorderly to an amateur sneak thief. He has learned of the existence of the liability companies, and is endeavoring to make their lives a burden. Clothed in the alleged habiliments of the law, he tries his best to bulldoze fake claims through the adjusting department, sometimes with success, although the shyster is spotted the minute he places a foot in the doorway and he finds the place as warm and cheerful as cracked ice.

Lately the disreputable Blackstoneans have fallen into what they regard as remunerative practices. They follow the ambulances, whenever one appears upon the street. At the end of the journey they interview the injured man and try to make out a damage suit, or make other arrangements by which they can bleed the companies. A shyster lawyer will follow an ambulance for miles. Plenty of whiskey libations do not appear to affect his mind while "chasing" the hospital vehicles. Sometimes a seedy rival will also enter into the chase, and then the race is to the swiftest, the companies being afterward apprised of the winner. But there are lawyers and lawyers. When a reputable Chicago law firm takes a case through motives of charity or otherwise, the companies always give them a respectful hearing, and in many cases accept their statements carte blanche, knowing the reputation of the firm is such that no case not first thoroughly investigated would be taken.

DARING THIEVES.

Word came from Chicago on Saturday last that Mr. Colleran, Chief of Detectives in that city, and four of his men, had captured four of the most successful and daring burglars of the United States and Canada, and $25,000 worth of stolen property was in the hands of the police awaiting identification. The men under arrest are "Sheeny Joe" Rubenstein, the leader and brains of the gang; Harry Rogers, James Flaherty and James Williams. Letters in the men's possession, which have been passed between them, showed they had been taking a flying trip from Atlantic coast to Pacific coast, robbing right and left. These letters also showed they had agreed to meet in New York city October 1, and then go to St. Louis, where the goods would be disposed of. Evidence was found on their persons indicating that they had committed robberies at New York, San Francisco, Denver, Rome, N.Y., Rochester, Dunkirk, Buffalo, Troy, Cleveland, London, Quebec, and other Canadian cities. "Sheeny Joe" and Harry Rogers, alias "The Dip," are Canadian thieves, and Flaherty and Williams are New York crooks. All have criminal records as safebreakers and all-round crooks. Their photographs adorn the rogues' galleries of almost every city in the country. The police of the entire country have been searching for the men for six months past. All are young men, none being over 30 years of age.

INVESTORS AND U.S. RAILWAYS.

Many have wondered why there should be only one bidder when a piece of railroad property so desirable as the Union Pacific was to be sold under the hammer. The main reason is that foreign capital has lost faith in American railroads, and that it was not an easy task to raise $50,000,000 in this country. Now that foreign attention is turning this way again, the sale attracts attention in London, and there is talk of a rival bid from there. Probably nothing will come of it. A month is rather short notice to get together £10,000,000, even in London.—*N.Y. Commercial Advertiser.*

PECULIAR CONDITION OF THE IRON MARKET.

The course of the iron trade has always been peculiar. Its history is one of surprises. The unexpected happens, while that which should take place, according to general reasoning, fails to materialize. Those who have been in business for many years as iron merchants or consumers of iron are full of reminiscences of how they failed to correctly interpret trade indications, and either bought at the wrong time, or failed to buy at the right time, made contracts running too far into the future, or else lost fine money-making opportunities by not making long contracts.

The outlook at present is just as puzzling as at any previous time. Men are mystified by the singular steadiness of prices under the strongest of all influences. Huge contracts have been made, exceeding anything ever before known in the history of American iron and steel, until plant after plant has been forced out of the market with its order books overflowing, and yet the market appears placid. Some advances have taken place, but they have been very moderate. At any previous period of active buying the placing of so much business would have caused a "bulge" of large proportions. When the fact is considered that all the large steel works are crowded with orders for delivery up to the close of the year, that they have in some cases been obliged to purchase from other works to fill pressing specifications for shipment, and that they are being urged to open their books for orders for next year's delivery, the maintenance of quotations at their prevailing low level is most remarkable. It is this persistency of low prices which makes many men uncertain as to the future. They argue that the trade in general is not yet convinced that business is on a permanently stronger footing, and they will not believe it until they see a substantial advance. A fair advance would undoubtedly be welcomed by all parties, manufacturers and consumers, but it is certainly to be hoped that it will not be unreasonable. The iron market at present is not unlike a tinder box, needing but a spark to make a flame. The great producers probably realize this, and are, therefore, continuing to quote low prices, even if they cannot book the business offered.—*Iron Age.*

—The increase in the price of rubber in consequence of the great demand for the article for bicycle and carriage tires, has turned the speculators' attention to rubber planting, and the suitability of land in the northern territory of Australia, for the growth of rubber trees, has been proved by experiments made at the Palmerston Botanic Gardens. Several applications have been made to the South Australian Government controlling the territory, for areas.

PETROLEUM NOTES.

The movement in petroleum on the Antwerp market, reports the British consul, is gradually decreasing, partly on account of the fluctuations in price not being as a rule sufficiently frequent to attract speculators, and partly through the general adoption of the tank system, which naturally confines the trade to a limited circle. The imports for the years 1895 and 1896 were as follows: From the United States, 1895, 782,947 cases; 1896, 856,700 cases; from Russia, 1895, 263,500 barrels 1896, 160,000 barrels.

WATER AND RAIL TRANSPORTATION.

One of the most common failings of those who compare water and rail transportation is the assumption that because the State pays for the maintainance of the waterways, therefore it costs the people nothing. Mr. Erastus Wiman, who is at present an advocate of the enlarged Erie Canal, in order to supply cheap transportation to the seaboard, falls into this error in his efforts to impress upon the people of the country the importance of his pet project. He claims that the enlargement of the Erie Canal, which is now being made by the State of New York at a cost of nine million dollars, will give to the canal a carrying capacity for western food products equal to that of the five trunk railroads paralleling it, and he adds, "the railways now carrying these products are exacting rates equivalent to paying fixed charges on five hundred millions of capital; the canal, being free, exacts no such tribute." Mr. Wiman forgets to explain who pays the nine million dollars, and why that sum should not be considered an expense of transportation just as much as any other sum paid out by the railroads; nor does he make it clear just why the people of the State of New York should pay out this nine million dollars in order that the people of the west may ship their food products at lower cost and without charge so far as any compensation for that particular outlay is concerned. Although it is true that no sufficient data can as yet be supplied to demonstrate the proposition, it would seem as if the experience of recent years has established the fact that an artificial waterway cannot live in competition with the railway. Indeed, it is doubtful if wherever parallel routes are possible, any waterway can successfully compete with the railway for long distances. It is, of course, possible that with improved methods of water transportation the present apparent disability of the waterway may be overcome, but just at present the rail carrier seems to be ahead in the race.—*Railroad Journal.*

WEST INDIA TRADE.

Writing on the subject of West India trade to the Montreal *Witness*, Mr. John Fulton dwells upon the anomaly of Canadian products "filtering through a United States medium, becoming American goods." He says he has been in every West Indian island, and has sought to know why Canadian products are not all imported direct. He was answered that till very recently there was no direct steam communication, and that even when started and subsidized by our Government, it was so irregular and inefficient that it had no appreciable effect in promoting trade with Canada. "Then, again, we have not the middle man, the enterprising commission merchant, who would travel through these islands, take orders for anything and everything, charter and ship, if desired, and ship in bulks, thus saving the merchant both expense and trouble of either going himself or sending a buyer, and who is ready to dispose of any return cargo, be it sugar, molasses, cocoa, or scrap iron." Then Mr. Fulton thinks that our geographical position militates against us, Halifax being at least two days longer from any portion of the West Indies than New York.

A NOVEL PLAN TO INCREASE EXPORTS.

The Government of France is proposing a somewhat radical method of increasing the foreign trade of that country. The four or five largest mercantile houses of Paris, and among them le Louvre, le Bon Marche, le Printemps, have taken initiatory steps for establishing branches abroad. The places in which such offices are to be established are Shanghai, Yokohama, Bombay, Alexandria, Sofia, and Colombo. By the establishment of such stores, which attend to the immediate disposal of goods, it is supposed will yield better results than by exports sent to domestic houses. Every imaginable support is to be rendered by the French Government. These branches will not sell all the numerous articles which fill the premises of the Parisian firms, but it is definitely understood that the branches of the large houses mentioned will sell only French goods in their branch establishments, this principle having to be kept in view from the beginning. It is impossible to say what developments might occur if this plan of trading were extended to Canada and the United States. The great retail establishments of France and of the United Kingdom might find it advantageous to extend their operations to certain foreign countries where the prestige of their name would prove of great service, but such operations must be destructive to domestic undertakings.

—A despatch of Monday last from Baku, on the Peninsula of Apsheron, on the west coast of the Caspian Sea, a centre of the great oil-producing regions in European Russia, says that a petroleum spring at Romany, a suburb of Baku, caught fire the previous night. The fire spread quickly to other springs in the vicinity until the whole valley was a sea of flame. A St. Petersburg cable of Tuesday says the losses are enormous, and the fires are still burning. Four springs and twenty-three bore holes have been destroyed, as well as several magazines and houses.

JOHN BARBER.

Mercantile Summary.

Messrs. Lonsdale, Reid & Co., wholesale dry goods dealers, Montreal, intend liquidating and withdrawing from business altogether. Their stock has just been sold, *en bloc*, to the Gault Bros. Co.

The number of passengers carried by the Quebec electric railway is said to have reached 243,000 during September. The new stock of $80 000 issued to raise the total stock to $400,000 was at once taken by the former stockholders.

Many persons expressed sympathy with the Toronto lawyer, T. W. Howard, when he was sent down the other day to gaol for misusing clients' money. But it now appears that Howard has been guilty in several instances of forging names to notes, which he got discounted, and of other irregularities.

The immensity of the Bushnell Oil Company's pipe line from the Enniskillen oil fields may be judged from the fact that it takes between seven and eight hundred barrels of oil to fill the pipes—that is, that quantity of crude was pumped into the pipes before the oil arrived at the company's works here.—*Sarnia Observer*.

A sub marine cable has been received by the Bell Telephone Company from Hamburg to replace the one between Quebec and Levis, which was destroyed last winter. The new cable rolled up forms a cylindrical mass four feet wide and eight feet in diameter, and weighs 18,000 pounds. It is 3,000 feet long, 2¼ inches in diameter and contains six wires.

The Canadian Pacific Railway last week handled a shipment of 1,500,000 pounds of canned beef from Kansas City for the Japanese army and navy. The first shipment was made in a special train of twenty cars, over the Chicago Great Western Railroad. At St. Paul the cargo was transferred to the Canadian Pacific for Vancouver, whence it goes by steamer to Nagasaki.

Burglars operated successfully last Sunday morning on the private bank of A. M. McIntyre, Dutton, Ont. They gained an entrance to the bank by prying open the front door with tools stolen from stores near by. There were two explosions. The first, it is supposed, blew open the vault, and the second the safe. The safe contained over $1,300, but it is not known how much money they secured. Mr. McIntyre's diary was also taken The bills were mostly of the Imperial and Molsons banks.

Report says that the Grand Trunk Railway Company will spend $25,000 at Kingston in fitting up wharfs, flour sheds, and railway switches, to secure a share of the trade that now goes to Prescott. Propellers coming from upper lake ports, having grain in their holds and deck loads of flour, etc., have been accustomed to discharge both grain and merchandise at Prescott. Hereafter, it is thought some of them will be induced to discharge at Kingston, and the Grand Trunk will benefit by the change.

Up in the Lake St. John district of Quebec people want modern factories. We observe that the Roberval Wool Manufacturing Company has been formed, with a capital of $10,000, and is applying for letters patent of incorporation to make woolen and cotton tweeds and shoddy, to spin flax, to dye, full, clip, press, etc. The principal place of business will be in the village of Roberval, on Lake St. John. The promoters of the company are: Messrs. N. Wells, A. Du Tremblay, T. Villeneuve, C. Lindsay, L. P. Bilodeau, L. W. Gingras, J. Juneau, T. Du Tremblay, P. E. Bergeron, L. E. Otis and B. A. Scott.

Another result of the late extensive forest fires in the Ottawa district is the reported embarrassment of the Edwards Trading Co., with headquarters at Thurso, Que., but who also carried on stores at Buckingham, Que., and at South Indian and Maxville, Ont. Their South Indian establishment was burned several weeks ago, together with a large quantity of cordwood and lumber, the loss being estimated at $30,000, with insurance of only $10,000. The creditors had a meeting in Ottawa last week, and the company seeks an arrangement at 50 cents, cash. Liabilities are figured at about $63,000.

On Monday last a general meeting of the stockholders of the Consumers' Gas Company was held here. The following were elected directors: Samuel Alcorn, M. Baldwin, G. S. C. Bethune, Henry Cawthra, Geo. R. R. Cockburn, M.A., Isaac C. Gilmor, Geo. Gooderham, Jas. Henderson, M.A., Thomas Long, Dr. L. W. Smith, Sir Frank Smith, Thos. R. Wood. At a subsequent meeting of the board of directors, Dr. Larratt W. Smith and Sir Frank Smith were respectively re-elected president and vice-president. The forty-ninth annual report of the directors was handed in, showing a favorable condition of the company's affairs, with a profit and loss account of $56,121.06.

It is understood that the last offer of G. Bresse & Co., shoe manufacturers, Quebec, namely 60 cents on the dollar, has been generally accepted, and that the compromise may be regarded as an accomplished fact. The proposition is to pay 20 cents cash and 40 cents spread over a year.—— Joseph Darveau, of the same city, who started a small tea and crockery business last spring, was under seizure for rent several months ago, and is now before his creditors with an offering of 20 cents on the dollar.——A demand of assignment has been made upon James Ellis, Quebec. Mr. Ellis retired from the firm of Madden and Ellis, coal merchants, some months ago, and has since been assisting the shoe manufacturing firm of J. V. Plamondon & Co., with his endorsation, and it was supposed at one time he would become a partner. His difficulties are due to complications with that firm.

Ovide Lariviere, in a small jewelry way, at St. Aime, Que., has made a voluntary assignment, and will be wound up.——A. A. Hunter, general merchant, who has been trying to effect a general settlement, owing to losses by lumbermen who suffered by freshet last spring, has finally arranged to pay 25 cents, cash, on liabilities of some $7.000——G. W. H. McKenzie, of New Richmond, Que., is in difficulties, and wants to assign to a local man, to whom creditors make objection. The business is thought to have been really carried on in the interest of his father, W. L. McKenzie, who failed some years ago, at Black Cape. The liabilities are said to reach to $8,000 or $10,000 with comparatively small assets.——The assignment is reported of W. R. Crepault & Co., general store, Kamouraska, with liabilities of some $5,000.——J. F. Martin, a Sherbrooke shoe dealer, who recently tried to secure a compromise at 30 cents, after a few months business record, has now assigned, owing $3,700.——A settlement has been arrived at in the matter of E. F. Keene & Co., lumber dealers, Keene's Siding, Que., Mr. T. A. Trenholme, of Montreal, the principal creditor, takes the estate and pays the general creditors 25 cents on the dollar. The estate is a large one.

The Gurney Foundry Co., Limited, TORONTO.

The Gurney-Massey Co., Limited, Montreal

Mercantile Summary.

The estate of the Globe Woolen Mills has declared a dividend of 25 cents on the dollar, on liabilities amounting to a quarter of a million. A further dividend of several cents on the dollar is to be declared later.

The manager of the branch of the Merchants Bank of Halifax, to be opened in Vancouver, will be Mr. William Botsford, who comes, we are told, from Dorchester, N.B. The *World* of 15th inst. says that Mr. Dickie, the manager at Truro, N.S., was leaving Vancouver that day for Kootenay, and then going home.

A Montreal despatch of Saturday last says that pine lumber and timber are showing an advance. Mr. E. H. Lemay, of that city, bought from the St. Anthony Lumber Company, of Whitney and Ottawa, a quantity of choice white pine lumber to the value of $300,000 as it stands at the mill, intending to winter it and then to ship it abroad. He has secured, the despatch says, about a quarter million worth more elsewhere, which is also intended for export.

At a special meeting of the shareholders of the British Columbia Southern Railway, held in Montreal, Sir W. C. Van Horne, T. G. Shaughnessy, R. B. Angus and William Hanson, all of Montreal; Sir George Kirkpatrick, and E. B. Osler, Toronto; J. A. Gemmill, Ottawa; Harry Abbott, Vancouver, and Wm. White, Winnipeg, were chosen directors. It is on the charter of this company that the Canadian Pacific Railway is building the Crow's Nest Pass line between Lethbridge and Nelson. Over 90 miles has been built since the company begun work in July.

A special meeting of the Vancouver City Council on the 14th instant, considered the proposed agreement with a company to erect a smelter in that city. The name of the company is the Vancouver Smelting and Electric Company, capital, £250,000. The company agrees to put up $6,500, and covenants to show by April 1st that they have made progress in the erection of the works; and also, by December 30th to have the smelter in working order, and the refinery by June 30th, 1899. The cost of the works, including the electrical works on Seymour Creek, is to be not less than $400,000. No Chinese or Japanese are to be employed in or around the works. In return for this, the city is to pay a bonus of $65,000 at the rate of $1 per ton of ore smelted, and to receive in return $65,000 worth of paid-up stock in the concern. This draft agreement was to be ratified at a subsequent meeting of the council.

It is bad enough to have had fourteen instances in a very few weeks, of vessels grounding in the "thirty foot channel" between Montreal and Quebec, few as were the injuries received by their touching ground. But it is unpardonable for Quebec journals to refer to the St. Peter's deepening, and the excavated channel east and west of it, as "the Montreal ditch." The low water which has for some time prevailed in the Lower St. Lawrence is said to be caused by the dryness of the season. The steamship "Lake Superior" ran aground opposite Champlain on the 20th, and the "Vancouver" on Sunday last near Cap a la Roche. However, the Quebec *Chronicle* dares to speak of the trip from Quebec to Montreal by a deep-laden steamship as "the attendant risk of running aground in a treacherous and dangerous mud channel plentifully dotted with rocks." The editor had better take some friends or constables with him when he visits Montreal.

An arrangement which will prove of importance to our inland passenger transport via the St Lawrence, is likely to be effected by the Richelieu and Ontario Navigation Co. forming a combination with the Niagara Electric Railway Co. and the Niagara Navigation Company, thus giving a through line from Buffalo to the Saguenay River. And the Bertram Shipbuilding Company, of Toronto, will contract for building two palace steamers for use between Toronto and Prescott.

$12,000 Reward

AS FOLLOWS:

The Dominion Bank offer a Reward of $5,000

for information which will lead to the conviction of any person concerned as a principal in the theft of about $20,000 from the bank's premises, in Napanee, on 27th or 28th August, 1897.

They also offer a reward of $5,000 for information enabling them to recover the money stolen, and in like proportion in case any part of such money is recovered.

They also offer a reward of $2,000 for the return of certain uncountersigned $10 bills, amounting in all to $10,000, stolen on the same occasion, and in like proportion in case only a part of such bills are recovered. The numbers of such bills are: **Nos. 46001 to 47000—Series A. Dated 2nd January, 1888.**

Apply to Head Office of the Bank at Toronto, to either the General Manager or Inspector.

Dated Toronto, 21st October, 1897.

Suckling & Co.

Mercantile Summary.

On the main street of Magog, Que., the burned structures are being rebuilt, brick being generally used for them.

The receiving teller of La Banque Nationale in Quebec, was last week tendered a $5 bill of the Eastern Townships Bank raised to fifty dollars, but the fraud was detected in time.

Bresse's factory in Quebec re-opens this week. It is said that the Dominion Shoe Company and Mr. St. Pierre's factory will also re-open in a few days, and Mr. Dion's new factory is almost ready.

Freight by the canal-and-lake lines out of New York will be received for shipment over the all-water route on and after October 30th for points west of Buffalo, though lake steamship lines will run until 1st December.

Charles Hendricks was arrested in Montreal, on Monday last, charged by the fire commissioners with arson. His premises are at 2,504 St. Catharine street, and a fire took place there which Hendricks declares was caused by spontaneous combustion.

By a recent concession Canadian exports of wood pulp shipped to France via New York will have the benefit of the minimum tariff. The same thing was done, if we remember rightly, with respect to lobsters. Well—France knows by this time that Canada produces lobsters and wood pulp.

In the village of Baie St. Paul, on the north shore of the St. Lawrence, 65 miles below Quebec, the village streets and several private residences as well as stores, are lighted with electricity furnished by the company, of which Rev. A. Fafard, parish priest, is the head. Messrs. F. Gagnon & Fils have put up a steam mill in that village and are going to cut timber on the river Gouffre this winter, to supply their mill next summer.

New Brunswick four per cent. bonds to the extent of $37,000 and three and a half per cents, $10,000, were sold at the Receiver General's office, Fredericton, on Friday last. Eleven offers had been received, six of them from the upper provinces. Ten thousand of fours, which can be redeemed at the expiration of ten years, brought $104.10. The remainder which have 40 years to run, brought $110.60. The 3½ per cents which have 40 years to run, sold for 51 cents above par.

An award has been made by the arbitrators of a grain deal between A. E. Matthews and Archibald McBean & Son, of Toronto. The dispute was over 32,000 bushels of No. 1 Manitoba hard wheat, which Mr. Matthews, for an English firm, Dewart & Webb, had contracted with Messrs. McBean & Son for delivery in London, but which the latter were unable to deliver. The amount involved exceeds $11,000. The decision handed to the secretary of the Board of Trade was unanimously in favor of Mr. Matthews, and A. McBean & Son are given four days to settle the claim.

It is announced that the Minnesota and Winnipeg Lumber Company, with a capital of $5,000,000, has bought out an enormous pine timber limit south of Lake of the Woods and will have its saw mills in Winnipeg. The company is composed largely of Canadian capitalists, and intends supplying Manitoba and Dakota's lumber requirements. The company has secured permission from the Minnesota Government, it is said, for the cutting of a canal from a point on the south-west of Lake of the Woods, through to Rosseau River, a distance of about 14 miles. The logs will be floated through this canal to Rosseau River, along this water course to where it enters the Red River, near Letellier, and thence up the Red River to Winnipeg.

Mercantile Summar

FIRE broke out in the Nova Scotia Lumber Company's yards, at Sherbrooke, N.S., on Sunday, destroying 1,100,000 feet of lumber. The mills close by were saved with difficulty.

WORD has come from the State of Kentucky indicating that the tobacco crop of that State has been almost entirely ruined by frost. Estimates of the yield say it cannot prove over 20 per cent. of the average.

THE council of Hull, Que., has closed with the offer of La Banque Jacques Cartier, to take its $53,000 worth of fifty-year 4 per cent. debentures at 100¼. The money is to be used to extend the waterworks of the place.

ACCORDING to the *Ontario Gazette*, the Milner-Walker Waggon Works Company, of Walkerville, Limited, has been formed, with a capital of $250,000, composed of Wm. Milner, J. R. Milner, of Chatham; Hiram Walker, of Ile Aux Peches, and D. R. Pierce, of Detroit.

THE residents of Cote St. Paul, a Montreal letter tells us, are resolved to have a system of drainage and also a lighting plant, which we are given to understand will be conducted by the municipality. They propose to work at drainage during the winter, and to put in an electric lighting plant next year.

THE creditors of Pilon & Frere, general dealers, of Alexandria and Casselman, Ont., were called together a few days ago. The firm are understood to be offering 65 cents on the dollar, 50 cents cash, and 15 cents on time. Their Casselman store was destroyed by the late bush fires which devastated that section.

AT the annual meeting of the Association of Accountants of Montreal, held at the office of the secretary-treasurer on October 19th, the following officers were elected for the ensuing year: John McDonald, president; A. W. Stevenson, first vice-president; John Hyde, second vice-president; W. J. Common, secretary-treasurer; George Durnford, J. McD. Haines, A. Cinqmars, and James G. Ross, members of council.

IF we in Canada were not so accustomed to such statements, a showing such as is described below, would be regarded as commercially demoralizing. The estate of Mr. Gordon Baker, general storekeeper, Osnabruck Centre, who assigned recently, shows liabilities of $25,600, and the assets have only realized $3,483. The expenses in winding up the estate were $885, and the amount divided among the creditors was $2,596.

A meeting of the creditors of A. E. Rondot, general storekeeper at Amherstburg, who assigned about ten days ago, was held in Toronto last Friday. Mr. Rondot's statement, to the surprise of creditors, showed a large deficiency, instead of the surplus that he represented himself to have had when buying goods. This surplus he stated at about $6,000 when in the witness box as late as six weeks ago. A curious feature is that in the list of merchandise creditors in Montreal and Toronto, to whom he owed nearly $7,000 occur the names of several firms who had figured in some of his previous failures. These did not include Messrs. Thibaudeau Bros. & Co., who became security for Rondot's compromise two years ago, and now are creditors to the extent of $19,168. The good assets of the estate are put down at $14,272. Bad and doubtful, $6,570. He owes for merchandise and to his banker, $24,294. Besides this, his lawyer claims $826, and THE MONETARY TIMES costs, which the Court have ordered him to pay, will considerably exceed $1,000, making nearly $2,000 of debt, chiefly, we presume, incurred by the suit against us for libel. He makes no offer Inspectors are appointed and the stock is offered for sale.

THE SITUATION.

The sudden and startling discovery has been made that nearly half the cattle at the Central Experimental Farm are infected with tuberculosis. Four years ago the animals stood the tuberculin test; but in the interval others have been purchased, without the test being applied. The facts naturally give rise to unpleasant reflections. Canada is believed to be comparatively free from tuberculosis in cattle; but the trouble is that, in every country, you never know when it is present, in the absence of the tuberculin test. When we know, as we do now, that the disease can proceed unseen and unsuspected under the eyes of experts, till nearly half the herd is affected, the utmost watchfulness is necessary. The discovery now made emphasizes the necessity that exists for applying the tuberculin test to all cows from which milk is supplied to cities. The Toronto health officer insisted on this some time ago, and the Granger raised his voice in protest; he went to the legislature and got words of sympathy there; he pretended to believe that the children who consume milk of unknown quality are in no danger. It is quite clear that Dr. Sheard was right in his rigorous precautions, and that what he proposed should be the rule for all cities. We all know how dangerous it is to drink strong drink of suspicious quality; but what shall we think of the perils of the beef-eater, the world over? To deny the fact that danger confronts the beef eater is impossible, in presence of the demonstrations of science. Precautions are necessary to avoid danger; but it is difficult to see how adequate precautions can be taken where the population is sparse; in cities, a common butchery, under proper inspection, is the dictate of prudence and humanity.

In Norway, the Protectionists have recently made some advance, and the new tariff of August slightly raises the duties on products which Canada furnishes, to some extent, to that country. The duties are raised a little on wheat, oats, flour, apples, both fresh and dried, and radiators. Before the new tariff was passed, there was a singular commercial union between Sweden and Norway, based on a commercial treaty, under which merchandise that had paid duty in one country was free in the other. The treaty was denounced before the change in the Norwegian tariff was made. An increase in agricultural wages in Norway has caused a demand for self-binders, and Canada will have a chance to supply some of these machines, having, in a competition, recently obtained second and third prizes. Canadian radiators have begun to find their way to that country.

Lady Aberdeen's well meant but too ambitious proposal of a Victorian Order of Nurses in Canada, founded on a million dollar subscription, must be pronounced a definite failure, a fact which of all the people in Canada her ladyship appears not to see. There has been, from the first, much quiet criticism of the scheme, which has not found voice. The financial question formed the crucial stage of the plan, and at this point it broke down. In the opinion of many it was not suited to the condition of the country. Some open opposition appeared, and little encouragement came; but neither the one nor the other sufficed to damp the indomitable ardor of Lady Aberdeen in favor of her plan, and even now she gives evidence at a meeting in Boston, that she continues to advocate what almost every one else has long regarded as hopeless.

Now that Senator Wolcot's silver proposals to the British Government are before the public, no one will be surprised at their rejection. He asked so much as almost to create the suspicion that he did not wish to succeed, though the chances are that he desired to head-off the silver cry in the States by the extravagance of his demands, going even beyond Bryan on some points. Bryan's ratio was 16 to 1; Mr. Wolcot's 15½ to 1. This ratio owed its initiative to France, who was willing on her part to open her mints at that ratio. The setting of such a ratio assumes two things: that the whole of the depreciation of silver is due to its relative disuse as coin, and that the proposed arrangement would restore and maintain the equilibrium of the two metals at 15½ to 1. Neither of these assumptions is true. Though the demonetization of silver was the chief factor in the depreciation of that metal, something is due to the lessened cost of producing the metal from the mine. Where the depreciation has gone so far, nothing less than a general effort could restore silver to its former place, and there was no chance of a general effort being made. The fear that the price of silver could not be maintained, at the proposed ratio to gold, made India withhold her consent, and her opposition made it impossible for England to agree to reopen the Indian mints to the coinage of silver. Senator Wolcot asked England to secure colonial action in the direction proposed, and the coinage of silver in Egypt; in doing so, he asked what was not in the power of England to grant, the self-governing colonies exercising independent power of choice in such matters. England was asked to do seven different things, almost any one of which would have been beyond her fair share, if the general plan had afforded a fair prospect of success. Lord Salisbury cannot, under the circumstances, see the utility of another Silver Conference, though he is prepared to receive and consider any other substantial proposal that the American envoys may have to make.

It looks now as if the ordinary tax sale of lands would not take place in Toronto this year. The doubt as to the right to postpone is apparently to be covered by legislative action. The principal argument used in favor of postponement is that those forced sales lower the price of all property similar to that sold, in the city, and thereby cause a large decrease in the assessable value of all real estate. The chief argument against postponement is that the municipal treasury may lose by delay. Tax sales are not the only forced sales at which property frequently changes hands, all over the country, at about 60 or 70 per cent. of the valuation, for loan purposes, made a few years before. The mortgagee stands in the place of the landlord, without any of a landlord's obligations, and when he realizes his claim, dispossession is the consequential incident. These sales about meet the demand for real estate in many places, and consequently, property is constantly changing hands at low prices. But the underlying fact is, that many of the loans were imprudently incurred, some of them not being so utilized as to earn their own interest. These things happen on a falling market. It may be, many regard it as an assured fact, that prices of real estate are about to show an improvement; and if this happens, the margins of mortgaged property will tend to increase rather than to diminish, as they have often of late done, in all degrees up to the vanishing point. Some of the loan companies favor delay in the tax sale, the obvious motive being that the tax sale cuts out the mortgagee, with whom the sacrifice is shared by the mortgagor.

THE STRIKERS AND SOCIALISM.

Whatever may be the immediate result of the engineers' strike in England, it is obvious that the strike is largely the result of the spread of Socialistic ideas, which represent rent, profit and interest as robbery of the "working classes," who are paraded as the creators of all wealth. The employers, on their part, still regard Trades Unionism as the real enemy with which they have to cope, and are anxious to accomplish its destruction. The immediate pressure felt by the employers comes from the Trades Unions, some of whose rules are arbitrary and tend to diminish the efficiency of labor. Among the workers themselves there is a section inclined to rebel against rules which do not appeal to their sense of equity. These men have formed the Free Labor Federation. It must be allowed that some parts of the address calling a meeting of the Free Labor Association look as if they had been written under a feigned name. The engineers' strike is computed to have already cost $4,000,000. According to Mulhall, an esteemed authority, a large majority of workingmen in Great Britain are non-unionists. The minority makes war on the majority, in such a way as frequently to interfere with the rights of the assailed, and in the unions themselves, men are not seldom forced to strike and do other things against their will. Nevertheless, Trades-Unionism is in no danger of destruction. It may, in time, cease to exist, when it has done its work. When this will happen, may, judging from present appearances, depend upon the rapidity of the march of the forces of socialism. In the present strike, the Socialists are, perhaps, for the first time in the history of English industry, a visible element. A new condition has been created, of which employers are naturally loath to take account. Meanwhile, the industry of the nation is subject to all the actual conditions of international competition, which have reached the highest point of vigor yet attained.

One of the demands of the striking English engineers is for an eight hours day; another, that improved machinery shall not decrease the number of hands employed. Of the two, the former is most likely to be, in the end, successful. Already eight hours is the working day in Australia, where there is great need for labor. But international competition and habits make it difficult for the greatest manufacturing nation in the world to adopt an eight hours working day. England has to compete with Germany and other countries where the working hours are longer than her own. As it is, her workmen manage to maintain a higher standard of living than Germans or French can. Could she do so, if the working day were abridged as proposed? In some callings, it may be, as much work can be done in eight hours as in a longer day; but the rule is probably the other way. It is not desirable that men, much less women and children, should be worked beyond their strength. If the International could bring about an eight-hours day, much of the objection to the change would disappear, from the point of view of international competition. The demand that new machines shall not diminish the number of hands employed is unreasonable and not likely to succeed, now or in the future. If there were any means of compensating the men displaced by machinery, out of the proceeds of the patents, one source of misery the less there would be; but this would be for society to avail itself of, a form of confiscation to avert the incidental suffering that follows in the wake of improved machinery. This suffering caused one economist, Sismondi, to dwell on the evils produced by machinery rather than the good, and another, Ricardo, to attribute a multitude of social evils to the same cause. But invention goes on, and society as a whole benefits by new machinery. It is sad to think that the men whom it displaces are sometimes trampled to death, in the onward rush of improvement.

AINT LIFE GRAND?

FINANCIAL REVIEW.

The general activity of business has been strikingly reflected in the Bank Return for the month of September, and a comparison between this year and last year will bring out the matter very clearly. The circulation increased $1,100,000 in September, 1896 (there is of course *always* some increase in that month), but the circulation increased in September this year $4,100,000—a striking difference, indeed, and well reflecting the great activity of the producing interest in the country during this fall season. The deposits in September, 1896, decreased $490,000; in September, 1897, they increased $1,300,000. Discounts increased in September, 1896, $2,737,000, but in 1897 they increased $4,808,000.

All these figures are significant of activity, but circulation is the most pronounced index of them all, for it is plainly manifest that the farmers of the Dominion as a whole are taking advantage promptly of the high prices that have been current for wheat and dairy products, a course which is always calculated to be of advantage to the mercantile interest generally, and, as a rule, is of equal advantage to the farmer himself.

It is very probable that the month of October may show a much larger increase still, and it would not be surprising if bank circulation in the Dominion then touched higher figures than have ever been known. The return of the 31st of October is the one which, as a rule, gives the maximum amount of circulation for the whole year. The highest figure yet shown in the month of October in any year for our bank circulation is $38,000,000. But the circulation in September has already touched that figure; so that in all probability the high water mark of something over forty millions will be shown when the returns for the present month come in.

When it is considered that the Government circulation of small notes is over $8,000,000, and that the total circulation of the country will thus almost certainly rise above $50,000,000 at the end of October, it will be seen how short-sighted were those who, some thirty years ago, were willing to have circulation arranged on such a basis that the banks would practically have about $50,000,000 less of means available for their mercantile customers.

The expansion of the trade and commerce of Canada' and of bank circulation as connected therewith; the expansion also of bank deposits, and of loans and discounts, all reflecting the growth of the commerce and manufactures of the country have proceeded in a manner which the most sanguine could never have dreamed of thirty years ago. It was about that time that an eminent financial authority, who was well acquainted with Canada, gave it as his opinion that the deposits of the banks of Canada could never be sufficiently large to be an important factor in the financial position. Little did he, and little did any-one else dream that at such an early period as the present, the deposits of Canada, of all kinds, would amount as they do, to over $300,000,000, equal to £60,000,000 sterling.

In view of the marvellous growth of the last thirty years, one may well look back with astonishment to a statement said to have been made by a Governor-General within the lifetime of persons now among us that Canada was "a *girdled tree*," an expression referring to the mark made by an axeman round trees in the woods, stripping off the bark and preventing all further growth. In view of the extraordinary mistakes of high authorities of a former time, it may seem dangerous to venture on a forecast now, though the forecast would be in an opposite direction. But considering the position to which we have attained, and the vast known resources still undeveloped, we cannot be far wrong in anticipating as great a development at least during the ensuing two or three decades, as have taken place place during the last two or three.

The development of the "North-West" alone, using that word in its largest compass, as including the vast stretch of prairies and the mineral regions that are now being explored, and have recently attracted so much attention, this alone would be sufficient to justify the most optimistic predictions.

The mining developments of British Columbia alone (quite apart from the Klondike region), have already been of such importance as to give rise to a population of 20,000 people round about the Kootenay valley, and there is sufficient of development within sight to justify expectations of a vastly larger population by and bye. But this development will not be of the sort which enables men to pick up gold on the surface, but will rather be of the nature of steady mining operations, analagous to working coal or iron mines. As to what may come in the future from the Klondike, it would be vain to speculate. But certainly these new developments in the western and north-western parts of the country have opened up new ideas altogether as to what the Dominion may be capable of in the future.

One grand effect of the rapid marketing of produce has been a very large amount of liquidation of indebtedness. There is always more or less of this at the fall season of the year, but the present will prove to have been one of the best the country has ever known in this respect. The present is a golden opportunity for those who will see it, to get their books cleared of unreasonably large debts, of which there are vastly too many carried in the accounts of wholesale houses. During the last few years the position of trade was such that wholesale merchants found the accounts in their books constantly creeping up, until many of the amounts became embarrassing to them. Bankers have complained repeatedly with regard to these things, and have only been forbearing in consideration of the difficulties of the times. But now there is no longer need for trespassing on the forbearance of bankers. Overgrown accounts can be cut down, and ought to be cut down, for the retailers' own sake, and new conditions of credit should begin to prevail, based on smaller lines and shorter dates. One half the amount lost in bad debts by mercantile houses during the last five years, has arisen solely from the manner in which credit has been pressed beyond all reasonable bounds.

The floating of a Canadian loan at 2½ per cent. on the London market, is another of those revelations which the men of a former generation could never have dreamed of.

When the late Sir Alex. T. Galt some thirty years or more ago, was harassed to death by the difficulty of borrowing money in London, even at 6 per cent. and upwards, how little could he have imagined a time such as the present. For not only has the London market responded to the call for money on a 2½ per cent. loan (so placed as to yield only 2¾ per cent. to the investor), but banks and financial corporations in Canada itself have bid for an amount aggregating some $3,500,000. Of course, this is only the placing of such banking funds as are available for investment, as distinguished from that which is needed for mercantile borrowers; and the amount is a mere bagatelle compared with the two hundred millions and more which they now have out in loans and discounts.

But thus the country has progressed in time past; and its former progress and present condition is the soundest foundation for assured hope for the future.

DOMINION TRADE RETURNS.

There was an increase of $4,691,052 in the aggregate trade movement of Canada for the month of September, 1897, as compared with the same month a year ago; the total exports and imports of last month amounted to $28,647,203 as against $23,956,151. The increase is due mainly to the phenomenal development of the export trade. The imports during September, 1897, were valued at $12,057,115, upon which was collected by way of duties $1,910,175, as against $11,330,095 in September, 1896, and a revenue of $1,810,301. This makes the aggregate imports of the first quarter $32,990,471 in extent, as compared with $32,684,242 in the same period last year, In spite of this increase in the import trade, the revenue for the first quarter has fallen away, the duty collected for 1897 being $5,127,700, as against $5,210,789 in 1896. The Vancouver returns have not been received during this period, and will somewhat diminish the deficiency. The importations of dry goods were somewhat greater than those of last year. A marked increase is shown in the imports of metals, and iron and steel manufactures. A part of this larger trade movement is no doubt due to the present activity in railway construction. During the month the imports of breadstuffs, coal and sugar were smaller than in September a year ago. We append a table of the principal imports:

PRINCIPAL IMPORTS.

	Sept., 1897.	Sept., 1896.
Cottons, including cloths and thread	333,369	328,456
Cotton, waste and raw (free)	80,882	161,816
Fancy goods	211,722	172,113
Hats, caps and bonnets...........	127,841	109,446
Silk goods	289,013	211,834
Woolens, cloths, carpets, yarns, knit goods	$1,048,398	$1,891,993
Wool (free)	103,279	54,731
Furs and manufactures............	57,032	43,882
Books and pamphlets	95,308	96,062
Breadstuffs, grain, flour and meal ..	95,079	131,864
Coal, bituminous	282,075	384,418
" anthracite (free)	686,851	724,944
Drugs and medicines..............	118,045	101,129
Earthenware	66,270	48,134
Metals and manufactures..........	52,142	23,960
" (free)	493,457	103,040
Iron and steel manufactures	972,280	701,303
Leather and manufactures	118,239	112,669
Oil and paints....................	104,467	129,690
India rubber and gutta percha	31,336	31,161
Provisions	133,081	56,984
Sugar	399,476	450,195

As previously mentioned, the exports for September, 1897, were much more valuable than in the corresponding month of the previous year, amounting in the former period to $16,590,088, and in the latter to $12,626,046 in value. The increase is mainly due to the greater exportation of cattle, meats, cheese, butter, and grain. The products of the Canadian farm appear to have won special favor abroad. The miner and the manufacturer have contributed moderate shares to the increased trade, but the lumbering industries and the fisheries have failed to hold their own. The decreased volume of exports of forest products is, however, much less than might have been expected from the unfavorable treatment given Canadian lumber in the markets of the United States. The exports for the first quarter of 1897 were $47,554,859, as against $35,811,503 in the same period 1896. We append a comparison of the exports in September for the years 1897 and 1896:

	September, 1897.	September, 1896.
Produce of the mine............	$1,292,770	$ 910,632
" fisheries	735,572	945,007
" forest	3,984,150	4,145,115
Animals and their produce.. ..	5,675,698	3,723.736
Agricultural products	3,708,991	1 242,060
Manufactures...................	959,339	841,227
Miscellaneous articles	49,901	33,198
Totals	$16,406,421	$11,840,975
Bullion.........................	176,691	108,534
Coin	6,976	676,537
Grand total..........	$16,590,088	$12,626,046

TRUE ECONOMY IN FIRE PROTECTION.

It has taken a long time, but at last the conviction seems to have got hold of people's minds in many towns and villages in Canada that it is well to be on the alert about fires, and that fire appliances need to be looked after regularly. We do not now speak of places which have no fire protection, but of places already provided with tanks and engines, or waterworks. It has proved the case, over and over again, that municipalities which had spent from $2,000 to $30,000 each in securing a fire-pump and water tanks, or a steam fire engine, or a pressure system, would neglect them or refuse to pay the price of keeping them in working order. A fire would come—the pump was choked, the engine would not work, the hose was rotten—and house after house burned down. To-day a better condition of things exists in this particular. People have become aroused to the duty of keeping their fire appliances in proper order. Doubtless this is in part to be attributed to the efforts of the underwriters, whose officials are going about the country constantly and inspecting the means of fire protection.

A stubborn sort of stinginess was for a long while apparent in the residents of villages when asked to expend money for protection against fire. Being desired to buy a chemical engine or a steamer, they would grudgingly consent to get instead a hand-pump or hooks and ladders. By and bye the ravages of fire and the need of insurance would drive them to take further and better means of protecting themselves from the flames. It would appear that hand engines, certainly hand pumps, are largely being superseded, for we hear of numbers of them being for sale second-hand. Gravitation, steam pressure, and other systems of supplying water for the extinction of fires, have come into use; chemical engines, too, and steam fire engines, are being bought by municipalities. Not only this, but they are learning how to use these properties and to maintain them. It has been pointed out by a correspondent recently, that villages or even individual factories may make an economical mistake, from one standpoint, in buying a hand-pump for fire purposes instead of a steam fire engine. "True," he says, [MONETARY TIMES, Oct. 15th] "there is considerable contrast between a hand-pump, costing $500 or $600, and a small steamer, that can be bought for $1,600 to $2,000. But mind you, the village has got to buy hose and equipment, and the cost of this hose and equipment is the same for the pump as for the steamer." Of course we know that a steamer of 1,000 gallons per minute capacity costs far more than the sums we have mentioned, probably $4,500 or $5,000, but there are Canadian steam fire engines made now for $1,600 and $1,700, and one of these is surely more effective as a fire-fighter than two hand-pumps. It is curious that more chemical engines are not used; they are very valuable as fire-fighters, and do far less harm to burning property than the copious and reckless drowning with water that ordinary water brigades indulge in. Still, the great point is that communities are being aroused to the need of constant protection against fire. What machinery they use should be proportioned to the needs of the place, and should always be maintained in an effective state.

MONTREAL AND THE ST. LAWRENCE ROUTE.

Canada is proud of Montreal. And not without reason. As a city she has shown such progress, as a manufacturing place she is so prominent, and as a financial centre her influence is so great, that people instinctively look to have an exemplar in our chief city. But our pride in her as a seaport is somewhat dimmed of late by reason of complaints and criticisms, by shippers, of Montreal harbor and its accommodations for modern sea-going steamers. A Bristol man, and a Grand Trunk director, Mr. Girdlestone, who visited Canada the other day, says some hard things about the defects of Montreal as a modern shipping port. Thus, pointing out that a vessel that ought to be discharged in two days is taking six or seven days to do it, he said:

> "As a practical dock manager, I don't see how the work is done in any days at all with the miserable accommodation that exists. Your wharves are practically blocked with goods, and you have no space to put down delicate or perishable goods, which have to be exposed to the

> sun and rain, because the wharves are blocked with lumber and heavy goods that require no shelter. Again, your trucks cannot come anywhere near the ships. A ship has to wait days and days because trucks cannot get alongside. How are these ships to be filled with cargo. They can only be filled by goods coming long distances—from Eastern Ontario, Western Ontario and far beyond. To get them filled, and filled quickly, requires the goods to be brought down cheaply, as they are by your railway systems, and handled cheaply. But when I find that at this port there is entailed on the shipper, the railway company, or somebody, a cost of 40 cents a ton to get these goods on the ship, I don't see how you can expect shipowners to increase their fleet."

And a gentleman connected with the Elder-Dempster line of transatlantic steamers, while in Canada this month, made some observations about the needs of Montreal harbor, which, while less blunt and severe than those quoted above, are still worthy of respectful attention. Both these gentlemen mentioned Bristol as a port of good capacity for rapid handling of merchandise, since at that port it is a common procedure, when a vessel of 8,000 tons arrives, to get out cattle and 6,000 tons weight of goods, and put in 1,500 to 2,000 tons of export goods in forty-eight hours. With the dock they propose building, it is intended to do a great deal smarter work than this at Bristol. Now these visitors say to Montreal authorities: "in view of the changes of recent years in the ocean-carrying trade and the great size of transatlantic vessels, you must re-arrange your port, get the railway car alongside the steamer, and give the utmost despatch to shipping. Give more width to your piers even if you have to do with less water between piers, and make your whole system a high level one. When you have got those piers completed, you must have covered sheds for your goods, and steam or hydraulic appliances to raise the goods. This much must be done," say these men, "before Montreal can properly accommodate the shipping she so much desires." And Mr. Girdlestone further says that Quebec has in some important respects better accommodation for large ships than Montreal.

Then, what bearing has this upon the St. Lawrence route between the Western States and territories and Europe? A very weighty bearing indeed. Everyone acquainted with transportation on the Great Lakes of this continent knows how Canadian carrying trade is handicapped by the smallness of our steam and sail craft compared with the American 4,000-ton steel fresh water steamers from Duluth to Buffalo. In precisely the same way must Montreal be handicapped, as compared with Boston and New York, until we can give to 8,000 or 10,000-ton steamers the same accommodation and despatch as those United States ports can. Size of steamer and quick despatch are two important elements to carriers. We may as well make up our minds to make a good job of it, whatever the expense, especially if Canada is to do transportation for the Americans by our fast line of new and big Atlantic steamers. And the business men of Montreal will do well not to take offence at the criticisms of these Englishmen upon her harbor, but rather to be spurred by them to take immediate steps towards the improvements that are undeniably needed.

UNITED STATES RAILWAYS.

We have this week received an abstract of the 1896 report of the Inter-State Commerce Commission, being the ninth statistical report of the kind. The figures it contains give a succinct impression of the vastness of the railway system of the United States, and facts enough are added to give an outline of its condition, which from a financial point of view is very far from satisfactory. The total railway mileage at 30th June, 1896, was 182,776 miles, an increase of 2,119 miles during the fiscal year. But the aggregate length of track, including double, triple, or quadruple track, sidings, yard track, etc., extended to 240,129 miles. This great extent of track was owned by 1,895 railway corporations. Of this number, 1,008 maintained operating accounts, 782 being classed as independent operating roads, and 226 as subsidiary operating roads. Of the roads operated under lease or other agreement, 324 received a fixed money rental.

One of the striking facts of this report is that there were, at the close of June last year, no fewer than 151 roads operating 30,475 miles of track, in the hands of receivers. The capital stock represented by the railways controlled by receivers was $742,597,698, and the funded debt $999,733,766. As compared with the corresponding figures for 1895, the figures given show a decrease of over $183,000,000 in capital stock and $319,000,000 in funded debt. This is startling, but there is more behind. Out of a total of $10,566,000,000 of railway capital, namely, $4,256,000,000 common stock; $970,000,000 preferred stock and $5,340,000,000 funded debt—seventy per cent. *paid no dividend.* And the amount of funded debt which paid no interest was $860,500,000. The total amount of railway dividends was $87,603,371, representing an average of 5.62 per cent. on the amount of stock on which some dividend was declared. The amount of bonds paying no interest was $515,029,668, or 11.40 per cent.; of miscellaneous obligations, $68,918,680, or 15.05 per cent., and of income bonds, $276,611,094, or almost 88 per cent.

A distinct increase in gross earnings is shown, as compared with the previous year. The figures are $1,150,169,376, against $1,075,421,462, an increase of about 6½ per cent. There was an equivalent increase in the operating expenses, which were $772,989,044, as compared with $725,720,415. The net income out of which dividends and surplus were declared was $89,631,926. This amount is $33,000,000 larger than the corresponding one for the previous year. The dividends declared were $87,603,371, leaving a surplus of $1,534,169, after the satisfaction of adjustment claims amounting to $494,386. This small amount of surplus, however, shows an improvement, since the results of railway operations during 1895 and 1894 showed deficits of $29,845,241 and $45,851,294 respectively.

The number of tons of freight carried by United States railways during the year under consideration was 765,891,385. This is the largest tonnage ever reported for railways in that country. The increase during the year was 69,130,214. Passenger traffic also shows an increase of nearly one per cent. The number of passengers carried was 511,772,737, being an increase of 4,351,375, as compared with 1895. The number of passengers carried one mile during the year was 13,049,007,233, showing an increase as compared with the previous year of 860,560,962.

For the first time, a summary showing the compensation paid to railway employees is presented in this report. It includes the compensation of over ninety-nine per cent. of the men for 1895 and 1896. The aggregate amount of money paid in wages and salaries, as shown in the summary for the year ending June 30th, 1896, was $468,824,531, or 60.65 per cent. of the total operating expenses of railways.

CONVICT LABOR.

What shall we do with our convicts? It is not in the interests of the taxpayers that they should be maintained in idleness, nor is such a course likely to be beneficial to the convicts themselves. The object of imprisonment is now generally considered to be, not as punishment alone, but as a remedy for the criminal traits in the men. There is nothing more beneficial to this end, than to teach men to be industrious. But so soon as convicts are set to work at any particular industry, an outburst of disapproval comes from the capital and labor engaged in that industry. And it does seem unfair, that men who have invested capitain making certain goods should be subjected to competition from the Government, or that the workers in the industry should have their wages reduced because convicts are employed at the same trade. The inmates of the Central Prison have for some time engaged in the manufacture of binder twine. The burning of the prison factory is taken as an opportunity on the part of those engaged in his industry to protest against a continuation of this work by the Provincial Government. Whoesale and retail merchants are being asked to sign a petition to this effect. It is recited among other things that "the manufacture of cordage and binder twine is one of Canada's largest and most mportant industries, employing from 1,800 to 2,000 operaitors, and including numerous plants more than sufficient to supply all the needs of the Canadian trade." Is it not possible to employ the convicts in ways that will not so seriously interfere with the course of trade? The farmers, who are under the obligation of statute labor on the roadways, would probably offer no objection to assistance from the convicts. It would seem quite practicable that at least a number of the men confined for their crimes and misdeeds could be well employed in this work.

REACHING OUT FOR TRADE.

The Canadian-Australian liner, the "Miowera" carried from Victoria on her last trip thirty-two tons of British Columbia hops. These hops are the product of a single grower at Saanich. Previously the hops grown in British Columbia have been shipped to Great Britain, and it is said this is the first shipment of hops from the Canadian Pacific coast to Australia. The experiment will be watched with interest by all interested in this industry. It was thought some years ago that Canada would soon build up a considerable export trade in hops, but these hopes have not been realized. In 1893, hops to the value of $48,244, were sent abroad, principally to Great Britain. Since that time the trade has steadily declined, until in 1896 the exports were valued at only $13,686, of which Britain took almost the entire yield. The Japanese, imitating Europeans and Americans in their industrial methods, are also adopting their habits of life. Beer, it is said, is becoming a favorite drink in the Orient, and it may be worth the while to enquire as to the possibility of finding there a profitable market for Canadian hops and barley. If we accept the view of the Canadian Commsssioner to Japan, Mr. George Anderson, who returned yesterday to Toronto from his three-months visit to that country, it is not easy to exaggerate the future extent of Japanese trade or its possibilities as far as they concern Canada. That nation of forty-two millions, skillful, enterprising, eager for development and determined upon trade, offers to Canada extraordinary opportunity in the mind of the commissioner. The Japanese have just adopted a gold standard—they have an excellent mint—and are preparing themselves by study and practice for becoming a commercial nation. "They are developing their industrial and commercial resources first," Mr. Anderson tells The Monetary Times; "they are extending their railway system, and next they will, I believe, devote themselves to increasing their marine. They have already one of the largest steamship companies in the world in the Kippon Yusen Kaisha, but they will very soon extend their lines of navigation both eastward and westward. They have just attempted a loan of 67,000,000 yen (equal to about $33,500,000 of our currency), but only some three or four millions of it has been subscribed in Japan. They will, therefore, probably go abroad with it.

After having visited Tokio, the capital; Yokohama, the great shipping port, Nagasaki, Kobe, Osaka, and a dozen other cities of the Japanese Empire, Mr. Anderson returns fully convinced that a trade of great extent and variety is possible between Japan and Canada. Not caring to particularize in advance of his official report, he yet declares that a hundred items of Canadian produce and manufacture will find market in Japan. The Japanese consume a great quantity of lumber, and they have been getting it mainly from Oregon and Washington States, the reason apparently being in part that British Columbia people had not looked after the trade. At present the Pacific Coast States are supplying a large quantity which British Columbia might easily supply. The North-West Territories and Manitoba can send flour and grain, a great deal of which is now being supplied by Oregon and California. While it is true that what has already been sent from Canada has been found very satisfactory. The Japanese are by no means as well acquainted with Canadian flour and grain as they should be. No less than 160,000 barrels of flour was sold them by the Americans in 1896, while Canada's share of this trade was but trivial. They buy largely of leather, too, in the States, and we can surely sell them leather. Of late, too, they have developed an immense demand for steam engines and boilers. The goods they have to send us in return we shall hear about more in detail when Mr. Anderson's full report comes out. Some of them were indicated in The Monetary Times more than a year ago. Meanwhile it is of moment to learn, as we do, that the general feeling in Japan is that trade with Canada will be most beneficial, and that there exists a general desire for trade extension with us.

A million and a half pounds of canned beef has been prepared for the Japanese army by a firm in Kansas City. Shipment of this meat was made over the Canadian Pacific Railway to Vancouver, whence it went by steamer to Nagasaki. It is satisfactory that Canadians obtain indirectly by their advantageous carrying facilities a share in this trade, but it would be far more satisfactory if the meat had been prepared in Canada. Large quantities of cattle are shipped from the ranches of the Canadian Northwest to the United Kingdom. The journey is a long one, and it is needless to say the cattle when they arrive in England or Scotland are in anything but the best condition. The exporters are put to great expense in carrying live stock so long a distance, only to find the cattle on arrival bruised and short in weight. Little foresight is needed to show that the more economical and effective method of trading is to establish abbatoirs at some central point in the cattle ranching district. A meat packing house in Manitoba and the Territories, with plant suited to production on a large scale should be able to accomplish a great deal in the export trade. The shipping facilities to the old established markets of Great Britain, or to the new and attractive markets of the Orient are unexcelled by any in the United States. There is practically an inexhaustible supply of land in Manitoba and the Territories suitable for grazing purposes, and all that is wanted to bring profit to farmer, drover and packer is combination of pluck, capital and energy.

AUDITORS—THEIR DUTIES AND LIABILITY.

The moral conscience of the business community has been too frequently shocked of late by the defalcations of persons in positions of trust. Confidential agents, municipal treasurers, and officers of corporations have been found short in their accounts, some being brought to justice, others fleeing successfully from it. And in nearly all the instances the defalcations have covered an extended period of time, during which the accounts in which the false entries have occurred have been audited at intervals. What occurs to everyone is how can these falsifications escape the detection of an auditor who is conscientious in the discharge of his duty?

An auditor is a person who is appointed and authorized to examine accounts, compare the charges with the vouchers, examine the parties and the witnesses, allow or reject charges upon proper proof, and state the balance. He is the trusted agent of those who have put their capital into the undertaking, and on him they rely. He is well paid, and if he is negligent in his duty he should be made to bear the loss brought on his employer by that neglect.

That an auditor is so liable to make good the losses occasioned by his neglect, to the extent of the loss, is well settled by the law of the land, and every auditor who fails in his duty should be pursued in the courts and made to pay the penalty. This is the best way to restore public confidence in our business and municipal book-keeping.

A good idea of the extent of the liability of an auditor for his own neglect, may be gathered from the decision of the English Court of Chancery in the case of the Leeds Estate Building and Investment Co. against Shepherd. In that case the articles of association of a limited company, formed in 1869 for the purpose of lending money on security, provided that when the company should pay a dividend of 5 per cent., the directors should receive a fixed sum for each attendance, and a further fixed sum for every additional one per cent. of dividend that the directors might declare dividends upon such estimates of account as they might see proper to recommend, so that *no dividend should be payable except out of profits*; that they should annually lay before the company a statement of the income and expenditure of the past year, and a balance sheet containing a summary of the property and expenditure of the company; and that the accounts of the company should be examined every year, with the vouchers relating thereto, and the correctness of the balance ascertained by an auditor, who should make a report to the members on the balance sheet and accounts, stating whether in his opinion the balance sheet was a full and fair balance sheet, containing the particulars required by the articles, and properly drawn up so as to exhibit a correct view of the state of the company's affairs. The company never made any annual profits, except in one year, when it made a profit of less than 5 per cent.; but the directors in every year from 1870, when the company commenced business, declared and paid a dividend of 5 per cent. and upwards, and they remunerated themselves on the corresponding scale, and, under the authority of a resolution of the company, paid bonuses to the manager. Such payments were, in fact, made out of capital. The balance sheets on which the dividends were declared, were prepared, not by the directors, but by the manager. They were delusive, they over-estimated the assets of the company, and were framed with the object of showing a profit available for a dividend. The auditor never looked at the articles of association, but accepted the statements of the manager, and certified from time to time, that the accounts submitted to him were true copies of those shown in the books of the company. No proper statement of income and expenditure, or auditor's report was ever laid before the company. The directors did not know the true state of the company's affairs, or that the balance sheets were delusive. They never exercised any judgment with reference to the accounts, but relied entirely on the manager and auditor.

The Court decided that the directors were jointly and severally liable to make good all sums improperly paid out of capital; and further, that it was the duty of the auditor, in auditing the accounts of the company, not to confine himself to verifying the arithmetical accuracy of the balance sheet, but to inquire into its substantial accuracy, and to ascertain that it contained the particulars specified in the articles of association, and was properly drawn up so as to contain a true and correct representation of the state of the company's affairs; and that as the improper payments by the directors of dividends, bonuses and directors' fees were the natural and immediate consequence of breach of duty on the part of the manager and auditor, the manager and auditor were liable in damages to the amounts so paid.

THE MANITOBA WHEAT CROP.

It is worth while directing attention to the unusually good quality of this year's wheat harvest in Manitoba. That province has repeatedly shown in former years, yields of this cereal remarkable in quantity, and once or twice of a quality almost uniformly the best. But where the quantity was unusual, there were generally drawbacks, such as frosted wheat, etc. This year, however, we hear nothing of frosted grain, and the quality is such as no one can take exception to. No such showing has been made in Manitoba for years. It contrasts strongly with the returns from Minnesota and Dakota wheat, as inspected at Minneapolis, where the quality was much lower.

The books of the Dominion Government grain inspector at Fort William show that up to the 19th of this month 5,595 cars of wheat of this season's crop had been delivered at that point, representing at, say, 750 bushels to the car, 4,250,000 bushels. Of this quantity of wheat 75 per cent. is graded No. 1 hard, and 22 per cent. No. 2 hard, leaving only 3 per cent. of lower grades. Practically, therefore, the entire crop is of fine milling quality, a very striking circumstance.

Another thing shown by the figures submitted is that the crop has begun early to move and been carried rapidly to the great lakes. At a corresponding period of 1896, namely, on 19th October, only 2,407,000 bushels had gone into the Fort William elevators. In this respect, also, the present season is somewhat exceptional.

CUSTOMS ENTRY REGULATIONS.

Numerous complaints have been received by the Department of Customs as to the complicated methods of making an entry of goods under the preferential clause of the new tariff. Frequent changes have been made by the Comptroller in his efforts to satisfy all parties and still guard the revenues. Last Saturday further instructions were issued in regard to this matter, the new memorandum being a consolidation of previous orders, with certain amendments. We elsewhere give the substance of the instructions. It is important to note that two changes have been made. The obligations on the exporter to make his declaration before a magistrate, mayor or city notary, or like official is abolished, and a "subscribing witness" substituted. This change while having the effect of saving time, as there is nothing to prevent the exporters' clerk from being the witness, will also lessen the expense of shipping. The officials before whom the declaration was made were entitled to fees, varying in different countries, and these amounts were usually added to the invoice. The exporter's declaration is no longer needed for goods under $10 in value, the department being satisfied with the declaration of the importer. These changes are commendable in that they simplify the details of trade. It remains to be seen whether unscrupulous traders will take advantage of them to further dishonest practices.

THE COMMERCIAL VALUE OF THE MAPLE.

There are more than sentimental reasons why the maple tree should be held in regard by Canadians. As a source of commercial profit the value of this tree is not sufficiently appreciated. According to the census of 1891, the annual production of maple sugar in Ontario amounts to 5,665,796 pounds, which means, at average market prices, almost half a million of dollars. This industry is capable of greater developments, and the merchants of the country should be interested in encouraging farmers to take it up more extensively. The sugar bush of the Michigan Agricultural College yields an annual return of twelve per cent., valuing the wood land at $50 an acre. A Simcoe county farmer estimates that the yield of ten acres of maple trees, when the sap is converted into syrup and sugar, gives a net return of about $10 per acre. In addition, there is to be considered the annual growth of wood suitable for fuel and farm uses, which should amount to five cords each year. In what industry can the farmer obtain greater returns with the expenditure of an equal amount of labor and capital? The bulk of the maple sugar produced in Canada is consumed here. Exports were made last year amounting to about $50,000, which is apparently about the dimensions of our foreign trade in this article. That this amount could be vastly increased by judicious business methods is the opinion of a number of those acquainted with the details of the industry. The supply is practically unlimited, as in numerous districts of Canada the farms contain land, much of it now wasted, which could be turned to good service if planted with maple trees.

We have not mentioned the usefulness of the wood of this tree for cabinet-making purposes or for interior decoration. But people in other countries admire it and value it, if we do not. Perhaps we are so far familiar with it that we have ceased to consider its worth in this aspect. Still this is another of the directions in which the maple is of value.

SOME COMMENTS ABOUT DRY GOODS.

In Huddersfield only the makers of the very highest class of woolens and worsteds are said to be well employed.

The exports of linen piece goods from Ireland for September were 50 per cent. less than those of September, 1896. Shipments to Canada show a falling off of 23.8 per cent.

A short while ago a traveling salesman expressed the result of his labors after this fashion: "A year ago I was selling thousands of dollars' worth of knit goods; this year I am selling thousands of dollars' worth of goods, *nit!*"

The precise amount of the debenture stock of the forthcoming issue of the English Sewing Cotton Company, Limited, is not yet indicated; but the *Pall Mall Gazette* understands that £750,000 to £1,000,000 is now considered likely.

It is also stated by the *Drapery World* that fourteen leading firms of thread-makers—cotton, silk, and linen—are now definitely included in the forthcoming flotation; that all the arrangements, excepting the legal formalities for the increase and alteration of the capital indicated, are now completed; and that the prospectus may be looked for at the end of the present month.

There are a number of Canadians in the textile centres of Great Britain, but the drapery journals report that their operations are, as yet, very limited. Mail advices of the 16th inst., report as the latest Transatlantic arrivals the following names:—Mr. J. Black, Robertson, Linton & Co., Montreal; Mr. J. H. Cockburn, Cockburn & Drake, Toronto; Mr. Beaudry, of Three Rivers, P.Q.; Mr. E. Hamel, J. Hamel & Co., Quebec, and G. H. Pack, G. Goulding & Son, Toronto.

"A gentleman connected with the fur trade informs me,' says a contributor to the *Drapers' Record*, "that the present is the worst year it has experienced since 1887. The obvious inference is that jubilees and furs don't go well together. The present unfortunate position of affairs is not mitigated by the appearance of 'electric' seal, garments made of which are sold at excessively low prices, with a detrimental effect on the fur trade generally. My informant had not, however, lost all hope, and I was glad to hear him express the opinion that if the weather becomes seasonable, those connected with the fur trade may yet be able to celebrate Christmas with some degree of enjoyment."

As we have previously noted, the Russian blouse is the newest feature of the mantle maker's art. A writer in the *Draper's Record* says: "The origin of it is the fact that the Russian moujik—who from excessive spirit-drinking has generally got a figure like Falstaff—envelops himself in winter in a sort of voluminous dressing-gown of sheepskin, which sticks out in front in the manner aforesaid. The reasoning, in fact, is this; that because the Russian moujik has a figure like Falstaff, and because France has gone crazy about Russia, therefore, English ladies are to look as if they had figures like Falstaff too." There is little accounting for the whims of fashion, and we must become reconciled to the Russian blouse, for it is supported by the *fiat* of Dame Fashion. It is a style to which heavy rich materials such as velvet and plush readily adapt themselves, and for this reason is very popular for smart visiting wraps.

FOR GROCERS AND PROVISION DEALERS.

Competition has reduced the price of a large loaf of bread, in Ottawa, from 12 to 11 cents.

Advices from Smyrna state that fig shipments are still quite large, but, as packers are shutting down, exports from this time forward may be expected to show a considerable decrease in quantity.

One of the large department stores of Philadelphia has decided to add a grocery department to their establishment. Their reason for taking this step lies in the opposition of a neighboring grocery store, which lately laid in a big supply of house-furnishing goods, and then began cutting prices at a great rate.

Contrasting the exports of cheese at the port of New York with those at Montreal, our correspondent notes that while last week's shipments from New York were 11,392 boxes, the shipments from Montreal same week were 121,618 boxes, which last is an unusual quantity. In the corresponding week of 1896 they were only 63,456 boxes.

Vancouver papers tell of the departure on October 22nd of the steamer "Tokio" for Liverpool with a cargo of 111,785 cases of canned salmon, valued at $411,461, besides a quantity of frozen and salted salmon and British Columbia ore. In all her cargo amounts to 3,900 tons, and it is thought to be the largest ever taken in one vessel from British Columbia.

Never has been seen in Shediac so large a trade in potatoes. The streets of the town are literally blocked with wagon loads of potatoes. One can see groups of twenty to forty at the stores of Messrs. Tait Hamilton, Melanson, Poirier and others. The farmers who have a good crop are now gathering in the money. The potatoes are selling at one dollar per barrel. There are some farmers in Barachois, Aboujagane and Cappele, who will make a clean profit of $600 alone. It is magnificent.—*Moniteur Acadien.*

An Order-in-Council has been passed on Sir Henry Joly's recommendation, appointing the following gentlemen as a board for the selection of standard samples of flour: Messrs. David Robertson, chairman; A. E. Gagnon, H. W. Raphael and Lionel J. Smith, Montreal; William Brodie, Quebec; Wm. Galbraith, J. L. Spink, Toronto; W. G. Bailey, Hamilton; I. D. Saunby, London, Ont.; Robert Noble, Dominion Millers' Association; Robert Muir, Winnipeg. The board will meet on Friday, October 29th, in the Montreal Board of Trade building.

The S.S. "Bellona" left Patras with Mediterranean supplies for the Montreal market. She had on board 665 tons of currants for that city, the principal shippers being D. Schisas, 305 tons; D. Pasquali, 105 tons; Hancock & Wood, and Arsenis & Co., 80 tons each, and several smaller lots. The same vessel has also 95 tons of currants for Halifax, and is reported to have a very heavy cargo of Valencia raisins and other fruits, nuts, etc. She is reported as having passed Gibraltar several days ago, but having to call at Halifax, may not reach Montreal till the 12th prox., or thereabout.

INSURANCE MATTERS.

Because of delay in establishing a paid fire department at San Francisco, insurance rates in that city have been raised 15 per cent.

On Monday last, the ratepayers of Tilbury voted upon a by-law to borrow $10,000 to improve the waterworks and electric light systems. The by-law was defeated. The park by-law was also submitted at the same time, and lost by a majority of 28.

Rate cutting in marine insurance is reported from Montreal. There is alleged to have been a cut of 20 per cent. on imported goods. But, on the other hand, a rise is threatened of rates on exports, the various groundings in the St. Lawrence lending color to this. It is stated that the marine underwriters have decided to increase by twenty per cent. next spring their insurance rates on the St. Lawrence trade generally, owing to the numerous accidents this season in the channel between Quebec and Montreal.

Boston has a horseless fire engine, and Fire Commissioner Russell, of that city, gives it his endorsement as being easier to handle than any of the three-horse fire engines. They turn a sharper corner and in shorter space than the horse engine; can be stopped in their own length, all of which has been proved by tests. As to the expense, the commissioner is less positive, and says: "The point which I want the public to fully grasp is that with me it is a question not so much of cost as efficiency in the department." The saving is the price of three or four horses and their keep, off-set by the necessity of keeping up ninety pounds of steam, which is again compensated for by power to throw 1,400 gallons of water per minute, as against 900 gallons by the other engines they have in use.—*Ins. Register.*

At Milwaukee, in September of next year, the Insurance Commissioners of the United States, will hold their annual convention. Dr. W. A. Fricke, of Wisconsin, is chairman of the executive committee, and may be depended upon to have a good programme. Here is part of it. John A. McCall, of the New York Life, has promised a paper on life insurance. Then, on assessment plans of life insurance, George D. Eldridge, of the Mutual Reserve Fund Life, and L. G. Fouse, of the Fidelity Mutual, will be heard. D. Ostrander, general adjuster of the Western department of the Phœnix, of Brooklyn, is to hold forth on fire insurance. The Attorney-General of Wisconsin, will speak to the text, "The Inconsistencies of Fire Insurance Legislation;" and John A. Finch, of the Indianapolis bar, will have something to say upon "The Liability of Members of Assessment and Fraternal Insurance Organizations." Addresses by experts are expected on the proper examination of companies engaged in the various branches of insurance, mortality tables, reserve and like subjects.

INLAND ROUTE TO THE YUKON.

We have received copies of a 30-page pamphlet entitled "The Inland Route to the Yukon," with map showing proposed routes from Kamloops to Klondike, published under Government authority by the Kamloops Printing and Publishing Co. at Kamloops, B.C. The route indicated is from Kamloops, north by the Clearwater Lakes and the Fraser River, or with an alternative detour to the westward, passing Barkerville and Cariboo, and striking the Necheco River, thence north-ward, crossing the Skeena at Hazelton. The more northerly of two suggested routes follows the Willow and the Findlay rivers, then west and north along a tributary of the Liard. The Stikeen River is crossed near Telegraph Creek, and then the route runs due north along the Teslin Lakes, across the boundary of British Columbia, in latitude 60° and longitude 132.30; thence north-westward to Fort Selkirk, Lewis River, Pelly River, and so up to the junction of the Klondike with the Yukon, to Fort Cudahy, Forty-mile Creek, and across the Alaska boundary to Circle City. The writer of the pamphlet says he has spent eighteen months with his family in the district from the Stikeen River northward, and says the C.P.R. has already begun surveying a line north of that river, and connecting it with Teslin Lake. Says the Victoria *Colonist:* "Can Eastern people, can our own people, fully realize what it means to say that from Kamloops, nearly 150 miles from the southern boundary of the province, a railway nearly fourteen hundred miles long can be built in British Columbia, connecting the great gold and silver region of the South-east with the gold fields in Yukon, and passing for its entire length through a highly mineralized country, with millions of acres of fertile land along its route? What a wonderful fact this is!"

BRITISH COLUMBIA NOTES.

The premier of British Columbia has been visiting the agricultural districts in the Fraser Valley and the Kootenay country. Everywhere, he says—in the agricultural as well as the mining districts—he found signs of prosperity. The farmers have all had good crops, and good prices, and in the silver-lead mining districts, Mr. Turner found that the advance in the price of lead had more than counteracted the slump in silver, and had in fact caused work to be started on several properties. The early reopening of the Pilot Bay smelter had caused activity in that district. Some rich finds of copper ore have been recently made on St. Mary's River, about 14 miles from Pilot Bay, and these, together with the silver-lead mines in Ainsworth camp will keep the Pilot Bay smelter going. A trail is being built to the new finds, and there is already talk of constructing a narrow gauge railway.

Nelson, the Premier tells the Vancouver *News-Advertiser*, he found a very busy place. A large number of new buildings have recently been erected, and numerous mines in the vicinity are being actively worked. In Rossland, too, he noticed a great change, and though there are at present not many mines actually shipping ore, the town has assumed a solid appearance. While there he met the Board of Trade, and discussed several matters affecting the district. At Revelstoke the vexed question of the erosion of the river bank was again called to the Premier's attention, and he has instructed an engineer to report on the same, and has also entered into communication with the Dominion Government on the subject.

ANSWERS TO ENQUIRERS.

G. C., Truro, N.S.—Cannot see that your argument applies. "Encouragement" of the kind you appear to suggest does not appear to be needed by the Massey-Harris Company, which ships its wares to Australia, or the Toronto Radiator Works, which sends its products to Norway. And both these concerns are 1,000 miles farther from the Atlantic than you. Then we heard the other day that the Robb Engineering Company of Amherst had received an order for three tandem compound engines for export to Spain. These were ordered, we understand, by an English egnineering firm for electric street roads at Barcelona and Madrid. If you have a good thing which people need, and will let people know that you have it, even foreigners wil find you out, and that without Government pap.

E. A., Ottawa.—(1) Don't think the Ontario Government has anything to do with it. (2) Ask the secretary of the Winnipeg Board of Trade.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Oct. 28th, 1897, compared with those of the previous week:

Clearings.	Oct. 28.	Oct. 21.
Montreal	$12,953 645	$13,463,878
Toronto	7,416,191	7,678,463
Halifax	1,139,040	1,317,248
Winnipeg	3,121,577	3,080,572
Hamilton	594,077	657,907
St. John	554,363	542,060
	$25,778,893	$26,740,228

Aggregate balances this week, $3,570,058; last week, $4,549,795.

BOOKS RECEIVED.

American Statistical Association.—The September issue of the quarterly publications of this body has just reached us. Among critical notices is one on Medical Statistics of the Negro, and a racy attack on Mr. M. G. Mulhall's statistical methods as exemplified in his latest book, Industries and Wealth of Nations. The criticism says; "Mr. Mulhall has shown us his art, his peculiar legerdemain, and has confirmed our original impression that it is all humbug."

Statutes of Canada.—This volume includes the local and private Acts, as well as the public and general Acts, of the first session of the eighth Parliament of the Dominion. It is two volumes in one; the first relating to the first session, lasting from 19th August to 5th October, 1896, and the second from 25th March to 29th June, 1897. S. E. Dawson, Queen's Printer, Ottawa, 1897.

—A correspondent who signs his very bitter letter "Labor's Sacred Cause" finds fault with a brief article in last week's Monetary Times on the London engineers' strike, saying that this journal must be in league with monopoly and is crying down the workingman. The impeachment is incorrect. We simply gave a statement of the true inwardness of the movement from a respectable source, and deprecated such an extension of the struggle as Mr. Keir Hardie is trying to bring about. It is not difficult for an unprejudiced man to see that the English trades unions have grown to be unreasonable in their demands. They are, indeed, making it impossible to carry on the industry with success. Here is what John Burns himself, a valiant champion of the "workingman," writes on the subject:—

"I know of unnecessary harassing in trivial matters of employers; I have opposed, and still more will strongly disapprove of the way in which some unions have allowed their district officials to raise non-essentials and to cause senseless, silly disputes over trivialites as between trade and trade, to exaggerate their importance, the employers and the men suffering therefrom. What is more, I am determined up to the hilt to use what influence I can to stop the internecine strife over demarcation of work and other questions upon which provincial, but not London, employers have some ground for complaint. I also believe that the larger unions should exercise stronger central control over the meddling minnows who fancy they are tritons."

—It is worthy of note that the Medical Association gathering in Montreal brought to the notice of European medical men some things previously unknown, or imperfectly known, about Canada. It was made clear that the air of our western plains, viz., from the altitude of them, is very dry and bracing, and a stay there has been found to be most beneficial in cases of lung and chest troubles. People in England are finding this out from the fact that not a few persons suffering from pulmonary complaints and affections of the kind have been practically free from them while staying in Canada. This is also the case in the Rocky Mountains, among the pine forests, and in the Kamloops district.

—The total amount to be raised in direct taxes for next year in New York State on the equalized value of real estate, which aggregates $4,506,985,694, is $12,033,651, of which $4,101,356 is for school purposes, $2,947,6t0 for canal and general purposes, and $4,957,684 for the State care of the insane. In addition to the amount of the tax, the State will have other revenues aggregating about $8,500,000, of which $2,300,000 will result from the annual tax on corporations and the organization tax, $2,000,000 from collateral inheritance taxes, and $3,500,000 from the Raines excise law. The estimated receipts under the latter are $3,250,000, but they will probably be nearer $4,000,000

A BANK CLERK'S VIEWS.

Editor MONETARY TIMES:

SIR,—I have read your article of 22nd October about "Bank Clerks and Other Clerks." You have said some very sensible things on the subject, but I don't think you have treated the whole subject. And I ask space to mention a few things about the position that bank clerks occupy in small towns that, perhaps, you do not know of.

You must remember that a bank manager in a small place is a pretty big man. I mean that he is looked up to in the village as a man of great influence, and is a good deal run after for all sorts of things. And then, of course, bank clerks get a good deal of attention, too. Either the manager, or the accountant, or the teller, has to "patronize," as the people call it, all sorts of meetings or concerts, and to be president of local clubs; sometimes he has to present prizes at the fall fairs, or maybe to be chairman at church socials. Well, that is all right. But don't you see, it costs the bank clerk money, for he has to subscribe, or, at any rate, he is expected to subscribe to almost everything that comes along.

This would be all well enough if his pocket would stand it. But the bank managers even do not get large salaries, and, of course, the clerks get less. And if any one of us is to "keep up his end" and not be called mean, he has a good many what you might say are social calls on his pocketbook. And so it appears to me that while it is all right to be economical and to not spend more than your salary, head offices might sometimes consider the calls that are made upon us and pay us better, because we have to hold up the honor of the bank, as it were, and not appear mean.

BANK CLERK.

A LITTLE KLONDIKE NEAR QUEBEC.

(*Translated from "La Semaine Commerciale."*)

Our friend Mr. Octave Ouellet, of the Provincial Department of Agriculture, who lived in Somerset in 1873, organized at that time a joint stock foundry company, under the name of "La Compagnie de la Fonderie de Plessisville." at Somerset or Plessisville, Megantic county, Eastern Townships of Quebec, with a capital of ten thousand dollars.

Iron was then worth $34 a ton in Montreal, with some tendency to weaken; in fact, it lowered down to $22 in 1875. In other words, it was a very bad time for starting in the business, and when Mr. F. T. Savoie took hold of the company in 1875 there was a deficiency of about one thousand dollars. However, the company soon began to prosper under his able management, and things went on so well that on the 1st February, 1883, after three successive yearly 10 per cent. dividends in 1880, 1881 and 1882, the shareholders were handed shares in the new company, the Plessisville foundry, to the amount of $30,000, for their original paid-up subscription of $10,000, that is, three shares of $100 each for every one of their shares of $100 in the original company.

Mr. Savoie had the capital stock of the new concern raised to $50,000, on which $39,800 was allotted and paid as follows: $30,000 to the first shareholders, as above stated, being the capital and accumulated profits of the old company, and $9,800 to the new shareholders.

The following dividends have been paid under the able management of the actual manager, F. T. Savoie, on the capital stock of 1883: In all $39,800; and there is to be added the sale of two shares for $200, which makes up the $40,000, viz.:

1884, 1st dividend paid		10	per cent. $	3,980 00
(In 1885, $15,263 75 was lost by fire, and year 1886 was spent to rebuild and re-organize the foundry.)				
1887, 2nd dividend paid,		10	per cent.	3,980 00
1888, 3rd	"	" 10	"	3,980 00
1889, 4th	"	" 7	"	2,786 00
1890, 5th	"	" 10	"	3,980 00
1892, 6th	"	" 10	"	3,980 00
1893, 7th	"	" 12½	"	4,975 00
1894, 8th	"	" 10	"	3,980 00
1895, 9th	"	" 15	"	5,970 00
1896, 10th	"	" 10	"	3,890 00
1897, 11th	"	" 10	"	4,000 00
				$45,591 90
Reserve fund				63,372 86
Total profits				$108,964 76

These figures show that the original capital stock of $10,000, which was tripled by the earnings of the first years, has given back to the first stockholders, in twenty-three years, an amount of dividends which represents 373½ per cent. on their actual investment, or $373.50 for each $100 share. It may be added that, as those $100 shares are now worth $200, the real market value of the stock subscribed in 1873 is $600. As to the new capital stock subscribed in 1883, it has earned for its bearers, in ten years, dividends to the extent of 114½ per cent. on their investment, or $114.50 for each share of $100, which shares are also actually worth $200 on the market.

This is such a striking example of what thrift and able management can do, that we are pleased to mention it in accordance with our well-known views on the marvels to be expected from capital associations. We might recall that, at the very same time when the share holders of the Plessisville foundry were realizing such handsome profits, fortunes were lost in the same line of business in different points of this province. The same diversity of results can be expected even in the Klondike district. Men like Mr. Savoie will thrive and prosper where others may lose their money and their life.

MR. WANAMAKER ON ADVERTISING.

"I never in my life used such a thing as a poster or dodger, or handbill," said Mr. John Wanamaker, of Philadelphia. "My plan for twenty years has been to buy so much space in a newspaper and fill it up as I wanted. I would not give an advertisement in a newspaper of five hundred circulation for five thousand dodgers or posters.

"If I wanted to sell cheap jewelry or run a gambling scheme I might use posters; but I would not insult a decent reading public with handbills. The class of people who read handbills are too poor to look to for support in mercantile affairs. I deal directly with the publisher. I say to him:

"'How long will you let me run a column of matter through your paper for $100 or $500, as the case may be.' I let him do the figuring, and if I think he is not trying to take more than his share, I give him the copy. I lay aside the profits on a particular line of goods for advertising purposes.

"At first I laid aside $3,000; last year I laid aside and spent $40,000. I have done better this year and shall increase that sum as the profits warrant it. I owe my success to newspapers, and to them I freely give a certain profit of my yearly business."

A CANADIAN CHAMBER OF MINES.

A meeting was held at 165 Fenchurch street, E.C., on Thursday, 7th October, with the object of establishing a Canadian Chamber of Mines. Among those present were the Hon. Forbes Vernon, Agent-General for British Columbia; Mr. J. Howard, Agent-General for Nova Scotia; Mr. William Thompson, C.E.; Mr. Bryan Johnstone, chairman of the British Columbia Development Association; Mr. W. A. Townsend, general manager of the same company; Mr. F. E. Harman, director of the Klondike Mining Transport and Trading Company; Mr. Robertson, director of the Quesnelle Golden River Company; Col. J. Harris, chairman of the proposed Chartered Hudson's Bay and Pacific Railway Company; Mr. F. A. Gillam, of the British Columbia Agency, Limited, and others. Letters of approval were received from Mr. J. H. Lukech, general manager of the British Columbia Exploration, Limited; Col. Cradock Hartopp, Mr. John McDonald, Mr. Cecil Hartridge, Major Flood Page, and others.

The Hon. Secretary, Mr. Jerome Dyer, reported that the resolutions framed at the last meeting of the Committee of the Canadian Chamber of Mines had been carried out. A representative board was in process of formation, and steps were being taken to incorporate the Chamber under license of the Board of Trade. The Canadian Government had been communicated with, as had also the Provincial Governments.

It was resolved that the Canadian Chamber should co-operate with the Australasian Chamber of Mines in regard to the proposed Mining, Metallurgical and Machinery Exhibition which it is proposed to hold in London in 1899. Mr. Seton Karr, M.P., was, it was stated, now in Canada, and would see the Governments on the matter; and Mr. J. Lowles, M.P., and Sir Somers Vine were now in Australia representing the Australasian Chamber in interviewing the Australasian Governments regarding their support to the exhibition.—*Canadian Gazette, London, 14th Oct.*

CLERKS' SALARIES AND TEMPTATION.

A case of theft has been reported in one of the stores of Boston this week, in which a clerk took property from his employers of the value of some thousands of dollars. The crime was deliberate, and appeared to have been systematically continued for some time. On a closer examination of the circumstances, it developed that this clerk held an important position, that he had been in the store for four years, and that at the end of that period he was receiving but $6 a week as his salary. The question may be asked if, in view of this, it would not have been policy, as well as justice, on the part of his employers to have paid him more money. Certainly it would have been prudent in them to know how this clerk was living. An enquiry might easily have satisfied them that what they were paying him was not adequate to his support. This and other instances that have been made public, and probably more which have not been brought to light, indicate that compensation is less than it should be in some departments of business in Boston. It arises, doubtless, from the competition to obtain positions in stores where the work is lighter and more "genteel," as the phrase is, than in mechanical pursuits; but it strikes us as a mistaken policy in more than one aspect. It is apt to induce a feeling of injustice in the minds of those who receive but a pittance for their service, and to render them more open to the temptation of dishonesty.—*Boston Herald.*

—Negotiations which have been going on for a good while between the promoters of the Vancouver and Victoria and Eastern Railway, and Mr. William MacKenzie, president of the Toronto Railway and other enterprises, and Mr. D. D. Mann, are said to have been concluded. Mr. MacKenzie and Mr. Mann acquire the charter which covers the line from Vancouver through Boundary Creek and Rossland, and is the charter which Mr. Heinze opposed the Dominion Government subsidizing at last session.

—In a lot of clippings found among old papers of the late C. C. Hine of the *Insurance Monitor*, was the following: "What kind of a man is he?—Good, bad, or indifferent?" "Well, that depends a good deal on who teeters on the other end of the plank with him" "How so, sir?" "Well, if you size him up alongside of Judas Iscariot, he looms up middlin' fair; but when you come to set him down between such fellers as you and me, Judge, he does dwindle terrible surprisin'—he does, for a fact."

—"I am the most flamboyant of Americans," writes Lillian Bell to the *Home Journal*, "the most hopelessly addicted to my own country, but I must admit that I had my first real taste of liberty in England. I will tell you why. In America [she means the States] nobody obeys anybody. We make our laws, and then most industriously set about studying out a plan by which we may evade them. America is suffering, as all republics must of necessity suffer, from liberty in the hands of the multitude. The multitude are ignorant, and liberty in the hands of the ignorant is always license."

—Canadian distillers have suffered seriously from the many imitations of their whiskeys, put by rascally persons on the United States market. On Friday last, in a musty and darkened cellar, on North Sangamon street, Chicago, lawyers, detectives and constables unearthed what they claim to be one of the biggest liquor counterfeiting schemes ever operated in any country. The liquor dealers of the world have been working to learn the location of this plant for over a year. After four hours work $25,000 in labels, representing all the leading brands of liquor, bottles and cases were found and confiscated. It now remains to find the persons who were at the bottom of this nefarious swindling.

REGULATIONS IN REGARD TO PREFERENTIAL TRADE.

A new code of regulations was issued last week in regard to the preferential clause of the Dominion tariff. It provides that persons making entry of goods under the Canadian reciprocal tariff, are required to furnish a separate invoice of the articles entitled to such entry, with a declaration annexed thereto, signed by the exporter or his agent in the presence of a subscribing witness.

If invoices are made out at lower prices for goods exported directly to Canada than the fair market value at the same time and place for such goods when sold for home consumption in the country whence so exported, in all such cases the invoices are also to show clearly, in a special column, or by addition thereto, such fair market value as aforesaid, for the goods described therein.

The exporter's declaration as to the origin of the goods is in all cases (except as hereinafter mentioned) to be produced and filed with the invoice, and its production is to be noted by customs officers in Canada on the entry form, otherwise the general rates of duty will be collected, without reduction, until the exporter's declaration as aforesaid is furnished.

Customs entries under the reciprocal tariff should be taken separately on the usual form.

The declaration of the importer or his agent, as to the origin of goods, will be accepted in lieu of the exporter's declaration, in the case of articles which have been entered for warehouse (in bond) in Canada, prior to the issue of these instructions, and as to goods valued at less than $10, for the whole importation when hereafter offered for entry, subject, however, in all such cases, to the approval of the collector after examination of the goods by a custom officer.

Articles from all the countries entitled to the benefits of the reciprocal tariff may be entered on the same invoice, and the origin of all the products entered on such invoice may be attested to in one declaration, on the form prescribed, the names of the countries (if more than one) being written in succession in the blank space reserved for origin of products.

Importers claiming entry of goods under the reciprocal tariff, are required to file with the customs collectors in Canada a certificate of the United States customs entry for immediate transportation, or a bill of lading showing through transportation when such goods are carried in transit through the United States and imported into Canada.

Note particularly, that the reciprocal tariff does not apply to the following articles, viz.: Ales, beers, wines and liquors, sugar, molasses, and syrups of all kinds, the product of the sugar cane or beet root; tobacco, cigars and cigarettes.

Articles which are the growth, produce or manufacture of the United Kingdom of Great Britain and Ireland, New South Wales and British India, when imported direct from any of the said countries and entered for duty or taken out of warehouse for consumption in Canada, shall be subject to the reduction of duty provided for in the reciprocal tariff, and under limitations mentioned, from the date when admitted to reciprocal tariff benefits.

Until the 31st day of July, 1898, the products of fourteen countries, when imported from the United Kingdom of Great Britain and Ireland, or any of the countries in question, and entered for duty or taken out of warehouse for consumption in Canada since the 23rd day of April, 1897, shall be subject to the reduction of duty provided for in the reciprocal tariff.

The excess of duty paid on products imported as aforesaid from the countries to which the reciprocal tariff applies, will be refunded, if the claim therefor, with satisfactory proof of the origin and value of such products, is made in the usual form through the collector of customs at the port where such duty was paid.

Nothing in the foregoing instructions shall be held as affecting the right to enter articles under the "French Treaty Act, 1894," but any articles entered at a reduced rate under the said Treaty Act shall not be entitled to a further reduction of duty under the provisions of the reciprocal tariff.

MINING IN ONTARIO.

Much interest usually attaches to the annual report of the Ontario Bureau of Mines. And the present issue, which is published this week, has been looked forward to by many. This report furnishes all the statistics of Ontario mining for 1896, and comes down into 1897. We hope soon to give a resume of some of its more important portions.

The total value of all the mineral productions for 1896 is placed at $5,235,000. The wages paid were $1,521,000. The statistics of gold mining in provinces are given in the following table :

Schedule.	1892.	1896.
Mines worked, number.. ..	9	8
Men above ground....	85	103
Men underground....	40	86
Ore treated, tons:......	3,710	13,292
Gold product, oz....	0	7,154
Gold, value.........	$36,900	$121,848
Wages paid for labor .. .	22,750	91,210

We quote from the beginning of the report :

"Compared with the transactions in mineral lands in 1894, there was an increase last year in the number of locations sold and leased of 218, in the area of land sold and leased of 13,635 acres, and in the receipts from sales and rentals of $22,644. The total collections on account of lands sold and leased last year was $35,581 (not including $5,006 of rent money, paid on lands previously leased), and during the last few weeks of the year there was paid in a further sum on lands applied for, of $28,436. The largest receipts were in the months of November and December; and as evidence of the continued briskness of operations, it may be stated that the receipts on account of mining lands in the first three months of the present year, exclusive of a special deposit of $20,000, first three months of the present year, exto transactions in Crown lands only. There have been large investments in patented lands, but no attempt has been made to procure a list of them."

. FRUIT FOR ENGLAND.

The reports received of the later trial shipments of fruit made by direction of the Minister of Agriculture show that they arrived in Great Britain in a satisfactory condition. Of the 336 cases shipped per the steamship "Numidian," to Liverpool, the report says that the fruit arrived in good condition, except the grapes, which were fairly sound, but inclined to drop from the stems. The report on the 86 boxes by the "Hurona" to London, says that the fruit arrived in good condition, with the exception of the grapes, which, although apparently in sound condition, dropped from the stems. The report further says that the pears were in very fine condition, the Crawford peaches a little soft; the tomatoes in fine condition. The objection to the tomatoes was that they were too large. A medium size variety take better in the British market.

The following paragraph in connection with the last-named shipment appeared in the *Standard* of London : "A consignment of Canadian fruit was sold at Covent Garden yesterday by Messrs. Garcia, Jacobs & Co. The fruit, consisting of some 800 packages, was sent from Montreal to Liverpool in the "Hurona," under the direction of the Canadian Government, who are actively establishing a supply for the English market. Previous consignments have not turned out wholly successful, but the present one proved completely satisfactory, with the exception of the grapes, which were of too soft varieties to withstand the transit, even in a refrigerator, while their quality make it improbable that they can compete with Portuguese growth. The pears were found to be of the same varieties as are grown in England and France, and of a quality that will suit the English trade. The opinion was generally expressed at Covent Garden that Canadian pears and plums will be able to compete in our markets with continental supplies. The peaches, though not as large as the English hothouse specimens are of sufficiently good quality to secure a large trade. The tomatoes were of exceptionally fine quality, and if defects in regard to size are remedied, they will undoubtedly rival those of French growth. All the fruit, excepting the grapes, commanded good prices, and the buyers expressed satisfaction at the appearance of another source of supply.

A JUDGMENT ABOUT TERRA-COTTA.

The Recorder rendered judgment yesterday in the case of the City v. Eusebe Paquette contractor, for using terra cotta bricks instead of ordinary bricks in the construction of the inner walls of a building on Cherrier street. The action was dismissed with costs against the city, the court holding that in the case at issue the wall complained of had been shown to be perfectly safe for the weight it had to bear, while the evidence went to establish that, in case of fire, the terra cotta walls were superior to others, on account of their ability to withstand more heat. The by-law under which the action was taken was one to prevent accidents through defective construction and through fire; the terra-cotta bricks which were invented only after the making of this by-law, were proved to be of incombustible material, and to answer both purposes fully. As for the pressure that they could stand, the tests made at McGill College were conclusive, and the court had no hesitation in saying that in the present case, at least, the requirements of the law had been fully met.—*Montreal Gazette.*

TRADE EXPANSION.

L'Economiste Europeen, of Paris, summing up the commercial situation in Europe, speaks as follows :

The almost general increase of fiduciary circulation makes it clear beyond the possibility of doubt that the nations generally are finding a use for credit. It is evident that this use is not merely the carrying on of speculation, for in that case it is not circulation that would increase, but deposits. It is for making ordinary trade purchases, and we must conclude from this that there is an expansion of trade, and an increase of activity in business generally. There is to-day a singular combination of circumstances that have not been seen simultaneously for a long time, and that show without doubt that we have entered upon a period of general revival.

In Germany, Austria, Russia, Great Britain and France, the situation presented is much the same. The circulation of the Bank of Germany has gone up beyond the limit which is exempt from taxation. The Austro-Hungarian Bank is also expanding its note issues. France's foreign trade has greatly grown during the past few months, while the statements of the British Board of Trade contain the best evidence that commerce in the United Kingdom, in spite of strikes and the losses caused by company promoting, is in a healthy and improving condition. On this continent, also, there are everywhere visible the effects of a better demand for merchandise of all kinds. The railroad earnings everywhere are showing increases; the volume of foreign trade is enlarging ; the financial centres report the call for money for legitimate enterprises good. The commercial world generally is showing the effect of the movement towards recovery after a period of depression and enforced economy.—*Gazette.*

MICROSCOPY AND CRIME.

"A curious use of the microscope," says the *British and Colonial Druggist*, "was lately made in Prussia A barrel of specie from the frontier arrived at Berlin, emptied of its precious contents, and filled with sand. Professor Ehrenberg, the eminent chemist, was consulted on the subject, and immediately sent for samples of sand from all the stations along the different lines of railway through which the barrel had passed, and by means of the blowpipe and the microscope identified the station from which the interpolated sand must bave been taken. In due time the culprit was discovered to be one of the clerks at this station." Commenting on this story, the *National Druggist* says: "If the annals of some of our larger establishments were written, we should doubtless find that the microscope had done good service on many occasions."

ROPE TRANSMISSION OF POWER.

The plant of the Milwaukee Dry Dock Co. presents an interesting application of rope transmission of power. The outfit is of the Dodge patent American kind, and was installed by the Milwaukee Rice Machine Co. Power is transmitted by means of a single one-inch rope more than 200 feet from a 100 horsepower engine in the blacksmith shop to the sawmill. These shops stand at an angle of about 45 degrees. The engine wheel is 96 inches in diameter, has eight grooves and transmits power to a sheave with a diameter of 6 feet and grooved for ten warps of the rope. Two of these grooves are used to drive an auxiliary shaft. One continuous rope transmits power direct to the shaft in the sawmill.

AN UNEXPECTED REJOINDER.

The Philadelphia *Record* tells a story concerning President George B. Roberts, of the Pennsylvania Railroad, in connection with an inspection tour over the lines of the company. The inspection party was riding over one of the branch lines of one of the numerous divisions of the big system, accompanied by the superintendent of the division. The branch happened to be an exceptionally crooked one, and as the superintendent was chatting with President Roberts the car made a sudden lurch going around one of the sharp curves, which led the superintendent to remark to his chief that "the engineer who built this branch knew d——n little about engineering." With a merry twinkle in his eye the president replied: "Yes, that is so. But I was very young when I located the road, and I know better now." The superintendent was completely discomfited by this reply, not having been aware that the then president of the Pennsylvania Railroad had, when quite a young man, located and done the engineering work thereon. President Roberts, on the other hand, took this somewhat severe criticism on his early work as a good joke.—*Engineering Review*.

THE UNITED STATES MINT.

The report made last week to the Secretary of the Treasury by the Director of the United States Mint for the fiscal year ended 30th June, 1897, covers the operations of the mints and assay offices, together with the statistics of foreign countries, relative to production and coinage of the precious metals and the monetary condition of each. The value of the gold deposited at the mints and assay offices during the fiscal year, 1897, was as follows: Domestic bullion, $60,618,239; mutilated and uncurrent domestic coin, $1,015,314; foreign bullion and coin, $22,559,534; old plate and jewelry, $2,810,248. The purchases of silver bullion for subsidiary silver coinage, under the provisions of section 3,526, revised statutes of the United States, aggregated 259,248 fine ounces, costing $171,455.

But this statement about "subsidiary silver" is a bagatelle compared with the coining of silver under the Sherman Act for a series of years. The total coinage of silver dollars from bullion purchased under that act from August 13th, 1890 (the date at which the law took effect), to July 1st last, has been 63,748,477 pieces, containing 53,172,650 ounces of fine silver, costing $51,532,154, giving a seigniorage of $17,216,322, not a bad profit on the coining. The net imports of gold were $44,609,841, as against $78,904,612 net export for the previous fiscal year. The net exports of silver were $32,636,835, as against $33,262,258, for the fiscal year 1896.

Commercial.

TORONTO MARKETS.

TORONTO, Oct. 28th, 1897.

DAIRY PRODUCTS.—Good dairy butter is scarce, and finds ready sale upon arrival, merchants quoting 16 to 16½c. Medium to low qualities are more abundant, and slow of sale at even the lowest prices. Creamery butter is more plentiful, and the tone of the market is easier at 19 to 20c. per lb. for prints, and about 18 to 19c. for tubs. The export trade is somewhat weaker. Cheese is lifeless. Large quantities are held in the country, and some dealers predict a break in the market soon. A steady market exists for eggs. Offerings are free. The quality of held stock is not satisfactory. We quote: fresh, 15 to 16c.; held, 13 to 14c.; limed, 13 to 13½c.

FLOUR AND MEAL.—Activity characterizes the trade in flour, both by way of export and import trade. Shipments are going forward principally to the United Kingdom, and mainly to these ports: Liverpool, Belfast, London, Glasgow and Leith. The local trade is active. A fair movement to the Maritime Provinces is reported, but values in this market are lower than in the British centres, and merchants are shipping with the idea of retaining trade connection. From Newfoundland reports of new vigor in trade are received, and a fairly active trade is taking place with that island. In the United States, Minneapolis mills are reporting an extraordinary demand for flour, and have actually been forced to buy that commodity from outside mills. One company, which controls five mills with a daily capacity of 14,000 barrels, is said to be unable to supply their own demand, the first time in two or three years that the company has been forced to buy its own product.

GRAIN.—Wheat is up 2 to 3c. per bush., as compared with quotations last week. Values are firm at the advance. Deliveries are being made freely by farmers, although the recent rains had the effect of increasing the attention paid to fall ploughing, and for a few days receipts diminished somewhat. The roads are, as a rule, in excellent condition. Peas are steady and unchanged. Barley remains dull, with prices nominal. A dull and unsatisfactory market exists in buckwheat. Rye is firm in value, and active. There is only a moderate movement in corn. The New York *Journal and Bulletin*, October 27th, says: "Stocks in Europe are still small, as a rule, notwithstanding recent heavy arrivals, which were expected to depress those markets more than they did, even with pretty free marketing of native wheats on the other side, especially in France, in expectation that the Government will grant the petition of the Municipal Council of Paris to reduce the duty on wheat. Hungary and Austria are still taking wheat and rye in our markets to supply the deficit, which is increasing on later estimates, which seems like shipping coal to Newcastle thus to be compelled to supply one of our former competitors for the import trade of Western Europe. But that it should draw its deficit from America instead of from Russia argues ominously for a shorter crop in that country than has been believed."

The stocks in store at Port Arthur on Oct. 16th were 1,112,195 bushels, and there were received 820,108 bushels, and shipped 659,095 bushels, leaving in store on Oct. 23rd, 1,261,126 bushels.

GROCERIES—Trade is moderately active Dried fruits appear to be the chief attraction. Advices from Smyrna state that the fig market there is very firm. Many of the large packing houses have shut down, owing to rains and the high prices for fine quality figs. The crop of new Naples walnuts is reported to be smaller than the average of recent years, but of very satisfactory quality. The sugar selling arrangements are still a subject of debate, and the trade is in a state of transition. It is impossible to predict what will be the outcome of present difficulties. The world's visible supply of raw sugar was 1,090,000 tons, against 1,100,000 tons last week. For canned goods there is moderate enquiry; all offers at anything less than standard quotations are promptly closed.

HIDES AND SKINS.—The hide market remains in a most unsatisfactory condition. Merchants are paying 9c. for green cowhides, and 9½c. for steers; cured are quoted at the same prices. How long this stupidity is to last no one knows. As all the trade knows, the high prices paid to butchers are the result of competition between two firms, brought about by family complications, and until this is settled, hide merchants are called upon to do business without a profit. Sheepskins are worth 90c.; calfskins are unchanged. A Chicago advice, Oct. 26th, says: "Tone of the market fairly firm; business fairly active, although no large trade reported. Recent purchases made by tanners cleaned the market of all native steers hides offering, and prices paid were 11 to 11¼c. The close was firm, with native steers at 11 to 11¼c.; heavy Texas, at 10¼c.; butt brands, at 10c; branded cows, at 9¼c.; Colorados, at 9c.; heavy native cows, at 10 to 10¼c., and light do., at 10¼ to 10½c."

LEATHER.—The market is quiet. Tanners and merchants report orders from shoe manufacturers as few and small Those who are handling specialties suited to other industries find a moderate market for their stock.

PROVISIONS.—The feeling in provision circles is somewhat easier this week. Prices, in sympathy with the hog market, are lower. The receipts of dressed hogs have been free, especially in rail shipments. For light weights $5.90 is quoted, and for heavy $5.50 per cwt. Buyers of provisions appear to be waiting for a drop in values, and are keeping away from the market. A considerable trade is doing in heavy meats, long clear bacon, and barrel pork. The falling off in trade has been most noticeable in smoked meats.

MONTREAL MARKETS.

MONTREAL, Oct. 27th, 1897.

ASHES.—The market is particularly dull. We have not heard of any export shipments for a fortnight, and there are few ashes coming in. Quotations are more or less nominal, at $3.80 for first quality of pots, seconds $3 30, and pearls $4.40 per cental.

CEMENTS AND FIREBRICKS.—Receipts of cements for the week are small, only 2,200 brls. of English, but two steamships on the way up the river are understood to have considerable supplies of Belgian. A pretty steady business is being done at the firmer prices, namely, $2.10 to 2.20 for English, and $1 90 to $2 for Belgian. A 1,000 brl. lot of the latter sold at $1,85 since last report. Of firebricks the receipts for the week are 70,000, and prices continue at from $16 to $21, as to brand.

DAIRY PRODUCTS.—Cheese exports last week were unusually heavy, totalling 121,618 boxes, as against 63,456 for corresponding week of last year. From New York the shipments of cheese last week were only 11,392 boxes. The market continues to show decline, and is weaker to the extent of about a quarter of a cent since last report. Finest Western is now quoted at 8⅛ to 8⅜c.; Townships, about 8½c.; Quebec, 8⅛ to 8¼c. In butter there is little activity, buyers and sellers being much apart in their ideas, but values are decidedly easier.

For fine creamery it would, probably, now be difficult to realize beyond 17¼c.; fine dairy makes are quoted at 14 to 15c., and Western, 12½ to 14c. per lb. A good supply of eggs exists for the season, but prices are fairly steady at 14 to 16c. for boiling stock, best candled, 13 to 14c. per dozen.

Dry Goods.—Letters from retailers in the larger centres, both in dry goods and clothing, continue to be pitched in a tone of complaint as to the unfavorable effect on autumn sales of the remarkably prolonged fine dry weather. But notwithstanding this fact, wholesale dealers report general business as of a satisfactory character, with sales quite distinctly ahead of those of last fall. As regards collections, too, the improvement over last year is very marked, while failures are very few.

MONTREAL STOCKS IN STORE.

	Oct. 18. 1897.	Oct. 25, 1897.

Buckwheat..........	25,817	....

Groceries.—Business in this line continues good. Refiners report the demand for sugars as active for the season of the year, though of course the movement is not so large as a month ago. Standard granulated is steady at 4 1-16 to 4⅛c., factory prices; yellows, 3⅜ to 3¾c. per lb. Some moderate lots of German granulated are coming forward, figured to cost, laid down, $3.55 to 3.60 per cental; Austrian would probably cost a shade more. Molasses is very firm at last quotations. In teas there is still a lack of any special activity, but the market is a very steady one, with better prices prevailing in New York than here. The situation as regards Californian dried fruits is a strong one. Raisins are reported to be curing slowly, owing to damp, backward weather. It is said there have been several failures among the "shorts," who have been trying to bear the market, and the position of the packers is consequently strengthened. Quotations on coast for three-crown are very firm at 4¼ to 4½c. for standard brands. Some packers are reported to be using smaller sieves for the grading of their fruit, a practice which cannot but react against themselves. Several carloads of three-crowns, aggregating about 2,000 boxes, have come to hand here, and have immediately gone into consumptton, jobbing quotations being 7½ to 7¾c.; of four-crown there are few to be had, and 8¾ to 9c. would be asked. The first car of California prunes is just to hand today, ranging from 40's to 80's, and are reported to be fine handsome goods. Dried apricots are also in; these goods are some 15 per cent. higher than opening prices. Dried peaches are short and stronger. With regard to Mediterranean fruit, Valencia raisins are firm, but no material change is to be noted. Currants have advanced since the "Bellona" left Patras with supplies for this market, and Filiatras are cabled at 19s. 6d.; Vostizzas, 24 to 27s.; Patras, 21s. and Provincials, 18s. 6d. Sultana raisins are advanced two shillings since last advices. First consignments of Bosnian prunes for this market left Hamburg on the 15th inst. and are now due; cost is figured at 6½ to 7½c., as to size. French prunes are almost too high to attract local attention; a 25 box lot of old crop, small size, sold at 5¾c. the other day.

Hides.—A fair demand exists for beef hides, not only from Quebec, but it is reported that there has also been some Western enquiry since last report. Prices are unchanged in any particular. Dealers are paying 8c. per lb. for No. 1, and quoting 9c. to tanners. Calfskins sell at 8 and 6c. per lb. for Nos. 1 and 2 respectively; lambskins, 60 to 65c. each.

Hops.—The demand does not improve, and values show further easing off, if anything, 13c. being quoted as about the best figure for fine Canadians. Yearlings, 6 to 8c. per lb. and not much doing.

Leather.—Nothing of special interest has transpired in this line during the week. Some shoe men report orders for spring goods to be coming in well, but retailers in this line are inclined to complain of rather slow sales for the season, owing to the complete absence of any wet weather. No further noteworthy sales of sole or black leathers are reported, but local values are well held. American advices would indicate a slightly easier market, but latest English reports would tend to show a very steady market. We quote: Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—Since last writing we hear of the sale of a 100-ton lot of No. 1 Hamilton pig iron at quotations, and a moderate lot to Three Rivers at $16.75, delivered. Of British iron there only light supplies on spot of Summerlee, Carnbroe, and No. 3 Redcar, the last named at $16. Domestic bars are firmer, and the mill quotation is $1.45, though a fair lot could still be done at $1.40. Lead is easing off a little in England, but local quotations are still steady at the late advance. We quote:—Summerlee pig iron, $18.00 to $19.00; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.50, to $18.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, $15.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.25 to 15.50; machinery scrap, $1400 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or

Canadian bands, per 100 lbs., $1.75 ; English ditto, $2 ; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal ; ditto three-sixteenths inch, $2.50 ; tank iron, ¼ inch, $1.50 ; three-sixeenths do. ; $2.00 ; tank steel, $1.75 ; heads, seven-sixteenths and upwards, $2.45 to 2.50 ; Russian sheet iron, 9c. ; lead, per 100 lbs., pig, $3 75 to 3.90 ; sheet, $4 to 4.25 ; shot, $6 to 6.50 ; best cast-steel, 8 to 10c.; toe calk, $2.25 ; spring, $2.50 ; sleigh shoe, $1.85 ; tire, $1.90 ; round machinery steel $2.25 ; ingot tin, 16 to 16½c. for L. & F. ; Straits, 15¼ to 15½c. ; bar tin, 16½ to 17c. ; ingot copper, 12 to 12½c. ; sheet zinc, $5 to $5.25 ; Silesian spelter, $4.75 ; Veille Montagne spelter, $4.75 to 5.00 ; American spelter, $4.75 ; antimony, 9 to 10c.

Oils, Paints and Glass.—The movement is hardly so active, but a fair business is still doing in paints ; in general sundries the demand is not so good as a fortnight ago. In glass there is quite a firmness, and for English makes an advance of ten cents is well established ; for first break, $1.40 is now asked ; second break, $1.50. German and Belgian goods are still selling at $1.30 and $1.40. Turpentine eased off a little in the South, when the strong advance checked the demand temporarily, but the market has again recovered all its firmness, and local quotations are steady at 50c. for single brls. Castor oil is strong, and large lots could not be done under 10 to 10¼c. We quote :—Turpentine, one to four barrels, 50c. ; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels. 42c.; boiled, one to four barrels, 46c. ; five to nine brls., 45c., net 30 days ; olive oil, machinery, 90c. ; Nfld. cod, 40 to 42c. per gal. ; Gaspe oil, 36 to 38c. per gal. ; steam refined seal, 48c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½ ; No. 1, $5.00 ; No. 2, $4.67½ ; No. 3, $4.25 ; No. 4, $3.87½ ; dry white lead, 4¾ to 5c. ; genuine red do., 4¼c. ; No. 1 red lead, 4c. ; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins ; London washed whiting, 40 to 45c. ; Paris white, 85 to 90c. ; Venetian red, $1.50 to 1.75 ; yellow ochre, $1.25 to 1.50 ; spruce ochre, $1.75 to 2.00 ; window glass, (German and Belgian) $1.30 per 50 feet for first break ; $1 40 for second break ; third break, $2.90. English, $1.40 for first break ; $1.50 for second break.

Wool.—Mill men are reported to be a little better employed, but there is still much complaint as to the difficulty in getting satisfactory prices for tweeds, etc. There is rather more enquiry for wool, but there is really little or no stock here. Cape wool is quite cleared out, but some moderate mixed lots are on the way out, being the purchases of a representative of a local house, who has been attending the London sales. They are understood to include Capes, B,A.'s, and Chilians. A cargo from the Cape is pointing this way, but is still some weeks off.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN
Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risks before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co..

BIMETALLIC PROPOSALS.

London, Oct. 22.—The correspondence in regard to the bimetallic proposals of the United States Monetary Commission was issued by the British Foreign Office this evening, and the following account of the negotiations is taken from the official publication :

At the conference held at the Foreign Office on July 12, Premier Salisbury, Secretary of State for India, Lord George Hamilton; Chancellor of the Exchequer, Sir Michael Hicks-Beach; First Lord of the Treasury, A. J. Balfour; United States Ambassador John Hay, and the United States Monetary Commissioners, Senator Edward O. Wolcott, of Colorado; ex-Vice-President Adlai E. Stevenson, of Illinois, and General Charles Jackson Paine, of Massachusetts, were present.

WOLCOTT DEFINES HIS MISSION.

On the invitation of the British Premier, Senator Wolcott explained that the object of the mission was to ascertain in advance of an international conference the views of the European Governments, and the envoys had determined to ascertain the views of the French, British, and German nations on the question of reaching an international bimetallic agreement.

They had been to France, where they reached a complete and satisfactory understanding with the French Government, and the envoys would have the co-operation in this matter of the French Ambassador in London.

The Senator then explained that the success of the mission depended upon the attitude Great Britain would take, and he requested that Government to agree to open the English mints, as its contribution to the attempt to restore international bimetallism, with France and the United States co-operating together in an attempt to that end.

FRANCE'S CONDITIONAL ASSENT.

The Marquis of Salisbury asked if France was ready to open her mints to free coinage, and Senator Wolcott replied " Yes."

The Premier thereupon enquired at what ratio France would open her mints. Senator Wolcott said at 15½, adding that the American envoys had accepted this ratio.

The Senator then presented the following list of contributions, which, among others, he suggested Great Britain might make:

WHAT THE COMMISSION URGED.

First—The opening of the Indian mints, and the repeal of the order making the sovereign legal tender in India.

Second—Placing one-fifth of the bullion in the issue department of the Bank of England in silver.

Third—Raising the legal tender limit of silver to, say, $50, and issuing 20-shilling notes based on silver, which shall be legal tender, and the retirement, in graduation or otherwise, of the 10-shilling gold pieces, and the substitution of paper based on silver.

Fourth—An agreement to coin annually so much silver, the amount to be left open.

Fifth—The opening of the English mints to the coinage of rupees, and to the coinage of British dollars, which shall be full tender in the Straits Settlements and other silver-standard colonies, and tender in the United Kingdom to the limit of silver legal tender.

Sixth—Colonial action and the coinage of silver in Egypt.

Seventh—Something having the general scope of the Huskisson plan.

ATTITUDE OF FRANCE DEFINED.

The meeting then closed, and a second conference was held on the 15th, at which, in addition to those already mentioned, the French Ambassador and M. Geoffrey, the Counselor of the French Embassy, were present.

The French Ambassador was then invited to declare the position of the French Government, and he said France was ready to re-open her mints to the coinage of silver if the commercial nations adopted the same course, and he advocated at great length the ratio of 15½.

But, he explained, France would consider the re-opening of the mines of India alone as being sufficient guarantee to permit the French Government to reopen the French mints to the free coinage of silver.

ENGLAND'S REJECTION.

Sir Michael Hicks-Beach then announced that Great Britain would not agree to open the English mints to the unlimited coinage of silver, and that whatever views he and his colleagues might separately hold regarding bimetallism, he could say that they were united on this point.

Baron De Courcel said, as a personal suggestion, that among other contributions he thought Great Britain should open the Indian mints, and also agree to purchase annually 10,000,000 pounds sterling of silver ($50,000,000) for a series of years.

Senator Wolcott accepted the proposal that the British Government should make this purchase with proper safeguards and provisions as to the place and manner of its use.

Since this conference the British Government has been considering the proposals, and finally made the negative reply handed to the United States Ambassador yesterday.

INDIA'S OBJECTION TO THE SCHEME.

The reply of the Government of India, upon which Lord Salisbury based his decision, is a long document, giving an emphatic negative to the proposal to open the mints of India. It says, in part:

The first result of the suggested measures, if they were to succeed even temporarily in their object, would be an intense disturbance of Indian trade and industry. There would be a sudden rise in exchange, which, if the ratio of 15½ to 1 were adopted, would be to about 23 pence the rupee. Such a rise would be enough to kill our export trade for a time at least, unless the public were convinced that the arrangement would be permanent and have the effect intended.

The report says if the Indian mints should be re-opened now it would be practically impossible ever to close them, and after noting that "the effect of the adoption of the scheme would probably be an increase in prices in France and the United States but a decrease in India," the reply suggests that " the United States is doubtless partly inspired in making its proposals by a fear of experiencing some of the difficulties and dangers which India has already surmounted after years of embarrassment."

WON'T JOIN IN THE EXPERIMENT.

Nothing but assured success could justify India in joining in the experiment, and our belief is that the proposals will fail to secure a permanent ratio of 15½ to 1. One reason for this conclusion is that the arrangement would rest on too narrow a basis. The union of two countries, with a third lending assistance, is a very different thing from the international union of a majority of the important countries of the world, advocated by the Indian Government in despatches forwarded in March and June, 1892, and in February and September, 1886.

" We doubt whether any two or three nations in the world, unless one of them were Great Britain, could establish the required stability. It is certain that France, the United States, and India could not."

REASONS FOR REJECTION.

The reply then discusses various reasons why the experiment would not succeed.

First, France and the United States, seeing the prospect of a total disappearance of gold coinage before the price of silver had been raised to the intended ratio, might take measures to prevent the export of gold. Second, Either country might be reduced to a paper currency, in which case the agreement would cease to operate. Third, A three-sided agreement would be open to greater risk of termination by one or two parties than a many-sided international agreement, besides which, either France or the United States might some day think some other nation benefiting at its expense, and this would lead to discussions as to the expediency of terminating the agreement, discussions only less serious than actual termination.

SOME TRADE CONDITIONS.

The rather sudden advance in steel billets has resulted in a corresponding advance in steel rails, which are now quoted at mill at $21 and $22, with an advancing tendency. The billet makers, it is understood, have sold production pretty well on into the winter, the exact dates being impossible to get. At this time producers are manifesting not only an indifference to new contracts, but prefer to delay accepting orders for later delivery. There are reasons for this. Prices of steel products may advance from outside influences. Coke talks of ballooning. Ore conditions are threatening. Heavy orders for billets may be precipitated from the long line of customers who use them as raw material. The iron trade is in a vigorous condition. A demand of a surprising nature is liable to be precipitated at any time. There is no telling what notion buyers may take on a rising market, and hence predictions are out of place.

There is no occasion for anticipating requirements with the inevitable consequences of a higher range of values, in face of the enormous producing capacity. Should railroad requirements come on the market to any general extent there would be a pressure on production which shrewd observers are even now discounting. Locomotives, cars, freight and passenger, rails for relaying and new track, fastenings, etc., mean, at a reasonable estimate, one million five hundred thousand tons of steel. Fortunately no such enormous demands would be presented in bulk, but they are hiding behind the horizon along which general prosperity is shining.—*Railway Review, Oct. 23.*

FOR INSURANCE ADJUSTERS TO REMEMBER.

Ear corn in crib, 2½ cubic feet make one bushel.

Apples, potatoes, etc., 1½ cubic feet make one bushel.

Tame hay in stack, 512 cubic feet equals one ton.

Wild hay in stack, 343 cubic feet equals one ton.

One thousand shingles cover 100 square feet and require 5 lbs. nails.

One thousand lath cover 70 square yards, and takes 11 lbs. nails.

Eight bushels of lime, 16 bushels of sand, and one bushel of hair plaster, 100 square yards.

A cord of stone weighs 13,000 lbs.

A yard of sand weighs 3,500 lbs. wet, and 3,000 lbs. dry.

A cistern 6 feet in diameter and 8 feet deep holds 55 bbls.

To find the quantity of grain a bin will hold, multiply length, breadth, and height in feet, together; multiply this by 45, divide by 50; the answer will be in bushels. —*Insurance Monitor.*

—A man in Iowa invited a girl to go with him to the theatre. A bicycle was offered to be drawn by lot among the audience. The woman won it, and the Iowa man—generous soul—claimed the wheel, as he had paid for the woman's ticket. The result was a law suit, and the jury awarded the case to the woman.

—At Peoria, Illinois, last week, an important labor conference was called, at which a plan to negotiate a federation was to be considered and adopted. Four international conventions have declared for closer federation of the railroad brotherhoods. The one brotherhood not included is the Brotherhood of Engineers. Fully 100,000 men in the United States, Canada, and Mexico, will be affected.

T. MACAULAY Actuary and Secretary.

We were asked by a prospective customer if we turned out real artistic work.

Yes!

was our emphatic reply. He since gave us an order and is highly pleased with the advance proof. It is true that a great bulk of our trade is done for old-fashioned conservative concerns that will not permit any flourishes, but want everything plain and good; but if anyone desires a catalogue or booklet or circular, or anything printed in a dainty, artistic, and at the same time sensible manner, we can do it. The best test is to send us a trial order.

Not 1 Business Man in 33

leaves his family anywhere near money enough to continue the comforts he has educated them to need and expect. This suggests immediate action on their part, in the direction of Life Insurance.

The Commercial Policy
OF THE

North American Life Assurance Co.

furnishes safe and legitimate insurance at a low cost, thereby enabling business men to build up an estate for their dependents, which otherwise might be left undone.

DECISIONS IN COMMERCIAL LAW.

PUDSEY V. MANUFACTURERS' ACCIDENT INS. CO.—A policy issued by the company in favor of P. contained a provision that it might be renewed from year to year on payment of the annual premium. One condition of the policy was that it was not to take effect until the premium was paid prior to any accident on account of which a claim should be made, and another that a renewal receipt, to be valid, must be printed in office form, signed by the managing director, and countersigned by the agent. P. having been killed in a railway accident, payment on the policy was refused on the ground that it had expired and not been renewed. In an action by the widow for the insurance it was shown that the local agent of the company had requested P. to renew, and had received from him a promissory note for $15, the premium being $16, which the father of the assured swore the agent agreed to take for the balance of the premium, after being paid the remainder in cash. He also swore that the agent gave P. a paper purporting to be a receipt, and gave secondary evidence of its contents. The agent's evidence was that while the note was taken for a portion of the premium, it was agreed between him and P. that there was to be no insurance until it was paid, and that he gave no renewal receipt, and was paid no cash. Some four years before this the agent, and all agents of the company, had received instructions from the head office not to take notes for premiums, as had been the practice heretofore. The note was never paid, but remained in possession of the agent, the company knowing nothing of it. The jury gave no general verdict, but found in answer to questions that a sum was paid in cash, and the note given and accepted as payment of the balance of the premium, and that the paper given to P. by the agent, as sworn to by P.'s father, was the ordinary renewal receipt of the company. The Supreme Court of Canada held, affirming the judgment of the Supreme Court of Nova Scotia, that the fair conclusion, from the evidence, was that, as the agent had been employed to complete the contract, and had been entrusted with the renewal receipt, P. might fairly expect that he was authorized to take a premium note, having no knowledge of any limitation of his authority, and the policy not forbidding it, and that, notwithstanding there was no general verdict, and the specific question had not been passed upon by the jury, such inference could be drawn by the Court according to the practice in Nova Scotia. Held, further, that there was evidence upon which it could be found that the transaction amounted to payment of the premium, and it was to be assumed that the act was in the scope of the agent's employment. The fact that the agent was disobeying instructions did not prevent the inference, though it might be considered in determining whether or not such inference should be drawn; and a new trial should not be granted to enable the company to corroborate the testimony of the agent that he had no renewal receipt in his possession except one produced at the trial, as the company might have supposed that the plaintiff would seek to show that such receipt had been obtained, and were not taken by surprise.

Two alleged "green goods" operators were arrested last week at Stratford, charged with having done a Listowel man out of $100. They gave him a box supposed to contain $500 in green goods, for the sum of $100 in hard cash As usual, the box turned out to be empty. When arrested one of the prisoners had $50 on his person and the other $30.

Mercantile Summary.

Mr. Haney, the superintendent, says there are 4,000 men at work on the Crow's Nest Pass Railway.

A Montreal deputation urges the Government to have Canada well represented at the coming Paris Exhibition.

The firm of Craig & Taylor, doing busines at Freetown, Prince Edward Island, has been dissolved, Mr. Frank Taylor withdrawing. The remaining partner, Bert Craig, continues.

The Ontario Basket Factory is to add to its output brooms and brushes. Mr. W. P. McMicking, who has managed the basket factory these seven years, has left it, and is succeeded by W. McEldonney.

In the awarding of militia clothing contracts at Ottawa last week, it came out that L. H. Boisseau & Co., of Montreal, received the biggest share of the work. They will have about $60,000 in all. Marsolais & Mundy, of Montreal, got about $10,000. The contract for caps and gauntlets goes to Z. Paquet, of Quebec, who is well able to give a satisfactory account of himself.

Montreal advices of Tuesday say that the representatives of the wholesale grocers' trade, in session there, drew up a set of resolutions to be submitted to the members of the trade from all parts of Canada for signature. The clauses of this agreement provide for the division of the country into districts with a uniform basis of prices for each. Under it, a Montreal house would not invade the territory of a Toronto one. Toronto, Hamilton and London representatives were in attendance.

A man named Chas. Law passed through Winnipeg last Friday with a gold nugget weighing three pounds, taken from the Cassiar range, east of Teslin Lake. This country, lately prospected by Mr. Law, is described as rich in placers and quartz. Mr. Law believes he has discovered mountain quartz, from which all the gold on the Yukon and other streams originally came. The place is north of Cariboo, which was Klondike of fifteen years ago, and in the same range of mountains.

The old-established dry goods merchants of St. Thomas, Messrs. Robertson, Lindsay & Wilcox, bought out some time ago the old Cochrane foundry building, opposite the post office and in the centre of the city. They have erected a good building on the old site, 100 feet square, four stories and basement. The interior is being fitted up for a departmental store. The front has full plate glass windows, and is decorated both inside and outside. The firm will take possession in a few weeks.

The award of the arbitrators in connection with the acquisition of the Sherbrooke waterworks by the city, was received last week. It places the value of the property, together with the portion of the unexpired contract, at $115,967, whereas the amount offered by the city council was $75,000. It is believed that an amicable arrangement between the city and the company will follow. A by-law authorizing the purchase of the waterworks will soon be submitted to the ratepayers for approval.

A rascally swindle has done a Montreal storekeeper out of ten dollars. Two well-dressed men went into his shop in a hurry, and said that his daughter, who was subject to fits, had been taken up by the police as "a drunk." So he hurried off with them in a cab waiting at the door. When half way to the station, one of the men alighted from the cab, made his way back to the shop and saw the merchant's wife, bringing a supposed message from himself. Moreover, his wife handed over a ten dollar bill, which she understood was required for her daughter's "bail." The man decamped.

The largest building on Prince Edward Island, is what the *Guardian* calls the new packing house of B. & M. Rattenbury, at Charlottetown. The main building, which is of brick, is 250 feet long and 80 feet wide. It is fitted with modern apparatus for preparing meats to suit both the English market and the Canadian market, for there is a decided difference. There are smoke houses and chilling rooms, besides the departments where the killing and cutting up is done. The capacity of the works is put at 800 hogs per day, but that number will not be turned out at first. It is expected that the premises will be completed by the 15th November; over 100 men are at work upon it now. Mr. Lees, an experienced English and American meat packer, is to be the manager of the works.

Leamington, in the Ontario county of Essex, on Lake Erie, is greatly favored by nature. It is in the rich and smiling southern county of Essex, on whose warm soil anything can grow, from sorghum, grapes, and peaches, to wheat, Indian corn and tobacco. The village is, besides, situated over a field of natural gas, and the municipality has made good use of wells, to secure this valuable element for heating as well as lighting. Leamington is a very pretty town, and is noted for its large exportation of fruit of which carloads are shipped to various points during the fruit season. The town is growing, too, forty new buildings having been erected this summer, principally private houses, costing in the aggregate some $50,000. It is worthy of note that about eleven miles of silica barytic stone walks, costing between $40,000 and $50,000, have been also laid. The waterworks have been greatly extended, and improvements made in grading and gravelling, and levelling the streets. The Gardner Bros. have a new factory here, manufacturing axe handles, and baskets of various kinds. In fact on every side improvements and evidences of industry are visible.

The week's list of country failures in Quebec Province is as follows: P. Gagnon, an old-time general dealer of St. Alexis de Chicoutimi, having been in business some 25 years or more, and slow pay for the last five of them, has made voluntary assignment of his estate, after unsuccessfully trying to compromise at 60 cents on the dollar. He owes about $2,500.——Duchesneau & Frere, a tailoring firm at Knowlton, are reported to have arranged a composition of 60 cents, secured, on liabilities of about $3,500, showing assets about $1,000 in excess.——A. L. Stockhouse, storekeeping at Masson five years, is reported to be preparing a statement of his affairs for creditors. Liabilities are estimated at $6,000, and assets consist mainly of weak book accounts, amounting to, say, $3,500, and a like amount of stock.——J. A. Boulanger & Co., making furniture in a small way at St. Anne de la Perode, has assigned.—— Mathieu & Dupuis, of Sorel, doing business in shoes and as auctioneers, have failed.——A brief business career has been that of C. E. McConville, of St. Jean de Matha, who a year ago bought out business premises and stock for $5,000, paying $2,800 down, and who has already assigned on demand. A lack of proper attention to business will probably account for his rapid decline.——H. J. Bisaillon, confectioner at Farnham, has been asked to assign. He did very fairly for a time, but a bottling business he engaged in, a year or so ago, seems to have involved him.

$12,000 Reward

AS FOLLOWS:

The Dominion Bank offer a Reward of $5,000

for information which will lead to the conviction of any person concerned as a principal in the theft of about $20,000 from the bank's premises, in Napanee, on 27th or 28th August, 1897.

They also offer a reward of $5,000 for information enabling them to recover the money stolen, and in like proportion in case any part of such money is recovered.

They also offer a reward of $2,000 for the return of certain uncountersigned $10 bills, amounting in all to $10,000, stolen on the same occasion, and in like proportion in case only a part of such bills are recovered. The numbers of such bills are: **Nos. 46001 to 47000—Series A. Dated 2nd January, 1888.**

Apply to Head Office of the Bank at Toronto, to either the General Manager or Inspector.

Dated Toronto, 21st October, 1897.

The Gurney Foundry Co., Limited,
TORONTO.
The Gurney-Massey Co., Limited, Montreal

Mercantile Summary.

We note the incorporation in Ontario of the Perfection Knitting Company of St. Catharines, Limited; capital stock, $2,000.

A Montreal newspaper tells of the receipt by a well-known wholesale drug firm, of that city, of an order from an extensive Chicago concern to fill out and forward a large order for supplies, which are to be sent direct from Montreal to the Klondike.

Shipments of cattle this season on the Manitoba and North-western Railway show an increase. Up to the 31st October last year 7,120 head of cattle were shipped from its station, whilst up to the present date this year 11,461 head have been shipped.

The city council of St. Thomas has decided to submit a by-law to the people on the 30th of November, guaranteeing the Electric Street Railway Company's bonds to the extent of $50,000, and are to take a first mortgage on the rolling stock and plant, as security to the city.

We hear that the creditors of E. T. Fournier, insolvent dry goods and clothing merchant, Ottawa, met and confirmed P. Larmonth, assignee. Messrs. J. A. Seybold, N. A. Belcourt, M.P., and J. T. Stowe, of Toronto, were appointed inspectors. The liabilities are $25,000, and the assets $20,180.

The new issue of Canadian postage stamps will be on sale about December 1st. They bear the vignette of the Queen as she appears to-day, not as at coronation. The color of the ones, threes and fives will be changed, in accordance with the postal union regulations, to green, red and blue respectively.

Last week took place a long contemplated trip of Manitoban Provincial legislators and Dominion representatives over the Dauphin Railway. The party were to start at Portage la Prairie on the 27th and proceed to Winnipegosis by special train, returning Thursday night. Governor Paterson went along, in a private capacity.

It is probable that the Ontario Minister of Agriculture will introduce, next session, additions to the Act governing agriculture and arts associations to prevent fakirs, thimble-riggers, wheel-of-fortune men, and such persons, doing business at country fairs or operating within a mile of the fair grounds during the progress of the show. Such an act will save the pockets of many country folk.

Oysters to Montreal; lobsters to London; cranberries and cheese to Liverpool; starch to Quebec—such are the varied exports of that rich Island of Prince Edward. The steamer "Campana" took from Summerside, P.E.I., the other day, on her trip to Montreal, over 500 barrels of oysters, 30 tons of starch, 100 cases of eggs, 30 barrels of cranberries for Montreal parties, and 100 cases of cranberries, shipped by S. R. Dickie, for Liverpool, G.B. And the "Fastnet" took 1,010 boxes cheese and 135 cases lobsters, destined for Liverpool and London.

From Nelson, B.C., comes word of the assignment of W. H. Graham, shoe dealer. Mr G. has been in business alone since 1894, and unhappily does not appear to possess the elements of success.——R. C. Waterson & C. A. Baldwin, doing a dry goods and clothing business in Rossland, under the style of the White House Trading Co., Limited, have been granted an extension of time covering a period of nine months. They owe $13,628, and have stock $26,000; real estate, $2,000. When they started in Feb., 1896, they invested about $10,000 cash in the business, and have done a large trade.

When dealing with collectors of customs in matters pertaining to the tonnage of new vessels, says the *Marine Review*, it will be well for vessel owners to give special attention to the measurements from which tonnage is calculated. Although Government fees now amount to very little with lake vessels, it is well known, of course, that dry dock charges, fees in the Lake Carriers' Association, Canadian canal fees and other important items are based on tonnage. This work of measuring vessels for tonnage is sometimes new to the deputy collectors of customs to whom it is entrusted.

The list of Montreal failures for last week contains nothing very important. On demand, T. Desroches, jr., a small grocer, has assigned.——Larivee & Hoolahan, produce dealers, are in difficulty, and have been asked to assign. Larivee has filed consent, but Hoolahan is contesting the action.—— Cusson & Leduc, tobacconists, have apparently got behind, and have been served with a demand in insolvency.——Aristide Belair, builder and contractor, of Maisonneuve suburbs, has assigned on demand, and owes $10,400.——Georges Marcoux, boots and shoes, owing $1,580, has abandoned his estate.——B. Bissonette, a restaurant-keeper, has assigned owing $3,500.

That Listowel is a thriving town is evident to the visitor. Its authorities are making improvements both in their streets and buildings. The organ and piano works of the Morris, Field & Rogers Co. is now a very fine stone and brick premises; so is that of the Gillies-Martin Mfg. Co. adjoining. Both factories are fully employed. B. F. Brook, who has been in business for 26 years in Listowel, has also been making considerable improvements and additions to his building. The store and offices in front of his mills have been torn down, and a new enlarged front, with plate glass windows, etc., has taken its place. The organ and piano works on Wellington street employ 68 hands. The streets of Listowel are being graded, and granolithic sidewalks are laid on nearly every street, and the whole to be finished in a few weeks now.

DEBENTURES FOR SALE

$150,000 Bonds of the Victoria Rolling Stock Company of Ontario, Limited.

Payable from one to ten years, bearing interest at 4 per cent. per annum, payable half-yearly. For sale to yield 4½ per cent., amounts and due rates to suit purchaser. Bonds $1,000 each.

Mercantile Summary.

THE customs receipts at the port of Montreal for the month of October amounted to $586,080 09, an increase of $51,249.85 over the corresponding month of last year.

THE long established furniture firm of T. W. Currier & Co., Ottawa, is reported to be arranging a composition of 52 cents on the dollar, cash, on liabilities of $10,000, the money being advanced by a leading creditor, who is secured by a chattel mortgage on the stock.——W. A. Currie & Co., of the same city, handling wall paper, paints, etc., have assigned.——G. M. Dalglish, grocer, of Ottawa, has also assigned.

A MEETING is called for the 8th inst. for the appointment of a liquidator to the Cascapedia Pulp and Lumber Company, of Maria and Quebec. The company was incorporated in 1896, as successors to the Maria Pulp and Lumber Company, with an authorized capital of $300,000. It is reported there has been some discord between the two principal shareholders, which has added to the company's troubles. The Peoples' Bank of Halifax is a secured creditor for $44,000 and other liabilities are footed up at about $30,000.

FROM Quebec City is reported the failure of F. Malouin, dry goods, who failing in his efforts to get an extension, has assigned on demand, liabilities being stated at $15,000. The business was begun in 1894 by Dubuc & Malouin, who dissolved a year ago, Mr. Malouin continuing alone.——A grocery concern in the same city, J. B. Prevost & Co., has also assigned. Mr. P. failed as one of the firm of Prevost & Larose, and of late has been carrying on under cover of his wife's name.

THE following are recent failures reported from the Maritime Provinces. A. McDonald & Sons, an old established firm of harness-makers, at North Sydney, N.S., are reported asking a compromise.——A. & J. Munroe, fish dealers, Bridgewater, have assigned, with small liabilities, mostly local.——J. F. Amero, general dealer, Pubnico, N.S., is reported to be asking an extension, and G. A. Cruickshank, a small trader, of Port Malcolm, N.S., has assigned.——Andrew Jamieson, of Canterbury Station, N.B., a farmer, also operating in lumber, is reported insolvent, and shows assets of about $2,000, to pay liabilities of $5,000.——The assignment is reported of Edwin McFarlane, of Annandale, P.E.I., who has carried on a general store and lobster cannery for several years.

THE new elevator at Owen Sound of the C.P.R. is a huge structure, standing about 75 feet from the previously erected elevator of the same company at the Sound. The new one has a total capacity of 812,000 bushels, namely, 64 bins of 11,000 bushels each and 18 bins of 6,000 bushels each. In handling grain the elevator has a lifting capacity (ex-vessel) of 12,500 bushels per hour, which will empty the average lake carrier in seven hours, while its shipping capacity, from elevator to cars, is 250 cars per day. It is described as one of the best and most modern buildings on the continent, being fitted with every convenience for reducing the cost of handling, minimizing the danger of fire, and facilitating the transhipment of grain from boats to cars. There is reason to hope that by means of this additional storage, much of the grain of the Canadian North-West, which previously reached the seaboard via Buffalo and New York, may be diverted to the all-Canadian route, and by this channel English importers are assured of securing the identical grades of Manitoba wheat.

Mercantile Summary.

Fingal merchants are endeavoring to close up their several stores at 8 p.m. each night of the week during the winter months, excepting Saturday.

The Sherbrooke Street Railway was formally opened on Monday last, when some 500 invited guests rode through Wellington street to Lennoxville.

Ottawa will exempt for 1898 property valued at $15,681,250, according to Assessment Commissioner Pratt's statement. The Dominion Government benefits to the amount of $10,673,900, the Roman Catholics $1,285,125, and the Protestants $969,875.

V. B. Bromley, of Brockville, Ont., formerly a hotel clerk, and for the last year or so doing a grocery and confectionery business, has made assignment of his estate.——Simpson, Darroch & Co., bicycle agents, etc., Arnprior, Ont., have also assigned.

The creditors of George Giller, of Berlin, or some of them, are wondering why he assigned last week, since his estate shows a surplus of $4,069 over liabilities of only $3,456. If he cannot pay 100 cents in the dollar on such a showing it, says little for his assets.

At Kingston, on Saturday last, the locomotive works turned out and launched a fine steel barge called the "Coburg," 180 feet long, 35 feet beam, and to carry 50,000 bushels of wheat on a draft of 11 feet; 36,000 bushels on a draft of 9 feet. Her bottom is planked with rock elm.

The Crow's Nest Coal Company is now opening up the property of the company. The seam is six feet thick, and first-class anthracite. By the time the Crow's Nest Pass Railway is built it is expected that the mine will have a productive capacity of 1,000 tons, or about 70 car loads per day.

G. A. Landon and F. A. Landon, manufacturers, and E. B. Landon, traveller, of Toronto, and James H. Taylor and James Kellam, of Etobicoke, farmers, have letters patent to manufacture carriages and carriage supplies under the name of the Carriage Specialty Co., of Toronto, Limited; capital, $20,000.

On Wednesday last, the stock of dry goods, clothing and shoes belonging to the estate of A. E. Rondot, Amherstburg, was sold by auction at Suckling's in this city. Fortunately for the creditors, there were no other complete stocks in the market at the time, and the price was run up to 60 per cent. The purchaser was M. G. Williamson, of Guelph.

The failure of the prominent and long-established Montreal grocery firm of Dufresne & Mongenais will be heard of with general regret. Owing to the declining health of Mr. Dufresne the business began to show a falling off several years since. Upon his death, a year or so ago, Mr. Mongenais, who had not hitherto taken any active part in the management, assumed control, but his health also gave way, and he has been confined to the house most of the time for the past six months, so that the business has had no proper controlling head, and affairs have fallen into more or less confusion, resulting in several suits, and finally a demand of assignment. The trade liabilities are not supposed to exceed $25,000 to $30,000, but there is supposed to be an indebtedness of probably $75,000 to the banks, and on mortgage. Mr. Mongenais has a considerable private estate in farming property, mortgages, etc., but under pressure these assets would be subject to much shrinkage.

The amount of Customs duties collected at the port of Toronto, for October, was $324,197. This is $29,600 more than in the previous October.

Last month several writs were issued against Dawson & Co., general storekeepers, Regina, and when judgment was obtained they assigned ——Hong Wo & Co., Chinese merchants, Vancouver, have have made an assignmenet.

The St. Catharines firm of Carlisle Brothers & Co., which carried a heavy stock of carpets, etc., and did a large business, finds it necessary to ask creditors for a settlement.——Minor assignments in Ontario are those of J. L. Kennedy, lumber dealer, Burk's Falls, and John H. Kratz, lumberman, McMurrich township.——A bailiff is in possession of the hotel premises of T. R. Skelsey, at Barrie, and a receiver is in charge, under a chattel mortgage, of the premises of W. C. Norris at Weston.

A Quebec letter of Saturday last says that Preventive Officer Jones arrived here with the revenue cruiser "Constance," having in tow the schooner "Canada," 45 tons, captured on Wednesday last off St. Felicite, with thirty-three casks of liquor on board, valued at about $4,000. Two of the crew were taken prisoners and were brought up in the "Constance," Captain Lachance and a sailor named Talbot. The schooner is about forty-five tons, and was captured about seventy-five miles below Rimouski.

Something over a year ago, G. E. Abbott succeeded to the harness-making business of Patrick Hayes, Deseronto, but soon found it necessary to obtain more capital. This he secured from George Stewart, hotel-keeper in that place, giving a bill of sale for the same. Now he assigns, and unsecured creditors need not expect a large dividend.——Another assignment is that of Donald Sutherland, grocer and liquor dealer in Hamilton, after being in business over sixteen years.

For a number of years Alex. Macauley has been engaged in the dry goods trade, in Ingersoll, but has not always been successful. After arranging his difficulties, he started business afresh in June, 1894, under the style of Macauley & Co., but owing to severe competition he again found it necessary to assign.——In Jan., 1890, J. A. McClelland opened a jewelry store, in Peterboro', with but small capital. Since then he has found little demand for his goods, and now he is obliged to assigu.——An offer of compromise at 75 per cent. is made by R. A. Elliott, general storekeeper, at Roseneath. He has been in business about ten years and has had several partners.

A meeting of the creditors of Schweitzer, Reid & Co., clothing dealers, Hamilton, was held in Toronto on Monday last. Their statement showed assets of $10,700 and liabilities of $16,000. An offer of 50 per cent. was made, a large portion of the sum to be cash. So far creditors seem willing to accept this proposal. ——After being chief of the police force, provincial game warden, then secretary of the Hamilton Jockey Club and mayor of that city two years, A. D. Stewart, hotel keeper, now offers creditors 20 per cent. on claims of $2,500. Most of his creditors seem kindly disposed and will accept this compromise.——Having been in business in Georgetown several years, then in Acton for a short time, Helen J. Doelle, trading as Doelle & Co., bought the bankrupt stock of Mrs. Purvis, St. Catharines, in February last, paying 25 per cent. cash for the same. The business was managed by her husband, who was insolvent. Now she, too, assigns.

THE entire tobacco crop of Essex county has been bought up by eastern cigarmakers at prices ranging from 9 to 22 cents per pound.

THE annual meeting of the Montreal Street Railway Company was held on Tuesday, Senator Forget presiding. The net profits for the year were $507,855, as against $462,100 last year. Two dividends of four per cent. and a bonus of one per cent. were paid out of this, leaving a balance of $139,500 to go to the reserve fund. The old board of directors were re-elected. The amount transferred to surplus account for the year ended with September, 1896, was $102,106.

ONE of the giant American steamers that ply between Lakes Michigan and Superior and ports on Lake Erie, arrived yesterday at the Canadian port of Owen Sound on Lake Huron. This was the "Lagonda," of Cleveland, which brought a cargo of 226,000 bushels of grain from Chicago. The "Lagonda" is 378 feet in length, which is some 70 feet longer than even the "Manitoba," the big boat of the C.P.R. Lake Superior line. It is such enormous carriers as this steamer which run away with the earnings of the Canadian boats of smaller tonnage.

A SALE has been made within the week to the Bank of Hamilton, of premises on the corner of Main and Owen streets, Winnipeg, for the sum of $33,000. The transaction was arranged between Mr. W. G. McWilliams, of Toronto, acting for the owner, Dr. Richardson, of Clover Hill; and Mr. John Stuart, president of the Bank of Hamilton. Two weeks previously the property was offered by Dr. Richardson to another party for $30,000. The fact that the bank made the purchase at an advance of $3,000 is thought to indicate the belief of that institution in the future prosperity of Winnipeg. The property is opposite the post office, and in the heart of the business quarter.

THE death of Mr. Frank P. Birley remove from Toronto a business man of worth. Successful and popular, he was so by dint of his own industry and character. Coming here in 1880, young and without friends in the community, he secured employment with a safe manufactory, and afterwards in a large box and bag factory. But his inventive disposition led him to enter business for himself, and he founded the Dominion Box Company a dozen years ago or more, the business of which has gone on increasing. Mr. Birley was the inventor of a patent folding box, which he patented in Great Britain and the United States, and we are told it is being largely made under royalty in both countries. He died of typhoid fever, unhappily contracted while on a business visit to the Eastern States, and the large number of persons present at his funeral attest the estimation in which he was held.

THE YUKON COUNTRY.

The Minister of the Interior addressed the Victoria Board of Trade yesterday upon the measures taken, and to be taken by the Government, with relation to the Klondike country, its routes and its trade. As to the question of issuing miners' licenses for the Yukon at Vancouver and Victoria, Mr. Sifton said there were certainly arguments in favor of that policy. He did not feel indisposed to adopt that suggestion. The matter of a gold escort for miners returning from the Yukon involved the question of banking facilities. The Government had offered to provide an escort to guard the treasure where the banks would be arranged, and had offered to become responsible for the keeping of gold dust.

It was not desirable, in the opinion of the Minister, for the Government to go into the banking business. There were enough enterprising banking corporations in Canada to look after that business. It would be so arranged that the miners would be given fair value for their gold in bills of exchange, which would cost nothing to cash in any Canadian bank.

There are three routes to the Yukon available, the speaker went on to say, one by means of the Yukon River, the second by the passes at the head of Lynn Canal, and the third by the Stickeen River and Teslin Lake. A surveyor had been sent over the Chilcoot Pass and Dalton trail, and a preliminary report had been received. He would also have complete reports on the Chilcoot and White Pass trails. Mr. W. T. Jennings, a very able surveyor, and others had been examining Stickeen River district and Telegraph Creek trail. The department would soon have accurate information of the river, the cost of building a railway and other necessary data. Tests were now being made of the navigability of Hootalinqua River. "I am prepared to say," Mr. Sifton added, "that I share with my colleagues the determination to open a Canadian route to the Yukon—not from any prejudice to the United States, but from my duty as a member of the Canadian Government." (Applause.)

As to the question of trade he shared the desire as to the outfitting for that trade being done in Canada. From information obtained he was led to believe that a great number of people would go into the Yukon this spring, and that the trade would become of great importance to British Columbia and to Canada. That being the case, if his audience would forgive him for being frank, he would say that he had heard, though he did not vouch for the truth of the statements, that last summer it had not always been possible to get in Victoria all classes of goods required for the trade, and also that the goods were not always conveniently packed. So far as Canadian customs duties were concerned, they were liberally and strictly enforced at the various posts by which people had to travel to get into the Yukon. (Applause.) The Government would establish posts on the Dalton trail, he declared. There are already posts at Tagish Lake, where the people going through by Dyea or Skagway have to pass. Inside of three months there would be one on the Hootalinqua and Stickeen route. So that every road of ingress into the country would be protected, while strong detachments of Mounted Police fully equipped and able to enforce the carrying out of the law, will be at hand to assist the customs' officers.

—The natives of "Thrums" are turning Mr. Barrie's fame to commercial advantage. A lemonade manufactured in the Kirriemuir district bears a label with a view of the famous "Window in Thrums," and a special brand of goods sold by a local shopkeeper has this inscription printed on the wrapper: "N.B.—Every packet bears a true picture of the Window of Thrums and Mr. Barrie's residence."

—A cablegram received by the Commissioner of Agriculture on Wednesday, reports that the last trial shipment of fruit sent under the auspices of the Department of Agriculture, arrived in good condition at London, per steamship "Gerona," and that the shipment of fruit per steamship "Sardinian" arrived in fine condition at Glasgow. Cases of pears containing about one bushel each, were sold as high as 15s.; half cases as high as 9s. 7d. Apples and tomatoes also arrived in good condition, and sold at good prices. Again the report says: "Do not ship grapes."

Debentures.

Municipal Debentures **bought and sold,** also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

If Washington correspondents of the press may be credited, the Sealing Conference between the United States, Russia, and Japan, is likely to come to a conclusion, favoring abstention from open sea sealing. All these countries own rookeries, in which seals are bred, and if they could get practically a general agreement not to catch these animals in the open sea, they would among them have the monopoly of killing them on land. It is not contended that such an agreement between these three powers would be binding on any other country; but it is said that hopes are entertained of persuading England and Canada to become parties to the arrangement afterwards. As the three countries in question are confessedly proceeding upon a view of their respective interests, England and Canada are likewise at liberty to regard their own interests. At the Paris Arbitration, we heard high-sounding words about the alleged immorality of killing a greater or lesser number of seals; and now humanity is said somehow to be interested in the question of more or less. A seal killed in the open sea makes one seal the less; a seal killed on land makes one seal the less; what is the difference between the two operations, as far as numbers are concerned? Once more there is a disposition, in some American journals at least, to claim that the seals bred on American islands are American property, even when they have swum away hundreds of miles. Such claims merely show the absence of humor in the heads that conceive them. In the same way Canada might claim all the wild geese bred in her northern wilds, and insist that everybody who killed one of them, hundreds of miles from Canada, is a poacher, with an immoral streak in his nature and something inhuman in his make up. We are not told how long the proposed inhibition of sea sealing is expected to last. It would be in the interest of Canada to favor it only if abstention for some seasons would bring a more ample reward thereafter; to permanent prohibition of sealing, if anyone has conceived such a thing, Canada could not lend an ear, and with Canada, practically, it is admitted, the decision of the question rests.

American journals begin by telling their readers that all members of the Sealing Conference are pledged to absolute secrecy, and forthwith proceed to tell us all about what was done, as a proof of the sacred obligation under which the members of the conference had come. The representatives of Japan, it seems, at first thought the interest of their country lay in the liberty of seal killing, at sea, rather than preservation at sea, while slaughter went on ashore; but the American negotiators soon convinced them that the interests of the islanders coincided with the American contention. Then one of Japan's representatives, M. Fujita, cabled the fact of his conversion and his present advocacy of the American view. The representatives of Russia, acting under limited instructions, had to bear in mind the treaty between that country and England, by which the killing of seals at sea, thirty miles from the coast is privileged, and they, too, cabled for further instructions. If the response to these appeals to the Governments of Russia and Japan be in accord with American aspirations, a treaty may be signed before Saturday night. The affected surprise, expressed by some American journals, at the non-attendance before the conference of Mr. Macoun, the Canadian expert, and of Mr. D'Arcy Thompson, the British expert, is of course diplomatic; it was well known from the first that neither England nor Canada would appear by representatives at a conference representing the United States, Russia, and Japan. The evidence of the British and Canadian experts will doubtless be given if a separate conference between England and the United States takes place.

Sir James Winter will become Premier of Newfoundland, consequent on the defeat of the Government in the general election. Sir James was the judge whose decisions unseated seventeen of Sir William Whiteway's supporters, for corrupt practices, in the previous election. The doctrine of a corrupt exercise of patronage was carried in these decisions to a greater length than ever before. Sir William doubtless thought it had been stretched to undue lengths, and retorted by the doubtful process of reducing the salary of the Chief Justice, whose decisions had made such political havoc. But the intended revenge missed its aim; for instead of taking the reduced salary, Sir James Winter resigned. Now he defeats, at the polls, the man who by cutting his salary drove him into political life, and carries off the premiership. Under him, if he can be kept under anybody, Mr. Morine will play an active part in the new order of things. He is, we believe, in favor of the union of Newfoundland with Canada; but it is doubtful whether the time has come for the union, no doubt inevitable, sooner or later, to be effected.

What has been miscalled better terms for Ottawa, as a municipality holding the seat of the Federal Government, has been asked by a deputation of citizens. At the interview, which was private, three ministers were present, including the Premier. Reference is made to the promise of Sir Wilfrid Laurier to make Ottawa the Washington of the North. The chances are, that in doing so, he referred to a direct Government expenditure for beautifying the capital. Ottawa owes its chief growth to the fact that it was made the seat of government, the whole assessment, previous to that date, being only £45,000; but though this consideration should moderate demands for Government aid, it does not follow that the Government should enjoy all the municipal conveniences of the city without contributing anything towards their maintenance. No doubt plenty of places would be ready to say "send the Government here, with all its apparatus and expenditure, and we will free it from local tax;" but that would not solve the practical problem. A reasonable contribution by the Government towards maintaining the municipality of Ottawa, in some form, would not be unreasonable. If we may believe some of the reports of the interview, the case of the city was not altogether judiciously handled. To cite the fact that in some countries the Government supplements municipal expenditure, is to invite a general raid on the Dominion Treasury; and if the fact was used as an argument, it went far beyond the mark. The fact of the existence of provincial subsidies, which Mr. Blake thought ought to cease, would be an effectual bar against any Dominion aid being granted to municipalities in general.

Death, in striking Henry George during the frenzy of an election contest, altered the figures in which Greater New York emphasizes its choice of first mayor, if not the actual result. There were people who believed that Henry George would win. His standing for an executive office, considering that his life-aim could be realized only by legislation, was a misadventure. In the last days of his campaign he took Tammany by the throat, and arraigned Croker as a thief, whose fate, he predicted, would be that of Tweed. The abnormal excitement which accompanied the arraignment was of a nature to bring on apoplexy, of which, in fact, he died. Such as they were, Henry George leaves his works behind him; his disciples are, or rather were, numerous, fierce, and fanatical; but there are already signs of awakening to the delusion, on one side, and of a lapse into Socialism, on the other. Single Tax, the sugar on the pill of confiscation, is a figure to excite feelings the opposite of admiration. Single Tax is a voice crying in the wilderness for what when offered, as free material for labor to work upon, the crier will not touch with his little finger. Most of the men whose voices rend the air, in an aimless demand for land, take good care not to accept any of the land freely offered to them, without money and without price, and which they knew they could get when they moaned out their hideous complaint.

There has just occurred an incident in Toronto, which shows the direction in which single tax is moving. The scene, Association Hall, *dramatis personæ*, Mr. Douglas, president; Rev. C. H. Shortt, with a well meant report in his hand; Mr. Belcher, holding in his hand a resolution telling of the efforts Single Tax will make in the lobbies of the Legisture, next session. Rev. Mr. Shortt was really taken by surprise, so he said; he had not expected to be called upon because, he candidly avowed, "he is a Socialist." But, in a moment he recovered from the surprise of a sudden and unexpected call, and found comfort in the reflection, which it did not take another instant to make, that "Single Tax is Socialistic." This is true, and the avowal is honest; for Addlepate, who tries to hide confiscation under Single Tax, as much cannot be said. "Prince Kropotkin," the reverend gentleman went on to say, "had said the Anarchists joined hands with the Socialists, because they were going the same way. The Single Tax people could, for similar reasons, join hands with the Socialists." This points to the road that Single Tax is travelling. Why is the man who, having put his money into land, receives rent, to have his property confiscated, while the receiver of interest is to escape? The Socialist answers that both, resting on the same foundation, must share a common fate.

Tammany wins in the New York election, by a plurality which, though large, is much below a moiety of the votes. The arraying of the forces in battle favored the side for which victory has declared. The Citizens' Union to win must have been able practically to break up both the great political parties, for, on a previous occasion, when Tammany only had to be fought, it was possible to win, and victory was made the more easy by Tammany being in power, in the city, and having many sins to answer for. When the Citizens' Union had to face the two great political parties, the task was beyond its strength. There was one way in which it could have contributed to defeat Tammany, and that was by withdrawing its own candidate, when the Republicans had refused to sink their party identity, in the contest. Tammany, with all its sins, must represent some active force that was stronger than any embodied in any of the other three parties to the fight. It is, however, as the numbers show, not an overwhelming force, or one which there was not enough of reserve power in the community to control. The death of Henry George may have helped Tammany; his successor, it was seen, had no chance of election; while he lived, George made the real fight against Tammany. What has Tammany promised? It is pledged to fight monopolies, though some think it is more likely to bleed them; dollar gas it has promised somehow to obtain. The lowest on the poll were men classed as monopolists, including General Tracy; the highest those who, Henry George being dead, showed the boldest front against monopolies and combines, the tendency of which to aggrandisement, nevertheless, survives; their culmination is not yet in sight. Mayor Harrison, in delivering an extreme Democratic speech, struck the note that did much to win. The Democrats gained votes by the repressive measures of their opponents on some aspects of the Sunday question.

ONTARIO MORTGAGE LOAN COMPANIES.

A subscriber in the Old Country, who is a holder of some shares in Ontario mortgage loan companies, has addressed us a letter in which he desires information about companies of the kind other than those in which he holds stock. He appears to be uncertain how to distinguish the more recently founded terminating building societies from what we call in Canada the old established mortgage loan companies. This, however, is not the point in his letter with which we propose at this time to deal. He adds—and this is what we desire to comment upon:—

> "You told us some eight months ago"—his letter is dated 20th October—"that there were some circumstances that were encouraging to loan company proprietors, and you cited one or two. Your article also stated that while some companies had lost money in land booms, and reduced their dividends, you thought the worst had passed; and while you did not specifically say that things were on the mend, you certainly let it be inferred that you did not agree with the 'prophets of evil who see nothing hopeful in the future.'
>
> But I have been in correspondence, not so many weeks ago, with a party in Canada who tells me that loan company shares on the Toronto market 'declined all summer long pretty much, and touched the lowest point in August, when some of them went below par, since which time (he writes in September) there has been some recovery and more demand.' I should like to understand, if I may trespass on you to this degree, on what this recovery and renewed demand is based and why—if none of the companies have ceased to pay dividends—should their shares go below par?"

It is true, as our correspondent has been informed that the shares of loan companies, with a few noteworthy exceptions were dull and declining nearly all the past summer. Some were known to have made losses, and many reduced dividend. There was a bearish and despondent feeling in certain quarters, and doubts were freely expressed as to whether even the reduced dividends could be earned. Even the shares of companies which had maintained their dividends suffered decline, because investors generally were, as the street expressed it, "shy of loan companies."

A change was wrought by simple means. Word came from Manitoba of a fine crop of wheat and other grain there, and the Ontario farmer was similarly blest. An unusually good price for wheat, happily, accompanied this harvest and rapid marketing supervened. The farmers began to pay up interest and often the arrears of loans, the loan companies, like the merchants and others, benefitted promptly and greatly by the harvest and a reaction in their shares set in, investors being, apparently, satisfied that the companies' dividends—which had for the most part been brought down to 6 per cent.—would not be brought lower, and believing besides that they could earn this rate. The table we present below shows the decline since 1893 and reaction this year of a dozen leading stocks:

We see no reason to doubt that these companies can go on with their business of lending money on real property and earn dividends; not ten and twelve per cent., perhaps, but such moderate dividends as prevail just now among them. This is a young country, with much undeveloped land. New-comers, whether farmers, mechanics or merchants, are often in need of capital to assist their enterprises. These companies have lent millions to the people of Ontario in days past. The people who received it profited by its use for the most part, and the lenders, who consisted of the thousands of shareholders, received dividends from the interest earned, and so both parties were benefited. Now that a fresh era of development and progress has begun on this continent, the loan companies of Ontario may fairly look to share in its advantages.

FOREIGN TRADE METHODS.

The are some developments of trade between distant countries, which are natural, because one country needs the products of the other. There are other developments which are the result of aggressive offerings of sale and purchase by countries possibly still more distant. It is not impossible for an enterprising and pushing nation to increase its trade with a far-away community at the expense of another nation which may have greater natural advantages. The trade of the United States with one of the Australasian provinces, namely New South Wales, is shown to have increased nearly four-fold in three years, as a result of intelligent pushing on the part of American manufacturers and merchants. The Sydney N.S.W., *Storekeeper*, in praising the efforts of Mr. Bell, consul for the United States at that Australian city shows, by quotations from the Statistical Register, how greatly American trade with that province has grown since 1894, as compared with that of some fifteen other countries. And much of this growth is stated to be the result of the well-directed efforts of this official. The total trade of New South Wales with foreign countries (of course the Mother Country is not included) grew from £5,397,000 in 1894 to £8,925,000 in 1896. Here is the comparative table:—

Total trade with	1894.	1895.	1896.
Belgium	£1,236,941	£931,114	£982,173
Chili	148,393	162,331	140,136
China	138,587	141,813	198,422
Egypt	5,355	10,307	11,318
France	1,138,089	1,512,785	1,618,881
New Caledonia	97,903	99,689	151,598
Germany	1,262,674	1,567,358	1,462,222
Hawaiian Islands	22,392	19,415	23,333
Italy	51,772	103,072	89,604
Japan	42,770	82,421	76,380
Netherlands....	35,577	27,561	11,135
Java	53,461	14,166	26,818
Sweden and Norway....	29,153	33,162	36,244
Peru	15,290	12,422	19,644
Phillipine Islands	42,645	33,814	43,087
South Sea Islands......	108,778	123,149	155,986
United States..........	916,968	1,307,874	3,794,835
Other foreign countries..	47,651	67,109	82,987
Total trade with foreign countries	£5,397,399	£6,251,298	£8,925,683

Commenting on this table the *Storekeeper* remarks that, deducting the total exportation of coin and gold, in which the net increase in the three years was over 130 per cent., against 20 for France and 16 for Germany, "notwithstanding the enormous subsidies paid by these countries to secure ascendancy in our markets; and, further, to deduct the entire wheat and flour imports, the real substantial and normal increase is over 54 per cent., or two and a half times greater than that of the next leading nation."

The view taken by Colonel Bell, when he went to Sydney as consul in 1893, at which time the trade of Americans with that Province showed a decline as compared with 1891, was that "to get our lost trade with your people restored and placed on a more enduring footing, which I am resolved upon, this can only be done by increasing the general knowledge regarding the products and resources of the respective countries, and by bringing the people into closer friendship and harmony." It would appear that the consul's ideas and efforts have borne fruit.

We have no doubt that the good sense and the persistent work of such commercial agents of Canada as Mr. J. S. Larke, at Sydney, are bearing fruit also. Statistics show, at any rate, that Canadian trade with Australia is growing. Our total trade with that country in 1894 amounted to $466,000, namely, $382,000 exported and $84,000 imported. In 1896 these figures had grown to $730,000, being $517,000 exports and $213,000 imports. And it is reasonable to conclude that the transactions of 1897, when the figures come out, will be shown to be greater still, especially in the direction of exports. Not a few of our exporters have much still to learn of the rules and arrangements to be observed in cultivating foreign trade. Montreal and lower province merchants, and perhaps British Columbian merchants too, living as they do in seaports, know more of the minutiæ of an export trade. But in the case of Ontario manufacturers, many a promising transaction with distant lands has been spoiled by ignorance of the prime requisites to a successful foreign commerce. Promptness in correspondence; good faith in matters small and great; obedience to the instructions of the foreigner; attention to details of the machinery of commerce—these we must observe, for without them we can, as an exporting country, secure neither good fortune nor respect.

CANADIAN PORK PRODUCTS.

The winter packers of pork products are now busily at work, and there are marked indications of an active season. The demand for lumbermen's supplies this year has been large, indicating active operations in the woods on the part of some people to the north of us. There is every appearance of an increase in domestic consumption of pork products this year. The volume of movement of Canadian provisions to old country markets since the beginning of the year has been disappointing. In the nine months ending Sept. 30, the imports into Great Britain were as follows:

	1896.	1897.
Bacon—Denmark........	945,638 cwts.	817,792 cwts.
" Germany........	322 "	62 "
" Canada	318,129 "	197,719 "
" United States....	2,069,906 "	2,725,367 "
" Other countries..	88,898 "	73,847 "
Hams—Canada	129,090 "	89,389 "
" United States....	984,382 "	1,298,824 "
" Other countries..	3,211 "	2,425 "

The falling off in the exportation of Canadian bacon must be admitted to be unsatisfactory, especially in view of the increase made by the United States exporters. The decrease was more marked in quantity than in value. The exports of bacon from Canada being valued, in the nine months of 1896, at £472,172, as against £357,734 in same period 1897. During the same periods the exports from the United States were valued in 1896 at £3,013,830, as compared with £3,954,163 in 1897. Canadian bacon continues to be quoted in Britain at much higher rates than the American product. Canadian Cumberland cut being worth 46s. to 48s. by late mail advices, as against 35s. to 38s. paid for the same product from the United States. There is a difference of 9s. in the prices of hams from the two countries in favor of the Canadian packers.

To place the industry on a profitable basis, Canadian capital and labor must be turned more extensively to hog raising and pork packing. The receipts of dressed hogs in the different centres of the trade are free, while the indications point to still larger deliveries. By actual count of the receipts at Toronto this week, of 6,000 hogs only 10 were brood sows, and this may be taken as an indication that Canadian farmers, encouraged by the high prices paid last year, consider hog raising remunerative. A renewal of the hog cholera is reported in South-western Ontario, but it is too soon to judge what effect, if any, this plague will have upon receipts.

TELEGRAPHS IN BRITISH COLUMBIA.

An interview in Winnipeg the other day with Mr. Hosmer, the general manager of the Canadian Pacific Railway telegraph, ascribes to that gentleman the opinion that the most feasible route for a telegraph line to the Klondike gold fields would be from Ashcroft through the Cariboo country of British Columbia, a route which had been successfully surveyed thirty years ago. Possibly Mr. Hosmer may have occasion to revise his opinion after reading the account given by Hon. Clifford Sifton in Wednesday's *Globe*, after his return, of the physical difficulties of the country northward from Cariboo. However, the C.P.R. manager of telegraphs has gone west to look the field over for himself, and if he does not attempt to reach the Yukon, as we trust for his own sake he will not, he may gather in British Columbia data enough to enable him to judge of the best route.

In the course of a visit to Victoria late in October, the president of the C.P.R. Company met members of the Board of Trade of that city, and was pointedly asked by the president of the body what was to be done to improve the telegraph system of the west coast of British Columbia. In reply Sir William Van Horne made some apologetic remarks, saying that his company, which had laid a piece of cable last year and found it inadequate, had ordered an entirely new cable to span the Strait of Georgia from the mainland to Vancouver Island, thus doing away with lines on the intervening islands, the maintenance of which had proved a source of trouble.

Meanwhile the Pacific Province has not been, and is not likely to be, left entirely to the mercy of the C.P.R. in the matter of telegraph service. While it is true that telegrams to the Canadian west coast cities are being handled at Seattle, Washington State, by the Rocky Mountain Telegraph Company, and transferred by them at the boundary to the C.P.R., telegrams to the Kootenays can be sent either via Kalispel, Montana, by a private company's line to Fort Steele, B.C., or they may be sent from Spokane on the Great Northern Railway to Rossland over a wire owned by Austin Corbin, and worked in conjunction with the Western Union telegraph. However, these connections are not adequate, we should think, to the prompt handling of such a business as naturally goes over the Western Union wires to the gold regions of British Columbia, and, therefore, we may very shortly expect to hear of a direct extension of their wires and cables to the Canadian coast cities, such as has been urged upon their authorities repeatedly during two or three past years.

REACHING OUT FOR TRADE.

The decay of the trade between Canada and the West Indies has long been a fertile theme for discussion. As early as the year 1809 the merchants of Halifax and St. John complained of the competition of Americans in their trade, and petitioned the Home Government for tariff privileges in their intercourse with British possessions in the West Indies. Since this time the active efforts of the commercial houses of the United States to secure business in these islands has been even more marked, and their efforts have met with the greatest success. This trade is important, the aggregate value of exports from the port of New York alone to the British West Indies for the week ending the 19th October, having reached a total of $200,896. In the list of exports were boots and shoes, soaps, drugs, tobacco, jewelry, machinery, oils of every description, paper and trunks. Canadians would compete in many of these commodities with Americans on an unfavorable basis. But in fish, breadstuffs, box shooks, and wood supplies generally, Canadians should be able to hold their own. The railway companies, we believe, are giving the same export rates to the port of St. John as current from the same shipping points to the port of New York, and the steamship rates from St. John to these islands are the same as current from New York.

The matter of freight rates cannot be offered as an excuse for lack of shipments on the part of the manufacturers and merchants of this country. The real difficulty is, apparently, the fact that the most important houses of the West Indies are also exporters. They wish to sell West Indian products in the country from which they obtain supplies. Canadians consume annually large quantities of these products, but obtaining them mainly *via* New York, they are not credited to the account of this country. So long as we are content to place our orders for West India fruit, molasses, sugar and the like with American houses, we cannot look for an appreciable improvement in the demand from this source for Canadian merchandise.

As shown by the Dominion trade returns, Canadians exported in the first three months of the present year goods valued at $47,554,759. Compared with our previous efforts this is a very good showing. But the Canadian export trade is in its infancy. The unanimous co-operation of all classes in the Dominion is necessary to bring about the developed growth. Carelessness, ignorance, or dishonesty on the part of individuals engaging in this trade injuriously affects the interests of all. There are a number of suggestions which may be made with profit to those who are making attempts to sell merchandise in foreign countries. We have already insisted on the need of promptness in correspondence and the filling of orders. Another point to be observed is that when quotations are asked they should be given f.o.b. at the port of shipment, and not at the place of production. All exporters should comply to the very letter with every instruction in matters of packing, character of package, weight, size, quality and general description of goods. "Something just as good" as the specific kind ordered will not do in the export trade. Pack merchandise carefully and economically with a view to safe carriage and small freight charges. In a number of markets, the packages may be required for re-shipments, and to secure suitable packages for this purpose may be a consideration with the importer. Ship only after the terms of sale have been definitely agreed upon. If it be deemed advisable to sell through agents, it is needless to emphasize the importance of exercising care in the selection of a competent and reliable selling representative. It is far from needless to give advice of this kind, because the reports of the Dominion commercial agents are filled with complaints of the non-observance of just such simple rules as those we have indicated.

In searching for the reasons why one country makes greater progress in foreign trade than another, we must look beyond the goods themselves, their quality and style, even farther than the means taken to transport them. We must take account of the efforts made, the machinery employed to sell them. Goods do not sell themselves in these competitive days. On the contrary, skill, and pains, and perseverance are needed to dispose of merchandise. We hear often of the very remarkable advance of Germany's foreign trade of late years. One reason for this is commended to Canadian manufacturers who aim to do trade abroad. It is this: the Germans supply commercial travellers of intelligence and skill, and employ them plentifully. Listen to this statement by an American consul, of the efforts of Germans in securing the trade of Switzerland alone. In the year 1896 there were in Switzerland 4,496 agents and commercial travellers, representing foreign business houses. Of this number 2,952 were Germans, 1,051 French, 235 Italians, 129 Austrians, and only 50 British. Two out of three foreign commercial agents in Switzerland were Germans. May we not presume that this is the way in which Germany is working everywhere—in Great Britain, Spain, Latin-America, and in the East? "To the indefatigable, intelligent and enterprising efforts of its agents," says Consul Monaghan, of Chemnitz, "the Empire owes its present important position among exporting nations."

The German commercial traveller is very apt to be a man of deeper education than the Britisher. He lives and travels more cheaply, as a rule, and he reverences Vaterland quite as much as the Englishman does the British Lion. It is absurd, therefore, for the John Bull sort of representative from Manchester or Sheffield, Leeds or Birmingham, to despise him. The Frenchman and the German, and, above all, the American, in this respect is more tactful and adaptable than the average Englishman.

THE SHIP CANAL AN UNWISE PROJECT.

The idea of a ship canal passing exclusively through United States territory and connecting the Great Lakes with the Atlantic, must be abandoned. In the spring of 1896, Major Symons was commissioned by the Washington authorities to report upon the practicability of such a scheme. Three courses were to be considered, viz., the Erie Canal route, the Oswego route, and the St. Lawrence-Champlain route. None of these partial waterways has been found suitable for the purposes of ship canal construction. The aggregate cost of the undertaking is placed by Mr. Symons at about $200,000,000, depending greatly upon the action of the State of New York in regard to its canals, feeders, reservoirs, etc.; while to maintain the canal and to keep it and all its structures in repair, including operation of locks, bridges, etc., and the maintenance of river channels, reservoirs, feeders, etc., would cost at a rough estimate, $2,000,000 per year.

After expending these enormous sums of money, the canal, in Mr. Symons' opinion, would have no military value. From a commercial standpoint there are few if any advantages that such waterway would have over an improved Erie canal, which would admit 1,500 ton barges. The discussion of this question has usually hinged upon the possibility of building vessels suitable for both ocean and lake navigation. Major Symons gives in his report a most complete treatment of this question. The main differences between the two services are described in this way:

"Ocean vessels fitted for combatting the storms of the North Atlantic are built much heavier, stronger, deeper, and on finer lines than are the lake ships. The machinery differs radically, owing to the salt water, and it is more expensive and differently placed. In the ocean ships surface condensers are imperative, and much brass or lead piping is required. The machinery, placed amidships, interferes with rapid loading and unloading. The hatches are too small and too few, and not properly spaced to suit docks, elevators, etc., and the rapid handling of freight in lake ports. The coal bunkers are too large, occupying valuable room. All deck constructions, the rudder, anchors, chains, etc., are heavier and more expensive than are required for the lakes. The decks add weight, and interfere with loading, storing, and unloading bulky, coarse freight. Speaking comparatively, the bottoms of ocean vessels are made for floating, and the bottoms of lake vessels are designed for grounding. The ocean vessels carry hoisting engines and derricks for handling cargo, which on the lake vessels are unnecessary, as all lake docks are fitted with machinery for that purpose. Making long voyages, the ocean vessel has to carry many spare parts, and tools for repairs, and skilled men to use them. A greater number of men are employed on ocean vessels than on lake vessels of the same class, and the officers of the ship must be practical sea navigators. For the same capacity, ocean ships ordinarily draw much more water than do lake vessels, and the cost per ton of carrying capacity is greater."

The costs of handling freight have been greatly reduced in the past several years. The improvement has taken place mainly in loading and unloading grain, ore and coal, but by reason of more economical methods of packing merchandise a general cargo is also handled with more despatch and at less expense. The objections to transhipment are not so serious as they were ten years ago, and it is reasonable to expect still greater changes in the methods of handling freight. The canal in question would be useless for military purposes; the commercial advantages would in no way correspond to the vast expenditures of money that its construction would entail, so it is reasonable to expect the project will be dropped.

LAKE TRANSPORT OF GRAIN.

To understand the extent of the grain and flour trade of the Western States and great lakes of North America, one must try to grasp the meaning of the statistics of receipts of these commodities at the city of Buffalo, situate at the eastern end of Lake Erie, where scores of steamers weekly discharge their cargoes of flour and grain from Duluth and Port Arthur on Lake Superior, Chicago and Milwaukee on Lake Michigan. Buffalo received in, say, five months of navigation, from 1st May to 30th September, 7,512,387 barrels flour, and 128,156,616 bushels grain, by lake. The following table shows the imports of flour and grain into Buffalo, by lake, from the opening of navigation to September 30th, this year, compared with those of previous years:

FROM OPENING TO SEPTEMBER 30TH.

	Flour, barrels.	Grain, bushels	Grain, inc. flour, bus.
1897	7,512,387	128,156,616	165,718,551
1896	5,879,719	103,545,640	132,944,235
1895	5,013,559	63,131,885	88,199,680
1894	7,167,105	67,011,063	102,846,588
1893	6,258,992	90,494,129	121,789,089
1892	6,574,445	92.346,612	125,218,837
1891	4.140,451	79,776,521	100,478,776
1890	3,739,111	64,472,756	83,168,311
1889	2,956,343	62,509,670	77,291,385
1888	3,302,248	55,221,034	71,732,274
1887	2,739,493	60,746,740	74,444,205
1886	3,166,703	53,427,169	69,010,684

These figures mean that an average of 50,000 barrels of flour and

854,000 bushels of grain arrived at that port by water *every day* of those months. The aggregate, if the barrel of flour be estimated as equal to five bushels of wheat, is equal to 33,143,000 bushels per month, which is over *one million one hundred thousand* bushels received at Buffalo every day.

COMPETITION WITH BRITISH MANUFACTURERS.

In November, 1895, Mr. Chamberlain despatched from the Colonial Office to the Governors of the colonies an enquiry as to the displacement of British goods by foreign manufacturers. The replies are very complete, the whole constituting a most voluminous report. Among the causes that have contributed to the failure of Great Britain to obtain a proportionate share of the increased trade of her colonies is the much-vexed freight question. British vessel owners, it is alleged, have formed "rings" to control the outgoing trade from the United Kingdom, but through force of competition have not been able to do this in the case of freight carried from foreign ports. The British exporters have been, in this way, subjected to an unfair discrimination at the hands of their own countrymen. A number of foreign Governments have been prodigal in the bonuses given shipping lines, and this has had an effect in diverting trade. In support of these contentions it is shown that the freights charged by "conference" steamers from New York to Hong Kong and Shanghai average 25s. to 30s. per ton, as compared with 57s. 6d. from London and Liverpool, while in the shipment of machinery from the United States to China, the freight is about forty per cent. lower than that from British ports.

British manufacturers have suffered keenest competition in the cheaper goods. The manufacturers of Germany and the United States have cultivated to a higher degree than the British the art of giving a good finish to a low-class commodity, whilst the British producer seems to reserve finish for better-class goods, and considers the cheap commodity good enough if it is rough. Price has been a more important consideration than quality with consumers in the past several years of trade depression, and must always be the weightier factor in new countries.

There is hardly a single colony which does not affirm that foreigners pack either more cheaply, more compactly, or more lightly than the British. The Americans excel in the economy of space, and consequently have an advantage in the matter of freight. Shippers in the United States also attach more importance to packing goods in receptacles or other coverings suitable to shop purposes, and the goods are kept fresh and sightly to the very last moment.

The reports affirm that foreigners give longer credits, are more disposed to accept renewals, and larger discounts, and are generally more open to pressure from the Colonial customer than the established British merchant. We should have expected that in the matter of terms of credit the British exporters were doing all that could be expected of them. The Canadian wholesale dry goods merchants have frequently made attempts to shorten credits, and failing in this allege as the main cause of their defeat the more favorable terms offered by the merchants of the United Kingdom.

The allegation is general that foreigners are more active in making direct approach to the Colonial buyer; that where English firms are satisfied to send out circulars the foreigner dispatches a traveller, and where English firms send travellers the foreigner appoints resident agents. The London *Chamber of Commerce Journal* draws from the report that it indicates "from beginning to end, the greater alertness and the apparently greater desire of the foreigner to force an entry into the Colonial markets, accompanied apparently by a continuance of old-fashioned methods on the part of the British merchant, who seems to expect that the customer should come to him, and that he it not under any obligation to find his way to the customer."

NOTES ON FOREIGN TRADE.

The Canadian manufacturers of cotton goods seem to appreciate more than any other manufacturers in the Dominion the importance of the Chinese market. In 1892 cottons to the value of $228,958 were sent from Canada to China, and in 1896 the exports of cottons had increased to a value of $549,211. The market is a peculiar one, and in order to attain success in it the exporter must have some knowledge of the likes and dislikes of the Chinese public. The Chinese favorite colors are red and yellow, the former being associated in the minds of the natives with rejoicing, the latter with dignity. The undraped or partially draped human figures should be avoided. Indeed the use of the human figure at all in trade marks and labels for use in China is dangerous. Some detail quite harmless to us may have an ominous significance to the Chinese. Thus a green cap is a token to them of the greatest misfortune that can befall a man. In the Amoy district the cloth most generally in use is a strong, coarse, unbleached cloth, 22 inches wide, and retailed at 4½c. a yard. As a general rule the native cloths used for underclothing and linings are about 17 inches wide, and those used for outer garments about 20½ inches wide. In Shanghai, 36, 32 and 24-inch-wide cloths are the rule, in pieces of 24 yards in length. The question of widths and colors is most important in preparing cloths for this market. Each year Canadians import considerable quantities of rice, drugs, sugar, silks and tea from China, while their exports are confined almost entirely to cottons and wool products.

When the incidents of history that so closely unite France and Canada are taken into account, it is disappointing to find the trade relations between the two countries so limited. Spasmodic efforts have been made to facilitate the exchange of products between Canada and France, but these have never been attended with pronounced success. The Montreal Chambre de Commerce suggests that the lack of a direct steamship service connecting the countries, is the cause of the lack of trade development. In putting forth a plea for a subsidized line of steamers between Canada and France, it is pointed out that the trade between Canada and France during the past twenty-three years, from 1873 to 1896, amounted to $70,237,142. of which the imports were $49,920,061, which paid duties of $17,962,691, or about 35 per cent., whilst the imports from Germany have paid an average of only 22.5 per cent. The memorial complains that the trade returns do not give the total trade with France, because a large proportion thereof comes via English ports and is entered as English goods. The Chambre de Commerce maintains that the imports from France into Canada reach seven or eight million dollars yearly. The export trade, too, is not properly represented, much of it going via England or the United States. Although it is very desirable that our commercial relations with France should be extended, it is a question whether the government has not already committed itself to an expenditure of money for subsidizing steamship lines as great as the moderate revenue of the Dominion can bear.

THE UNION PACIFIC SALE.

The United States Government has repeatedly had trouble with the various Pacific railways of that country. It had a large claim against the Union Pacific Railway—after first mortgage claims upon that road for $33,000,000; the Government came next with a mortgage of $53,000,000. On Monday last the road was disposed of at Omaha by order of court. According to the telegrams it was sold on that day to the Reconstruction Committee for $53,528,522, the particulars of which are given as under: Roads $39,883,281.67, bonds and sinking fund $13,645,250.69. In anticipation of the transaction which has now been closed as above, the New York *Tribune* said: "The sale of the Government's interest in this great property, and final severance of relations which have been embarrassing and unprofitable to both for so many years, it hardly need be said will be a great public benefit." The result of the sale above announced has been generally expected by financiers, and the agitation of the matter in the press no doubt brought about the increase of the committee's offer for that portion of the road to the full amount of the Government claim, with all overdue interest. It is believed that the Kansas Pacific lines will also come into the control of the Union Pacific committee eventually, though the Kansas Pacific division, the sale of which does not come on till 15th December, is of course not included in the sale of Monday last.

DIAMOND JUBILEE SYNDICATE.

Advantage was taken by "The Street" of the way people in England, and especially London, went wild over the prospect of the Diamond Jubilee Celebration, and various "Syndicates" were formed, to use capital Heaven knows how, and make great profits out of the procession, or something. The London *Shareholder* gives particulars of a stormy scene at the extraordinary general meeting of the shareholders of the Diamond Jubilee Syndicate No 2, held at the Liverpool Street Hotel, on Thursday, October 21st. to decide whether the company should be wound up voluntarily, Major Torkington, who was in the chair, said the syndicate had handed over the whole of its assets to the Amalgamated Syndicate, and the shareholders had received from them the certificates of exchange. Therefore the syndicate had no funds whatever. It simply existed on the roll of the Registrar-General. He moved that it be wound up voluntarily.

A Shareholder: Let us have information about the other companies. (Cheers). Why have we had no statement of assets or profits whatever? (Cheers).

Voices: What has become of the £30,000? (Cheers).

A Shareholder: It has been a shameful swindle. (Shouts of "Disgraceful.")

Another Shareholder: It's the founders' shareholders who are going to collar the money.

Mr. Robson said the transference to the Amalgamated Syndicate was a fraud, for it was done without the consent of the shareholders.

The Chairman: This is inaccurate. The transfer was perfectly in order.

Voices: Let's have a legal investigation. (Loud cheers.) What have the promoters and the directors had out of the syndicate? (Cheers.)

The Chairman: You know as well as I do that not a single Jubilee Syndicate was successful.

Voices: But where's the money?

The Chairman: The Amalgamated Syndicate has it.

The Chairman repeated that the meeting in May carried the amalgamation unanimously.

A Shareholder: It's a lie! (Cheers.) Let's have the minutes of the meeting of May 24th.

The Chairman: Well, you can't have them. (Cries of "Shame! You have collared our money without our consent.")

From this moment the crowded room was turned into a bear garden. Everybody tried to shout at once and was perfectly incoherent in his excitement. At last

A Shareholder shouted: Why not divide the £30,000? and

The Chairman retorted: It belongs to the Amalgamated Syndicate.

After further angry incriminations,

The Chairman promised to convene a meeting of the Amalgamated Company at once.

Voices: And then wind them all up compulsorily. (Laughter.)

A vote was taken. The Chairman declared the resolution not carried by a sufficient majority, and the meeting ended in confusion.

POINTS FOR INSURANCE MEN.

There are always humorous and bright things said at the annual gatherings of the Fire Underwriters' Association of the North-West. And there are sure to be sensible things said. We have culled a few from the records made of addresses at the last Chicago meeting. The president of the convention, Mr. G. H. Moore, of the Liverpool and London and Globe, called the attention of the insurance men to the power and influence of the local agent. He told what they did in the States of Oregon, Washington and Montana, about three years ago.

"When the Pacific Union went to pieces, and a rate war was inaugurated on the Pacific Coast, one that was widespread and ruined many a good agency, and cost the companies millions; at that time, when the managers and companies were powerless to control the situation, the local agents arose in their might, and said to the companies and their managers: "We will not submit to this suicidal policy; we propose to protect our business and yours as well." And they kept their promise. They organized State associations, elected their officers, appointed their managers, and have maintained fair and equitable rates, and preserved the dignity of the business."

"Another aid in our work," said Mr. E. C. Irvin, of Philadelphia, "when properly utilized, is the insurance press—a great educational power, just as important and necessary to us as the party organ for political purposes, or the religious paper for church work. Every intelligent underwriter concedes the necessity and value of good insurance papers *of character and conscience*, edited with brains, and conducted upon a high plane; and we must all freely acknowledge our great indebtedness to papers of this kind. But there are insurance papers, too many of them, that do not come up to that standard—and WE ARE RESPONSIBLE FOR THEIR EXISTENCE."

Valuable advices on mill construction were given to the insurance men by a well known Chicago architect, Mr. W. L. B. Jenney. Said he: "Mill construction feeds the flame and causes total loss in an incredibly short time. Several Boston fires, the Jenkins building at Pittsburg, as well as the St. Louis fire, have shown that no advantage as against loss can be expected from this class of construction. The timbers add so much fuel to the flames after the fire is once under way. In these buildings we meet another difficulty. The long, heavy timbers required for that construction can be obtained cheapest and easiest in Southern or pitch pine. This Southern pine, often called pitch pine, is, as its name implies, full of pitch. It is the most inflammable of all the usual building materials. The pitch distils out by heat and rapidly catches and spreads the fire with rapidity, so that the usual so-called 'Slow-Burning Construction,' often used as a synonym for 'Mill Construction,' is a misnomer, and offers no protection against the burning of a stock of goods beyond the ordinary common construction, and is not entitled to any reduction in rate."

The essential feature of underwriting, I believe, is inspection. An inspection does not simply mean an instantaneous view, through the window of a railway coach; the peripatetic exterior observation; the study of the variegated colored-map diagrams, nor the conversational promenade through an establishment, in company with the owner, who occupies your entire time (excepting such as you devote in avoiding disarrangement of your garments, or dimming the polish of your shoes), in attracting your attention to the best features of his risk. An inspection must give a concise, but complete, word reproduction of the risk, embodying each and every specific element of danger, from cellar to garret; construction of building to requirement of hazard; location with reference to facilities required for conduct of the business; exposure; water for fire use; fire department; private protection; watchman and the watchman's watchman; congeniality of the hazard to the neighborhood, and local conditions, determining the financial result of the enterprise. J. C. JOSEPH, of the Phenix.

REGULATE ADVERTISING.

The value of publicity to the merchant is each year obtaining increased recognition. In the nationalization of trade and the building up of large international trade interests it has been found necessary to spend large sums of money in advertising. The money spent each year by the large mercantile houses for this purpose, forms a large part of the aggregate expenditure. Like many other good things, advertising has been abused, and it is a question whether the abuse is not grievous enough to demand that the matter be in some respects regulated by the State or the municipality. The streets of our cities are made unsightly by ugly posters and sign boards, which are not confined to the business centres alone, but extend to the residential parts. In the country many a pretty landscape view is spoiled by the flaring announcement of the virtues of a patent medicine advertisement, or the announcement of some "up-to-date" manufacturer or merchant. There was a time when the rocks of the St. Gothard, by the Devil's Bridge, in Switzerland, were covered with similar deformities. But the Cantonal Councils intervened. Uri, Grisons, and the Valais said: "We will no more allow these advertisements on our rocks than on the white cross of our flag." And they were effaced. If the municipal or legislative authorities were to act in this matter, their regulations would probably meet with no serious opposition at the hands of the advertisers; many of them readily acknowledge the evils of this indiscriminate placing of advertisements, offering as an excuse for their own part in the matter, the force of competition.

IRON, STEEL AND HARDWARE.

The Quebec Government has received from Mr. David Russell, of Montreal, the sum of $50,100, being the amount Mr. Russell bid for and secured the lease of Shawinegan Falls No. 2. Mr. Russell has successfully launched the Canadian Calcium Carbide Co., which will begin operations as soon as the machinery can reach Three Rivers.

Letters patent have been issued by the Ontario Government incorporating the Carriage Specialty Company of Toronto, Limited, composed of the Loudon Bros., J. H. Taylor, and James Kellem, with a capital stock of $20,000, divided into shares of $200 each. Also the Perrin Plow Company of Smith's Falls, Limited, with a capital stock of $9,000, and the Shallow Lake Woodwork Manufacturing Company, Limited, with a capital stock of $5,000.

Dwelling upon the circumstances of the engineers' strike in England, the *Hardware Trade Journal* says, with respect to its effect on engineering and iron-founding: "In these branches there is much irregularity. Several of the locomotive works are greatly affected by the lock-out, while others, remaining neutral, are carrying on their work as usual. At the railway shops this latter condition exists. The founders have, as a rule, moderate employment."

As Pittsburg is the great centre of manufactured iron production in the United States, it is interesting to read the following from the Pittsburg *Dispatch* of Monday last: "One of the most conclusive indications that the business of Pittsburg is exceptionally active comes in the shape of a total of clearing house exchanges for October of $74,205,443.10. This, as a month's business, is not equalled by any October on record, the nearest to it being in 1895 and 1892. It is 30 per cent. above the average month's business for the past ten years, and represents at least 40 per cent."

Respecting shipbuilding, the launches of new vessels from the Clyde shipyards in the past month show a marked reduction, and marine engineering work is of course curtailed in proportion. On the Tyne, too, shipbuilding has suffered in some degree from the engineers' strike, but not so much as expected. One or two shipyards have been closed, and others will have to follow before long. Some fresh orders have been received for ships; but of course much cannot be done with them, nor delivery guaranteed, while the strike lasts. A lessened tonnage has been launched, orders for marine engines have gone from the Tees to Germany, and the hulls of the vessels will be taken over to have the engines put in them.

It is suggestive of the world-wide trade that England does, to find a Birmingham exchange touching upon the various points at which the engineers' strike may handicap employers in the United Kingdom.

The *Trade Journal* mentions orders expected by Tyneside houses for 30 locomotives for the new Siberian railway in Russia; a railway at Lima, the capital of Peru, has ordered in England a number of 1st and 2nd class railway carriages 49 feet long; again a Sheffield novelty is a train built entirely of steel, for a railway company at Natal. Several waggons are now being built for it at Messrs. Cravens, Limited, Sheffield. The waggons are 46 feet long; the under-frames on which they are built weigh two tons when delivered. The reason for having them entirely built of steel is twofold, as the climate would wear away the woodwork too quickly: another reason is the lightness and strength secured.

Each week develops some new phase in the steel industry, says the *Railroad Review* of last Saturday. The recent upward tendency struck a snag in the shape of a subsiding demand. Present consumption has reached a high level. The value of it is that it will not only be permanent but increase. All the great producing centres are crowded. Prices are firm. No false steps have been taken. The experience of over a year ago taught the trade a lesson. Billet mills are oversold from two to four months. Foreign steel requirements are increasing. The demand for plates and shapes is heavy, and engineers engaged on large engineering enterprises have advised that contracts be now made at current rates for winter and early spring delivery. Steel rails have been active, and in the aggregate one hundred thousand tons have been recently ordered. While the tendency in the entire market is undoubtedly upward, wise heads do not regard an actual advance in prices as probable from this week's indications.

DRY GOODS ITEMS.

Several prominent retail houses have made very attractive displays of evening wraps and opera cloaks this week. This branch of the mantle trade is very prominent at present.

"Honey," said old Uncle Eben, "dem autumn woods kinder 'minds me ob folks. Dey's puttin' on heaps o' finery now, an' when de col' weathuh comes dey won' hab no clo'es at all."—*Washington Star.*

The Sanford Manufacturing Company, of Hamilton, reduced the wages of its hands by ten per cent. a year ago, and the men accepted the cut, believing what Senator Sanford told them that he could not make a profit on the cheaper grades of clothing without it. Word comes from Hamilton that the company is about to restore the former rate of wages, and the employees are jubilant accordingly. This points to improvement in both profits and payments.

To judge from the language of resolutions passed at a meeting of French silk producers, recently held at Marseilles, that industry must be in a very bad way in France. The resolutions, which were unanimously adopted, expressed the opinion that it was essential to the vitality of this branch of business that the bounties on the growth and winding of silk, established in 1892, should be continued, and that the bounty on its growth should be increased to 75 centimes per kilogramme.

The report of the Alexandria Produce Association upon the condition of the Egyptian cotton crop during September, says: "The first crop is well advanced, and is generally estimated to be 6 to 10 per cent. more than that of last year. The second picking will be good, but perhaps smaller than in 1896, because of the fogs. As for the third, we cannot say anything yet. In Upper Egypt and the Fayoum the crop is drawing to a close. It shows an increase of about 15 per cent. over the previous one. To sum up, in spite of the fogs, our information is satisfactory, and allows us to hope that the ultimate result will be a rather larger yield than that of 1896."

The Irish Flax Supply Association has just issued its report for 1896, from which it appears that notwithstanding an increase of ten per cent. as compared with the yield of 1895, the latter year may still be classed as an unfavorable one for the flax grower. The area devoted to the cultivation of this product was 72,253 acres, or a decrease of 24.1 on the acreage for the preceding year. The total yield in 1896 was 10,844 tons, or 24.02 stones per acre, and in 1895 it reached 12,972, but owing to the larger area then cultivated, the average yield per acre amounted only to 31.8 stones. On the other hand, the average annual amount of flax imported into Ireland during the ten years 1886-95 was 71,440 tons, by far the greater bulk of which was grown in Russia and Belgium. The average prices of flax for the same period show that the Belgium product reached £59, that of Russia £30, and the Irish £49.

FOR GROCERS AND PROVISION DEALERS.

Grocers are now busily thinking out plans for an active campaign in the Christmas trade. If you have something new and choice, goods that are out of the ordinary run of business, don't neglect to let your customers know the fact.

Cables from Sicily report an unexpected rise in the price of filberts, owing to bad weather in the interior and small arrivals in Messina.

The crop of Naples walnuts is reported to be small, but of fine quality. The crop is later than in former years, and the first arrivals are not expected in New York until the 7th inst.

Advices from Smyrna report a very firm market there for Sultana raisins, the stocks having been greatly reduced by the demand of consuming markets, and the prospects point to the maintenance of presen prices.

The Department Store, while aiming to get a slice of any and every trade, finds itself occasionally blocked. In Chicago, for instance, these stores cannot have things all their own way. The corporation counsel of that city, backed by Mayor Harrison, begins a fight on department stores this week. The programme is to institute proceedings in some justice court to compel the department stores to observe the provisions of the Walker and Duddleston ordinances, one of which provides that in no store where dry goods are sold shall meat or liquor be dispensed, while the other requires all sellers of meat to take out a license. It appears that the department stores asked the Chicago authorities for meat licenses and were refused.

An American paper tells of stores in New York, instancing one on Sixth Avenue, which sells groceries in five and ten cent lots, and a Brooklyn branch has just followed its example. Neat packages, containing one-quarter pound of tea, are exhibited in the window with a 10 cent label, and displays are also made of fractional parts of a pound of coffee, spices, gelatine, baking powder, etc., offered at either 5 or 10 cents, and canned goods are not missing, either. As these stores sell for cash and deliver no goods under $2 in value, it is possible for them to sell at very low prices, but much more of their success is due to the plan of displaying goods with price tickets attached. The *Merchants Review* thinks that grocers will do well to make use of the 5 and 10 cent baits whenever they want to move a class of goods that can be retailed for either price. "Bottles of sauce, pickles and olives, jars of jam and jelly, tumblers of honey, etc., will sell better if placed on 5 and 10 cent counters, than if mixed with other articles of different prices."

THE CHEESE SEASON ALMOST OVER.

"And the board adjourned until the first week of May" was the message attached to a number of the reports of the cheese board meetings this week. The season is almost over and many of the factories are closing the year's business. Those factories which have made arrangements for butter making will soon begin the winter's work as creameries. This must have an effect upon the butter market although the United Kingdom will probably be the principal goal of the makers of butter. The depressed condition of the cheese industry is an incentive for dairymen to make a change in their operations. At fourteen Ontario board meetings this week 70,688 boxes of cheese were offered and scarcely any sales were reported. The exports from Montreal were 70,840 boxes, or about 18,000 boxes less than the exports of the corresponding week a year ago. The shipments this year to date have been 1,854,377 boxes, as against 1,564,893 boxes to date last year. We append our usual table of transactions;—

Boards.	Date of meeting.		No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price. Cts	Date of next meeting
Brockville	Oct.	28	..	641	.....	8¼	......

SELLING CHEESE DIRECT.

The deadlock that has existed for some weeks between the buyers and sellers of cheese has revived: the old idea of a combination on the part of dairymen for the purpose of making direct shipments to the British markets. At a recent meeting of the Frontenac Cheese Board, an advocate of the scheme pointed out that there were 10,000 boxes of September cheese in that district awaiting shipment, each cheese averaging 75 lbs., making 750,000 lbs. of cheese. Figures from a Montreal agent were given, showing the rates from Kingston to Liverpool to be $41.79 per 112 lbs. In addition, there must be taken into account when estimating the costs of shipment. Insurance, $225; cabling, $10; exchange, $100; for handling in Kingston, $25. Travelling expenses for agent to England, $105; agents' services, $100. The local manager of a chartered bank was present, and promised that if an agent secured a bid from a good house, his corporation would advance the money necessary to carry the shipment through. Cheese exporters have not, as a rule, grown rich in the business, and are confident that several experiments of this nature are alone required to show that the profits of the middleman are not exorbitant.

INSURANCE MATTERS.

A block of handsome mercantile buildings is about to be erected in Sherbrooke by the Sun Life Assurance Company. The site chosen is the corner of Market and Factory streets, opposite the branch office of the Merchants Bank.

Sandon, British Columbia, professes to be about to have, to use the words of the newspaper, "the best fire protection of any town on the continent." Its citizens have resolved, in meeting assembled, to build a fire-hall and hose-tower, and to add 500 to the 800 feet of hose they now possess. The water supply will be derived from 11 double hydrants, with ample pressure for fire purposes. Two carloads of pipe are being put in for the additional water system. The water will be taken from below the Slocan Star concentrator, and the pipes extended the full length of Slocan Star street. Five fire plugs will be put in from which any part of Reco avenue can be reached from the rear.

That is good news, if it be true, that all Canadian obligations of the Massachusetts Mutual Benefit Life Company will be paid in full. The American receiver has decided not to attach any of the Canadian assets before the Canadian liabilities have been satisfied. Which means, probably, that he finds he will not be allowed to attach any. They are even talking of a surplus to hand over to the receiver after Canadian claims are satisfied. It will be a blessing if the settlement comes soon. We know of claims outstanding for deaths occurring six and seven months ago, and much discomfort arising out of the non-payment.

ANCIENT ORDER OF FORESTERS.

This important body, which is one of the best known of English friendly societies, should not be confounded with the Independent Order of Foresters, which has been made so prominent of late years by Dr. Oronhyatekha. The elder body never made the pretensions, or the promises, or the "Hurrah! Boys," that the newer one did, but keeps on quietly paying funeral benefits and accumulating money. The annual financial returns of the districts and courts of the order for the year ended December 31st, 1896, have been issued by Mr. J. Lister Stead, permanent secretary of the order. The returns embrace 4,022 courts, containing 655,268 members in Great Britain and Ireland, and the extent of them is remarkable. The receipts amounted to £966,533, not far from five millions of dollars, made up as follows:—Entrance fees of new members, £3,571; contribution from benefit members, £685,441; honorary members, £1,018; funeral allowances from districts, £98,085; interest on invested capital, £148,481; other receipts, £28,933. The payments to members were: sick allowance, £111,206; contributions to district funeral funds, £120,306; other payments, £19,953. We have left out the shillings and pence. It is to be remarked that the margin between income and outgo increased by £50,000 and over, last year, and that the cost of management was about 76 cents per member. Can Dr. Oronhyatekha show such a record in this respect? The total income of these funds was £966,533, and the expenditure £762,828, leaving a balance of £203,705 as compared with £151,028 in the previous year. The cost of management for the year is returned at £104,187 14s. 1d., or an average of 3s. 2d. per member. The total funds of the order amount to £5,068,991 14s., or say $25,344,000 in round numbers.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Nov. 4th, 1897, compared with those of the previous week:

CLEARINGS.	Nov. 4.	Oct. 28.
Montreal	$13,995,105	$12,953 645
Toronto	8,126,794	7,416,191
Halifax	1,643,211	1,139,040
Winnipeg	3,332,880	3,121,577
Hamilton	671 777	594,077
St. John	538,534	554,363
	$28,318,301	$25,778,893

Aggregate balances this week, $4,172,156; last week, $3,570,058.

—The activity of trade in the last completed week of October is indicated by the returns of bank clearings at American and Canadian cities. The totals of clearings at 87 cities in the United States for the week ending October 28 show total clearings $193,497,468, an increase of 22.9 per cent., as compared with the corresponding week last year. Outside of New York city the clearing were $488,567,224, an increase of 18.1 per cent. The clearances reported for the Dominion of Canada made a total of $26,779,620, as compared with $21,019,128 for the corresponding period of 1896. There were increases of 22.8 per cent at Montreal; 19.7 per cent. at Toronto; 65.9 per cent. at Winnipeg, and 21.7 per cent. at St. John; while the decreases were 5½ per cent. at Halifax and 12.8 per cent. at Hamilton. The Canadian percentage of increase on the whole was 22.1 per cent. Montreal, $13,953,645, increase 22.8 per cent.; Toronto, $7,416,191, increase 19.7 per cent.; Winnipeg, $3,121,527, increase 65.9 per cent.; Halifax, $1,139,847, decrease 5.8 per cent.; Hamilton, $594,077, decrease 12.8 per cent.; St. John, N.B., $554,363, increase 21.7 per cent. This week's clearings in Canada are between five and six per cent. larger than same week last year.

—A very significant estimate of amounts deemed necessary for the improvement of rivers and harbors and waterways along the great lakes is published by the *Marine Review*, of Cleveland. They are taken from the report of the Government engineer-in-chief, and they represent, in the opinion of the engineers, the amounts that may be profitably expended at the different points. It is expected that the next Congress will pass a river and harbor bill, and the Government engineers have prepared estimates on work to be undertaken during the next fiscal year, which begins July 1, 1898. These lists of estimates are prepared as a guide to Congress. The harbors of Duluth and Superior City are down for more than a million ($1,102,776); Chicago River for $400,000; Hay Lake channel, $494,115; Detroit River, $91,000; Cleveland harbor, $450,000, and Buffalo harbor $618,750; Toledo, Sandusky, Ashtabula, Conneaut, and Lorain harbors, on Lake Erie are down for sums ranging from $38,000 to $495,000 each. Then there are harbors of refuge at Marquette Bay and Grand Marais, Portage Lake, Sand Beach, and Milwaukee, Lake Michigan, $795,000 in all. Ashland, Green Bay, Muskegon and Manistee harbors all want appropriations. The total approaches $8,000,000.

—Bankers, whether private or joint stock, are receiving plentiful warnings that their vaults and safes are objects of attention at the hands of burglars. Within the week there have been two more cases reported in which private banks were robbed at night by safe-blowers. Gillies & Co.'s private bank, at Teeswater, Ont., was entered on Saturday morning last, the door of the vault being first blown open by gunpowder, and then the door of the safe similarly treated, after the front door of the bank building had been pried open by crowbar and sledge hammer. The robbers secured about $2,000. Then on Monday, the private bank of R. G. Baxter, in Elgin county, was broken into and robbed of about $1,800. Both vault and safe were badly wrecked. Still another case is that of the private bank of A. M. McIntyre, of Dutton, which we referred to last week.

—An increase in net earnings by the Canadian Pacific Railway of 31 per cent. in September, and 19 per cent. for nine months over same period, 1896, was quite enough to justify the advance in the shares in London, New York and Montreal on Monday last, which the announcement of the figures caused. The September gross earnings were $2,344,529, and the working expenses $1,284,639; net earnings, therefore, $1,059,890. The gross earnings for the nine months ended with September were $16,396,340, and the working expenses $9,750,489; net profits, therefore, $6,645,850, as compared with $5,381,360 in the same period of last year. The outlook is very hopeful for this road.

—Some half dozen years ago an Act was passed by the Province of British Columbia preventing Chinamen from working in mines underground. The constitutionality of this Act was tested by the Supreme Court of British Columbia and sustained. The decision of the Provincial Supreme Court was an opinion to the Government, and not a judgment. An appeal was taken to the Supreme Court of the Dominion. This has been quashed on the ground that there was no appeal from such a decision, it not being a proper judgment. The Act, therefore, remains in force.

—The meeting of shareholders in the Bank of Nova Scotia, called for November 2nd to consider the increase of capital recommended by the directors, was held on that day. The recommendation to increase the capital of the bank to $2,000,000 was adopted, and the increase of $500,000 necessary to effect this was authorized. It does not, however, follow that the increase will be made at once.

Correspondence.

WHO SUFFER BY FIRES?

Editor Monetary Times.

Sir,—I have read with interest your article entitled, "The Duty of Municipalities," and the letters headed "Forest Fires," and "Unreadiness for Fires," in issue of 15th ult. Since the publication of the editorial and letters mentioned, the country has been startled by the almost total destruction of the beautiful town of Windsor, in Nova Scotia, by fire It is said that the water supply of that town was limited in quantity and weak in pressure, and that the town did not possess a single steam fire engine. In my travels through the Province, I have found that Windsor is not the only town inadequately protected against fire. The most striking instance is that of Lunenburg, a flourishing town of between 3,000 and 4,000 inhabitants, situated on the Atlantic coast, about 50 miles southwest of Halifax. It is, like all our towns of similar size, a wooden town, with the houses roofed with wooden shingles. It is very compactly built, having been laid out by Government officials, 140 odd years ago, after the fashion of European towns, with small squares and narrow streets. It is supplied with pure water in abundance, the water works having been put in two years ago by a private company.

The remarkable thing in Lunenburg that astonishes all visitors who learn the fact, is that, with five or six miles of mains in its streets, carrying water to its citizens, it has no hydrant system, and not a drop of the water flowing through these mains is available for fire protection purposes. The town owns one steam fire engine and a couple of out-of-date hand engines, but its water supply for those engines, apart from the waters of the harbor (available only in certain cases), is limited to a few wells on the sides of some of its streets.

I presume the insurance companies know exactly the state of affairs in this as well as in other towns, with regard to facilities for fighting fire, and that they regulate their business accordingly.

I have sometimes wondered if the banks of this country watch with sufficient closeness the insurance carried by their customers. I understand that two or three banks are likely to lose considerable as the result of the Windsor fire, for want of sufficient insurance on the part of those whose notes they had discounted. In these days of complicated business relations, it behooves banks, insurance companies, wholesale merchants, in fact everybody interested in business affairs, to see that those who get credit carry sufficient insurance, and that adequate means are adopted to prevent conflagrations.

—Letters patent of incorporation have been granted to the Consolidated Cariboo Hydraulic Mining Company, capital $5,000,000, in one million $5 shares. The charter members are W. D. Matthews, E. B. Osler, and H. C. Hammond, of Toronto; John Cassils, George Hartt, Theodore Labatt, and P. A. Peterson, of Montreal; and J. B. Hobson, of Cariboo, B.C.

INSURANCE FROM A BUSINESS MAN'S STANDPOINT.

At the meeting of the Fire Underwriters' Association of the North-West, last month, Mr. H. N. Higginbotham, of Chicago, delivered an address, of which the following is part :

The usual practice is for an owner to estimate the value of the property to be insured, and take out a policy for the amount, or such other less sum as may, in his judgment be sufficient. How many agents, in granting insurance, carefully estimate the value of the property, and decline to place any sum on the risk beyond, say 75 or 80 per cent. of its value ? How many agents ask to look at the last inventory of a stock of merchandise, or even ask if one was taken? I would not insure a man who did not at least once each year, not only take, but preserve, an inventory in some safe place, and also keep an intelligible merchandise account, subject to my inspection, at my pleasure, as long as my policy was in force. Overvaluations usually indicate fraud, aimed either at the insurance company, or the credit man. Companies should realize, as against a little extra premium, that the interest of the insured in the preservation of his property on account of the value left to his own risk is a wonderful safeguard from loss. From these generalities, I have allowed myself to believe that a fire insurance agent has a moral and a fiduciary responsibility that he does not always fully recognize and obey.

An agent is, of course, "out for the premium;" he wants a "big line." An agent, however, who, for the sake of a large premium, would permit, or fail to decline, over-insurance; or who would accept insurance without first scrupulously affirming the integrity of the proposed transaction, is himself a party to fraud, and unworthy of his position. I suppose the agents dislike to give offence by too close scrutiny. They realize that what they may refuse to do, some other agent may consent to. They understand that, between the risk and the company, there is the adjuster; but these condone nothing. The insured should not be permitted to pay premium on an amount he cannot recover in case of a total loss. That is a fraud on a fraud, a sort of double-headed fraud. The agent should always bear in mind that the "amount of insurance" carried on property is often accepted in other transactions as a basis of loan or credit. Here is a fraud on the public, to which the agent lends himself. The agent should, and may, in a prescribed or perfunctory way, consider the moral character and general reputation of an applicant for insurance. In my opinion this is a first consideration. If I were an agent I would take note of the applicant's character and reputation as well as his financial responsibility, in the same manner as if I contemplated selling him goods on credit, or loaning him money without security. A man who tempts another to crime is himself a criminal; an agent who permits an applicant to insure for enough to tempt a fire to break out is himself an accessory.

ASSAYS OF MINERALS.

The matter of the proper qualification of assayers is one to which it is impossible to attach too much importance, but legislation that has been so far attempted in the province for protecting the public and preventing irresponsible and incompetent persons from calling themselves, and taking up the profession of, assayers, cannot truthfully be described as adequate or effective. The "small" investor (a personage, by the way, to be respected, for the up-building of Rossland was largely due to him), is guided to a great extent in the laying out of his money by an assayer's certificate of ore value, and if this analysis is inaccurate, the investor, who, goodness knows, takes chances enough anyway, has so much less in his favor. Very much more important issues, however, not infrequently depend on an assayer's report, and it is hardly necessary to insist that these reports should be as reliable as care and knowledge can make them.

At present to become a full-fledged assayer, duly recognized as such by the Provincial Government, it is only necessary to pass an examination, for which any intelligent student of the text books can qualify himself after a very brief period of study. But the theory of assaying and the practice thereof are two very different things, and proficiency in the latter can be only obtained by experience under skilled direction. A long apprenticeship is required of a surveyor, why not of an assayer, who surely needs training to an equal degree?

But if there are some incompetents among the assayers practising in the province, the names of those, who, without training, without even a theoretical knowledge of any of the "ologies" connected with the science of mining, call themselves mining engineers or mining experts, is legion. The harm that this class of men can do to the mining industry of the province is incalculable, and investors cannot be too cautious in finding out the professional standing of the self-styled expert before engaging his services or accepting his reports.

Again it should be remembered that a recently graduated student of some school of mines, who, perhaps, has gained a limited knowledge of geology or assaying, is not necessarily qualified to pass judgment on the value of a prospect, or predict the future of a mine.

We hope ere long to see the establishment in the province of a strongly organized association of recognized representatives of the provincial mining industry and its subsidiary branches and interests. Such an association would, without doubt, if intelligently ordered, be of immense assistance to all engaged in legitimate mining enterprise in British Columbia.

Since the above was penned we have been informed on the very best authority that the Provincial Government have arranged that candidates for assayers' diplomas shall go through a laboratory course of some months before being allowed to write for examination. So far so good; nevertheless, we still contend that "some months" are not sufficient to teach a student the whole duty of an assayer.—*Mining Record.*

—From Kaslo, B.C., comes word of the largest dividend in the history of the Whitewater mine, paid on the 13th. The amount was $24,000, and makes a total to date of $64,000. The announcement is also made that the Slocan Star declared a dividend in September of $50,000. This brings the dividends of the Slocan Star Company up to $400,000.

—A new steamship, the "Cymric," for the transatlantic service of the White Star Line, has been launched from the yard of Messrs. Harland and Wolff, Belfast. This vessel, whose gross tonnage is 12,300 tons, and displacement, 23,000 tons, is by far the largest cargo carrying steamer in the world. Her dimensions are : Length, 600 feet; breadth, 64 feet; depth 42 feet.

—A great glass combine was perfected the other day in the States. The new association has absolute control of over 90 per cent. of the actual productive capacity of that country, while it controls a large percentage of the total output capacity. There are 1,918 pots ready to melt, and this concern controls 1,774 of them. The head of this great organization, which will be known as the American Glass Company, is James A. Chambers, of Pittsburg.

—A lady much interested in good works was bewailing the loss of a somewhat ill-bred but extremely wealthy neighbor who had been very liberal in his help to her country charities. "Mr. X. is dead." said she; "he was so good and kind and helpful to me in all sorts of ways. He was so vulgar, poor dear fellow, we could not know him in London; but we shall meet him in heaven."—Pearson's Weekly (London).

WINNIPEG BOARD OF TRADE.

The Winnipeg Board of Trade received last week from merchants of Edmonton, N.W.T., a copy of the statement given in part below:

An all-Canadian route to the Yukon gold fields is at present being advocated by the press of the Dominion, but in no Eastern newspaper, that has come under our notice, has the claim of the Edmonton, the only real all-Canadian route, been advocated or received more than a passing notice. The fact that the only route from which the Eastern wholesale merchants and manufacturers of the Dominion can reap the full benefit of the Yukon trade, must be an all-Canadian route east of the Rocky Mountains, does not seem as yet to have been grasped by the merchants of the Eastern Provinces. The Victoria Board of Trade in a circular letter to all North-Western Boards of Trade, calls attention to the fact that over three million dollars of trade was done by the American Pacific coast cities in outfitting Yukon miners this past season. The merchants of Edmonton and the people of the North-West, are quite convinced of the practicability of a route overland from Edmonton, via the Peace River to the Pelly River, but they cannot alone bring much influence to bear on the Government, in order to have the road surveyed and opened up to them of an all-Canadian route east of the Rocky Mountains Eastern merchants and manufacturers should bring their influence to bear on the Government, and make every effort to induce them to have an early and thorough examination of the Edmonton route made. The best authorities in the Dominion have expressed themselves as in feavor of the Edmonton route.

The route down the Mackenzie and Athabasca Rivers to Peel's River, and thence by the Rat River to the waters of the Porcupine, affords an all-water route, which has been used for years by the Hudson's Bay Co. for supplying their posts on the Yukon. Chief Factor McDougall, of the Hudson's Bay Co.'s service, who was for some years in charge of the old Fort Yukon, who discovered the "McDougall Pass" by Rat River to the Porcupine, and who of late years has passed over the present coast routes, writes that were he going to the Klondike and wished to take a year or more supply of provisions with him he would certainly take the water route from Athabasca Landing. Travel on this route could be greatly expedited by a little work on the shorter portages, and tramways on those at the Grand Rapids of the Athabasca, and between Smith's Landing and Fort Smith.

CONSUMPTION OF TIMBER.

In a paper on the consumption of timber in the United States, Mr. B. E. Fernow tells the *Lumber and Trade Journal* of the extravagance of the Americans in the use of wood. He declares that there was never a nation using wood to the extent that United States people do. For example: "The majority of our houses and other structures are still built of wood, and the majority of our homes are still warmed by the product of the forest, in spite of the rapid development of our coal mines. Our per capita consumption of wood of all descriptions exceeds that of the English people twenty-five times, and of the Germans nearly ten times; while of coniferous wood, pine, spruce, cypress and the like, for building purposes—the one class of wood which is most needful—we consume with 400 ft., broad measure, per capita four to five times as much as those two nations. And as our population grows, our consumption grows; the substitution of iron, stone, coal, etc., being offset by new uses for wood."

He forecasts the result of this reckless use of forest products, and asks: "Can this drain of our natural forest resources continue forever? Can we go on expecting to harvest the bounty of nature without assisting her to reproduce? Can we continue to be wood-choppers without becoming foresters? We do not need to go into a statistical discussion—our statistics are besides woefully uncertain—to prove that sooner or later there must be an end to this one-sided process of taking the wood crop without the other part of the business being attended to—the reproduction. In other words, the time must come sooner or later, when the virgin timber, which we found ready grown for the axe, will have been cut and we must rely on the new growth that may have sprung up after the old timber was removed; and if this is true, we will have to take an interest in the young growth, and finally we must take care of it. Logging, which is nothing but the reaping of nature's crop, must be supplemented by forestry, which means the reproduction of a new and useful crop."

BEET AND CANE SUGAR.

The New Orleans *Times-Democrat* publishes some striking statistics with reference to the sugar production of the world. While the growth of production of sugar from cane is at a standstill, the quantity of beet sugar produced is increasing with remarkable rapidity. The following table of percentage of beet and cane used respectively, shows that the beet growers are distancing the cane growers in the race for supplying the markets of the world:

Season—	Beet. Per cent.	Cane. Per cent.
1887-88....	48.6	51.4
1888-89.....	53.4	46.6
1889-90....	62.5	37.5
1890-91..	58.3	41.7
1891-92..	55.2	44.8
1892-93..	54.6	45.4
1893-94.....	53.7	46.3
1894-95....	59.8	40.2
1895-96..	62.3	37.7
1896-97....	66.2	33.8

MEDICAL EXAMINATIONS.

How is it that life offices have not adopted the rule, and made it inflexible and imperative, that medical examination reports should be forwarded direct from the medical officer to the head office? If this were the invariable rule, what a world of trouble and annoyance it would save to agents, the proposers, and to the medical men themselves, as also, perhaps, be the means of averting claims against the offices. The position of the medical officer should be absolutely free and independent. Cause for friction between the medical man and the agent should be studiously avoided, and means should be employed to guarantee that the medical report should be a strictly confidential communication between the medical official and the company. The companies must know, just as well as we do, that frequently agents flatter themselves in the belief that they know as much about the merits of a proposal as does the doctor. When upon this point the doctor and the agent differ, the agent knows how to act. That his action promotes the interest of the company he represents is quite another affair.—*Ins. and Fin. Gazette*, Belfast.

MAGNITUDE OF THE RAILWAY MAIL SERVICE.

The annual report of the general superintendent of the railway mail service of the United States shows that at the close of the year there were 1,164 railroad post-office lines, manned by 6,854 clerks, 33 electric and cable lines, with 102 clerks; 42 steamboat lines with 57 clerks; making total number of lines 1,239, and total number of clerks 7,013. In addition to these there were 311 clerks assigned to duty at important junctions and depots, and 238 detailed to clerical duty in the various offices of the service, making a grand total of 7,562 clerks. The miles of railroad covered by railway postoffice car service were 154,225; of electric and cable, 303; and of steamboat lines, 7,459. The grand total of miles travelled of all classes of service was 282,830,031. There were 654 whole cars in use, and 173 in reserve, and 2,026 apartments in cars in use and 540 in reserve.

The number of pieces of all classes of mail matter distributed on the railway cars during the year was 11,571,540,080, exclusive of registered matter and city mail. Of registered matter there were 16,256,603 pieces in all. The amount of city mail distributed for stations and carriers during the year aggregated 402,409,640 pieces. The increase of ordinary mail handled over the previous year was 3.7 per cent. A comparative table covering a period of ten years shows that there has been an increase in amount of mail handled of 77.2 per cent., and an increase in the working force of 48.6 per cent.. There were 589 casualties during the year, in which 14 clerks lost their lives, 33 were seriously and 75 slightly injured. This is a larger number of casualties and fatalities than have occurred during any previous year.

BIGGER LAKE MONSTERS.

The Bessemer Steamship Company, which is John D. Rockefeller's big line of lake steamers and tow barges, has just closed a contract for the three largest ships ever constructed for service on fresh water. As the big ships built for this line over a year ago were far larger than anything brought out previously, so the new boats will be an advance in size over even those enormous freighters. The contract for the three went to F. W. Wheeler & Co., of Bay City, Mich. The contract is for one steamer and two consorts. The three must be completed by next May, and all together will carry over 20,000 tons of iron ore in a single trip on a draft of 17 feet water. The steamer's dimensions are 475 feet over all, 455 feet keel, 50 feet beam, and 29½ feet deep, exceeding in all dimensions anything now afloat on the lakes. The engines will be quadruple expansion; the cylinders measuring 28, 40, 59, and 85 inches in diameter, with 42 inches stroke. The boilers will be of the Scotch pattern, four in number. The capacity of the steamer will be 6,500 gross tons of iron ore. The barges will be 450 feet long, 50 feet beam and 28½ feet deep. They will carry 7,000 gross tons each. The boats will cost betweeen $500,000 and $600,000. They will be equipped with everything modern for the rapid handling of cargoes, and be excelled in size only by the largest ocean greyhounds. The Bessemer Company is figuring with other builders for two more boats of the same displacement for future delivery.

NORTHERN QUEBEC.

The report of Henry O'Sullivan, C.E., who has just returned from an exploratory survey through the new north country of the Province of Quebec, as far as James' Bay, shows that this province has millions of acres of cultivatable land on the Hudson Bay slope, particularly on the Waswanapi and Lower Rupert Rivers. There are also immense tracts of merchantable timber lands, the supply of pulp-wood being practically inexhaustible all along the route, while enormous quantities of first quality spruce, up to two and two and a half feet in diameter are reported. An excellent harbor is found at Rupert, and another splendid one can be made with a little dredging at the mouth of the Nottaway. The construction of a railway from Lake St. John to James' Bay would be comparatively easy, as it is established that the greatest height of land on the route is 1,225 feet against 1,500 feet betweeen Quebec and Lake St. John. The complete report of the surveying party is expected to be ready for presentation to the Legislature of Quebec next session.

—The Mount Royal Flour Milling Company asks incorporation in Quebec Province with capital stock $50,000. The applicants are Felix Casey, contractor; John Hallady Rowell, merchant; Daniel Morgan Sexton, insurance manager; John McLaren, miller; Frederick Richarn Scandrett. The first three are to be the first directors.

Commercial.

TORONTO MARKETS.

Toronto, Nov. 4th, 1897.

Dairy Products—All good dairy butter coming forward is readily taken. Deliveries have been more free this week, and the trade in consequence has been more regularly and adequately supplied. Prices remain about as last quoted. There is an easier feeling in creamery butter this week. The export demand has proved dull, and in marketing supplies in local centres the factories have exceeded the consumptive requirements. Prices are a shade easier as a result. We quote: Dairy, choice tubs, 15 to 16½c; medium quality, 11 to 13c; and inferior descriptions, 10c; pound prints, 16 to 17c per lb.; creamery tubs, 17 to 18c; and prints, 18 to 19c per lb. The cheese market is very flat. Prices have fallen off, and holders are disappointed with the outlook. As we elsewhere note, there is a movement on foot by which the salesmen may make direct shipments to British markets. The local trade is well supplied with eggs. Prices are steady, at about 15 to 16c per dozen, while held stock is quoted 12 to 13c per lb., and limed eggs are worth 13 to 13½c, with pickled selling on the same basis.

Grain—There is a weaker feeling in wheat circles, although quotations as compared with those of a week ago are unchanged. The deliveries from country points are not so large as they were several weeks ago, but still remain fairly free. There is some enquiry for barley from the United Kingdom, but transactions were not reported during the past few days. Oats have advanced 1c per bushel, and are in fair demand for the export trade, but the local street is apparently well supplied, and buyers are not anxious bidders. Rye continues firm; the demand is active; prices are up 1c. per bushel as compared with last quotations. The corn market is nominal. For buckwheat there is only moderate enquiry, and the trade lacks vigor.

The stocks in store at Port Arthur on Oct. 23rd were 1,261,126 bushels, and there were received 791,093 bushels and shipped 489,557 bushels, leaving in store on Oct. 30th, 1,562,663 bushels.

TORONTO STOCKS OF GRAIN.

	Nov. 1, 1897.	Nov. 2, 1896.
Fall wheat, bush	33,426	11,893
Spring wheat, bush.. ..	494	7,000
Hard wheat, bush......	16,430	209,458
Goose wheat, bush.....	482	1,359
Total wheat, bu......	50,832	229,710
Barley, bush	13,196	62,092
Oats, bush	3,697	54,234
Peas, bush	3,622	1,387
Corn, bush..	17,000	......

The visible supply of grain in the United States and Canada, with comparisons, is as follows:

	Oct. 30, '99.	Oct. 31, '96.
Wheat, bush	26,974,000	58,680,000
Corn, bush	45,958,000	19,340,000
Oats, bush	15,364,000	11,756,000
Rye, bush	4,241,000	2,544,000
Barley, bush	4,225,000	5,907,000

Wheat increased 2,345,000 bushels last week, as against an increase of 1,395,000 bushels the corresponding week of last year. Corn increased 1,186,000 bushels last week, oats decreased 504,000, rye increased 929,000, and barley increased 545,000 bush.

Hardware and Metals—Trade this week is hardly as brisk as last week. It is difficult to account for the falling off in the volume of movement. The decline is rather in the size of the orders than in their number, although the range of the orders is scarcely as wide as it was a week ago. The warm weather is restricting the movement of autumn goods. The sales of axes, saws, and woodsmen's supplies generally are under an average amount. In tinware and graniteware trade is keeping up. The metal trade has been exceptionally good during the past several weeks. For some time there has been a scarcity of galvanized iron, but stocks are now more complete. The demand is being well maintained. For black sheet-iron, steel sheets, tin, and Canada plate there is a brisk demand, and good orders are being booked. Prices generally are firm. Wire nails continue to be sold at the recent advance, which is a basis of $1.95 f.o.b., Montreal, freights to points other than Toronto, Hamilton, and London being equalized in Montreal. Manufacturers of plumbers' supplies have been compelled to work over-time, so brisk is the demand for goods. Skate shipments are free, and merchants are looking for a large trade this year.

Hides and Skins.—There is practically no change in the local situation. Values are still much higher than the leather market, and merchants continue to pay excessive prices for green hides. A Chicago report, Nov. 1, says: "There was a moderate call for all descriptions, but the operations were not extensive. However, in view of the limited offerings, there was a very firm tone, and full previous values were demanded. Quotations were as follows: 11 to 11¼c for native steers, 10¼ to 10½c for heavy Texas, 10 to 10¼ for butt brands, 9¼ to 9½ for branded cows, 9 to 9¼c for Colorados, 10 to 10¼c for heavy native cows, and 10¼ to 10½c for light ditto.

Leather—Trade remains unchanged. The enquiry for leathers for shoe manufacturers' purposes is limited. There are no excessive stocks of leather on hand, and tanners say that rates are being well maintained, and must continue to be, so long as hides remain on their present basis.

Provisions—A number of cars of dressed hogs have come forward during the week. Farmers at various points in the Western part of the province are aparently marketing their hogs more freely than in the east. For hogs weighing 100 to 150 lbs. packers are paying $5.50 to $5.60, while all the hogs over this maximum weight are worth $5.25 to $5.30 per cwt. Trade in provisions at the moment remains active. Merchants are busy making shipments to the north and north-west points in view of the approaching close of navigation.

Seeds—The deliveries from farmers' hands are confined within small limits. In fact the movement is smaller than a year ago. For alsike $3 to $4.50 per bushel is being paid. Red clover is worth $3 to $3.25, while timothy is bringing $1 to $1.25 per bushel.

Wool—There is a more active enquiry from the Canadian mills for wool. A letter received from Philadelphia this week says: The upward tendency to wool prices (with the exception of a brief interruption in the spring), has been almost continuous since the beginning of the year, but since the middle of October there has been some falling off in the demand, and in the upward tendency, owing to the fact that speculators who heretofore had been competing with manufacturers have not only stopped buying, but in some cases are now offering to sell in order to take their profits. Some manufacturers even find a larger inducement for the resale of a portion of their supply than in its manufacture. Under these conditions, and in view of the enormous amount of wool already bought in advance of their wants, it is not surprising that buyers now show a disposition to hold off, especially as prices asked for wool are so nearly up to the importing point as to have removed a part of the former inducement to buy. Prices average higher than last month.

MONTREAL MARKETS.

Montreal, Nov. 4th, 1897.

Ashes.—There has been some demand for pearl ashes, and consequent firming in price, quotations for this kind being now $4 70 to 4.75 Business in pots continues restricted, with limited receipts, and quotations continue at $3.80 for firsts, and about 3.30 for seconds.

Cements and Firebricks —Receipts for the week ending to-day have been fairly large, comprising 7,521 brls. Belgian cement, 2,435 brls. of English, and 198,000 firebricks. Three steamers have yet to arrive with further supplies before close of navigation. No large sales of cement have been reported since last report, but there is a fair jobbing movement in progress, with quotations for British cement at $2 10 to 2 20, Belgian $1 90 to 2.00; firebricks, $16 to 21 00, as to brand.

Dairy Products.—Cable quotations for cheese show a decline since last writing, and there has been further decline on spot, with holders apparently rather anxious sellers, as there does not seem to be any great prospect of recovery for the market, especially in the face of the unusually large output of the season. The usual Monday offerings of Quebec cheese this week, some 6,000 boxes, are reported to have been sold at 7½ to 7¾c. per lb., quite a decline from last week; finest September Western is quoted at 8½ to 8¾c., and Townships 8¼ to 8⅜c. The shipments last week were large, considering the situation, aggregating 70,000 and odd boxes. The most of the business doing in butter is for local purposes, and prices continue somewhat easy at 17½ to 18c. for creamery, and 14 to 15c. for best makes of dairy.

Dry Goods.—City retail trade shows no very marked improvement, but colder weather is expected to follow the copious rains of the past several days, in which case there should be a noticeable increase in sales. Wholesalers still report a very satisfactory sorting demand from the country, and the improvement in remittances by retailers is well sustained, with an absence of failures of any note. A leading buyer just returned from the European markets, reports a stiffening of prices in woolen fabrics in the Old Country, doubtless due to the advance in raw wools developed at the late series of London sales.

Furs.—We give the following as fairly approximate quotations for new catch of raw furs: Mink, large dark, $1.25; small, ditto, 75c.; marten, $1.50 to 2 00; fisher, $4 to 6 00; lynx, $1 to 2.00; otter, $10 to 12 00 for dark; pale, $4 to 7.00; red fox, large, $1.30 to 1.40; small, $1; cross fox, $2 to 5.00; bear, cubs, $3 to 7.00; medium, $7 to 10.00; large, $12 to 15 00; skunk, 15 to 70c., as to color and stripe; coon, 15 to 75c; rats, fall, 8c.; kits, 2 to 5c. Beaver not quoted, killing being forbidden by law.

Flour	17,930	12,537
Buckwheat..........	....	68,756

Groceries.—The movement is quite a brisk one, especially for heavy goods, as the close of navigation approaches, and winter rates by rail go into effect on the 15th inst. In dried fruits, the stiffening process continues. The lowest jobbing figure for currants of ordinary kind is 5¼c. in brls.; in cases, Filiatras are quoted at 6c.; Patras, 6½c., and Vostizzas, 7½c. Valencia raisins, ordinary off-stalk, 4¾c.; fine, ditto., 5 to 5½c. as to brand; selected, 6 to 6½c.; layers, 6¾ to 7c. California loose muscatels, 2-crown, 6½c.; 3-crown, 7½c.; 4-crown are very scarce and firmly held at 8¾ to 9c. A good many new California prunes have been sold already at 7½ to 9½c. as to size. Some few French prunes have come to hand since last writing, and are quoted at 6c. for 120's, but the large sizes are very high, 13½c. being asked for 60's; 14c. for 50's, and 16c. for 40's. Bosnian prunes are quoted at 6¾ to 7c. for 100 to 110's. Sultanas are quoted firmer at primary points, and jobbing rates are 9 to 12c. as to grade. Candied citron peel has advanced, and 18½c. is asked in a jobbing way. Japan rice is up half a cent. Tapioca shows a strong market. Canned vegetables, etc., keep firming up, and latest canners' quotation for good brands of tomatoes is 90c. in quantity; corn, 65c.; peas, 75 to 80c.; strawberries, $1.35; raspberries, $1.25. Refiners say that the wholesale demand for sugars show some little decline. Factory prices are steady at 4 1-16 to 4⅛c. for standard granulated; yellows, from 3 5-16 to 3⅜c. Teas are rather slow of movement at the moment, but values are well held.

HIDES AND TALLOW. - The only change to be noted in this line is the advance in lambskins, which are now quoted at 75 to 80c. each. Of hides there are increasing receipts, but the demand is quite eqnal thereto, and prices are steady at 9 to 9½c. for No. 1, to tanners, dealers paying about 8c. per lb. Tallow quiet at 3 to 3½c. for rendered.

HOPS.—The market has ruled a little firmer since last report, and choice Canadians have been quoted at 13 to 14c., and ordinary 11½ to 12c. Yearlings continue dull at 6 to 8c. per pound.

LEATHER.—The week has developed little in the way of news in "the Swamp. Many of the boot and shoe manufacturers of the city are now engaged taking stock, and the demand for leather is comparatively restricted, but there is no weakening in prices, and in black leathers especially, light stocks are the rule. A Leeds (England) circular, under date 20th ult., reports considerable activity in sole, and a very fair demand for all other lines of leather, with supplies of American leathers comparatively small, and a firm market generally. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.; polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—The week has developed nothing of special interest in these lines. We hear of a 25-ton sale of No. 2 Hamilton iron, at $16; in Scotch brands there is apparently little doing. Domestic bars are fairly steady at the late advance, $1 45 being asked at the mills, though fair lots could doubtless be done something lower. Iron pipe is stiff at $4.10 for one inch, the last advance. Canada plates are perhaps a shade easier, and $2.05, or probably a little less, would not be refused for a round lot. We quote:—Summerlee pig iron, $18.00 to $19.00; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16 50; Shotts, $17 25 to 17.50; Carnbroe, $17.50. to $18 00, ex-store; Siemens pig No. 1, none; No 2 Siemens, $15.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16 50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates —Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10 tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 75 to 3.90; sheet, $4 to 4.25; shot, $6 to 6.50; bes; cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16½c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

OILS, PAINT AND GLASS.—The demand is still very fairly maintained, especially for glass, which is in comparatively small supply, but three steamers with further stock are yet to arrive before the close of navigation Prices in this line are very firm, as noted last week. Turpentine has eased off a cent since last report, being now 49c. in single barrels Other lines are quite unchanged. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 40 to 42c. per gal.; Gaspe oil, 36 to 38c. per gal.; steam refined

THE NYLIC.

The New York Life Insurance Company has established an organization known as The Nylic, embodying an absolutely new and unique method of compensation, by which men of integrity, ability, and energy, with or without experience, can make life insurance their business, and secure a definite income continous throughout life.

Applications are invited by the undersigned for general and special agencies and management of territory from experienced Life Insurance men, as well as from those wishing to acquire training and experience.

R HOPE ATKINSON, Agency Director, MONTREAL.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... \$25,592,003 78

The Metropolitan has \$150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from \$1,000 to \$20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

THE KLONDIKE AND THE ROAD TO IT DESCRIBED.

In the November number of the *Strand Magazine* is a most interesting description of a visit to Alaska, paid last summer by a well-known English traveller, Mr. Harry DeWindt, who has been interviewed by the magazine.

Mr. De Windt left New York in May, 1896, his preparations having taken quite a year. He travelled to Montreal by rail, and from there to Vancouver by the C.P.R. The trip from Vancouver to Victoria, B.C., was made in a little steamer, and then there was a two days' voyage to Juneau, the metropolis of Alaska, which contains 3,000 people, and consists of wooden houses. Its streets are generally knee-deep in mud during the summer, on account of the incessant rainfall. A busy place, with two hotels. Good shops (especially fur shops); a theatre, and electric light everywhere. Miners fit out here for the Yukon region, and houses are springing up everywhere to accommodate them.

"When you leave Juneau," Mr. De Wendt said, "there is no more food for 800 miles, and gold won't buy it. Why, I heard of miners stretched on the ground dying of starvation in the camps, with a sack of gold-dust for their pillow! It is madness to think of starting, say, from England, with less than £300 capital. You've got to get yourself and perhaps half a ton of stores over thousands of miles of awful country—snow mountains, stormy lakes, and raging rapids.

"Dyea, which is 100 miles from Juneau, and which he reached in June by steam launch, consists of a rude log store and a movable town of tents, occupied by diggers bound for the gold fields.

"Things won't be quite so bad in the spring of '98," remarked Mr. De Windt, "for then the recently-discovered White Pass will be open. Travelling by the White Pass route, you go to Skagway Bay, at the head of the Lynn Canal. The total distance by this route from Victoria, B.C., to the Klondike River is 1,400 miles, as against 4,000 miles by the sea route to St. Michael's. Besides, the latter is only available for three months of the year, while the White Pass is open for nine months. However, all those who have already made their fortunes on the Klondike, or are still making them, have travelled over the Chilcoot, as I did."

The Chilcoot Pass is 4,000 feet high, and difficult, dangerous, climbing it is. "I have roughed it" says the English traveller, "in Siberia and in Chinese Tartary, but I can safely describe that climb over the Chilcoot as the severest physical experience of my life." * * * The head of Lake Linderman, the first of a chain of five lakes, is about nine miles from the summit of the pass. The distance across Lake Linderman is five and a half miles. Next comes Lake Bennett, 26½ miles long. The journey down the lakes occupied ten days, four of which were passed on Lake Bennett. All these Alaskan lakes are dangerous, by reason of the sudden storms that spring up. In winter, Lake Bennett is crossed on sleighs. The scenery is wild and beautiful, the shores being fringed with well-timbered slopes, sheltering grey wolves and black, brown, and grizzly bears. * * * Leaving the lakes on June 26th, we entered the Lewes River, and next day reached the Grand Canon Rapid, which is nearly a mile long, and dashes through perpendicular walls of rock from 50 ft. to 100 ft. high. The fall is 100 ft. wide, and so swift that the stream is 4 ft. higher in the centre than at the sides!

"Next we dashed down a perfect mill-race for six miles to the White Horse Rapids—a place so fatal as to have received the name of the 'Miner's Grave.' Not a day passed that we did not see a cairn, or a rude wooden cross, marking the last resting place of some drowned pilgrim to the land of gold. At Fort Selkirk, the Lewes River down which we journeyed from the lakes unites with the Pelly. On the twenty-fifth day out from Juneau we reached Forty-Mile City, one of two settlements on the Yukon that have sprung into existence since the gold rush; and there we beached for the last time the tiny craft that carried us safely for over 000 miles."

Forty Mile City is the central point of the new El-Dorado. It is in British territory. It was in Forty Mile Creek that the first "coarse" gold was found. "Any visions of civilized comforts inspired by the name," said Mr. De Windt, "were rudely dispelled. Forty Mile is (or was, a few months ago) a collection of eighty or ninety dismal log huts, scattered about anyhow. Though bread is often scarce, whiskey is never lacking, and yet the place is a miracle of law and order. A detachment of the Canadian Mounted Police, under Inspector Constantine, have their barracks here, but could well be dispensed with.

"The spring of '98 will see *the* great rush," said Mr. De Windt, "but there's plenty of room. A hundred thousand miners might go prospecting in the Yukon Valley and be lost to one another. My impression is that there are streams richer even than the Klondike—the Pelly, the Lewes, the Porcupine, the Big Salmon, the Tanana, the White, the Hootalinqua, and the Stewart Rivers, for example—especially the last-named. All are navigable tributaries of the Yukon."

"Thus there is the appalling journey, the awful cold of winter, the terrible mosquitoes in summer, and a scarcity of decent food at all times. Transportation companies are being formed, however, and doubtless things will be different next spring, when, among other things, the British Yukon Co. will place twenty stern-wheel steamers on the great river, and probably construct a narrow-gauge railway over the White Pass. But that there will be much suffering among the gold-seekers, no one doubts.

Mr. De Windt has been approached whilst in London by all classes, seeking information about the Yukon diggings. "A titled lady wanted to set up a store at Forty Mile; and an aged clergyman said he'd like to send his sons out if there was a railway and a postoffice nice and handy in the district. Letters poured in upon me at the rate of seventy a day, and at length I protested against it."

Circle City (so-called from being within the Arctic Circle), was Mr. De Windt's next stopping place. "Last year," remarked Mr. De Windt, "Circle City contained 1,100 inhabitants, but that population might be doubled in a week. This being American territory, 'Stars and Stripes' of various sizes wave from many of the dingy camp dwellings."

"As to the Klondike 'rush' next spring," he said, in conclusion, "there is no doubt it will alter the face of the entire region, the climate notwithstanding. Railways and steamships, and telegraphs will soon be established. Fortunes will be made, and the unlucky forced to the wall. Sensational reports may be expected daily, for the place is a real Tom Tiddler's ground, honeycombed by rivers and creeks with sands of gold. There is plenty of room for all between the Klondike and the Cassiar. Let the gold seekers take their time and make prudent preparations." Mr. De Windt, who has travelled to Siberia, is an agent of the *Pall Mall Gazette*, was in Montreal last week, en route to the United States, where he proposes to undertake a lecturing tour.

BUSINESS AND ADVERTISING.

The action of an association of business men in New York in protesting against false advertisements in the papers simply to attract attention is another evidence of the value of newspaper advertising, and a hopeful indication of the tendency toward truthful representation. Advertisers who have commodities to dispose of are learning that a statement of the facts and honest representations of their goods are a better paying investment than statements that cannot be substantiated. This fact has long been recognized by experts, few of whom will be found to advocate exaggeration.—*Troy Press.*

CONSUMPTION OF WINE.

The consumption of wine in the United States does not increase in the same ratio as the population. In England, on the contrary, close upon a million more gallons of wine were consumed in 1896 than in 1895. Of this total quantity, 463,000 gallons was French, red and white, 100,000 Portuguese, 180,000 Spanish, and 200,000 from other countries. Sherry shows a deficiency of 180,000 gallons consumption, as compared with previous years, although the quality is better and the price less than formerly. The use of brandy is largely on the increase. This is attributed to the skill now employed in blending the various brands. This manipulation has driven out of the market almost all the low-priced Cognac brandies formerly imported from Charente. The decline in wine-drinking in the United States is due to excessive duties imposed upon foreign products, the crude quality of California wine, and the enormous consumption of beer, which may now be called the national beverage of this country. The cost of the better grades of whiskey will always restrict their use. The French claim that newly-distilled liquors are safer to drink than those ripened by age.—*N.Y. Sun.*

THE DEPARTMENT CLERK.

The following story of the habits of department clerks is from the New Orleans *Times-Democrat.* We are not aware that this correspondent has ever been in Ottawa, but it is by no means impossible that he might find points of resemblance in the Ottawa Government clerks to his Washington cousin:

"Life in the departments at Washington," said a Government clerk at home on his vacation, "despite the fever, is certainly a delightful sort of thing if you have a good position. The hours are easy, 9 to 4 o'clock, and you are allowed thirty days' annual and thirty days' sick leave. This leave you can take by the hour, day, or in a lump. Of course, you are not expected to take the sick leave unless you are sick, but then it is much easier to be sick under the Government than in a commercial house. Nobody asks any unpleasant questions. You put in a slip; that is the end of the matter. I know a chief of a division in the patent office who regularly every year goes off to Nova Scotia. After he has used his thirty days' annual leave he gets a physician's certificate to cover his sick leave. The physician states that it is necessary for his patient's health that he stay in Nova Scotia. Such is life. Of course there are those who are scrupulous even about Government sick leave, but they are too rare to live long. Two months in the departments modify most consciences in this respect. But this little matter aside, you have exceptional facilities to study human nature."

—The Stanstead and Sherbrooke Mutual Fire Insurance Company reports the losses paid during the year amounted to $34,165, as follows: Agricultural class, $15,268.62, and commercial class, $18,796.61.

—At the recent cinchona auction in Amsterdam, the bark sold at an advance of 45 per cent. The quantity of quinine represented by the bark sold was 19,571 kilos, the quantities being secured by the principal buyers being: American and English manufacturers, 3,439 kilos; Auerbach, 3,701 kilos; Brunswick, 2,752 kilos; Mannheim and Amsterdam 5,391 kilos; Frankfort-on-Main and Stuttgart, 1,633 kilos; various other buyers, 2,835 kilos.

—"Have you any good sweet cider?" asked Mr. Frankstown of his grocer. "Yes," replied the man of tea and sugar. "I have some genuine anarchistic cider." "Anarchistic. It is likely to make trouble, isn't it?" "I don't mean it in that sense. I call it anarchistic cider because it is guaranteed not to work."—*Pittsburg Chronicle-Telegraph.*

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE

NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

WM. McCABE,

DECISIONS IN COMMERCIAL LAW.

LELLIS V. LAMBERT.—Motion by defendant to set aside verdict for plaintiff for $2,250 in an action brought by May Lellis against Mary Lambert for damages, for alienation by defendant of the affections of plaintiff's husband. Defendant contended that the plaintiff should be non-suited, because the action does not lie. The Court held that the weight of authority is against such an action as the present, and that the action was not maintainable by a wife under the Married Woman's Property Act. Appeal allowed by the Court of Appeal for Ontario, and action dismissed with costs.

CRAWFORD V. CANADA LIFE ASSURANCE CO. —Appeal by defendants from judgment at the trial at Kingston, in favor of plaintiff in an action to recover $902, the surrender value of an insurance policy for $5,000 on the life of one Donald Fraser, claimed by plaintiff as assignee of Fraser for the benefit of creditors. The defendants had before action paid to Fraser himself the value of the policy, and the question raised was whether they had sufficient notice of the assignment to plaintiff before they so paid. The Court of Appeal for Ontario held that the notice given was insufficient.

ANDERSON VS. G.T.R. COMPANY.—Appeal by defendants from order directing judgment to be entered for the plaintiffs for $3,000 damages in an action under Lord Campbell's Act, brought by the personal representatives of one William McKenzie, who was struck by a train of defendants while walking upon a railway track, and killed. The court below held that the deceased was properly upon the track at the time he was struck, as he was necessarily there in seeking egress from the station of the defendants at Lucan crossing, and that he was entitled to the benefit of the provisions of section 256 of the Railway Act, requiring warning by bell or whistle on approaching a highway, he being at the time only a short distance from the highway, and no warning having been given. Appeal dismissed with costs by Court of Appeal for Ontario.

TOWNSHIP OF CARADOCK V. TOWNSHIP OF EKFRID; TOWNSHIP OF METCALFE V. TOWNSHIP OF EKFRID.—Appeal by plaintiffs in both actions, and from report on decision of Mr. Britton, when drainage referee, in favor of defendants, the initiating township, dismissing an appeal from the report of an engineer upon a drainage scheme affecting the three townships. The principal question was as to the construction of section 75 of the Act of 1894. The Court of Appeal held that the defendants had jurisdiction to initiate the work. The majority of the court, however, held that the course pointed out by the statute in assessing for outlet was not followed. Appeal allowed with costs.

DOMINION BANK V. WATEROUS.—Appeal by defendants from judgment of Meredith, J., who tried the action without a jury at Brampton, in favor of plaintiffs establishing their lien for about $900 upon certain lands now owned by defendants, and directing the enforcement of the lien by sale. The plaintiff's rights arise under an assignment of the lien from the Haggert Bros. Manufacturing Company, by virtue of an agreement made in 1884 between the company and two men named Harrad, who then owned the land. The lien was for payment of the price of an engine sold to the Harrads by the company. The defendants are purchasers of the land for value with notice of the lien. They contended that they were entitled to consider the lien at an end by virtue of certain dealings and transactions between the Harrads and the company. Appeal allowed, with costs, and action dismissed, with costs, by the Court of Appeal for Ontario.

JOHN BARBER

Mercantile Summary.

THE Bank of Ottawa has declared this half year, a bonus of one per cent. in addition to the usual dividend at the rate of eight per cent. per annum.

THE National Association of Manufacturers of the United States are preparing to establish a sample warehouse for American goods in Kobe, Japan;

SENATOR McINNES, of British Columbia, has been appointed Lieutenant-Governor of that province, and Mr. Templeman, Editor of *The Times*, Victoria, is made a senator.

SIR JULIAN PAUNCEFOTE, British Ambassador to the United States, has been instructed to ascertain the views of that Government regarding a reciprocity treaty with the British West Indies.

ON Monday last, says a Montreal letter, the employees of Messrs. James Johnston & Co., dry goods merchants, presented to Mr. J. W. Tresidder, on leaving the establishment, a handsome gold locket

THE portion of far northern Canada eastward from Alaska has been officially divided and designated. The district adjoining Alaska is named Yukon, then in order eastward are Mackenzie, Franklin and Ungava.

AN Order-in Council passed at Ottawa this week, gives Japan and the Netherlands the benefits of the reciprocal clause of the Canadian tariff This means that goods entering Canada from these countries will be admitted at a reduction of one-eighth per cent. on the ordinary tariff for the first year and of one-quarter per cent. next year.

THE lumber firm of Graham, Horne & Co. are getting out 10,000,000 feet of logs this winter, and, the *Commercial* says, will operate their mills at Fort William next season. They cut all their logs at Duluth this year, thus leaving their Fort William mills idle. The operation of the mills next season will help business at the Fort very materially.

THE lively Japanese consul at Vancouver, Hon. T. Nosse, has received promotion, which we doubt not is well merited. By order of the Mikado, a Japanese Consulate for all the territory west of the Alleghenies will be established in Chicago this week, and Mr. Nosse will assume the duties. The Vancouver office is to be tributary to the Chicago office, we are told.

THE annual report of the British Post Office states that the total mileage of trunk telephone wires now under the control of the Government, exceeds by nearly 4,000, the mileage of wires transferred by the old telegraph companies in 1870 Of the total of 52,000 miles of wire in the United Kingdom, 29,000 were bought of the National Company, and the remainder have been erected by the Post Office. The office handled in 1896 over 1,800 millions of letters and 79 millions of telegrams. The Post Office earned £3,893,000 of profit in 1896-7.

THE People's Bank of New Brunswick is putting into circulation the first of its new issue of bank notes. The new paper is known as the Jubilee issue, and $250,000 worth has been ordered, it is said, in tens and fives, The $10 note bears a portrait of Hon. A. F. Randolph, president of the bank. At the upper left hand corner is a picture of the Fredericton Parliament buildings, while the lower corner contains a likeness of the Queen, of 1837. The five dollar note is similar in appearance, except that the positions of the pictures of the Queen and Parliament buildings are transposed.

IT appears now that the Baltic and North Sea canal traffic since it was opened in 1895, falls far short of the estimates made by its promoters. The sail tonnage is much larger and the steam tonnage much smaller than was calculated. The official statisticians of the German Government, who made estimates upon the canal traffic beforehand, figured the annual traffic at 5,500,000 tons and the receipts from tolls amounting to over 4,000,000 marks. The actual returns show that in the first year the traffic was 1,505,983 tons and the receipts 897,451 marks; in the second year the traffic was 2,036,861 tons and the revenue 1,086,432 marks.

IN 1892 H. J. Wilson succeeded his employer, Wm. Turner, as a tinsmith at Niagara, but never made solid progress Not being able to arrange a compromise as expected, he now assigns. —— Another assignment is that of Northwood & Co., coal dealers in Chatham. They succeeded to the business of the late Wm. Haward, the purchase amounting to about $3,000. Of this sum one-third was paid in cash. The trouble seems owing to keen competition. — Some months ago the general store firm of Nicholls & Ferguson at Gorrie dissolved partnership. T. J. Nicholls continued the business and paid his partner $1,000 cash. Although they did a nice trade, we already hear of his assignment.

THE mayor of Ottawa fears that speculating in stocks is rife in that city, and wants it stopped. But Ottawa human nature is much like human nature elsewhere—somebody always wants to gamble, and the lawmakers will be kept busy passing prohibitions, from the grab-bag downwards. A stock broking firm tells the *Journal* that at present he does not sell on an average more than 100 shares a day. He says but few Ottawa men deal with him, but that his principal customers are commercial travellers from Montreal and Toronto, who drop in when they are in town and buy a few shares. It was with this firm that Holcomb dealt. His account shows total gains were $9,170, from October 16th, 1896, while his losses were $10,428.

THE electric system of the town of Orillia, Ont., is operated in connection with the waterworks plant. The management of the plant is vested in a board selected from the town council. The plant is situated near the lake, where condensing water is easily obtainable. Nature supplies an abundance of pure spring water into a partly submerged tank, with a capacity of 33,000 gallons. These springs are situated on Muskoka Hill, and the water gravitates to the tank. Besides this tank there is a stand-pipe three-quarters of a mile away, with from 100 to 120 pounds pressure. There is also a reservoir on Peter street with a capacity of 250,000 gallons. Forty-five arc lamps light the streets, and 2,300 incandesent lamps are installed for public and private lighting.

THE United States are hardly pleased with the French bounty system, and have determined to "get even" with France on the fish question. Hence a Washington Treasury circular addressed to collectors and other officers of the customs reads thus: "A bounty of 10 francs per French quintal of 55 kilogrammes, equivalent to 121 pounds avoirdupois, is paid by the French Government to all exporters of fish from the island of St. Pierre Miquelon, and you are therefore instructed to assess a countervailing duty of $1.93 per 121 pounds on fish imported from said island, directly or indirectly, under the provisions of section 5 of the act of July 24th, 1897."

Toronto
The Gurney-Massey Co., Limited
Montreal

Mercantile Summary.

THERE is a falling off in the Indian opium revenue this year. Bengal and Bombay presidencies during August and September were 1,400,000 rupees below the estimate.

AN assignment is made by Donald Sutherland, who has done a small grocery business in Hamilton for the past twenty years. The assignee is F. H. Lamb, and the liabilities are about $2,200. A meeting of creditors is called this week.

A GRIM reminder of the United States civil war is found in the fact that in the last fiscal year that country paid the enormous sum of $139,947,717 as pensions to 976,014 soldiers who had fought in that war. This represents an average of about $144 each.

IN last issue it was stated that A. & J. Munro, of Bridgewater, N.S., dealers in fish, had assigned. This was an error, which we regret. What we should have said is that they assigned their book debts to Dawson & Sons and C. H. Harvey, who have received confession of judgment from them.

CAMPHOR, for which Hiogo used to be the leading market of the world, fell off last year to under 1,000 tons, value £118,000, barely a third of the figures of seven years ago. The supply from the island of Formosa was shipped to Hong Kong, which is now likely to become the permanent depot for that island.

JUDGE DUGAS, of Montreal, has rendered judgment in the case of John C. Glackmeyer, a hotel runner, against three special officers of the R. & O. Company, for ejecting him from a steamer. The Judge holds that he had a right on the boat, and was creating no disturbance—at least none was proved. He finds the defendants $10 and costs each.

IN September, 1893, C. R. Shane & Co. succeeded W. P. Hayes & Co., dealers in men's furnishing goods at Goderich. In doing so, the former invested some $2,500 in the venture. Being anxious, to do a large trade, they purchased goods too freely, and thus became crippled. We now hear that this embarrassment has resulted in an assignment.

THAT there is improved demand for Manitoba lands, whether from United States or European immigrants, is evident. The land sales of the Northwest Land Co. for the past ten months aggregated $150,000 for 28,000 acres, compared with only 12,000 acres for $67,000 for the whole of 1896. The land sales of the Canadian Pacific Railway, for October, aggregated 22,000 acres, the value of which was $86,000.

A PORTION of the assets of the Young Co., Limited, of Brampton, Soil Pipe Fonndry, amounting in value to $7,700, has been sold to the Toronto Hardware Co. by the assignee, F. H. Lamb, of Hamilton. The building and plant remain unsold, and it is likely that the town of Brampton will have to take it over and add it to the collection of such things they have acquired by their system of liberal bonus giving.

AT a meeting of depositors in La Banque du Peuple, held in Montreal, on Friday last, Hon. Mr. Boyer resigned his extra directorship and could not be persuaded to withdraw his resignation. After several gentlemen had been proposed for the vacant post but declined it, the name of Mr. Decarie, M.L.A., for Hochelaga, who was not present, was mentioned and on some one's assurance that he would accept the post, he was elected. A report of the bank's affairs showed an improvement in the state of the assets since March.

THE Canadian Government telegraph line along the north shore of the Gulf of St. Lawrence, has been extended from Esquimalt Point to Agwanus, a distance of 80 miles. The present terminus is just west of Natashquan, and telegraphic communication with the latter point may be obtained by the end of the year. Offices have been opened for business along the new stretch of line at Agwanus, Piastre Bay and Sheldrake.

AUTHORITIES of the United States Government in Detroit, have been notified that a new counterfeit silver certificate has been placed in circulation. It is a photograph, and consequently is in two parts, pasted together at the back. It is a counterfeit of the series of 1891, letter A plate No. 17, the vignette being a bust of Hendricks. The lettering and numbering is defective to the eye, and the silk fibres in the paper of the genuine notes are but pen marks in the counterfeits.

MORE activity is to be expected in Toronto shipyards this winter. An active season's shipping has given some encouragement to vessel owners, who will make improvements to their steamers and sailing vessels. Besides the building of two large steamers for the Richelieu and Ontario Company for lake passenger traffic, at the Bertram shipyards, the iron grain steamer "Rosedale," belonging to Crangle & Hagarty, is to have a new hurricane deck. The iron steamer "Seguin," 200 feet long, will be lengthened about 40 feet.

THE Kent Mills Co., Limited, have taken over the Kent Mills in Chatham, and the Blenheim mill property and bean warehouse in Blenheim, from the Stevens-Campbell firm, and John Campbell, of St. Thomas, has taken the Erie Mills of St. Thomas, and the Aylmer mills of Aylmer, and will conduct the same under his own direction. The Kent Mills Co. is a close corporation joint stock company, N. H. Stevens, his sons, and Jas. Rutherford, of Blenheim, carrying the principal stock. Its directors are: N. H. Stevens, H. J. Stevens, Mrs. N. H. Stevens, Jas. Rutherford and J. A. Walker.

THE death on Sunday last of George S. Fenwick, of Kingston, removes a well-known Canadian merchant, an active citizen and a very charitable man. The deceased, who was born in Dundee, Scotland, in 1830, came to Canada as a young man and began his business career in the dry goods house of Wm. Bryce & Co. He became confidential clerk to Thomas Hendry, and was made partner with him thirty odd years ago. Upon the death of Mr. Hendry, he became senior partner of the wholesale firm of Fenwick, Hendry & Co., then organized and continued as such until his death. Deceased was in the city council of Kingston, and showed both energy and public spirit as an alderman.

A HINT to Klondyke travellers may be found in the fact that the recent Government expedition to the Yukon, consisting of Hon. C. Sifton, Major Walsh and their staffs, was supplied with eiderdown sleeping bags by the Ottawa agent for the Alaska Feather and Down Co., of Montreal, who are the manufacturers. This sleeping bag, it is said, combines the two great essentials of lightness and warmth, being five pounds lighter than any other sleeping bag, and having two interlinings of genuine eiderdown and an inside lining of soft fine wool. The company claim that this is the only form of covering adapted to the Arctic climate and to travelling on the pack trail, and those who have read Nansen's famous trip to seek the North Pole will remember that he seemed to think so, too for he always slept in fur or feather bags.

Mercantile Summary.

If you have not remitted for your Monetary Times subscription you might look up the postal card notice now, and buy the P.O. order, so as to get the matter off your mind.

A well known Toronto man, Mr. John Dunlop Hay, of the Davidson & Hay Co., limited, died suddenly on Monday. He was one of the most popular of the younger generation of business men.

The grape crop of Pelee Island was a very heavy one this year. The fruit was all gathered before the frosts, and will be mostly used for making wine. Growers secured from $12 to $16 per ton for the grapes.

The Western Stock Growers' Association have decided that it is expedient that an amendment to the North-west hides ordinance be introduced, making it compulsory that all stock must be inspected by a hide inspector before they are shipped from or driven out of the district.

The past season has been an unprofitable one for Canadian shippers of cattle to England. Mr. A. J. Thompson, one of Canada's largest cattle exporters, tells the Montreal *Herald* that he intends to give the Argentine trade a trial, and with that object in view, he has gone to Buenos Ayres, under the belief that the cattle trade between the Argentine and England is going to show a marked improvement. Mr. Sheridan will continue to look after the Canadian end of the business.

The fifth ordinary general meeting of the Acadia Sugar Refinery Company is to be held in Halifax on December 2nd. The report for the year ending Sept. 30, 1897, says that the business of the year has resulted in a loss of $21,082.19, which was due to continued depression in trade, extreme competition, and a further decline in the value of sugars. The balance at debit of profit and loss at the close of last year was $68,354.24, to which has been added the present year's loss, making the amount at the debit of this account $89,436.43, which is carried forward. The insurance on the property destroyed and damaged by fire at Moncton was duly collected by the Eastern Trust Company, as mortgagees, and the amount, with accrued interest, $59,198.57, is held by them, as shown in the financial statement. The efficiency of the refiners at Woodside and Richmond has been fully maintained.

Here are some Montreal embarrassments: E. F. G. Daniel, druggist, has filed consent to assign, showing liabilities of $4,430.——Aristide Belair, contractor, proposes a compromise at 50 cents cash.——W. B. Morris, bicycle dealer, is also seeking a compromise arrangement with creditors.——The liabilities of Cusson & Leduc, cigar dealers and manufacturers in a small way, are larger than anticipated, footing up some $8,900. They have assigned to the court.——Eugene Montbriand, a small tailor, has assigned.——Paul Desjardins, who has for many years done a fair-sized suburban dry goods trade, on Western Notre Dame street, has of late been showing signs of retrogression. He some years ago sank a good deal of his capital in bricks and mortar, and has of late evidently felt the departmental store competition. He has now assigned, and is estimated to owe $15,000.

Mercantile Summary.

BEAN & WESTLAKE, biscuit manufacturers, Woodstock, propose to extend their premises, and are negotiating to purchase premises adjoining their factory.

HENRY A. CANFIELD, sporting goods dealer in Woodstock, has been in business there since March, 1896 He has made but little headway, and now assigns.

HON. J. D. ROLLAND, of Montreal, has been asked by a deputatien of the Dominiom Commercial Travellers' Association, to be a candidate for the presidency of that body for a second term, and has consented to do so.

BECKER BROS., two hard-working fellows operating a planing mill in Stratford, have made an assignment. They succeeded their father in this business last February, and although they did considerable trade, were very poor business men. Liabilities will amount to $1,000, with assets of $300 or $400.

NAZAIRE LACHANCE, of Quebec, who has carried on a grocery business in a modest way in Quebec city for some thirty years or more, without previous mishap, has been obliged to assign.——The demand of assignment recently reported as being made upon James Ellis, of the same city, is being contested.

AMONG the passengers to Boston by steamer, Saturday evening, says the Halifax *Chronicle*, was Mr. Charles E. Platt, of Montreal; who contemplates engaging in the West India trade, having headquarters at Halifax, with branches at Digby and Yarmouth. Should his scheme materialize, a storage warehouse will be erected at Halifax, and one at Digby.

AN insurance agent in Ottawa named Walter Spencer, has left that city hurriedly for New York, and his bondsmen have been asked to make good a shortage of several hundred dollars. Spencer wrote from New York to his father, saying that evil.companions had led him astray, and that he would have to remain away from Ottawa for the future and to seek to rise from his fallen position.

DAVID BERTRAND, of Hawkesbury, Ont., who has been doing business of recent years in groceries, produce, etc., under the name of his wife, A. S. Bertrand, because of previous difficulties, is trying to arrange a compromise at 20 cents.——The assignment is reported of F. Offord, boots and shoes, Kingston, Ont., a son of the late George Offord, well known in his life time as a prominent name in the shoe line.

MR. ROBERT IRONSIDES, who handles the bulk of the Manitoba and North-West cattle that comes east, says that the North-West trade this year been unprofitable and disappointing. Poor quality he gives as the principal reason for the failure Flies and rain injured the stock and the cattle failed to fatten up well on the long grass. He says that there were an enormous number of cattle raised in the North-West, and the fact that thousands were taken across the line for feeding purposes prevented a glut. Otherwise beef might have sold on the Montreal market at a cent a pound. Shipment to the British market did not turn out well.

ACCORDING to the *California Fruit Grower* the prune output of California for the past seven years has been as follows: 1890, 16,000,000 lbs.; 1891, 27 500,000 do.; 1892, 22,500,000 do.; 1893, 52,180,000 do.; 1894, 44,750,000 do.; 1895, 64,750,000 do.; 1896, 55,200,000. Total in seven years, 282,880,000 lbs., or more than one hundred and forty thousand tons.

THE annual statement of the Cornwall Electric Street Railway shows the total receipts to have been $25,282.68, and the surplus earned forward to profit and loss, $1,359.87. The passenger receipts amounted to $16,557, while $1,661 was earned in carrying freight.

THE estate of Thouret & Co., Montreal, dry goods jobbers, is to be wound up. The proprietor, Emil Thouret, has filed consent to assign. He was formerly connected with another dry goods firm, from which he withdrew two years or so ago, with a clean $20,000, which, however, has all been lost through an unwise liberality in the dispensing of credits. It will take Emil longer to make the next $20,000, probably.

FROM the Province of Quebec the following list of country failures is reported for the week: At Baie St. Paul, Louis Bouchard, a millwright by trade, has been running a small store for the past four years. Last year he built a mill for making spool wood, which seems to have proved too much for his limited capital, and he asks indulgence from creditors. proposing to pay 40 cents cash, balance spread over 18 months.——On the demand of Thibaudeau Bros. & Co., an assignment has been made by Godfred Caron, of Cap St. Ignace. In 1896 he settled at 65 cents. Liabilities are about $3,000. — J. A Blondin, general store, St. Maurice, is asking for a settlement at 70 cents on the dollar. He was burned out last July.——Edouard Roy, of L'Anse St. Jean, for many years doing a small general store trade, is now reported to be in some embarrassment, and to be consulting his Quebec creditors, with the view of getting a settlement.—James Powell, general store, St. Ferdinand d'Halifax, was in Montreal lost week, soliciting signatures to a deed of composition, at the rate of 60 cents on the dollar, but has now assigned. For the past year he has been often sued, and has had to pay a good many hundred dollars in costs.——A demand of assignment has been made upon P. E. McGee, who began storekeeping at Rimouski in 1895.

TORONTO JUNCTION APPEAL.

The appeal of the municipality of Toronto Junction has been disallowed. Chief Justice Meredith and Justice MacMahon have dismissed the appeal of that town from an order compelling it to pay $144 interest on debentures to Arthur Park and Jacob Vipond, brokers, of Montreal. For the Junction it was pleaded that the municipality had already assessed at 20 mills on the dollar, and that the law allowed them to go no further. The bonded debts of the Junction were now $1,000,000. Said the Chief Justice: "And if this appeal is allowed you are absolved from this particular debt."

"With respect to this interest, we are," answered the counsel.

"Well," answered His Lordship, "you'll have to go somewhere else to have that allowed."

"This is a valid debt," the judge continued. "It would be a nice way to pay off your liabilities, to reduce your assessment one half and then declare that you haven't enough to pay. The action is dismissed."

—An experienced man, who has just returned from Alaska, tells the Fargo *Argus* how to cure the Klondike fever. "Pick out a morning next winter," he says, "when the mercury is below zero, shoulder a pick and go into the woods before breakast; dig a hole sixteen feet deep; come back to the house at night and eat a small piece of stewed buffalo robe and sleep in the woodshed. Repeat the dose as often as necessary."

An exchange says that Mr. T. Marks has left Port Arthur for some point on the Crow's Nest Pass Railway, where he will establish a departmental store.

The town of Fort William has $13,000 worth of debentures for sale. The town has decided to install an electric lighting plant, and the sale of debentures is to raise funds for this purpose.

A general dealer at Mount Brydges has just had his third visit from burglars. Last Saturday night or Sunday morning the store of J. Bell was burglarized and $200 worth of goods stolen. The merchandise taken consisted of pipes and tobacco, cutlery, perfume, boots and shoes, hardware and ladies' underwear.

A proposal is put forth by the New Westminster *Columbian* to have a grand Western Fruit Fair at that city in connection with the R. A. & I. Society Exhibition next autumn. It is urged that the agricultural associations throughout British Columbia might combine to assist such a fair, while the American Sound cities and towns would crowd to make it a success, as they did the Spokane Fruit Fair a month or more ago.

When he began storekeeping, J. R. Jaynes succeeded to the insolvent estate of Hugh Gillespie & Co., who were in the general business at Alvinston. In doing so he was assisted by a wholesale firm in Hamilton. Owing to the McMaster failure in this city, last February, Mr. Jaynes was obliged to consult his creditors, who granted him an extension. His statement then showed assets of $13,000, and liabilities of $10,000. Now he is obliged to consult his creditors again.

F. J. Waghorn, auctioneer, Winnipeg, has assigned. When he began business he claimed to have over $1,500 cash.——No less than six judgments have been obtained against Weir & Co., dealers in clothing in the same city. A bailiff has taken possession of their premises. ——The sheriff has sold the saw-mill effects of J. C. Squirebriggs, of Duck, B.C.—— We understand that F. J. Golden, who succeeded Golden Bros. last month as a dealer in men's furnishing goods at Sandon, B.C., finds that he cannot successfully conduct the business and is trying to make some arrangement with creditors.

MONTREAL HARBOR.

Commenting upon The Monetary Times' article of 29th ult. on Montreal and the St. Lawrence route, a Montreal business man writes last week: "You are not far wrong in saying what you do about the handicapping Montreal is subject to from the lack of space and other facilities for handling cargoes of big modern steamers. We are not at one down here on the matter of harbor improvement—I wish we were. Some are pulling one way and some another."

It is very evident that Montreal people are not agreed as to methods of harbor improvement. The papers have teemed for a week past with letters on the subject. But the writers are not agreed as to the necessary length of piers—not agreed as to the angles of piers with the revetment wall—not agreed as to whether space is more useful as wharf space or as basin space. Then there are the differences of interest between shippers and landowners at the east end and the carriers and commercial bodies who uphold the concentration of the traffic near the canal basin. Clearly, those who urge low level construction ignore its inhibition by an agreement between the harbor commission and the city, to overcome which, if it is to be overcome, must prove an expensive job.

A decision worthy of the future greatness of the port, and the importance of the St. Lawrence route must be reached; and to this end, narrow views will have to be subordinated to the general welfare. Not only do the admitted present defects of Montreal harbor require to be faced; but the cure of them must be set about in a manner worthy of the occasion. What is needed is a comprehensive scheme of improvement which shall over-ride selfish ends and brush aside petty objections. The main point to be kept in view is the prompt and economical handling of freight in competition with other Atlantic sea-board ports. And we should be sorry to believe that the skill and patriotism of the men of Canada will not prove equal to the solution of the problem.

MONTREAL'S FOREIGN TRADE.

The inwards and outwards foreign trade of Montreal, for October, was large, amounting in the aggregate to $10.979,600, that is, the imports were $3,484,322, while the exports reached $7,495,278. Twelve months ago the imports were $3,262,628, and the exports $5,662,316, making an aggregate of $8,924,944 in October. Last month's imports were unusually large, beating even the September record by over a million, and the increase was all in Canadian products. There were larger exports of horses live cattle and sheep, cheese and butter. The October shipments of cheese were valued at $2,187,696, and of wheat at $1,226,919, two-thirds of it American. Flour, too, was a large item of export, all of it Canadian. The following comparison shows classes of goods:

Exports.	October, 1897.	October, 1896.
Produce of—		
Mine	$ 8,226	$ 7,428
Fisheries	19,450	19,683
Forest	676,161	689,893
Animals	4,316,290	3,218,039
Agricultural products	2,069,388	1,217,470
Manufactures	270,350	280,003
Miscellaneous........	3,702	13,162
Bullion..............	122,698	206,864
Gold coin............	9,004	9,768

Imports, too, show, as we have said, some increase, noticeable in free goods, such as raw products for manufactures; raw cotton, $208,137; hides and skins, $51,820: jute cloth and yarn, $48,945; wool, raw silk, tea, coffee, and anthracite coal, which last item was $141,100. Among dutiable goods, dry goods exceed $269,000; pig iron and metals of all kinds stand at $403,715. Imports of sugar, which in October last year amounted to $497,133, were only $390,032 last month.

TOWN OF FORT WILLIAM
Debentures
For Sale

Sealed tenders will be received by the Council of the Town of Fort William, addressed to the undersigned, and marked "Tender for Debentures," up to noon on MONDAY, NOVEMBER 22nd, 1897, for the purchase of debentures to the amount of $13,000, issued for installing a system of electric light in said town. TORONTO, FRIDAY, NOVEMBER 12, 1897.

THE SITUATION.

Sir Wilfrid Laurier and Sir Louis Davies have gone to Washington, in connection with the sealing question, though neither of them, it is understood, will attend the Sealing Conference between England and the United States, that duty being confided to experts, one of whom, Mr. Macoun, will represent Canada. Despatches from Washington to the American press, previous to the arrival of the Canadian Ministers, represent that the visit is expected to have an important bearing, not only on the sealing question, but on all pending questions, which have been sources of international complications between the United States and Canada." This is in accord with what Sir Wilfrid Laurier has more than once publicly stated, and may be taken as substantially correct. It is eminently desirable that the slate should be cleared as soon as possible, though the collection of information, on the ground, may not have reached the stage when the Alaskan frontier can be adjusted to the terms of the existing treaty. There is a somewhat formidable array of questions, in which the two countries are interested, awaiting adjustment, on some of which a settlement is imperative, while on others it is a matter of choice. But long as the list is, it is short compared with the number of questions, which at some previous times have been in dispute. For instance, there were no less than eighteen distinct matters forming a subject of negotiation eighty years ago. Some of the questions on which it is desirable, at present, to come to an understanding, are matters of policy, like the international labor question, others involve matters of right, like the adjustment of the Alaskan-Canada frontier and the sealer's indemnity. Looking at what diplomacy has done in the past, there is no reason to despair of the way being cleared now for wiping out all existing subjects of difference. But it is useless to conceal that there is one serious difficulty in the way: when the Governments agree upon a settlement, there is no guarantee that the United States Senate, when the treaty comes before it, may not render of no avail all that diplomacy has done.

Whether what may be called the published programme of the international discussion expected to take place informally, between the representatives of Canada and the United States, is of joint or only American origin, it contains most of the subjects on which adjustment is admitted to be advisable. Not only are the unsettled questions liable to give trouble; some that are regulated by international agreement are scarcely less so. Of these the bonding privilege is one, and of them, the most conspicuous. Before international bonding came into operation the privilege of transit over the soil of a neighboring country was treated in connection with the navigation of the St. Lawrence, and it would have saved a world of trouble if both had been settled on the same principle. If, when the United States obtained the privilege of navigating the St. Lawrence for ever, the bonding privilege had been likewise made permanent, it would have saved Canada from much disturbing intrigue, and her carrying interests from the periodical alarms which threats of withdrawal of the privilege are liable to produce. Jingoes do love to have the means of annoyance, and the extreme anti-Jingoes have shown that they are capable of producing substantially the same effect. On the bonding question, these two extremes met some years ago, and occasional proof is still seen that the alliance, though somewhat out of joint, is not yet wholly at an end. This bonding question ought to be settled permanently, once for all. This could be justified by the precedent of the St. Lawrence navigation. At first, the two privileges were conceded together; but the fatal mistake of putting the two concessions on a different footing was committed. If we are to hold the privilege under constant threats that it will be withdrawn, the question may arise whether it would not be for our ultimate benefit that it should be superseded by some other arrangement.

The use of alien labor, and the conditions on which it shall be employed, fall for regulation everywhere by the country to which the aliens go. In Europe, the privileges accorded to aliens partake of almost every possible shade; though, in dealing with the restrictions to which aliens are subjected, the rule of retaliation has become predominant. At the same time, the tendency of modern civilization there is to lessen the restrictions on aliens. Canada has been forced, much against her will, practically to adopt toward the United States, on the labor question, the European law of retaliation. Just at this point, a new factor in the complication came into existence, in the form of the interests which Americans have in British Columbia and the Klondike mines; the consequence is that the offensive and irritating deportation of Canadian laborers at Buffalo and Detroit have, for the time, ceased. But the cessation ought to have some better guarantee for its continuance than caprice. Things have now reached a stage in which the Americans have a stronger motive than we have for regulating, on a basis of mutual interest, the question of alien labor.

Rights of fishery, both on the Atlantic coast and in the lakes, have in the past caused some friction. In regard to the lakes, measures have been in progress for some time, looking to a settlement, which may be mutually advantageous. What is wanted here is preservation of fish from wastefully destructive processes. Here the difficulties are almost as good as overcome. On the Atlantic coast, the Americans are admitted to our shore fisheries on conditions, which require renewal every year, and which are, at the end of any year, liable to be terminated. This element of uncertainty is capable of removal, if equivalents can be agreed upon.

In its present stage, the sealing question, taken alone, is scarcely a subject for negotiation. What is now to be given is the evidence of experts to establish the facts, on which it seems there is a difference of statement between the representatives of Canada and the United States. When the facts have been proved, the mists that now represent an alleged danger of the destruction of the seal herds, will be less dense. It is quite possible that some of the contentious matter may survive in the form of a difference as to the number of female seals killed and of those that survive. If the danger of the destruction of the herds has been exaggerated, or is in fact non-existent, sealing at sea will be found not to be responsible for the mischief which it suits Americans to charge against it. We read in the American press of a scheme for buying out the rights of the Canadian sealers; no such statements are made on this side, and we cannot believe that any one here suggested it. In any case, it is difficult to see how Canadians of this generation could sell the common sea rights of future generations.

It looks as if the Canadian envoys to Washington would proceed, in their negotiation with the American Government, in a wholly informal way. So much uncertainty exists as to the disposition of Americans to make or receive overtures for a settlement of existing difficulties, that this is, perhaps, a wise precaution. Among the subjects to be talked over, Commercial Reciprocity would naturally find a place. The State Department, at Washington, is alleged to have intimated, during the last week, that it is prepared to discuss this question with Canada. Considering the past treatment of reciprocity by the Washington authorities, it would be necessary that the resumption of any negotiations should come from them. Commercial Union is a dream which no one now regards as realizable in actual life, whatever spell it may have cast over some minds in the past. Once it was a bar to a form of reciprocity which was, and may still be capable of being realized. On this subject, the past forbids Canada to be sanguine, though we need not despair of something being done.

According to the statements made, on what appears to be reliable authority, the Canadian delegates to Washington do not intend to offer a reciprocity more extensive, or on any other foundation, than is contained in the preferential trade legislation of last session. The offer there held out is general, and any nation can, by accepting the condition on which it is based, share the preference. The principles of the British tariff brought Great Britain within the circle of the preference. The tariffs of some other countries were found, on examination, to entitle these countries to the same privilege. The form of reciprocity offered by Canada does not differ essentially from that offered to all the world by the United States. This fact should make it all the more easy to arrive at a favorable conclusion. The offers made by the two countries have to be adjusted, so as to bring them to the equivalent of a common term, and the thing will be done, if done at all. So much for the general principle. Beyond this, it is conceivable that proposals may be made, on one side or the other, for the admission, duty free, of specific articles, the produce of either country. In this case it will be necessary to deal strictly on the principle of equivalents. If the list of articles proposed to be so dealt with were long, it would be necessary to guard against exclusive preference; but if it were confined to a few articles, and those not such as England is specially interested in, it would not much matter what form the preference took. Any adverse discrimination that would touch England in a vital spot, will, of course, not be thought of: on this point the honor of the Government and of Canada is, by the most solemn pledges, made through the organ of its Prime Minister, sacredly engaged.

INSOLVENCY LEGISLATION.

There are signs of restiveness among the merchants and manufacturers of Canada at the unsatisfactory state of the various laws of different Provinces with respect to the handling of the estates of bankrupt debtors. And the commercial sentiment in favor of a general insolvency law for the Dominion is growing stronger day by day. Nor can it be wondered at. Suppose a man, say in Quebec or Ontario, who has credited a trader in Nova Scotia for $1,000 worth of goods, and finds that trader making an assignment to some Bluenose friend, and giving preferences to local creditors, which reduce the dividend to outside creditors to thirty or forty cents in the dollar. And they may have to sign a discharge to get even that dividend. In Ontario itself, the state of things is unsatisfactory. Let alone the fact that a creditor may make a private arrangement with a debtor that will virtually shut out the claims of everybody else, it is also the case that a man may lay a plan to swindle a creditor, and the creditor may know it, but is unable to help himself by either criminal or civil proceedings. Naturally, a wholesale dealer so treated wants to see some law passed that will guarantee him equality in ranking with other creditors in such a case. And there are numbers of merchants and manufacturers smarting under this kind of inequality. Not only is this the case here, European merchants have the same fault to find. And not only have British journals had much to say about the injustice of these conflicting laws of different Canadian Provinces, but meetings of merchants and trade guilds in the Old Country have remonstrated in high places about them.

It is not to be denied, however, that there are great difficulties in framing a satisfactory insolvency measure. Nor can we forget that the Act which was abrogated with opprobium in 1880, which had been carefully drawn and once, if not twice, amended, was far from giving satisfaction in its working. And the various efforts made since, in the Curran bill, introduced in 1883 and again in 1892, the measure prepared by Mr. Edgar for the relief of insolvent debtors brought in in 1886, and the carefully prepared bill of Sir Mackenzie Bowell two years ago, have all failed to secure parliamentary approval. But the pressure for an insolvency law is increasing and will demand a response.

PRESERVE THE WOODLANDS.

The woodlands of Ontario have been sadly depleted. In the counties of Wentworth Dufferin and Huron the proportion of woodland to the total area is but ten per cent.; in Prince Edward and Lambton it is nine per cent.; in Wellington and Brant, eight per cent.; Peel and York, seven per cent., and in Victoria only five per cent. These figures are not the estimates of a careless or merely local investigator, but are based upon the returns made to the Ontario Government. The latest returns show that, taking the province as a whole, less than twenty-five per cent. of the total area is under timber. This average is low enough, lower indeed than is easily credible, but becomes more unsatisfactory when we take into account that in it is included vast tracts of wooded land in Northern Ontario, which are not now used for agricultural purposes. This devastation of our forests has been attended by many serious consequences.

An important function of wooded land has always been to hold the rainwater and distribute it according to the season's requirements. The spongy masses of leaves and wood which cover the soil in the forests, absorb the water as it descends from the clouds in the form of rain or snow, to impart it gradually in small streams, or by the process of evaporation. When the forests are removed, destroying this natural reservoir during the spring months, the season's supply of water is dissipated in floods and freshets. The overflow of the streams and rivers often causes serious damage, it is true, but is the source of less damage than the droughts which follow later in the summer as an inevitable consequence. In other ways the value of a fair proportion of forest to agricultural land might be shown, but enough has been said to emphasize the importance of efforts by Government and people to conserve our forest wealth.

In this connection, we observe with interest the decision reached last month by the Government at Ottawa, to change the policy regarding the timber regulations applicable to the Northwest and Manitoba. It is now announced to be the aim to maintain permanent timber reserves. With this object in view, the heavy timber belts will be withdrawn from settlement, to preserve the young growing trees and to foster a growth to provide for the future. In pursuance of this policy, guardians will be appointed to protect the reserves, particularly at Moose and Turtle Mountains, from fire, and to prevent the cutting of the young trees by the settlers. Another step in contemplation is the devoting of labor and money towards the laying out of a proper fire guard, a sum having been voted last session for this purpose. On the tops of the above mentioned reserves are numerous lakelets. These are to be connected with wide roads, which, when completed, will form a complete barrier to the progress of a fire. The theory is that the open space and the lakes should effectually prevent any further ravages and act as a reliable fire break. Such movements as these in needed directions are very satisfactory. We trust to see the best results from them.

HALIFAX AND ST. JOHN.

A contract has been entered into between the Government and the Beaver Line of Atlantic steamers, under which there will be a weekly service between Liverpool and Halifax and St. John. The principal business of the line is freights, which St. John is expected to take, and for which the old subsidy of $20,000 is continued, while $500 additional per trip, is given for carrying mails to Halifax. This arrangement was foreshadowed some time ago. The city of St. John has raised a vigorous criticism of the details of the arrangement, the great objection being, that the steamers are to call at Halifax. The necessity for taking the shortest route for the mails is ignored or denied.

According to some the objection of St. John is not so much about the mail, as that the freight trade having been built up by St. John, Halifax is to be allowed to share it. The case is one of those rivalries of commerce in which neither rival has much consideration for the other. St. John deserves credit for having spent a large sum of money on her harbor, while others have been largely built up with public money; but St. John now has a virtual promise of a substantial Government grant for this purpose. If the Government tried to please both Halifax and St. John, it has not succeeded in the impossible task, and has apparently pleased neither. The present indignation expressed at St. John shows the danger of importing politics into questions of this kind. There is reason to hope that the arrangement now made will turn out better for St. John than the fears of many foretell. Those who say that it would be better for St. John if the arrangement under which freight line went to Portland had been continued, cannot be taken seriously. Many criticisms made in haste will be soon forgotten, and the reality is likely to be better than the gloomy prospect of despondency paints it in the dim light of the distant future.

OUR EXPERIMENTAL FARMS.

A tribute is paid by Prince Kropotkin to the Canadian Experimental Farms, which, or some of which, he visited when attending the Toronto meeting of the British Association this year. In the November issue of the *Nineteenth Century*, in one of a series of articles on "Recent Science,' the Prince speaks of the scientific, no less than the practical, value of the Experiment Farms of this country. The sites for them were not chosen without care and a definite purpose, but, as he points out, each is surrounded by a large area of territory in which typical conditions of soil and climate prevail. He adds, that "while in Europe the work of the experimental farms too often remains little known to those who toil on the soil, in Canada, as in the United States, a whole machinery has been worked out for diffusing the knowledge that has been won from scientific research, down to the remotest village." This last is not a small or unimportant portion of the work of the Canadian Government in connection with these farms. And his perception of its value is significant of the Prince's closeness of observation.

BANK CLERKS AND OTHER CLERKS.

We have received an unusual number of communications on the subject of our article of October 22nd, entitled "Bank Clerks and Other Clerks." And in the main, they approve the views therein expressed as to the maintenance of a standard of morals and habits on the part of young men of the present day. For example, a banker in Brantford wrote on October 23rd: "I read with a good deal of interest and approval, your item on 'Bank Clerks and Other Clerks.' Think it should be framed and hung up in every monetary institution in the country." And a Montreal business man expresses the opinion that "while your editorial remarks appear to be addressed mainly to bank clerks or bank authorities, and are probably appropriate enough to those institutions, I should like to see them applied more widely, for I recognize that there is much room for improvement in the modern habits of young men of business. I can see this, not only in our warehouses, but in our insurance staffs and other offices. Too many youngsters are forming costly habits—costly in more ways than one."

A Toronto communication takes the ground that bank clerks should be better paid, while a Napanee writer essays, with much feeling, but poor success, to defend the gushings and rejoicings to which our previous article took exception. Passing over some letters from Quebec, Winnipeg, etc., on the general subject, some blaming the "enthusiasm of generous youth" for its extravagance, some defending that extravagance as being "at any rate better than close-fisted miserly meanness in a youngster," we quote a portion of the letter of a former bank employee, who dates from Ottawa :—

> "There is, I make bold to say, Mr. Editor, hardly a bank agency in the country in which the clerks, and often the manager, too, if he is

not married, do not make the bank premises their headquarters in the evenings. They use it just as they would use a club, and they play cards, and smoke and amuse themselves with freedom. I know some managers who take part with their clerks in amusements and games of this kind, and they do it with a good object. And this is how they justify it. They say it is better for young fellows to stay around the bank office at nights and amuse themselves in this way than to go to a billiard room or a village drinking place, and so they would rather stay with them. For you know young fellows will have amusement of some kind. Maybe you will say this is loose discipline, but there might be worse things than this, because if a young man stays in the bank at night, he is kept out of worse places."

To show how thoughtful men in the smaller places think of such things from an ethical standpoint, we quote from a subscriber in Grey County, Mr. J. E. Murphy, of Hepworth, who on October 27th, writes: "While The Monetary Times is invariably interesting and newsy, the last issue was more so, to me, than usual. Your article on 'Bank Clerks and Other Clerks' was well chosen, and should have great influence in counteracting wrong notions, and the unseemly display of gushing interest in such trials as the one at Napanee." One of the worst notions, and possibly the most insidious, is that for a variety of reasons, it is necessary for a young man to keep up a certain style of dress, to belong to certain associations, and to conform to certain customs. Nothing is "necessary" that is immoral; and to live beyond your income, spending money on fads, is neither moral nor gentlemanlike.

SOME BUSINESS CONSIDERATIONS.

The letter of "Traveller" in last week's issue, entitled "Who Suffer by Fires?" brings up the subject of the conflagration hazard, instancing Windsor, N.S., and the Ontario forest fires. It also brings forward a consideration of especial interest to bankers, namely, the extent to which insurance carried by traders is to be thought of as an element in credits given them. This matter has been discussed by boards of trade and commercial bodies in Canada, notably by Toronto business men a few years ago, when a scheme was outlined whereby the mercantile agencies of the country should take steps to ascertain each merchant's fire insurance. But nothing came of it. Probably, however, the circumstance mentioned by "Traveller," namely, a possible loss sustained by several banks as a result of the Windsor conflagration, for want of sufficient insurance on the part of a number of persons or firms whose notes they had discounted, will have some effect in re-opening a question which has a very clear bearing on the extent of credit that may be safely granted to a merchant. What our correspondent says is very true, that in these days of complicated business relations, it behooves banks, insurance companies, wholesale merchants, in fact, everybody interested in business affairs, to see that those who get credit carry sufficient insurance. It is equally a duty to see that adequate means are adopted to prevent conflagrations.

A LOAN COMPANY LIQUIDATES.

The directors of the Farmers Loan and Savings Company have recommended to the shareholders that the company go into voluntary liquidation. Accordingly, an approximate statement of the company's affairs has been made public, and a full statement will presently be submitted to the shareholders.

The reasons given for this step are the continued depression in real property in Toronto and its suburbs, where a large share, probably the larger share, of the company's loans have been made, and the reduction of the margin of profit in the mortgage loaning business. The former is, perhaps, the reason which has most influenced the present decision, but the latter is not without weight. Of late years, private capital and the money of insurance companies and trust companies has come into competition with the loan societies in Canada in loaning on mortgage and has narrowed the field. Hence, and by reason of "boom" losses, the reduction of their dividends of late and the suggestion heard here and there for the amalgama- of too numerous companies, which are not likely to earn in the future any such dividends as they paid in earlier years.

We have every reason to believe that the company's liabilities to bondholders and depositors will be paid in full, as those of Canadian loan companies have always been. Its largest stockholders for the last quarter century have been wealthy and respectable individuals and estates, and whatever loss may be entailed by realizing the company's assets will fall upon the holders of shares. Liabilities to the public are something over $1,300,000, of which total deposits form about $250,000; Canadian debentures $200,000, and sterling debentures, nearly $900,000.

—It is not so often Canada is honored by the attention of British consuls abroad that she can afford to disregard a trade hint when it comes from that quarter. It appears that the Canadian Department of Trade and Commerce received on Saturday last from the British Secretary of State, a report of the consul at Barcelona, Mr. W. Wyndham, drawing special attention to Spain as a market for Canadian lumber. He describes the depletion of the Spanish forests and tells us that Spain is now deriving her lumber supply from Russia, from the Baltic, and from Norway and Sweden. This year the first cargo of Canadian lumber was imported. It went forward from Quebec, 680 standards for Barcelona and 175 for Valencia, all of which sold at good remunerative prices. The information should be of service, but the business of forwarding more timber should not be gone about hastily. Mr. Tripp, Canadian commercial agent on the Island of Trinidad, in the West Indies, draws attention to the great agricultural show to be held in the port of Spain from Feb. 8 to 12 next, as a good opportunity for showing Canadian products.

BEET ROOT SUGAR POSSIBILITIES.

The cultivation of beets on a large scale and the establishment of refineries to produce sugar from these vegetables has been the subject of different experiments in Canada. The attempts to build up this industry in the Dominion have been confined mainly to the provinces of Quebec and Ontario. But although considerable money has been expended in different ventures, only a nominal quantity of sugar has been produced. It is now proposed to exploit the farm lands of Manitoba, especially in the vicinity of Winnipeg, as a possible centre of sugar beet cultivation.

In the event of the beet sugar production obtaining a foothold in Canada a number of interesting problems suggest themselves. Under the present tariff arrangement the tax collected on sugar imports forms a by no means insignificant part of the revenue. In 1896 the duty collected on sugar entering the Dominion amounted to $1,139,042. The growth of domestic sugar production must decrease this amount, and should the Canadian markets be captured by the domestic producers, must wipe it out entirely. Mr. E. F. Atkins in a recent contribution to the *Forum*, pointed out that the countries of Continental Europe have been fostering the beet sugar industry, with the result of producing 2,300,000 tons more than their own consumption. Their Governments are levying taxes upon their people to obtain means to pay export bounties to the sugar manufacturers, and are actually making sugar expensive at home in order to supply it to foreigners at less than cost, and regard this as the height of economic wisdom. The world's stock of sugar August 1st, 1894, was a little over a billion tons; three years later, in spite of the ravages of war for two years in Cuba, the stock of sugar was not much less than nineteen hundred thousand tons. Though Cuba's crop fell short 800,000 tons last year, the total production increased 582,000 tons.

So long as the sugar market is maintained in this false and artificial position by the jealousy of Germany, France and other European producing countries, it would seem that the industry can be made profitable to Canadian farmers only by means of Government assistance. When the bonuses are withdrawn, the industry could live only by means of a highly protective tariff.

ORE SMELTING AT NELSON, B.C.

From time to time there have been in British Columbia newspapers references to the smelter of the Hall Mines, Limited, at Nelson. And of late, notices of its performances in turning out some 300 tons with only a 200-ton plant. We are fortunate in procuring from the present superintendent of the smelter, Mr. R. R. Hedley, who has gained some knowledge of its capabilities, a description of this plant; under date November 5th, Mr. Hedley says:

"The blast furnace being under repairs when I took charge on the 2nd of September, we blew in on the 4th, and have worked to date sixty days. During this time, we have smelted 14,676 tons of charge, of which 1,587 tons was barren flux, chiefly limestone. This shows an average of 244.9 tons smelted daily. Under favorable circumstances, it is possible to smelt 300 tons per day, as proven by the last twenty-four hours, ending this day at 6 a.m., the actual tonnage passed through the furnace being 273.9 tons ore and 30.1 tons limestone, and again on the 30th of October, 277.2 tons of ore from the Silver King mine, and 30.8 tons limestone. The average tonnage for the last seven days is 282.5 of charge.

"In addition to this, note may be taken of the fact that 200 pounds of slag is added to every ton of charge. The percentage of coke used varies between 14½ and 16, according to the quality of coke, and amount of sulphur in the charge. Matte produced during the above period of sixty days was 1,029 tons, averaging about 49 per cent. copper, wet assay. Concentration is about 14.25 parts of charge into one of matte, but we have run successfully with a concentration of over 20 to 1. A great point in favor of this furnace is that it will handle a very large proportion of fine ore.

"The character of this ore is chalcopyrite, bornite, tetrahedrite, and kindred minerals in variable gangue, which gives an average composition of silica 33 per cent., ferrous oxide 9.5 per cent., manganese oxide 8 per cent., lime 7.5 per cent., magnesia 4 per cent., alumina 15 per cent., copper 4 per cent., sulphur 3.2 per cent. Limestone, the only flux generally used, carries about 10 per cent. silica, and resultant slag has a composition of silica 43 per cent., lime 15 per cent., ferrous oxide 12 per cent., manganese oxide 9 per cent., alumina 18 per cent. Slags have averaged for two months 0.345 per cent. Cu. and 1.15 ozs. Ag. per ton.

"This furnace was designed and erected by Mr. Paul Johnson, late superintendent. Its dimensions are: area at tuyeres 144 by 44 inches, at top of jackets, which are 5 feet 6 inches high, 144 by 64 inches, and at feed floor 160 by 72 inches. Total height of column is 12 feet 6 inches, but charge is generally maintained four feet lower, varying, however, with conditions of charge, etc. Tuyeres, eight in number on each side, and reduced from 6 to 4¾ inches. Centre of tuyere is 24 inches above bottom as originally constructed. The bottom is supported by a cast iron plate resting on six jack screws carried by a truck, and consists in a coil of 2-inch water pipe bedded in steep, and a course of fire brick on end. On this the furnace makes its own bottom, probably now about four inches higher.

"Provision is made for tapping on the side, but end tap only is used. Flow is practically continuous, separation being made in a large conical pot of special manufacture. A second settler is used of similar form, but smaller, and thence slag flows into a powerful stream of water."

MINING INFORMATION.

After months of patient labor, and the expenditure of thousands of dollars, says the Rossland *Miner*, J. B. Hastings, the manager of the Crown Point, has established the true course of the mine's famous lead, and has solved the mystery of the no less famous porphyry dike. Operations have now been commenced in opening up the vein itself, and the Crown Point is in a fine way to become one of the great mines of the camp.

On Saturday last the Inspector of Mines for the District of Michipicoten, Mr. Boyd, gave an interview to a Toronto paper about that part of Ontario. He says that on two or three properties work will go on all winter. The Great Northern Mining Company will keep eight men employed on the Lawlor and Lauzon claims during the cold weather. Their instructions are to sink sixty feet, and then cross-cut and drift. Mr. Thomas Johnstone will also do a little work on his property, which adjoins the Lauzon land. Lord Douglas of Howick and Henry Dreany have left three men behind, while Joshua Legge, of Gananoque will prospect his claim until the snow interferes with surface work.

A paragraph of date October 30th from Nelson says that work on the new reverberatory and calcining furnaces at the Hall Mines smelter is being pushed, and they will be ready by Christmas. The large blast furnace made a run last week which broke the record, turning out 20 tons of matte in 24 hours. The management is getting in some lead ores from the Slocan to make a trial on the old 130-ton furnace, which has been converted into a lead furnace.

In a jubilant item on the subject of Rossland camp, the *Miner* announces a steady increase in output of ore. Thus: "Seven mines made shipments last week, viz.: The Le Roi, War Eagle, Iron Mask, Centre Star, Cliff, Velvet and Little Joe. Then the following mines, the Columbia and Kootenay, Lily May, Poorman, Josie, Evening Star and Iron Colt, are in a position to follow suit, as they have a large tonnage of shipping ore ready to stope. The Monte Cristo, Colonna, Sunset No. 2 and Jumbo will be ready to make consignments to the smelters in a short time." Then as to the rosy future: "The development of such fine properties as the Deer Park, Great Western, Monita, St. Elmo, West Le Roi-Josie, Coxey, Good Friday, Nickel Plate, Crown Point, Homestake consolidated, Mayflower, Commander, Abe Lincoln, and a dozen others, may bring them into the list of steady shippers at any time."

Visiting Rossland, B.C., the other day, the superintendent of the C.P.R. telegraph told the Rossland people something of his plans: "As soon as the Slocan City extension of the railway is completed Rossland will have two separate telegraphic connections with the north," said Mr. Hosmer. "In addition to the present line, reaching from Revelstoke down Arrow Lake to Nakusp, then overland to Kaslo, down Kootenay Lake to Nelson, and then to Rossland via Robson, we shall soon have a wire extending from Robson up Slocan Lake to New Denver, where it will join the main wire to Revelstoke, and from Robson to Rossland we shall have communication via the Columbia and Western wires. This connection will be increased by October of next year by the new line of telegraph wires that will extend from McLeod, N.W.T., to Rossland, via the Crow's Nest Pass."

The first brick from the Hammond Reef mine, Sawbill district, near Fort William, was sent east on Nov. 5th. Its weight is about five pounds, from 259 tons of ore, and a run of 304 hours. Preparations are being made to enlarge the stamp mill.

At the Bureau of Mines information has been received this week of a rich find of oil near Florence, seven miles north of Bothwell, Ont. Seven wells already sunk are said to produce from 40 to 100 barrels a day.

What strikes one first in the opening section of the Ontario Bureau of Mines report is the formidable list of companies, twenty-two in number, and with an aggregate nominal capital of $12,775,000, formed during the year, according to the official Gazette, to carry on prospecting, developing, and mining in the province. Sixteen of these companies, it appears, have been organized to operate in the gold fields; one to get lithographic stone in the Temiscaming country; one the Algoma Coal Mining Company. Then there are besides these several companies formed under the Imperial Joint Stock Act, which have spent money in opening mines and putting up works to treat ore.

From the Belleville *Intelligencer* of Monday last we learn that Mr. Swinney, manager of the Deloro gold mines in Hastings county, Ontario, has publicly stated that his company have spent $500,000 in buying mineral lands, and are putting in a new plant which will increase their output of gold to $5,000 or $6,000 per day. The mispickel they get yields $12 per ton, or 85 per cent. of its riches. The same concern is behind the Carscallen mine, in Belmont.

HUDSON'S BAY EXPLORATION.

In the month of June last a Government expedition, per steamer "Diana," left Halifax to explore Hudson's Bay. In that month the vessel found plenty of ice in the bay, but after 15th July was not inconvenienced in this respect, but was able freely to navigate the Strait and the Bay. There were a number of Scotch whalers found on an island near Baffin's Land. The "Diana" has returned to Nova Scotia. Commander Wakeham states that the present charts of Hudson's Bay and Hudson's Straits are most unreliable. All of them show islands which do not exist, whereas islands which do exist are not mentioned. Tides are very heavy in the Bay, the navigable season is short, and the summer days very long. As to the question whether the route is feasible for Atlantic steamers running in connection with a proposed railway from Winnipeg to Churchill, to carry Manitoba grain, which is supposed to have been one of the objects of the "Diana's" trip, no authentic information is yet given.

OCTOBER FIRE LOSSES.

The fire loss in the United States and Canada during the month of October amounted to $11,387,500, as compared with $8,993,000 in October, 1896. The companies were hard hit last month. Still, although this shows a marked increase in loss for the month, the total for the past ten months, $91,801,200, is considerably less than that of the same period the previous year. The following is a statement of the losses by months during the past three years, as compiled by the *N. Y. Journal and Bulletin of Commerce*:—

	1895.	1896.	1897.
January	$11,895,600	$11,040,000	$12,049,700
February	12,360,200	9,730,100	8,676,750
March	14,239,300	14,839,600	10,502,950
April	11,018,150	12,010,600	10,833,000
May	7,761,350	10,618,000	10,193,600
June	9,223,000	5,721,250	5,084,450
July	9,085,000	9,033,250	6,626,300
August	9,929,000	8,895,250	6,454,950
September	10,766,300	8,200,650	9,392,000
October	13,411.500	8,993,000	11,387,500
Totals	$109,689,400	$99,081,700	$91,801,200

Among the most serious conflagrations of the month were the forest fires in the Ottawa Valley, and the destructive burning of the town of Windsor, N.S. There were 184 fires of a destructiveness of not less than $10,000 each. They may be classified as follows:

$10,000 to $20,000	81
20,000 to 30,000	33
30,000 to 50,000	24
50,000 to 75,000	15
75,000 to 100,000	7
100,000 to 200,000	13
200,000 to 1,250,000	11
Total	184

It will be seen, comments the *Journal and Bulletin*, that 1897 so far is still showing a much lighter loss than for the same period in either 1896 or 1895, and underwriters are quite satisfied, for the combination of high rates and light losses gives the deserving and undeserving both liberal profits. However, this condition of affairs seems to be about to change. The influx of new companies means lively competition in the future and troubles in rating organizations at various points. The year 1898 will prove interesting to those who can observe the fire insurance situation understandingly.

SPONTANEOUS COMBUSTION.

Many of us recollect, when we are reminded of it, that certain substances when left together, or when neglected long enough, will burn of themselves. But we forget, or our perceptions are dulled to dangers that we should recognize if we would but *think* of the meaning, as fire causes, of certain elements in certain conditions. A recent issue of the New York *Monitor* devotes a couple of columns to recent cases of spontaneous combustion, and we shall make a brief analysis of these, in order that our readers may be familiarized with possibly new causes of fire. Four cases are instanced of slack coal taking fire voluntarily. One on board a steamer, which was a total loss in consequence; one on an elevator. Oil sprinkled on sawdust sweepings in an Illinois drug store caused fire by spontaneous combustion, and in the same State grease and sawdust in a barrel of floor sweepings took fire in a meat market. A heap of rosewood sawdust in the coffin factory of J. & J. Stolbs took fire; and in Astoria, Ill., in pine sawdust which had been mixed with linseed oil for cleaning, in the dwelling of D. W. Hettrick, combustion took place in forty-eight hours.

Next, as to hay, the instances are numerous of heat generated in masses of new hay bursting out into flame. Seven or eight cases of the kind are cited in as many States. "Barn burned from the heating of uncured hay," in Connecticut; "hay and wheat just stored in a barn in Indiana took fire and burned." Greasy or oily rags and waste are commonly known to be substances favorable to spontaneous combustion, whether, as in cases cited, they are left by plumbers in a city club, or left neglected by somebody in a Government printing office. But we notice, in particular, one fire caused by shoddy in sacks at a Rensselaer woolen mill, and another arising "in a woolen cloth saturated with varnish, wrapped in another cloth and left in the closet of an Indiana dwelling."

Miscellaneous burnings by spontaneous combustion are further instanced as under: Through an accumulation of dust and carpet lint about the steampipes in a Michigan residence. From paper, cotton, wool and other waste in the storeroom of Newlin & Peterson's drug store at Geneseo, Illinois; waste was heated by the sun through a rear window. In cotton seed oil, stored in a New York warehouse. Further, we hear of fire of this sort in a Washington junk store, not an unlikely place, followed by the description of spontaneous combustion in garbage, in the plant of Philadelphia Product Co., and also in the drying-house of a starch works at Glen Cove. Here are instances enough to cause firemen, fire agents and inspectors, constables, policemen, or any public officer or public-spirited citizen, to keep his eyes open to the fire risk of neglected rubbish of any and all kinds, and to educate those ignorant of such things to recognize the elements of a spontaneous fire and to keep the elements apart.

TORONTO TRADE FIGURES.

In both exports and imports the foreign trade of Toronto for October showed an increase over the same month of 1896. The value of exports last month was $558,308, and of imports $1,796,156, in all $2,354,464, where the previous October showed exports of $485,233, and imports $1,477,100, in all, $1,962,233. Dutiable goods, as well as free goods, were imported last month to a larger extent. The main dutiable articles showing increase were books, pamphlets, and paper goods, leather, oils and paints, jewelry, fruit, earthenware and soft coal, whereas spirits and wines, glass and glassware, drugs and medicines, exhibit a decrease.

Among raw materials for manufactures, entered free, there was an increase in raw cotton, wool, metals, india rubber, jute yarn and cloth, but, on the other hand, a decrease in foreign woods, broom corn, raw furs, hides and skins. The principal items of import were as shown in the annexed comparative table. The figures are taken from the Board of Trade bulletin:—

DUTIABLE IMPORTS.

	Oct., 1897.	Oct., 1896.
Cotton, manufactures of	$65,397	$57,438
Fancy goods, laces, etc.	47,459	36,159
Hats and bonnets	22,407	12,578
Silk, and manufactures of	74,236	47,956
Woolen manufactures	139,994	114,604
Total dry goods	$349,493	$268,735
Brass and manufactures of	$ 4,883	$ 4,646
Copper "	455	874
Iron and steel "	121,017	89,912
Lead "	4,782	6,200
Metals composition	14,378	10,888
Total metals	$145,515	$112,520
Books and pamphlets	$44,976	$38,870
Bicycles	4,446	5,168
Coal, bituminous	27,912	20,677
" anthracite (free)	164,682	150,584
Drugs and medicines	21,095	22,110
Earthen, stone and chinaware	25,316	24,758
Fruit, all kinds, and nuts	46,657	33,197
Glass and glassware	19,559	33,144
Jewelry and watches	31,455	29,468
Leather and manufactures of	39,258	23,710
Musical instruments	12,026	8,554
Oils, paints, colors	32,399	27,689
Paper and manufactures of	31,934	29,409
Spirits and wines	8,560	14,810
Wood and manufactures of	10,360	9,960

A noticeable feature of the exports is the larger quantity of manufactured goods which were sent abroad: wood goods, shoes and leather, agricultural implements. Another large increase is in the item of meats, while forest products dwindled to the inconsiderable sum of $7,634.

EXPORTS, PRODUCE OF CANADA.

Produce of	Oct., 1897.	Oct., 1896.
The Mine	$	$ 40
" Fisheries	57	12
" Forest	7,387	65,132
" Field	53,584	84,385
Animals, etc.	309,005	269,415
Manufactures	125,945	56,351
Total	$495,978	$475,335

CANADIANS SHARE IN ELECTRIC RAILWAY BUILDING.

There are 14,000 miles of electric railway track in the United States. Ten years ago there were 86 miles of railway track operated by electricity. This is a most remarkable development of electric railway construction in a single decade. As the *Railway Age* points out: "In 1888 the horse-car tracks represented over 91 per cent. of the total, and the electric railway tracks a little over 1 per cent. At the commencement of this year the horse-car tracks were a little more than 6½ per cent. of the total, while electric railway tracks represented more than 89 per cent., and were still growing. It is important to note, however, that in these ten years of electrical development very little progress has been made in the direction of substituting electric motors for steam locomotives, excepting upon elevated roads." Canadian competition with the United States in foreign countries is usually considered as limited to trade in natural products. But in a number of industries the capitalists of this country have shown that they are able to successfully undertake more complicated ventures. In competition with American firms, Canadians, it will be remembered, were awarded the contract of constructing and operating an electric railway line in Manchester, England. Several weeks ago a charter from the Jamaica Government to build electric tramways on the island, was granted to a group of capitalists, including the following: Mr. James Ross, Montreal; Mr. William McKenzie, Toronto; Mr. W. B. Ross, Q.C., Halifax; Mr. R. C. Brown, Halifax; Mr. B. F. Pearson, Halifax; Mr. R. D. McGibbon, Q.C., Montreal; Mr. Granville C. Cunningham, Mr. W. B. Chapman, Montreal: Mr. H. M. Whitney, Boston, Mass., and Mr. F. S. Pearson, New York. The capital required to build this line, it is understood, exceeds $500,000, and it is much to the credit of Canadians that they have secured this franchise.

ST. JOHN ALARMED.

What is to be done now? St. John is up in arms again over the winter port transatlantic business. Word came last Saturday or Sunday, that the service had been settled—the mails and passengers per incoming ships were to be landed at Halifax, and the ships were to go on to St John with the freight. Outward bound they would sail from St. John and call at Halifax for passengers and mails. Presumably, the Government deemed it had made an arrangement that would end the clamorous claims of both seaports, and thus all parties would be pleased. Word from St. John, on Monday, lets us know, however, that she is far from pleased. On the contrary, she is insulted, "has received a slap in the face," etc., because, after spending money with a free hand, and providing deep water wharf facilities on a scale not dreamed of ten years ago, "the order that the Beaver line steamers must call at Halifax, both ways, to land and receive mails, means delays that will handicap St. John to death in its competition against Portland, Me., for Canada's winter trade.

PROGRESS AROUND THREE RIVERS.

What with activity in ordinary lumbering, the production of wood for pulp making, the manufacture of paper, and the increased output from the Radnor iron forges, the district around Three Rivers, Que., is busy and the city itself is going ahead. The activity in the lumber trade had been marked along that portion of the north shore of the St. Lawrence, and the increased development in the St. Maurice has helped the city. The extensive pulp industry at Grand Mere, with the large mill under construction at the same place for making the finer qualities of paper, is affecting the whole district, since it is known that 1,400 hands, nearly 1,000 of them heads of families, are here employed constantly. The great hive of industry which has been built up 20 miles above Three Rivers on the St. Maurice is fast assuming large proportions of a city. The town site is being levelled off, and the company erecting 100 dwellings this season for their men.

The product of these establishments are either brought to Three Rivers by the Piles branch of the Canadian Pacific or forwarded to Quebec by the Laurentides and Lake St. John railways, and the export trade to Great Britain will grow. Another important industry growing up is the Three Rivers Iron Works, owned by Mr. Alphonse Charlebois, and a great deal of the machinery for these up-river mills is turned out there. Mr. Curtis of the Hull mills, has an electrical scheme in view, comprising the tramway up the St. Maurice, and the supplying of Three Rivers with light. Three Rivers may become a great centre for agricultural displays, it being half way between Montreal and Quebec. Meantime $12,000 has already been spent on macadamizing the streets, and $20,000 is proposed to be raised on debenture for continuing this needed work.

RICHELIEU AND ONTARIO NAVIGATION COMPANY.

It seems to have been recognized by some of her citizens that it will be a good thing for Toronto to have the passenger water route of the Richelieu and Ontario Navigation Company, already so attractive by nature, made additionally attractive by means of what it has long needed—modern and swift steamers. As Toronto is already a centre of traffic by boat from across Lake Ontario, and one of the termini of the Richelieu and Ontario line to Montreal and the Lower St. Lawrence, whatever will increase the traffic of these steamers will benefit the city; not only as a port of call for American passengers, but as a place of summer residence for strangers. In this view it was either enlightened selfishness or loyal enterprise, or both, which impelled Toronto merchants and financial men to buy this week from 50 to 100 shares each of Richelieu and Ontario stock. Wm. Christie, Wm. Brock, George Bertram, A. D. Benjamin, J. W. Flavelle, W. D. Matthews, J. K. Osborne, Joseph Simpson, James Ross, are down for 100 shares each; John Hoskin and Timothy Eaton for 50 each, Sir Frank Smith, Senator Cox and Wm. McKenzie for amounts not stated. At a later date two or three of these western holders may find place on the directorate. This movement in the shares, the new steamers to be built, and the improvements contemplated, bode well for the future of Richelieu and Ontario as a prosperous corporation.

THE CHEESE MARKETS.

The season is about over. Reports from only seven boards were received during the week, and two of these adjourned until May, 1898. The stocks of cheese held in the country are large, as indicated by the boarding of 35,865 boxes at these meetings. Last week, at 14 boards, 70,688 boxes were offered. The market is very quiet. Buyers are not anxious to secure cheese at the reduced quotations. Only 3,610 boxes were reported sold at 7⅞ to 8c. per lb. We append our usual table:

Boards.	Date of meeting.	No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price. Cts.	Date of next meeting.
Brockville	Nov. 4	..	521	....	..	......
Barrie	" 4	..	2,717	405	7⅞	May, 1898
Brantford........	" 5	..	1,780	1,555	7⅞-8	Nov. 19
London	" 6	23	9,702	1,660	8	......
Iroquois	" 6	..	13,000	....	8	May, 1898
Ingersoll	" 9	..	1,985	....	8	......
Woodstock	" 10	14	6,161	....	7$\frac{15}{16}$-8¼	......

TRADE DEVELOPMENTS IN OTHER COUNTRIES.

A remarkable increase has taken place in the French trade movement. The customs returns show that the imports into France during the first nine months of the current year amounted in value to 2,897,955,000 francs, against 2,858,920,000 francs, being an increase over the corresponding period of 1896 of 39,035,000 francs. The exports in the same period amounted to 2,714,089,000 francs, against 2,501,662,000 francs, showing the goodly increase of 212,427,000 francs over 1896. The increase in the exports thus exceeds the increase in the imports by no less a sum than 173,392,000 francs. It is impossible at the present time to give satisfactory reasons for this marked expansion in French foreign trade. The commercial relations between France and Russia have been extended as a result of the recent political alliance, but it is scarcely possible that this explains the total gain.

The United States consul-general in London has reported to Washington upon the trade of the United Kingdom in 1896. It shows that the imports of that year were $125,596,730 more than those of 1895, and from the United States alone the excess was $98,992,430. The exports show a large increase, valued at $1,200,727,755—an excess of $70,000,000 over the previous year. The balance in favor of the United States last year was $370,000,000 greater than at any time in the last fifteen years, and probably at any time prior to that period. The articles imported from the United States specially mentioned are as follows: Oxen and bulls, $10,000,000; butter, $1,700,000; unwrought and partly wrought copper, $5,000,000; corn (wheat), $10,000,000; oats, $5,000,000; maise, $7,500; wheat meal, or flour, $7,000,000; raw cotton, $25,000,000; apples, $2,000,000; tires and axles, $5,000,000; slates, $435,000. In an article significantly headed "Our Best Customer"—and it might have been added "Our Best Abused Customer"—the Philadelphia *Record* points out that nearly one half of the whole export trade of the United States goes to Great Britain, and with the addition of the exports to British colonies the trade exceeds that of all other countries combined.

From a recent report prepared by the Secretary of the British Legation at Pekin, we learn that the value of the foreign trade of China rose from nearly 315,000,000 Haikwan taels in 1895 to 333,000,000 Haikwan taels, which is the largest total, expressed in silver value, that has yet been recorded in the returns of the Imperial Maritime Customs. Of the total foreign trade of China the amount taken by the British Empire was £32,271,000, and that by all the other foreign countries £17,846,000. Of the former, Great Britain took £2,209,000; Hong Kong, £24,235,000; India, £4,200,000; Singapore and the Straits, £830,000; Australia and New Zealand, £212,000; South Africa and Mauritius, £56,000; British America, £429,000. The share of China's foreign commerce secured by Canada is all too small, when we consider the transportation facilities between the two countries. Of the latter the United States of America took £3,842 000; the continent of Europe, Russia excepted, £4,585,000; Russia (Odessa by sea), £1,050,000; Russia and Siberia, via Kiakhta, £1,386,500; Japan, £4,795,000, and the remainder was distributed among the various countries of the East. The value of the re-exports from China to foreign countries is not deducted from these totals; still, when that is done, we have the satisfactory conclusion that the value of the share taken by the British Empire in the foreign trade of China has increased by 19,500,000 taels.

FOR GROCERS AND PROVISION DEALERS.

Mexican oranges were last week selling on the market at Chicago for $5.50 per box.

Under the auspices of the retail grocers and the associated charities of the city, a pure food show is to be held in the Caledonian Rink, Toronto, November 22nd to December 4th.

So great has been the demand for Scotch whiskey of late, that according to the *Pall Mall Gazette*, only the best houses have any matured spirits left. The Irish manufacturers, in consequence, are trying to revive the English taste for the old Irish whiskey.

Ottawa has made some proposals with the view of inducing the Messrs. Lever, the Port Sunlight makers of soap in England, to locate at the Dominion capital one of the branch soap factories which the Levers propose to establish in the United States and Canada.

Three English firms and their assistants have recently (at the instance of the British Bacon Curers' Association) been prosecuted and fined for selling American hams as British. A fine of from £5 to £10 and costs was imposed on the firms, while the assistants were fined 10s. and costs.

Our Montreal letter of yesterday remarks the firmness in tone characterizing all Mediterranean fruit this week. Currants at Patras, and Sultana raisins at Smyrna, are stiffer, and from the rapid distribution of that part of the Valencias of the "Bellona's" cargo which were not on order, they will not be obtained at lower, but possibly higher prices.

A writer in the *Grocery World* suggests that a grocer should deliberately select the class of people he expects and desires to reach, and should carefully aim at this class in all of his business acts. For instance, the better classes demand more daintiness of appointments, a better class of goods, and a more exclusive service; while the masses hanker after low prices. It is also well for the grocer to bear in mind that if he aims for the better class he will be sure to get some of the lower class trade, while if he aims at the latter class he will probably get none of the better.

On Monday last the ship "John McLeod," laden with sugar from Iloilo in the Philippine Islands, struck on Sambro Ledges, off Halifax, and went down in eight fathoms water, her crew being saved. The vessel is 1,591 tons burthen, built of wood, owned in St. John, and valued at $25,000; uninsured. The cargo of sugar was purchased at Delaware Breakwater by the Acadia Sugar Refining Company, to be landed at Halifax. It was purchased from Moorehouse & Co., New York, and insured in New York. Mr. Butler, secretary of the refinery, thinks that the cargo is worth about $90,000. It is said the refinery had insured on anticipated profits to the amount of $12,000.

On the subject of regulating the canning industry, the official organ of the National Association of Canned Goods Packers, in the United States, says it is not only necessary to compel the packer to put his name on his goods to make him responsible for them—so he will gain or lose by their reputation—but it is absolutely necessary to prevent buyers from purchasing unlabeled goods at one grade and selling them at another that is higher. "It has been determined that the only way to overcome this evil is to have some specific mark by which each grade of goods will be known, without opening the can. The National Association will be likely to adopt a plan somewhat similar to that followed out by the apothecaries a few years ago—this was done by having a strict rule that all noxious medicines should be put in blue glass bottles, while clear glass bottles would be used for those that were not poisonous. The National Association will adopt a seal, and registered labels will be expected to carry the device of this seal in some part of the design. As this seal will be registered, it can only be used by those to whom the National Association gives permission. For instance, if the groundwork of the seal be white in the label it would indicate the contents of the can as standards; if extras, the groundwork would be red; super-extra, yellow; seconds, blue; and for pies, green, gray or some other color. Any party using the label of the National Association in other than the manner specified, would make themselves liable at law for damages, just the same as for infringement of a patent. In a little while retail grocers and their customers would understand the significance of the ground color in a seal, and the jobber could not deceive them."

—A branch of the Imperial Bank of Canada is to be opened in Montreal. Its office will be in the Standard Insurance building on St. James street. The beginning of December has been spoken of as the day of opening, but this is dependent on whether the new premises are ready by that date

INSURANCE MATTERS.

The Western, the Alliance and the Manchester fire insurance companies are suing the Government for $4,000, the amount of the insurance which they paid in the Beaulieu fire case at Levis, Que. The finding in the fire marshal's enquiry was that the cause of the fire was a spark from an Intercolonial Railway locomotive. Judge Burbidge will decide the case in the Exchequer Court this week.

The late George M. Pullman was a director of the Travellers' Insurance Company of Hartford. His life insurance amounted to $100,000, namely, $80,000 in the Equitable, $10,000 in the New England, $5,000 in the Home and $5,000 in the Travellers. A few years ago he was talked up to making the total an even $500,000 and had agreed to do it, but on being examined the discovery was made that he had heart trouble.

At Goderich, on Friday night last, the Grand Trunk Railway elevator was burned, together with the contents, 65,000 bushels of wheat, valued in all at $85,000. The fire communicated with the lumber yards of N. Dyment and William Rutson, adjoining, destroying three and a half million feet of lumber, valued at $35,000, belonging to the former, and 1,500,000 feet, valued at $15,000, belonging to the latter. Mr. Dyment had no insurance.

Mr. T. C. Livingston has arranged to represent in Winnipeg the Northern Life Assurance Company of Canada, with the title of director for North Western Canada. His headquarters will be in the Livingston Block, corner Portage avenue and Main street, but doubtless with his energetic instincts he will not confine his efforts to the city, but will be heard of from time to time at outlying points. He is enthusiastic about the North-West and predicts a prosperous future for the Canadian life companies who have adequate representation there.

As a result of a series of consultations by the council, two propositions are to be put before the members of the Gratuity Fund Scheme of the Toronto Board of Trade. One is Mr. President Gurney's all-level premium plan, the rates to present subscribers to be ante-dated five years on the first $1,000. The alternative proposal is to in effect wipe out the gratuity fund altogether, and give back to each subscriber a paid-up certificate for $150, to draw interest at 3½ or 4 per cent. This is not a satisfying result of steady payments since 1886, but it is the best, it seems, that can be got out of this delusive assessment scheme.

There are opinions expressed here and there that fire underwriters are too severe in their regulations for the use of acetylene gas. The United States *Review* says: "In spite of all protests it seems as if acetylene has come to stay. This hazard from a fire insurance standpoint has been frequently taken up and discussed by fire underwriters pro and con. It is reported that already about forty fire insurance companies doing business in New York have signified their intention of writing risks in what the gas is used. The Philadelphia association has approved its use under restrictions, and the New York association has similar action under consideration."

A conference has been held between a committee of the Hamilton city council and a deputation of the Canadian Fire Underwriters' Association. The latter stated that the city had been getting a lower insurance rate than the fire protection deserved, and the companies were anxious to know what the city council would do. The pressure is, they claim, inadequate, the hydrants too far apart. The Hamilton waterworks engineer admitted that the engines are not strong enough to pump continually over the stand pipe. On behalf of the Cataract Power Company, it was promised that it would be able to supply all the power necessary by June next. It would appear that no definite agreement to improve the fire appliances of the city resulted from the conference, and it cannot be truthfully affirmed that the underwriters were pleased with their visit.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Nov. 11th, 1897, compared with those of the previous week:

CLEARINGS.	Nov. 11.	Nov. 4.
Montreal	$15,099,019	$13,995,105
Toronto	9,101,462	8,126,794
Winnipeg	3,578,282	3,342,880
Halifax	1,489,410	1,643,211
Hamilton	775,147	671,777
St. John	639,244	538,534
	$30,682,564	$28,318,301

REFORM IN BANKRUPTCY LAWS.

The remark has been made more than once by English journals, and with much force, that while Canada, in this year of affectionate demonstration towards the old country, is holding out with one hand preferential terms of trade to Great Britain, she is with the other closing the avenues of profitable Canadian trade by the manufacturers and exporters of the mother country, by means of provincial laws that prefer the Canadian creditor of bankrupt estates and handicap the British and other European creditor.

Writing on this subject in a recent issue, an influential organ of the textile merchants, the *Drapery World*, of London, says, in the course of a lengthy article: "Canadian imports of British Goods have been diminishing rather than advancing in volume and value since the new fiscal policy came into operation, and all the world engaged in Canadian trade wonders accordingly. Yet the seemingly inexplicable situation is not shrouded in any particular mystery. The Canadians themselves have apparently reached the heart of it. Their reputation at this side of the Atlantic is waiting for some thorough process of rehabilitation. As customers, they are still suffering from the mistrust engendered by the long series of failures through dishonest trading, in which their British creditors have been heavily mulcted.

The British manufacturer and exporter of textiles, drapery and fancy goods, has, to his own grievous loss, been hitherto too lavishly favored with orders from Canada. Under the belief that he was dealing with his own kindred on similar principles of mercantile morality as are legalized in the United Kingdom, his trust in the honesty of his Canadian customers was almost unbounded. He trusted only to be grievously betrayed. It would, perhaps, be uncharitable to catalogue the many instances which have been in evidence during the past few years of the facilities afforded by the present condition of the Canadian bankrupicy laws, to the dishonest ingenuity of Canadian traders in the exploit of fleecing their European creditors.

The mercantile men of the Dominion are quite alive to the evils which their black sheep have brought upon them. The first sign of amendment is the frank confession of the backsliding. . . . Only a few months ago, the general sympathy of the Canadian commercial community was on the side of offenders against common mercantile morality, who put into practice the questionable expedient of pilfering Peter to pay Paul, by emptying the pockets of their European creditors to meet the claims—preferential or otherwise—of the Canadian banks and syndicates.

According to Canadian law, as it exists, they were within their right, and like Brutus and his friends, can claim to be honorable men in dishonorable methods of dealing. While the trading adventurer in Canada, casting about the whole world outside for unlimited credits, is protected by the laws of the Dominion, as British creditors have discovered to their cost, it cannot be expected that Canadian houses, whose repute is neither ancient nor fully ascertainable, can be trusted with the handling of British merchandise, except on cash terms. . .

The mercantile men of Canada are just now engaged in the propagandism of a scheme of mercantile redemption. They acknowledge that the mistrust and consequent minimizing of business are justified by the condition of their bankruptcy laws. They protect the operations of the dishonest Canadian trader at the expense of the foreign creditor. They propose, therefore, that by the amendment of its laws, the Canadian State shall give security for Canadian trade honesty.

—Ex Governor Hoard, of Wisconsin, a shrewd man with a ready tongue, declared not long ago that the faulty condition of the average country road is "the biggest rat-hole on the face of God's green earth—and down it goes the substance of the people." Practically, the same thing has been said, though not with the same rhetorical swing, by others, in Canada as well as in the United States, but it takes a long while to arouse a whole people to the fact. Mr. Campbell, the Ontario Government Instructor in Road-making, is doing good work in arousing people in this province to the economic value of good country roads, and is showing people how to make such roads. We are told that something like 200 townships in Ontario now use grading machines, to the great improvement on the roads of the township. A few years ago grading machines cost $300; but the agitation for good roads created a great demand, and this secured competition. Only a few days ago Dufferin County Council purchased seven at $150 each. But rock crushers and road rollers are also necessary for the making of good roads. These, too, are gradually but more slowly coming into use.

—It will be good news to many bank officials and financial men in the United States, that the Secretary of the Treasury intends to supply that country with paper notes of a kind less ornamental than has been the rule. Too much engraving, too many pictures and "frills," and too little clear paper has characterized the American Government note. So much has this been the case that counterfeiters have thriven upon the much-engraved "picture money." We now hear from Washington that designs are being prepared for new notes with less printing and more clear paper. A sketch for $1 notes has been submitted, which is a radical departure from all previous designs, showing a large space of white paper front and back. An eagle with extended wings hovering over the flag and the Capitol is the only illustration on the face, and in the corners is the figure 1 in scroll work. The back is very plain, consisting largely of a border in geometrical lathe designs. It is not unlikely that the colors used in printing the bills will at some not distant day be varied with the denomination of the note.

—A feature of the British iron trade that causes ironmasters to squirm over a present loss, even though it may result in a future economic gain, is the modern change in smelting plant. In one Staffordshire district no less than twenty of the old-fashioned small furnaces have been demolished during the last few years. At Brierley Hill extensive plant, including hot-air furnaces, engines, etc., worth £3,000, were sold this month for about one-tenth of the cost. At one time 110 furnaces were in blast in the Wolverhampton and Dudley districts, where there are now only about 25, the greater part of the others having been demolished, and the materials sold at a great sacrifice. These old furnaces were thought to be doing well if they produced 80 or 100 tons of pig iron per week; now some of the furnaces at work produce 500 tons per week each, with a corresponding saving in management and other charges.

—Changes in the staff of the Molsons Bank are announced as under: C. McCuaig, former manager of the Woodstock branch, goes to manage the new branch in Quebec city, and E. W. Waud, manager at Owen Sound, goes to Woodstock. The Owen Sound vacancy is filled by J. R. Wainwright, manager at Norwich, and R. Elliott, accountant at the Toronto branch, goes to take charge of the Norwich branch. The position of assistant manager of the bank in Montreal vacated by the appointment of H. Markland Molson to be a member of the Board of Directors, has been filled by E. C. Pratt, formerly accountant at Toronto.

—It is satisfactory to learn that the provincial municipal auditor has prepared forms for special cash books to be used by municipal treasurers of Ontario. The forms have been copyrighted, we are told, and arrangements made for supplying the books, which are being manufactured by Brown Bros., Limited. They have been approved by the Lieutenant-Governor-in-Council, and the use of them is to be compulsory after 1st January next. It is to be hoped that the use of proper books may tend to lessen the opportunities for using public funds, or stealing from the ratepayers, such as have troubled not a few municipalities.

—The assessment of the City of Kingston, according to some printed statistics issued by that city, is $7,581,840, and the rate of taxation thereon 17½ mills on the dollar. The bonded debt of the city is $524,276 general; $284,900 for waterworks, and $64,288 for local improvements. At a recent sale of her 4 per cent. debentures, $25,000 of elevator bonds and $17,000 of Fair ground bonds brought $43,487; while $29,145 local improvement and debt arrangement bonds brought $31,331—a still larger premium. The population was 18,021 at the last enumeration.

—Probably the largest amount of Canadian securities held by any British insurance company doing business in Canada, is held by the Scottish Union and National, of Edinburgh. It has over $550,000 in debentures of a dozen Ontario mortgage loan companies; town, county and city bonds and stocks to the extent of almost a million, and railway, tramway and other securities, making the aggregate investment of the company in Canada $2,035,940. It looks as if this company had a good opinion of our securities for purposes of investment.

—The present week's Canadian Bank Clearings, $30,682,564 in amount, are the largest of the year. We should think they are the largest for any week since clearings were compiled. Compared with those of the same week last year, which were $26,561,893 they show a marked increase, which is significant of the improved activity in business.

PROTECTING SECRETS OF TRADE.

The action of the O & W. Thum Company, manufacturers of a well-known sticky fly-paper, against A. A. Tloczynski, a former employee, to restrain him from divulging to a rival company the company's secret process of manufacture of their goods, is of particular importance to the manufacturing trade. The case was recently decided in the Michigan Supreme Court on appeal by defendant from the Circuit Court of Kent County, that State, where an injunction had been ordered against him.

The plaintiff, Tloczynski, had been in the employ of the firm since 1887, at which time all the labor of making the sticky fly-paper was done by one man and a boy in an attic and in a small building in the back yard. The business grew, and the public were excluded from the premises; rigid requirements were made to guard the formulæ, the process of manufacture, and the machinery used. In 1892 about $100,000 was invested in the business. The next year Tloczynoski, who had left their employ a year or so earlier, wrote that offers had been made to him to go into business with a firm having ample capital, and intimating that he intended doing so, of course utilizing his information secured in the service of O. & W. Thum. This led to the filing of the bill for injunction, which was granted. The defendant appealed, and the Supreme Court, by Justice Moore, all the bench concurring, affirmed the decree of the court below.

It was held by defendant on appeal that after employment has terminated a servant cannot make use of or divulge a trade secret necessarily confided to him by the master in the conduct of the business, where it was agreed as a condition of employment that he should not use the secret to the master's detriment, or disclose it, although the contract did not, in terms, so provide. Also that a condition of a contract of employment that a servant will never make use of or divulge trade secrets necessarily confided to him by the master in the conduct of the business is not invalid as being in restraint of trade.

It was further held that where one discovers and keeps secret a process of manufacture, whether or not a proper subject for a patent, he has a property therein that equity will protect by injunction against one who, in violation of contract, and in breach of confidence, undertakes to apply the secret to his own use, or to disclose it to a third person.

Justice Moore, in his opinion, held;

"The conclusion is irresistible that defendant would not have been employed, and information which was imparted to him would not have been conveyed, if it had been understood that he might sever his relations with his employers at any time, and sell the valuable information which had been imparted to him, whenever he could find a market. We think it clearly established by the testimony that the employment was upon the agreement that defendant would not use the information imparted to him to the harm of his employer."

The only important question involved, it was held, was as to whether an employee, after his employment terminates may make use of secrets confided to him by his employer, etc. The court held that the testimony disclosed an express agreement between the employer and the employed, but if it might be stated that the only agreement was an implied one, growing out of oral statements taken in connection with the facts and circumstances surrounding the business, the parties and their acts; still, if it was clearly established by all that was said and done that the secrets confided to the defendant were not to be disclosed by him to others, and were not to be used by him except when he was in the employment of those who imparted to him the secret, or their legal representatives, and that was one of the conditions of his employment, the court could not think it would make any difference in the principle involved. The knowledge came to him in the course of a confidential employment, relying upon his using the knowledge only for the benefit of the employer. Parties have been restrained from using the secrets of compounding a medicine not protected by patent when it appeared that the secret was imparted to them in breach of faith on the part of persons communicating it. The citations are voluminous.—*N.Y. Price Current.*

"A MERE FAD," INDEED.

There can be no doubt that the great majority of the people of Canada, without respect of party, have reached the conclusion that no more public money should be expended in subsidizing mail steamers which make their Atlantic terminus at a foreign port, and that it is the duty of the Government and people of this country to use all legitimate means to divert the carrying trade of the west, and particularly of the Canadian West, into Canadian channels and through Canadian ports. This determination of the people of Canada is contemptuously spoken of by Mr. Shaughnessy, vice-president of the C.P.R., as "a mere fad." We admit that there is a good deal of sentiment in it, but it is sentiment of a national character; and there is hard, matter-of-fact business sentiment in it too for Canada and her railways and waterways, and ocean ports. Characterizing this sentiment as "a mere fad" comes with very bad grace from an official of a railway company which has been dowered by the people of Canada to the amount of $100,000,000, and which is using the power and the opportunity created by that endowment to build up American ports. The C.P.R. enterprise when first launched was regarded as a Canadian national undertaking, and on that score the people of this country, with remarkably little dissent, subsidized it generously. It has practically become as much an American as a Canadian road, and one of its chief officials insults the people of Canada by terming their national aspirations in trade and commerce as "a mere fad."

True, we shall be told that the C.P.R. has made St. John a winter port, but this has been done from necessity, not from choice. The company had to do something to profitably utilize the railroad across the State of Maine, subsidized from the Canadian treasury to the tune of $3,500,000, and which it was compelled, much against its better judgment, to build after the late John Henry Pope had, through the manipulation of the late Government, succeeded in unloading on the company his famous "cork-screw" railway through the Eastern Townships of Quebec. St. John is the white-headed boy with the C.P.R. just now, but the moment that corporation can do better it will drop the building up of that port as "a mere fad" and take up with its new love. Railway corporations, like many other corporations, have no souls. To them national sentiments and national aspirations are "mere fads." The people of Canada had better make a note of Mr. Shaughnessy's contemptuous opinion of Canadian national sentiment.—*Halifax Morning Chronicle.*

BUSINESS IN THE UNITED STATES

"Stronger proof of the great change in the condition of business could not be given," says *Dun's Review*, "than is found in the detailed report of failures by branches of business, never shown except by Dun & Co. for the month of October. Though swelled by a few large speculative or brokerage failures, the aggregate was smaller than in any other month for more than four years, except in July and August, and one month in 1894. The manufacturing and trading failures, $7,823,199, against $7,830,811 in September, and $7,700,835 in August, include one for $1,000,000 having no relation to the present state of business. During the four years iron manufacturing failures have not been smaller, except in one month, wool manufacturing except in two months, leather and shoes and unclassified manufacturing except in four months, and cotton manufacturing except in six months. Of trading classes, failures have never been smaller in groceries, jewelry and books except in one month, in clothing, furniture, and unclassified trading except in two months, and ten manufacturing and eleven trading classes out of fourteen each have never reported smaller failures in a third of the past forty-eight months. Improvement so general, with a remarkably low average of liabilities in most classes, has a meaning which cannot be mistaken.

The quiet following the great rush of orders and purchases for over two months is still increased in many branches by unseasonably mild weather, and yet the mills are obliged to refuse many orders because unable to finish previous engagements soon enough. It is in every way fortunate for the industries and the would-be buyers, since speculative purchases would otherwise advance prices so fast as to make reaction probable. More works have joined the active list, including some long idle, and the production in iron manufacture is the greatest ever known. The output of pig again exceeds the demand which naturally diminishes near the close of the year, and prices yield slightly, but the consumption is kept at the maximum by pressure of orders which the works are not able to fill fast enough. The Illinois Steel Co., shipping 5,000 tons of finished products per day, is behind with its orders. Eastern and Western orders accumulate for railway materials, for cars and bars, for ship plates and structural forms. Shipments of boots and shoes for the week were 0,000 cases larger than in the same week of any previous year, and 16,000 larger than in 1892, and orders for winter goods still keep the shops busy. Prices are but a shade lower for shoes and leather, while hides are slightly stronger."

THE MINISTER'S IMPROVED HARBOR PLAN.

The following letter has been received by the chairman of the Harbor Board from Hon. Mr. Tarte. The plan enclosed is Mr. Tarte's first plan, which was a three-pier plan, but altered, so that the piers are 300 feet wide and the water basins correspondingly reduced:

Office of the Minister of Public Works of Canada.

Robert Mackay, Esq., President Harbor Commission, Montreal:

My Dear Sir,—Perhaps you would like to have our amended plan showing the wharves 300 feet wide. I take the liberty of mailing copy of the same to you to-night.

The comparison between that plan and the plan submitted by the Harbor Commissioners, on the 28th of July, brings out the fact that this plan would give room for 8,000 tons (average) of merchandise for each berth, whereas the plan of the commissioners would give a little over 7,000, the number of vessels being the same.

Now, the tonnage of the ships is increasing from year to year, so much so that there is to-day afloat a ship of 20,000 tons capacity, lately launched by the White Star Steamship Company. When the St. Lawrence is deepened, it is expected that the biggest ships will reach our harbor, and it is in view of that fact that it is our duty to equip the port of Montreal with wide basins and wide wharves. In a word, the plan suggested by the Department of Public Works gives more wharfage space and more water space, and the same number of vessels.

We want as much water space as possible between the piers, because of the fact that much of our trade is to be transhipped from bottom to bottom, and we want as much space as possible on the wharves, because of the fact that, if we want to compete successfully with rival ports, we will have to equip our wharves with modern appliances, railway tracks, sheds, cranes, hoisters, etc., etc., moved by steam, water or electricity.

Believe me, my dear Mr. Mackay,
Yours very truly,
(Signed) J. ISRAEL TARTE.

This new plan proposes three piers of lengths varying from 700 feet to 1,000 feet, width 300 feet, width of basins 510 feet, and the upper pier about 1,100 feet from the canal.—*Montreal Herald.*

ONE WAY TO INCULCATE SAVING.

Mr. Gary, the Postmaster-General of the United States, has always been a champion of savings banks, and believes in encouraging thrift. He has reduced his theories to practice in his own family. Forty years ago Mr. Gary began a plan for the encouragement of his own children to lay aside a part of the money allowance he made them, says the Washington *Star*, which he continued until they grew to manhood and womanhood, and then he adopted the same method with his grandchildren, which he pursues now. He told the children that every dollar they could save and put in the savings bank he would match with four other dollars. It wasn't long before he instilled a lively interest on their part in their bank accounts. Now whenever his grandchildren have a surplus of spending money they seek their grandfather. A dollar saved for them means $5 in the bank, and it is understood that they cannot touch this surplus until they arrive at age. The result of this system is that all the children have good bank accounts, and enjoy an income which is constantly growing, and which will amount to a modest competency when they become of age. The children know the value of money, and its power to work for them night and day in earning interest.

—From seventy acres of crop Mr. John Hawk, whose farm is in Assiniboia, has threshed out 4,040 measured bushels of oats, 1,000 bushels of wheat, and 1,000 bushels of barley. This will average nearly 100 bushels to the acre—Medicine Hat *News.*

DIDN'T RECOGNIZE HER.

This is a story about a girl and a man. The girl lived in a suburb of London, where she is distinctly the belle. The man lived not very far away from her, and during business hours he is to be found in a bank in the city. He is fairly good looking, and is a favorite in the set in which he moves. He and she had words—so many in fact that the girl, who is said to have more than a bit of temper, ordered him never to presume to speak to her again as long as he lived. She forbade him to recognize her even, and said that she would make it a point to forget that she had ever met him. The other day she went into the bank in which he is employed to get a cheque cashed. The young man advanced. He took the cheque and examined it carefully. The girl was in a hurry. She had not an acquaintance within half an hour's walk. The young man handed the cheque back. "Very sorry, madam," he said, "but you will have to get some one to identify you," and she had to do it.—London *Free Press.*

—With not a thousandth part of its resources developed, its fisheries only in their infancy, the mines, forests, and soil only scratched in places, its population of 120,000 confined to the coast and one river valley, the revenue returns rank British Columbia as third among the provinces of the Dominion. British Columbia is emphatically the province of the future, the country of destiny, and the most valuable possession of the British Crown on this continent.—*Harper's Weekly.*

THE CURRANT MARKET.

In their circular of Oct. 20th Hancock & Wood, of Patras, Greece, say: "The currant season through which we are passing, has, up till now, been the most anomalous one we ever remember; prices generally opened rather higher than the trade considered circumstances justified, but owing to many causes, some of which were local, prices since beginning of season have been continually on the rise, and stand to-day, for the lower descriptions of currants, about 3s. higher than they did at the end of August. The general impression that the crop will turn out much smaller than was at first estimated, and the readiness with which markets of consumption, being bare of stock, followed the advance, has no doubt had much to do with the rise in prices, but large uncovered sales to Continent and elsewhere, and a great decline in exchange without any fall in the currency price of currants, have also been factors in the situation. If total crop available for export does not exceed, as many assert, 120,000 tons, we shall see no decline, for although France and Russia are no longer buyers of currants, it must not be forgotten that Germany and Austria now use currants largely for wine-making, and have lately paid as high as 31 marks per 100 kilos in bags, c.i.f., Rotterdam, a price which they have hitherto declared they could not possibly pay for wine-making purposes. We, however, are not of opinion that crop available for export will be so small as people want to make out, and we shall, therefore, look for some decline after the turn of the year or before. Shipments, as will be seen by list attached, have been on a very large scale, and all markets will be well supplied for their Christmas requirements. Shipments ascertained to date, as compared to last year's, are: To London, 17,210 tons, against 13,849 tons in 1896; to Liverpool, 15,520 tons, against 9,136 tons in 1896; to outports, 3,850 tons, against 6,366 tons in 1896; to United States, 6,250 tons, against 5,895 tons in 1896; to Canada, 1,320 tons, against 1,220 tons in 1896; to France, 475 tons, against 553 tons in 1896; to Germany, Belgium, Holland Austria, 10,905 tons, against 7,340 tons in 1896; to Australia, 2,612 tons, against 2,141 tons in 1896; to Russia, nil, against 1,392 tons in 1896. Total tons, 58,142, against 47,892 tons in 1896."

MARKET EXTENSION.

There is a scheme on foot to enlarge the area of the Bonsecours market in Montreal in a direction not contemplated when the first report of the markets was submitted. The original idea was to extend the market space in an easterly direction between St. Paul and Commissioners streets, but it was for obvious reasons considered undesirable that the market should be so close to the Canadian Pacific Railway. The latest scheme is to expropriate the property between Jacques Cartier square and St. Claud streets, and between Commissioners and Notre Dame streets, which is likely to be a very costly venture. The opinions of the aldermen are very much divided on the matter, but it is admitted that more market room must be had.

EXTRAORDINARY efforts are being made to get the Verity Plough Works at Brantford, burned the other day, into running shape, so as to enable the completion of contracts for some 2,000 ploughs. A large proportion of this number was completed, and hundreds more were in process of manufacture when the fire came and swallowed up almost the whole. The company receives $40,270 insurance. The total insurance on the works was $50,000, but part was on the buildings, which were not touched by the fire. R. H. Verity says that the company's loss on stock, etc., over and above the insurance, will amount to $25,000. The company has a force of 200 men employed. Several carloads of machinery are en route from manufacturers in the United States, and some is on the ground.

—It is whispered that Secretary Gage's plan of currency reform involves three fundamental propositions: (1) The refunding of the bonded debt by the issue of 2½ per cent. gold bonds; (2) the gradual retirement of the greenbacks and Sherman Treasury notes; (3) the extension of the national banking system, with such modifications and improvements as would secure safety, elasticity, and adaptability to the needs of communities now without banking facilities. Mr. Gage would firmly establish the gold standard, and take the treasury out of the banking business.

—It is a great truth and a terrible fact, that many men are kinder to their cattle and horses than they are to their employees, associates or themselves, and yet neither the wearied body nor the worn-out brain can begin to accomplish in long hours of incessant effort what the same individual can easily do if he enjoys needed rest and suitable relaxation. There is nothing so certain as the untimely collapse of vital force, confined to one incessant grind of labor and thought, unrelieved by occasion holidays and indulgence in innocent and manly relaxations.—St. Paul *Trade Journal.*

—Figures for both the C.P.R. Land Department and the Canada North-West Land Company show an enormous increase in business in the year over that of any previous estimates yet published. The sales of the Canadian Pacific Land Department for the last month amounted to $86,000 for 22,000 acres, more than twice as much as those for the corresponding month in last year. The value of the sales of farm lands by the Canada North-West Land Company, Limited, amounts to $19,000 for last month, approximately totalling altogether for the year 1897 up to the end of October, the sum of $150,000 for about 28,000 acres. The total sales of farm lands by this company amounted last year to about 12,000 acres, netting an aggregate of $67,000.

—There has recently been cast by the Bethlehem iron foundry a nickel-steel ingot weighing 222,300 pounds, said to be the largest ingot ever cast. It is 16 feet 7 inches long, 74 inches in diameter, and from it will be made a 16-inch gun of U.S. coast defence.—*Boston Herald.*

—The manufacturers of a certain bicycle, having sold a machine to a customer in a neighboring town, for the use of his boy, wrote to him several times for a testimonial. He responded at last in this wise: "It gives me pleasure, gentlemen, to testify that my son, who is riding a bicycle purchased of you a few months ago, says he can get more exercise out of a five-mile ride on that machine than he can out of a twenty-five-mile ride on any other bicycle he ever tried. Yours, etc." That ended the correspondence.—*From the Youth's Companion.*

—The hawser used in towing the large floating dock from England to Havana, where it will be used by the Spanish Government, is the largest and strongest in the world, and the cable is of manilla hemp. It weighs nearly five tons, is twenty-two feet in girth, composed of 2,500 threads of hemp, is 690 feet long, and its breaking strain is 180 tons. The dock weighs 6,000 tons, and the towing steamer is carrying 4,000 tons of coal for the voyage, which will take between 80 to 120 days. It required seventy men to haul and stow the hawser on a trolley, which was drawn by seven horses.—*N. Y. Maritime Register.*

—A Dorchester woman tells a good story of one of the grocerymen of that classic suburb, according to the Boston *Traveler*. She received a bill for two pounds of "psalmon." When the dealer came to collect his bill, Mrs. B. called his attention to the incorrect spelling of salmon. The dealer exclaimed: "That's the work of my new bookkeeper. I am ashamed to have such bills sent out. He's a good bookkeeper, but he'll have to learn to spell if he wants to work for me. Let me correct the word" Taking out a pencil, the dealer drew a couple of lines through the word and wrote above it "sammon" "There," he said, "I'll teach that bookkeeper how to spell that word or get rid of him."

SOUND MONEY IN THE STATES.

The semi-annual meeting of the Executive Committee of the National Sound Money League (non-partizan), was begun on the 9th instant in the eastern office of the league. There were present: President George E. Leighton, St. Louis; General Secretary, E. V. Smalley, Chicago; Henry Villard, Gus H. Schwab, J. Kennedy Tod, New York; H. P. Robinson, Edwin Burritt Smith, Chicago; J. K. Cowen, Baltimore; E. Ingalls, Cincinnati; J. W. Norwood North Carolina; W. C. Cornwell, Buffalo; and Treasurer A. P. Hepburn.

Hon. J. Sterling Morton, vice-president for Nebraska, wrote as follows:

"Mr. Bryan and his disciples are actively engaged in a propaganda of money fallacies. They have united in one conglomerate all the fanatics, bigots and idiots in this State for the purpose of upholding the free coinage of silver at the ratio of 16 to 1. It is very painful to observe that this aggregation may quite possibly make a majority of 20,000 at the coming election by the candidates who represent all that is inimical and disastrous to agriculture, and, in fact to sound Government everywhere."

Judge W. M. Rose, vice-president of the league for Arkansas, wrote: "There is no change in this State. There is an overwhelming majority for free silver and Bryanism in every congressional district."

A sub-committee of the league was appointed to prepare a declaration on international bi-metallism to the effect that bi-metallism is dead, and that gold should be the standard of the country. Members of this committee stated that President McKinley has intimated his intention of recommending in his next message to Congress the advisability of separating the issue department of the treasury from the regular Government expense account. In other words, it will be proposed to hold the gold reserve as a redemption fund for greenbacks, and to make gold and greenbacks interchangeable. It was said that President McKinley had spoken freely on Monday with a prominent official of the National Sound Money League on this question. The committee subsequently made its report in the nature of an appeal to the people of the United States to recognize the fact that international bi-metallism is dead.

The report concludes as follows: "We invite the friends of sound money, and all who would contribute to the well-being and safety of our commercial life, to join in bringing about the unmistakable declaration that now and henceforth the monetary system of the United States shall rest on the single gold standard."

EXTRACTION OF ORE BY ELECTRICITY.

The mining world has been watching with much interest the success of the experiments by Mr. Edison to recover by an electrical process the iron contained in low-grade ores. It has long been known that by means of magnetism the extraction of iron ore could be accomplished, but the problem to be solved was the perfecting of a process which would render the treatment of even the leanest deposits commercially feasible. To this end Mr. Edison has in a measure concentrated his efforts, and it would now seem that after a large expenditure of money he is to be rewarded by success. His experiments have been carried on in New Jersey, where about $3,000,000 has been expended in plant. The process by which iron mining promises to be revolutionized consists in applying the principle of the magnet, by which the little black particles of ore are drawn from the pulverized rock. The powder is allowed to fall in close proximity to electric magnets, which deflect the iron to one side, and the non-metallic matter falls to the other side by gravity, the entire process being automatic. This is one of the greatest of Mr. Edison's many achievements, and one which will undoubtedly have a far-reaching effect upon the iron industry throughout the world. To Canada it is likely to prove of great benefit. We have abundance of iron ore deposits, but the difficulty in the past has resulted from the absence of cheap coal in close promixity to the mines. Thus the advantages of the application of electricity for ore extraction is at once apparent. That he has finally reached the goal of success must be a source of gratification to all persons as well as to Mr. Edison.—*—Can. Electrical Review.*

ARE THE JEWS NOT RICH?

Can it be that the Jews, after all, are not rich? That, indeed, as a people, they are poorer than other peoples, as we are asked to believe? What, then, becomes of the proverbial saying, "As rich as a Jew," and many other allusions in history, tradition and literature, all to the like effect? The London *Statist* recently introduced a list of the wills of wealthy Jews, extending from 1879 to 1897, with the following remarks: "It has for a long time been a common idea that the Jews as a people are much richer than others. Sometimes the average of the wealth of the Jewish community is put at twice or three times, or five times as much as that of other people. Now and then the exact figures—which, of course, are not ascertainable—are purported to be given precisely. The opinion of many well-informed Jews is that as a people they are not rich, and that the average, if it could be taken, would come out below that of other communities."

The capacity of the Jew for commerce and finance, perhaps finance in particular, is everywhere acknowledged. He is as universally thrifty as the Scotchman, and about as omnipresent. And he is not afraid of work—when there is profit in his work. How comes it, then, that as a people they are not rich, if these "well-informed" Jews *are* well informed on the subject? It is curious that there are probably a larger number of very poor among the Jews than among any other class, excepting, perhaps, the Roman Catholics in some districts. But the *Statist* says that even among the middle class it is doubtful if the average is equal to that of the same classes among some other communities. There are doubtless some very rich Jews in the British Islands, but it is noteworthy that the largest Jewish fortunes of which there is record in the Probate Registry do not include any so large as some of those that have been left by other people. While we are by no means carried away with the notion that the Jews are three or five times as wealthy as any other community, we are not disposed to believe that on an average they are less well off than other people.

Commercial.

TORONTO MARKETS.

Toronto, Nov. 11th, 1897.

Dairy Products.—The offerings of butter have been more liberal this week. This is no doubt due to the closing down of some of the cheese factories. Quotations remain about as given last week, although merchants say there is an easier tone in the market; and that to keep stocks cleaned up it will probably be necessary to accept lower quotations. We quote: Creamery tubs, 18 to 18½c, and pound prints, 19 to 20c per lb.; dairy tubs, 15 to 16c: medium quality, 12 to 15c; and large rolls, 10 to 12c per lb. The cheese market is quiet, but unsteady. The offerings of eggs have been larger this week. Nearly all coming forward are taken at former quotations. Export shipments are large, and in the United Kingdom fresh eggs are in better demand, relatively, than pickled.

Dry Goods.—For some weeks the representatives of the wholesale houses have been talking business for the spring of 1898, and have received a fair amount of success. The houses are in the midst of active shipments of autumn and winter goods. The weather has not been entirely favorable to this business, but in spite of these conditions, a fair amount of trade has been done.

Grain.—Values of wheat remain as reported last week. The unfavorable weather has interfered somewhat with deliveries from first hands during the week. Oats are firmer at unchanged quotations. Peas remain steady without change. Corn continues dull. There is little life in the barley market. Quotations for buckwheat are nominal.

Green Fruits.—The movement is being fairly well maintained in spite of unfavorable weather conditions. Supplies of fruits for the winter trade are coming to hand. This week several car shipments of Mexican oranges arrived. Jamaica oranges are also contributing to the consumptive requirements. There are frequent complaints as to the quality of lemons offered here.

Hides and Skins.—The remarkable strength shown by the hide market continues unabated. Exports have been made to the United States. The merchants, notwithstanding the high prices, are making small profits, and the butchers are receiving almost the entire benefit of the advanced values. There is a fair supply of sheepskins. Calfskins are quiet and unchanged. A report received from Chicago Nov. 10th says: Only a limited demand from tanners, but tone of the market firm, as packers were carrying only very moderate supplies of branded hides, and were sold ahead on native steer hides, closing at 11 to 11¼c for native steers, 10¼ to 10½c for Texas, 10 to 10¼c for butt brands, 9¼ to 9½c for branded cows, 9 to 9¼c for Colorados, 10¼c for heavy native cows, and 10½c for light do.

Leather.—Trade is only fairly satisfactory. Harness leather is in good demand. Stocks of all descriptions of leather are not excessive, and in view of the high price of raw material, values are being maintained. Consular reports state that while Canadian exports of sole are increasing, shipments of other sorts have declined.

Provisions.—Free deliveries of dressed hogs have been made this week in car-lot shipments from Western Ontario. For the heavier hogs $5 to $5.10 per cwt. has been paid, while the light-weights have brought $5.25 to $5.35 per cwt. Packers maintain that these prices cannot be maintained, but the future alone can tell of the stability of the market. Up to the present the deliveries of heavy hogs have not been out of proportion to the aggregate receipts, but we are in receipt of advices from the country which lead us to believe that the farmers are holding back their hogs, and there is good reason to look for plenty of heavy hogs later in the season. There is a good steady market for products. The lumbermen continue to be large purchasers of heavy meats.

Seeds.—The growers do not appear anxious to make deliveries, and not until the advent of winter do the merchants look for free offerings again. Local quotations are as follows: Red clover, $3 to $3.25; alsike, $3 to $4.50; timothy, $1 to $1.25 per bushel. New York, 9th inst., quoted: Clover, $5.50 to $6 for common to fair, and $6 to $6.25 for choice to fancy, in job lots; No. 1 clover, export, $3.52½ per bushel f.o.b., New York, nominal; $2.75 to $3 for fair timothy in car lots, and $3 to $3.25 for high grade.

Wool.—The local wool market shows few or no changes, as compared with the events of last week. The mills are taking a fair quantity of wool for consumptive requirements, and are evidently more active than they were some weeks ago. Values remain about as last reported.

MONTREAL MARKETS

Montreal, Nov. 10th, 1897.

Ashes.—There is an absence of demand, with easier values prevailing. For No. 1 pots $3 50 to 3 60 is a normal quotation, seconds $3.10 to 3.20; about $4.50 is given as a normal quotation for pearls.

Boots and Shoes.—Stock taking has just been completed by a number of our manufacturing houses and apparently not without satisfaction, for they are beginning to make enquiry for leather, and the leather houses are cheerful accordingly. The present wet and slushy weather is having a beneficial effect hereabout on the sale of heavy footwear and rubbers. This is probably the case in the country as well as in the city.

Cements and Firebricks.—The receipts for the week are 7,437 brls. of Belgian cement. No further direct supplies are expected this season, as the "Haokow," from Antwerp, had to return disabled, and the "City of Boston" sailed only on the 7th, and is a 20-day boat, and will probably have to discharge at Halifax. Stocks of cement are smaller than usual, and there is a probability of scarcity before spring.. A sale of 2000 brls. of Belgian cement is reported since last writing, at about $1.90 Quotations continue at $1 90 to $2 for Belgian, British $2.10 to 2 20 Firebricks, $16 to $21 per thousand.

Dairy Products.—Exports of cheese last week were 71,686 boxes, being 30,650 boxes more than the corresponding week of last year. From New York the exports for the week footed up 12,231 boxes. The local market continues to show weakness, and yesterday's Liverpool cable reported a decline of sixpence. For fine late made Ontario goods 8⅜ to 8½c. would be about the limit, and for fine September 8⅝ to 8¾c.; Townships, 7½ to 8c.; Quebec, 7¼ to 7½c. per lb. Butter shippers are not disposed to bid beyond 18c. for fine creamery, though for local consumption 18½c. is obtained; fine dairy is quoted 15 to 16c., and lower grades 13 to 14c. For first-class goods in eggs there is a good demand at 15 to 16c.; No. 1 candled 13 to 14c. per dozen.

Dry Goods.—It was not posible at last writing to estimate fairly the proportion of dry goods customers' paper that would be provided for on the 4th, though anticipations had been formed of a good day. Now that returns are all in, the favorable expectations have been more than confirmed, and several of the leading houses report that from 80 to 85 per cent. of their customers' paper was paid, an unusually good percentage. Sorting business is hardly so brisk in the warehouses, but a fair number of letter orders are still coming in. Travelling salesmen are turning their attention more to the pushing of spring goods, of which a good many are being sold. Retail business in the city shows some improvement

Fish.—The demand for pickled fish is, as yet, comparatively light. Herring, however, are high in price, owing to short catch, according to all advices from below. We quote:—No. 1 herring, $4.50 to 5.00; medium, $3 00 to 3.50; green cod, No. 1 large, $4 25 to 4.50; No 1, $3.50 to 4 00; No. 1 North shore salmon, $12.00 to 12.50; British Columbia, $10.00 to 11.00; dry cod, $3.50 to 4.00; finnan haddies, 6 to 6¼c per lb.; kippered herring, $1.10 to 1 25 per box.

Furs.—The offerings of American raw furs at the late London October sales were quite small, and the variations from prices at the last March sales were not very marked. Bear and marten sold up a little, also fall rats; mink, about the same; lynx, otter and coon sold a little lower. Local offerings of raw furs are yet very small. We quote:—Mink, large dark, $1.25; small, ditto, 75c.; marten, $1.50 to 2 00; fisher, $4.00 to 6.00; lynx, $1.00 to 2 00; otter, $10.00 to 12.00 for dark; pale, $4.00 to 7.00; red fox, large, $1.30 to 1.40; small, $1.00; cross fox, $2 00 to 5 00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 15 to 75c.; rats, fall, 8c., kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Buckwheat..........	68,756	93,371

Groceries.—The last fruit steamer, the "Bellona," left Halifax Saturday evening, after discharging a small portion of her cargo for that port, and is now in this harbor with some 80,000 boxes of Valencia raisins, 660 tons of currants, besides a large assortment of other Mediterranean goods. The most of the Valencia raisins and currants are to order; some few thousand boxes of consigned Valencias have been mostly placed within the last few days, and there will be really little of the cargo undistributed. Values in all lines of Mediterranean fruits continue very firm; the Patras market for currants is, if anything, a little stiffer; Sultanas at Smyrna, and Tarragona almonds are also a little advanced at producing points California raisins are a shade easier, but it is claimed this is on rain damaged and smaller sizes, and for standard goods firmness prevails. Large and smallest sizes California prunes are scarce and firm; intermediate grades are in good supply and fairly steady. There have been fair receipts of California goods, which, however, have been quickly distributed as fast as received. First car lots of new pack of salmon are coming to hand; prices on the coast continue steady at $3.50 for best brands. The refiners report some slackening in the demand for sugars, which is only to be expected with the advancing season, and the active business they did in September and October. Quotations remain exactly as last quoted. Brokers and importers of teas report a remarkably dull business, jobbers apparently being stocked up for the present; values, however, are well held.

Leather.—Now that some of the shoe factories have completed stock-taking there is rather more enquiry, and some houses report a little more actual business doing. In dongolas, particularly some late sales of very fair amount have transpired. In the Quebec market some lines of black leathers are reported firmer. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.;

imitation French calf skins, 65 to 75c ; colored calf. American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c

Metals and Hardware.—Some sales of Summerlee pig iron are reported as low as $17 ex-wharf, supposed to be owing to the importer not wishing to have to put same in store. The competition of Hamilton iron has also had some effect on Carnbroe, which could be probably bought at $16 in fair quantity. A few small sales of No. 2, Siemens, are reported at 16. Pig lead is rather easier, and some moderate sales are reported at $3 65. Ingot tin is also a little easier. In other lines we hear of no changes. We quote:—Summerlee pig iron, $18.00 to $18 50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17 00; No. 3, $16 50; Shotts, $17 25 to 17.50; Carnbroe, $16.00 to $17 00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, $15 50 to $16.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16 50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto. $12 00 to 13.00; bar iron, Canadian, $1 40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5 90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2 05; Nos. 17, $2; No 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D. Crown, I C, $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; bes; cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5 00; American spelter, $4.75; antimony, 9 to 10c.

Oils, Paints and Glass.—The demand is quieting down as the season advances, though some houses are still fairly getting off shipments by boat before navigation closes, and also to rail points before winter freight rates go into effect next month. With regard to prices there is nothing new to note. There has been some little fluctuation in linseed oil in Britain, but local quotations are steady; also prices for turpentine, there being no further change since last week's decline of a cent. Glass is very firm at the late advance in English makes. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 40 to 42c. per gal.; Gaspe oil, 36 to 38c. per gal.; steam refined seal, 48c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4 25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, (German and Belgian) $1.30 per 50 feet for first break; $1.40 for second break; third break, $2.90. English, $1.40 for first break; $1.50 for second break.

PATERSON & SON,
General Agents for Dominion
Montreal, Que.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN
Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Millers' & Manuf'rs Ins. Co
ESTABLISHED 1885.
HEAD OFFICE:
Queen City Chambers, Church St., Toronto.
DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT
Authorised Capital................$1,000,000

WHERE PROTECTION LEADS US.

The Protectionist policy of our American neighbors, as seen in the Dingley Bill, seems to have given an impetus to Protection in Europe. Among other powers, Bulgaria is taking measures to protect home manufacturers from foreign competition. That government has declared that every Bulgarian Government employee in receipt of a monthly salary must be clothed from head to foot in cloth and leather of native manufacture only. Cloth and leather manufacturers are allowed to the end of the present month to provide themselves with a registered trade mark, which all articles must bear, and without which evidence of home-make no article can be supplied to any functionary. That functionaries will not like this regulation, and that they prefer to get their clothes and boots made outside Bulgaria, is evidenced by the stringent regulations which have been framed for the use of Custom House officers, and which prescribe nothing less than immediate confiscation of the exotic habiliments. Nor do precautions end there. At all Government and municipal offices an official is to be posted with instructions to assure himself by personal inspection that every coat, waistcoat, and trouser coming upon the premises is true Bulgarian.

HIS ONE REGRET.

Once a clergyman went to pay a visit to an old Yorkshire yeoman, who was lying on his deathbed. After a few preliminary words, the worthy minister said that, if the veteran had anything on his mind, he hoped he would ease his conscience and confide it to his pastoral ear, so that he might die in peace. "Well, sir," answered the old sportsman, "if 1 only had to live my life over again, I'd fish more with bait and less with flies."—*Argonaut.*

Under the same heading, "His One Regret," might be placed the saying of Sergeant Moloney, a retired pensioner and an enthusiastic fisherman of Detroit River in days gone by. He suffered a long illness one winter, in fact was very near death's door, and recovered but slowly. Being afraid that he might become too infirm to fish any more, he said to a neighbor one March morning, in a weak voice and with a longing look towards the river, "If I could only get another sayson's good fishing, I wouldn't care a dom." It is consolatory to know that he did get better, and that he was "converted" from a profane Sunday fisherman into a faithful frequenter of a dissenting church.

AMERICAN COMPETITION IN IRON AND STEEL.

Englishmen are now admitting that they entertain grave fears on account of the low range of manufacturing costs attained in the United States. The engineering strike has directed attention to the fact that English employers have not the same control over their workshops and workers that prevails in the United States, and there is a general fear of competition from this country. But this fear is not alone on account of the difference in the two countries in relations between employers and workmen, as the following from J. S. Jeans, former secretary of the Iron and Steel Institute of Great Britain, will show:

"The United States have now attained to such a low range of manufacturing costs as no European country can excel, and probably none can rival. The cost of producing Bessemer pig iron in the most favorable circumstances is now in that country 10 to 15 shillings ($2.50 to $3.75) per ton less than the corresponding costs in Great Britain. The difference in the cost of producing a ton of steel is at least as much, and in the majority of cases is likely to be a good deal more. I know of cases where the labor cost on a ton of billets and rails is 25 to 35 per cent. less than the lowest labor cost I have ever heard of in this country, although the rate of wages paid in America is materially higher. Quite a number of iron works in this country pay from 15 to 17 shillings 6 pence per ton for their coke, which in the neighborhood of Pittsburg is delivered at works for 5 to 6 shillings per ton. The United States not only command richer and cheaper ores, but they have the fundamental advantage of possessing unlimited indigenous supplies, whereas this country is now producing 30 per cent. of its total output of iron from imported ores, about the extent and duration of which there is a considerable amount of anxiety. Now the bearing of all this upon the present dispute is manifest. American engineers can purchase the materials of construction at a considerably lower range of prices than is possible in this country. This fact would alone place them in an almost impregnable position, even assuming that all other things were equal."

PETROLEUM IN JAVA.

The following is from the *Moniteur Officiel du Commerce,* Paris, July 1st, 1897: "There are in the districts of Lidah and Koetei forty wells, with an average daily production of 19,800 gallons of oil, which could be easily increased to 25,000 gallons. Recent reports are to the effect that two new wells have been discovered, producing some 1,400 barrels per day additional. In the district of Panolan, there are 15 wells, the largest of which has a daily production of 2,400 barrels. The wells of Tinawen have been but little exploited. A company has obtained a ten-year concession for this district, and the probable yield is estimated at 1,600 cases a day. There are two refineries, and another in process of construction. The paraffin factory at Ploentoeran, which has a capacity of production of 6,000 pounds a day, is only partially in action. A factory at Wonokrano supplies all the oils necessary for the sugar refineries and for the railroads of Java. Statistics for the last eight years show that the production of refined petroleum on the island has increased from 8,000 cases in 1889 to 1,250,000 cases in 1896. During the month of January, 1897, the production reached 108,007 cases, against 87,577 cases in January, 1896. The same journal, in its edition of August 5th, has a communication upon the same subject, to the effect that the exports of petroleum from Java have already begun to be a serious menace to the American trade.

QUESTIONABLE HONESTY IN TRADE.

If English trade is not honest, where shall we find honesty in trade? Of course, the English contemptuously say the foreigner is not honest, but here is an Englishman and an English journal deliberately "speaking out in meeting." It is not long since Lord Justice Fry, lately retired from the bench, wrote to the *Times* to show that the question "whether the morality exercised in the conduct of business in this country is satisfactory" can only be answered in the negative. Sir Edward Fry is practised in the art of summing up evidence, so that his conclusions are not to be dismissed lightly. The *Draper's Record* says, on this subject: 'The over-insurance of vessels destined to be lost, and the adulteration of articles of food and drink, are subjects with which this journal has nothing to do; but the trade we represent is certainly concerned in the allegations made regarding this fraudulent imitation of trade names and trade marks, the scamping of work for which a salary is paid, the adulteration of manufactured goods, and the exaction of illicit commissions. Upon the latter point we have more than once expressed an unequivocal opinion. Sir Edward Fry has obtained some information from an eminent firm in the North of England, whose experience is that the whole course of business is riddled with bribery. Commenting upon this, an evening contemporary opines that such a state of things must greatly handicap us in our struggle with the foreigner. Undoubtedly it has this effect; but it is in a measure consoling to remember that, however prevalent the system of secret commissions may be here, it is vastly more so on the continent."

"PUT UP JOBS" MUST BE CAREFULLY PUT UP.

People who make up their minds that they will "beat" an accident company should take precautions against untimely visits of agents and adjusters of companies. Not long ago an ex-detective thought times were too hard and that he could make a raise from the accident companies. He took out as many policies as he conveniently could in this city and then retired to his home on the south side and had a telephone message sent to the home office of one of the companies that he had been so unfortunate as to shoot himself in the foot. The secretary suspecting something was wrong went at once to his house, and the wife told him that her husband had been cleaning his revolver when it had been accidentally discharged and the bullet went through his shoe and foot. The shoe was asked for, but, when found, exhibited no hole as it should. The man himself was next interviewed and told an entirely different tale as to the shooting, and when confronted with his wife's tale he broke down and confessed that the shooting was a "put up job."—*Investigator.*

DEPTH OF FRESH WATER LAKES.

Lake Superior is very deep, but by no means the deepest lake in the world. The deepest fresh water on the globe is Lake Baikal, in Siberia; next comes Crater Lake, in Oregon, which is 2,000 feet in deepth. Lake Superior's greatest ascertained depth is 1,008 feet. Lake Michigan in its deepest part is fathomed by a plumb-line not much over 900 feet long, and on a line east directly from Chicago its utmost depth is not over 200 feet. Its deep part is the northern portion, the biggest figures in soundings being opposite the Sturgeon Bay Canal. Up towards the Straits of Mackinac it shoals off. Lake Michigan's bottom is 400 feet below the level of the sea. The deep part of Lake Huron gives soundings of 750 feet. The utmost recorded depth of Lake Ontario is 738 feet. Lake Erie is the shallowest of the five, in few places being deeper than 80 feet, though to the southeast of Long Point the depth reaches 204 feet.

SCREW VS. PADDLES.

An interesting contribution to the once much mooted question of screw vs paddle efficiency is afforded by an illustration in the November number of Cassier's Magazine, representing two of the earlier steam vessels of the British navy, the paddle steamer "Basilisk" and the screw steamer "Niger," towing stern to stern, the vessels exerting their utmost power in opposite directions. From the very meagre particulars which are available, it appears, says Cassier's Magazine, that this trial of power took place in the English Channel on June 20th, 1849, and lasted one hour, in which time the "Niger" towed the "Basilisk" at the rate, by patent log, of 1.466 knots per hour. Both ships were of very nearly the same dimensions, the former having a length of 194 feet and beam of 34 feet, while the latter measured 190 feet and 34 feet respectively. The tonnages were 1,073 and 1,030, and the horse power equipments, 406 and 400 respectively. Both ships, too, were constructed at the Woolwich Royal Dock Yard, and the conditions therefore were as nearly alike as one could well wish them to be for the purpose of a fair comparison.

OLD COINS MELTED UP.

The United States Treasury is retaining all the United States coins received in the ordinary course of business bearing the figure of Liberty seated. These coins are sent to the Mint to be melted up Over three million dollars' worth in subsidiary coinage has been melted and recoined during the past year. Of course the new dies are used. This is but a drop in the bucket to the mass of old silver which is still in circulation.—*Harpers' Round Table.*

—There will be suspicion of an immigration policy that can require the dismissal of an old, trained and capable agent like Mr. John Dyke, to make room for a raw hand like Mr Alfred Jury, whose only known recommendation for the position is the fact that he has been useful as a political supporter. He will require some years of service before his knowledge of immigration methods is as great as that of the person whom he supplants.—*Winnipeg Free Press.*

—A Paris advertising agent, who recently painted the front of his establishment a brilliant red, has been sued for damages by a milliner, a jeweller, and a silk merchant, having stores opposite, on the ground that the reflection of color makes it impossible for their customers to distinguish the colors of the goods they wish to buy.

50 YEARS The Year 1897 is the SEMI-CENTENNIAL

OF THE

Canada Life Assurance Company.

ESTABLISHED 1847.

President, A. G. RAMSAY, F.I.A.
Secretary, R. HILLS. Superintendent, W. T. RAMSAY.
Asst. Actuary, F. SANDERSON, M.A., A.I A.

The Sun Life Assurance Co.

OF CANADA

ANSWERS TO ENQUIRERS.

PRESENTATION OF CHEQUE.

QUES. 1.—A cheque is drawn payable to . . . or order. When payee personally presents for payment cheque at bank upon whom it is drawn, has bank a right to demand payee's endorsement of same before paying him the preceeds? Can bank legally refuse to pay him proceeds unless he endorses cheque? Take it for granted that payee is known to bank or has been indentified.

ANS.—When the holder of a cheque presents it for payment at a bank he has to do nothing more than to present it to the person from whom he demands payment, but when a cheque is paid, the holder is to forthwith deliver it up to the party paying it. He need not endorse it, assuming that he is known to the bank or is otherwise identified.

QUES. 2.—A cheque is issued payable to . . . or order. Payee resides away from place where cheque is drawn payable and is unknown to bank (payer). Payee encloses cheque to bank with letter requesting bank to forward him proceeds, that is, he really presents it by letter, but does not endorse cheque. Can bank legally refuse payment without payee's endorsement?

ANS.—Presentment for payment must be made by the holder, or by some person authorized to receive payment on his behalf to the bank. The Bills of Exchange Act provides: "That where authorized by agreement or usage a presentment through the Post Office is sufficient." Although in England and the United States such a usage has existed for many years, especially in the case of cheques, it is said that no such usage has existed in any part of Canada. If such a mode of presentment be a good mode of presentment, the question of the payee's endorsement is dealt with in the answer to the first question, but subject to the limitation that if the payee be not known he must have himself identified to the bank.

QUES. 3.—"A," say in Toronto, draws on "B" in Chesley, through, say Merchants Bank, Toronto, draft is drawn payable to Merchants Bank of Canada, or order; Merchants Bank forwards draft to bank in Chesley for collection and remittance of proceeds without endorsing it. Can bank in Chesley refuse to remit proceeds to Merchants Bank, Toronto, unless they endorse draft?

ANS.—Until "B" has accepted the draft and named a place of payment there can be nothing to remit. Assuming "B" to have accepted the draft payable at his bank in Chesley, then the position is that of the payee of the cheque in either question 1 or 2, according as draft is presented personally or by letter for payment.

S. B. writes: "Kindly through your columns reply to the following: A. owns fully paid stock in Farmers' Loan & Savings Company, lately suspended; stock was purchased 72 days previous to suspension.

1. Would A. have recourse against previous holder of shares? No.

2. This company has charter under Building Societies Act, 1859. Is there a clause in this Act similar to clause No. 96 Bank Act, 1890, *re* liability of shareholders who have transferred their stock?" No.

A FILLIP was given to the Ottawa lumber market last Friday and Saturday by the advent in that city of a buyer for the Standard Oil Company of the United States, who, according to the *Citizen*, purchased large quantities, including about eight million feet from J. R. Booth, at remunerative figures.

JOHN BARBER

Mercantile Summary.

THE Tennessee Centennial Exposition, which closed on Saturday, October 30, was a great success in point of attendance and finances.

DR. REYNOLDS, of Ashcroft, B.C., editor of the British Columbia *Mining Review*, has consulted the Canadian Pacific officials as to the number of boats to be placed on Teslin Lake and other streams that form the route from Telegraph Creek to Klondyke. The Dr. says his company intend to take in 7,000 horses over the route and thousands of cattle as soon as the ice breaks up in the spring.

AN offer has been made by the city of Kingston, it is said, of a bonus of $50,000, a free site and free municipal taxes to Abbott Bros., Montreal, if that firm will remove their rolling mill works to that city, the concern guaranteeing work for from 150 to 200 men for the first two years. A site proposed for the works is the old lead works in the eastern part of Kingston.

G. WALLACE & SON, of Cardinal, Ont., who left the farm three or four years ago, to buy out a furniture business, have been obliged to assign, after being sued by several western manufacturing concerns.——G. A. Marion, of Rockland, Ont., formerly a clerk for the Canada Lumber Company, and who started storekeeping on a limited capital about two years ago, is declared insolvent.

EVEN in the free, far West the burglar thinks the world owes him a living by means of his profession. One, or more likely a gang, entered the hardware store of Young & Company at Cypress River, Manitoba, one night last week, and carried off goods to the value of $500. And two or three days afterward the safe of Bready, Tyron & Love, at Lumsden, was opened by robbers and $600 in cash secured.

BURGLARS were at work in several Barrie stores last week. Among the premises visited at night were Seager's drug store, Reedy's dry goods, Hunter Bros.' boots and shoes, etc.; Coffey's hotel, and J. Cheesman's grocery. The loss was nowhere serious, but the visits will make people more particular about fastenings. Word came on Saturday that the office of the Canadian Express Company at Trenton, Ont, was entered by burglars, the vault opened, and checks to the amount of about $2,500 stolen.

THERE was a good attendance at the third annual meeting and election of the New York Credit Men's Association, held recently in that city. The secretary's report showed the membership of the association to be 323. It was deemed advisable to ask the N. Y. associations at their meetings to consider (1) a uniform trade inquiry blank, its form, requirements, fairness and desirability; and (2) the relation between credits and collections, and in what way can that relationship be best sustained; what are the cardinal principles that should be recognized in the treatment of open accounts, and what system is best adapted for their enforcement.

A VERY old established general store firm of Arnprior, J. Tierney & Sons, with a hitherto favorable record of a quarter of a century or more, have somewhat unexpectedly called their creditors together. The statement presented showed liabilities of $21,000 and assets of $23,000. The firm offered 30 cents on the dollar and afterwards 35 cents, but this did not satisfy the creditors. There is real estate valued at $22,000 belonging to Mr. Tierney, but it is mortgaged for $18,300. The creditors also discovered that Mr. Tierney had recently put two mortgages, totalling $6,300, on his real estate in favor of his two sons. The creditors met in Toronto, and asked the firm to assign to Henry Barber.

A VOLUNTARY assignment has been made by J. N. Hamel, of St. Jeanne de Neuville, Que., originally a bailiff, and of late a small merchant. He owes but little.——G. A. McIver, of Milan, Que., is another beginner in business, whose lack of experience has brought about an early embarrassment. Formerly a farmer, he began storekeeping less than a year ago—getting goods on credit, of course—and is now reported to be compromising at 40 cents on the dollar.——Hercule Chene, of Cheneville, Que., has quite a lengthy record, having been in business, off and on, for over 25 years, but has not achieved much success. He is reported to have been in deep water in 1878, and to have compromised in 1891. His assignment is now reported.

NOVA SCOTIAN failures of late occurrence are as follows: E. P. Nelson, dealing in men's furnishings, at Westville, has assigned, owing $3,200, and making preferences of $1,400, which will likely absorb all the available assets.——A Halifax grocer, W. H. Stimpson, has assigned, owing $2,500, and making no preferences. He was previously of the firm of Lordly & Stimpson, who failed in 1888.——Wm. Almond, of George's River, and H. D. Gilles, of Upper South West Margaree, both small traders, have also assigned.——C. & G. Wilson, dry goods dealers, of Windsor, and sufferers to a heavy amount by the late sweeping fire, have written their creditors, saying they are unable to meet their liabilities in full, and proposing a settlement at 50 cents.——Miss Bertha Smith, milliner, of the same town, is somewhat similarly circumstanced. She has $1,700 insurance on a loss of $2,700, and asks creditors to accept 60 per cent. of their claims.——Ezra C. Shand, maker of doors and sashes, at Windsor, offers to settle liabilities of $4,000 at 70 cents in the dollar.

MONTREAL commercial casualties for the week are as follows: A demand of assignment was served some days ago on E. Dagenais & Co., dry goods merchants. They gave notice of contestation, but eventually called their creditors together on Monday last, and have made a proposition to pay 80 cents on the dollar. E. Dagenais failed only last year, in September, and tried to compromise at 55 cents, but creditors wound the estate up, and he afterwards resumed under cover of a brother's name.——Consent to assign has been fyled by W. C. Norman, a manufacturer of spring beds, who a few years ago was doing a very fair business, which, however, has suffered much decline of late.——John Mason & Co., dealing in clothing and second-hand goods, are insolvent, with liabilities of $2,100.——J. R. McDonald, grocer, is asking a settlement at 10 cents on the dollar, which it is to be hoped he will not get.——J. A. Guimond, began a men's furnishings business, early last spring, on small capital. During the summer he opened a branch store in the east end, and has now made a voluntary assignment.

Two small failures are reported from Quebec in the shoe trade. Charles Lagace and Edouard Montminy, who recently entered into partnership to do a small manufacturing business, under the style of the Royal Shoe Company, have made a voluntary assignment. They only owe about $1,500.——J. A. Bourbeau, after a few months' experience as a clerk, started a small retail business last spring, but has already assigned.

The Gurney Foundry Co., Limited,
TORONTO.

The Gurney-Massey Co., Limited, Montreal

Mercantile Summary.

The water-works by-law has been carried at Rat Portage.

The value of buildings erected in Berlin during 1897 is placed at $160,000, and the town has grown in population by 608.

The treasurer of Middlesex County is advertising for tenders for $24,000 consolidated debt debentures of that county, payable in twenty years.

Guelph debentures for local improvement, $7,365, bearing five per cent. interest, were sold this week to H. O'Hara & Co., of Toronto, at 103.55.

Freight rates on grain this week from Duluth to Buffalo are 2 cents per bushel for wheat, Buffalo to New York, via Erie canal, including charges at Buffalo, 4½ cents per bushel.

The general stock of T. J. Nicholls, of Gorrie, valued at $4,577, was sold on the 13th by auction at London, at 67 cents on the dollar A. Dulmage, of Lakelet, Ont., was the purchaser.

At the regular meeting of the directors of the Le Roi Mining Company, held at Spokane last week, the 21st dividend was declared. The dividend was $50,000, making a total of $675,000 paid.

From Bristol, N.B., is reported the insolvency of Mrs. W. A. Sherwood, general store. Her name has been used as a cover, for the past six or seven years, by her husband, who failed as one of the firm of W. A. & J. W. Sherwood.

At the sale of G. T. Phillips' insolvent estate, in Quebec, on Saturday last, the stock of plumbers' goods and tools, $3,000, was bought by D. C. Morency at 30½ cents in the dollar. The book debts, $861, went to M. J. Murphy, at 19 cents in the dollar.

Belleville six per cent. debentures to the amount of $30,000, were sold in 1877, and yielded $26,100. A similar sum, bearing four per cent. interest, was disposed of last week to the Ontario Mutual Life Company, and yielded $31,602, representing a premium of more than five per cent.

A considerable contract has been made by the Royal Electric Company, of Montreal, with the town of Fort William, for apparatus and machinery for the construction of an electric lighting plant at that place. The contract price is $13,000, and it is expected to be ready in January.

The revised asessment rolls show that the city contains real estate to the value of $1,010,919, and improvements to the value of $415,551, says the *Rossland Miner.* This makes the total municipal assessment $1,426,460, but as only one-half of the assessed value of improvements can be taxed, the city's valuation for taxation is $1,216,694.50.

An account of the trade sale of rubber goods held by Benning & Barsalou for account of the Canadian Rubber Company, on Thursday of last week, in Montreal, reached us too late for last issue. Over 5,000 cases were sold on that occasion, bidding being spirited, and the audience composed of buyers from different provinces, e.g., the Western Shoe Co., London; H. Cole, Almonte; N. B. Gould, Port Hope; Hally Bros., Toronto; Tibbitt Bros., Three Rivers; many Montreal buyers, and a sprinkling from Sorel, St. Hyacinthe, and other Quebec points.

Of the suburbs of Montreal, St. Cunegonde has done well in an economical direction as a municipality. It had a surplus of $6,300 last year, and it is likely to show, acording to the city clerk, a surplus of $4,500 this year.

A report of the financial condition of Nelson shows a revenue since the incorporation of $59,835. The disbursements were $45,352, leaving a balance on hand of $14,482. The sum of $900, independent of the balance stated, has been set aside as a sinking fund to meet the debentures.

The latest and best information gives the size of the Louisiana rice crop at between 900,000 and 1,000,000 sacks, or between 3,500,000 and 4,000,000 bushels, while the crop of the Carolinas will aggregate some 1,200,000 or 1,500,000 bushels, making the total production of American rice between 4,700,000 and 5,500,000 bushels.

The Pullman's Palace Car Company's shops at Pullman, Chicago, annually consume 50,000,000 ft. of lumber, says the North-west *Lumberman.* When it is considered that much of this lumber is high grade hardwood, it can be seen that it represents a good deal of money. The variety consumed includes yellow pine, white pine, Norway pine, fir, oak, poplar, basswood, cottonwood, mahogany, birch, cherry, holly, ash and other kinds.

There would appear to be a fair degree of activity in the timber trade of Quebec last season. The quantity of waney white pine culled at that city to date is 4,311,340 feet, or double that of last season at the same time. White pine reached 832,589 feet, nearly treble that of the preceding year, while red pine shows 211,217 feet, four times the quantity of 1896. Other woods such as oak, ash, elm, show an increase equal to about 25 per cent.

The creditors of George William Harvey McKenzie, merchant, of Little Cascapediac, Que., held a meeting at New Carlisle lately, and W. Kempfer, of that place, was appointed curator, John Ferguson, of Toronto, and J. Neil Campbell, of Amherst, N.S., being appointed inspectors. The condition of the estate is fitted to arouse indignation on the part of the creditors. Assets $1,721, liabilities $8,049. an apparent deficit of $6,618. McKenzie is offering a compromise of 35 per cent. If the estate is wound up according to law it will only pay five or ten per cent.

There is a good deal of activity among merchants by reason of the near approach of the close of navigation on the St. Lawrence and the lakes. At Montreal heavy goods are being sent out per last boats. The last steamer of the C.P.R. line will leave Owen Sound for Fort William November 29th, from Owen Sound to Sault Ste Marie and intermediate ports of call —North Shore Navigation Co.—November 23rd; Great Northern Transit Co., November 25th; Charlottetown Steam Navigation Co., from Point du Chene and Pictou for Prince Edward Island, uncertain, probably between December 5th and 10th, Dalhousie steamer, for Baie de Chaleur ports, November 20th. The steamers from Detroit to Cleveland expect to lay up about 1st December.

Mercantile Summary.

THE granite quarries at Shelburne, Nova Scotia, will ship to Aberdeen, Scotland, in December next, 200 tons of their famous granite.

THE jewelry stock of J. H. McLelland, Hastings, has been sold by Richard Tew to Mrs. McClelland for sufficient to pay the creditors 20 cents on the dollar.

THE liabilities of the estate of C. & C. J. Wilson, woolen mills, Cumberland, who have assigned to A. P. Mutchmore, are said to amount to about $45,000.

A FIRM which carries on a brickyard at Bloomfield, P.E.I., have recently installed a new brick-making machine, which will turn out 10,000 finished bricks per day.

Two hundred and twenty installations of electric light have been made in Buenos Ayres, Argentine, this year. Theatres, clubs, churches, banks, and newspaper offices.

A LOT of hardwood was burned last Saturday by a fire in David Davidson's mill yard. The town brigade saved the mill, but two million feet of lumber, mostly hardwood was burned. The loss is estimated at about $20,000.

THE records of the various States of the United States show a consumption of 1,575,632 tons of commercial fertilizers for 1896. Of this total, the eleven Southeastern States, grouped with Georgia, consumed 72.21 per cent. of the whole amount.

THE Winnipeg *Free Press* understands that Mr. Simpson, manager of the Bank of British North America in that city, is to leave shortly for Vancouver, to take the management of the bank's branch at that city, and will be succeeded by Mr. Bailey, of the New York branch.

MR. W. J. BELL has ceased his connection with the Bell Organ and Piano Co., and intends to join the service of an opposition firm. He brings an action against the Bell Organ and Piano Co., claiming $378 for commissions on sales of goods, and $3,000 damages for wrongful dismissal.

TENDERS FOR SUPPLIES
1898

The undersigned will receive tenders for supplies up to noon on MONDAY, NOVEMBER 29, 1897, for the supply of butchers' meat, butter, dairy and creamery, giving price of each, flour, oatmeal, potatoes, cordwood, etc., for the following institutions during the year 1898, viz.:—

At the Asylum for the Insane in Toronto, London, Kingston, Hamilton, Mimico, Brockville and Orillia; the Central Prison and Mercer Reformatory, Toronto; the Reformatory for Boys, Penetanguishene; the Institutions for the Deaf and Dumb, Belleville, and the Blind at Brantford.

Two sufficient sureties will be required for the due fulfillment of each contract.

Specifications and forms of tender can only be had by making application to the Bursars of the respective institutions.

N.B.—Tenders are not required for the supply of meat to the Asylum in Toronto, London, Kingston, Hamilton and Mimico, nor to the Central Prison and Mercer Reformatory, Toronto

The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Mercantile Summary.

THE people of Nelson, B.C., have chosen Samuel F. Calkins chief of the volunteer fire department. He will also act as fire inspector and patrolman.

THE Attorney General of Kansas is about to prosecute members of the Kansas Wholesale Grocers' Association under the anti-trust law for fixing prices of sugar, tobacco, soap and other staples.

A DESPATCH from Sydney, N.S.W., under date Tuesday last, states that the wheat crop of New South Wales is approximated at 9,343,000 bushels, an average of 9.9 bushels per acre.

PRETTY close to forty miles an hour is the speed reached by the newest British torpedo-destroyer. On Wednesday of this week the torpedo boat "Crane" had her official trial in Stokes Bay, and developed the speed of 32.49 knots.

A BAILIFF is in possession of the tailoring stock of Thomas Gray, at Vancouver, B.C., under a chattel mortgage for $3,000, held by his principal creditor.——Last December Henry Bauman went from Seattle, Wash., to Rossland, and opened a cigar store. Now he makes an assignment.

ON Monday last the creditors of James A. Francis, clothing, dry goods, etc., Essex, had a meeting in Toronto. The statement then submitted showed liabilities of about $8,000 and assets nominally the same. The creditors seemed willing to accept 60 per cent. of their claims.

A MEMBER of the United States Fish Commission gives the arrivals of fish at Boston and Gloucester in October as 2,238,500 pounds fresh, and 1,605,000 pounds salted cod, 544,000 lbs. fresh cusk, 2,094,000 lbs. fresh haddock, 4,278,000 lbs. fresh hake, 961,300 lbs. fresh pollock, 879,000 lbs. fresh, and 620,000 lbs. salted halibut, 18,195 lbs. fresh, and 227,060 lbs. salted mackerel, 404,000 pounds other fish of all kinds, fresh and salted. The value of the catch received at Boston was $136,890; for salted, $5,900. The value of the receipts at Gloucester was $95,577; salted, $92,154.

THE National Board of Trade will meet in Washington next month. This body is made up of some forty commercial organizations, and its aim is to consider subjects relating to the commercial, legal and legislative affairs of the people. Five delegates will represent the New York Board of Trade and Transportation, as follows: G. Waldo Smith, F. B. Thurber, Silas M. Giddings, C. A. Schieren and W. H. Wiley. Among questions for discussion submitted by the New York Board are: "Monetary Legislation," "National Bankruptcy Law," "Pooling by Railroads," "Extension of American Export Trade," "A Trade Mark Law," "The Merchant Marine."

THE creditors of Lee & Company, general storekeepers, of Alvinston, met this week in Toronto and passed a resolution calling upon the firm to assign to Mr. Henderson. The assets and liabilities are nominally equal at $15,000. The assets consist entirely of stock, there being no book debts. This is the firm that lately bought a bankrupt stock in Alvinston, agreeing to give a chattel mortgage for the purchase money. Owing to a disagreement about the price of the stock, the mortgage was not given, so an injunction was taken out to prevent Lee & Company from doing business. This will have to be arranged before an assignment is made. The principal creditors are mostly Montreal houses.

THE New York Board of Trade and Transportation last week adopted resolutions that the preservation of the public health against the invasion of imported disease is co-equal in importance—if not of greater importance—with that of any of the great interests of the American people which are now cared for by officers of the Government. "Health and protection of life are more precious to the people and more necessary to their happiness than even the extension of our commerce, the fostering of our agricultural interests, the solving of our financial problems, the cheapness or efficiency of our postal service, the improvement of our rivers and harbors, or the enlargement of our navy." A committee was suggested to be appointed by the president to consider the desirability of creating a National Department of Health, and such other methods as may be suggested to protect the public health, especially as the same affects interstate commerce.

A MEETING of the creditors of S. K. Stewart, cigar store and billiards, London, has been called for to-day. This business was started by his father, who retired some years ago, giving his son about $1,800. The son's present embarrassment is said to be largely the result of inattention to business.——J. R. Jaynes & Co., general storekeepers, whose troubles were noted last week, have since assigned.——Something more than seven years ago, C. C. Lee opened a general store in Alliston, and in May, 1891, he was burnt out, losing about $2,000. After this he assigned, with liabilities of $7,500, and nominal assets of $4,600. A settlement was arranged at 45 cents. He thereafter continued the business in his wife's name, but her stock was then mortgaged for $4,600. Last January this was foreclosed, and J. Benner & Co. bought the stock at 46 per cent. It now appears that the stock is owned by Deborah Lee, and Benner issues an injunction to restrain her from selling it. In consequence of this she consulted her creditors on Wednesday last and was advised to assign. This she has done.——A. W. Martin, a Toronto Junction baker, owing to illness, and losses through bad debts, has been obliged to assign. He has been in business there about seven years, and for a considerable time has been doing well.——A Toronto druggist, John McKay, has had his stock mortgaged for a considerable time, and this week a bailiff advertised it for sale under a landlord's claim.——An assignment has been made by W. N. Guest, butcher, here. He has been some years doing business in a small way.

THE RETORT.

Here is a retort which a "dull" student once made: Professor: "You seem to be very dull. When Alexander the Great was your age he had already conquered the world." Student: "Well, you see, he had Aristotle for a teacher."—*Chambers' Journal.*

A DESPATCH from Sydney, N.S.W., under date Tuesday last, states that the wheat crop of New South Wales is approximated at 9,343,000 bushels, an average of 9.9 bushels per acre.

EARLY yesterday morning, the business part of the village of Tiverton, in Bruce County, was swept by fire. A block of six stores was consumed and other damage done. There were no means of fighting the flames but wooden pails. After losing $15,000 or $18,000, the residents will probably now set about fire protection.

PRETTY close to forty miles an hour is the speed reached by the newest British torpedo-destroyer. On Wednesday of this week the torpedo boat "Crane" had her official trial in Stokes Bay, and developed the speed of 32.49 knots.

FIVE of the seven freight steamers now building on the lakes are of steel and of the 6,000-ton class. All of the five steel steamers are to have quadruple expansion engines of 2,400 to 2,700 horse-power, and three of them are to have water tube boilers. The adoption of water tube boilers in these big freight carriers is a matter of importance to manufacturers of marine boilers throughout the country.

UNDER date November 13th, a Victoria despatch says that an increased activity is noticed in coal shipments from this province to San Francisco, the bulk of which trade has hitherto gone to England. It is explained that the advanced freight rates from Newcastle will tend to divert this trade, and induce a material increase in shipments from the coal stations of this province, where the situation is viewed by business men as a precedent of better times.

A REVIEW of the Present Railway Situation in the United States finds place in the *North American Review*. It presents what is now the general opinion of students of political economy. The present improved amount of railway traffic should not deceive any one into believing that traffic conditions are what they ought to be. As a matter of fact there is much more demoralization in rates, and consequent injustice, now than during the years of traffic famine. "This fact emphasizes the necessity for regulation—self-regulation under lawful conditions and with such governmental assistance, or supervision if you please, as shall conserve the rights of the sellers of transportation as well as of the buyers."

SENATOR OGILVIE, of Montreal, is the successful party in the suit of the Dominion Government against him to recover $77,337 in connection with the Exchange Bank case. It was argued in July last, and judgment has just been given in the Exchequer Court held at Montreal. In 1883 the bank secured deposits from the Government to the amount in all of $300,000. The last instalment of $100,000 was secured upon Mr. Ogilvie's personal security for its repayment. Some $227,000 was duly repaid, and Senator Ogilvie, when the Government sued him for the balance, claimed that the amount of his guarantee was included in the repayment. This view was taken by Judge Davidson, who has dismissed the action accordingly.

THE ALASKA OVERLAND TELEGRAPH.

When we read of contemplated arrangements for telegraph lines through northern British Columbia to the Klondyke gold fields, the great Russian and American Telegraph enterprise of forty years ago comes to mind. In an interview reported in a British Columbia paper, Mr. C. R. Hosmer, of the Canadian Pacific Telegraph, states that within a year that company will have telegraphic communication with Dawson City by the route surveyed by Mr. George Kennan more than 30 years ago. The survey in question was made in the infancy of Atlantic cable enterprise.

Upon the collapse of the Atlantic cable enterprise in 1858, when the cable ceased to work, it was thought that the difficulties of ocean telegraphy were insurmountable, and the necessity for telegraphic connection with Europe having become urgent, it was determined to build a telegraph line up through British Columbia to Alaska, and thence across Asia to Europe, a cable being laid across Behring Strait, and hundreds of miles of line were built. George Kennan was one of the surveyors, and it was then that he first became interested in Siberia, about which he wrote so graphically in the *Century Magazine*. With the successful laying of the Atlantic cable in 1865 the partially constructed overland route was abandoned. Mr. Jennings, the engineer, who has just returned from his inspection of north-western British Columbia routes, by order of the Government, tells us that fragments of poles and great quantities of wire are to be seen to-day along the route, both at Telegraph Creek and south of it. The name of Telegraph Creek, by the way, is derived from the enterprise in question, which was abandoned when later efforts to lay an ocean cable were crowned with success.

TRANSACTIONS ON TORONTO STOCK EXCHANGE.

Bank shares sold: Merchants, 10 at 186; Commerce, 467 at 134-137; Imperial, 92 at 188¾-192; Ontario, 134 at 100; Dominion, 75 at 251-251½; British America Ass., 90 at 126; Western Ass., 260 at 166½-167¼. THE SITUATION.

To Mr. Tarte is due the credit of being one of the first, if not the first, public men to emphasize the fact that the St. Lawrence route has not had fair play, and is far from being properly equipped for doing the business of carrying efficiently. The difficulty has not been in the canals, though these are being properly improved, but with the forwarders, who have been content to use old methods which in effect made success impossible. In a speech, at Toronto, the other night, Mr. Tarte gave an account of a recent visit which he made to Buffalo. "What," he asks, "did I see there?" The answer is that he saw "Buffalo equipped with 52 elevators, and having only the Erie Canal, a small ditch compared to our St. Lawrence; and, he adds, "I said to myself: 'If the Canadian people and the Canadian Government are alive to their duty, they will see to it that, in a few years, that state of things will change and we will change it." To within a very short time the advantages of elevators have been renounced by our river carriers and the business has been driven away from Montreal to the little Erie Canal. The competition on this side has been poor, inefficient, based on conditions that implied defeat; and then we wonder that our rivals, who have used all available means to secure success, have triumphed. We cannot expect to make the whole stream of traffic flow down the St. Lawrence, but it ought to be the best route for the exportable portion of the produce of the West. And it will not be the best route till it is properly equipped. At Buffalo the elevators are private property; and here the best rule would be, in the present condition of things, that elevators should be private property, care being taken to guard against a possible elevator combine, such as is not unknown in the Western States.

President McKinley's first plan of appointing different persons to deal with different subjects on which an agreement is desired, had some advantages of a technical kind; but it is one that makes against coherence, whereas a general plan, which necessarily implies compromise, is essential to full success. This defect was remedied by the President afterwards, giving General Foster power to treat on the various questions requiring adjustment between the two countries. The Canadian Premier suggests an International Commission as the best instrument for reconciling all differences. Canada is to reduce to writing the proposals she has to make, after the return of the two Ministers to Ottawa. Public opinion in Canada will sustain the Premier in declining to treat on the sealing question separately, feeling that an effort ought to be made, by means of equivalents, to settle all the open questions between the two countries at once.

Sir James Winter, the new premier of Newfoundland, expresses a desire to have the island he represents take a part in the negotiations for reciprocity between Canada and the United States, There would probably be no objection to this; indeed it is a logical deduction from the refusal of the British Government to sanction a separate treaty for Newfoundland. Senator Elkins is reported to be working for a defeat of the negotiations set on foot by Sir Wilfrid Laurier. This Senator it was who smuggled the clause into the tariff act intended to discriminate against the carrying trade of Canada, and he now renews the threat that if Canada will not agree to stop pelagic sealing, whether any other question be settled or not, to promote a bill at next session of Congress for killing all the seals on Pribyloff islands. Senator Elkins represents the extreme and unreasonable party in the Republic, and though there is every reason to suppose they are in a minority in the country, their influence for mischief, in the Senate, may prove to be considerable. But except as a means of influencing the negotiations, by a menace of rejecting any treaty which may be agreed upon, the attitude of the Senate is not yet a primary consideration in the question. Discrimination against the carrying trade is threatened to be renewed by the opponents of closer relations with Canada, at the coming session of Congress. It is too soon to be able to tell the decided set of public opinion on the questions raised by the preliminaries to negotiation at Washington; but so far as any impression has been made by the Canadian delegates, it is, on the whole, favorable.

While Canadian and American representatives at Washington are trying to arrive at an agreement on questions that now divide the two countries, all sorts of discords are heard out of doors, some of which will penetrate into the room in which the negotiators are at work. Want of discretion is responsible for most of these disturbing sounds. The organ of the extreme protectionists in New York does not want reciprocity, on any conditions that are possible. "To get our trade," the American protectionist organ tells us, "Canada would have to give us hers and shut out Great Britain. This," it is candid enough to admit, "we cannot ask, Canada ought not to offer, and Great Britain could not permit." This is more reasonable, in the conclusion, than some few Canadians are, who apparently want complete commercial reunion between the two countries. They tell us, in effect, that the only condition on which the American can agree to reciprocity is that Canada should cease to be a British dependency. To do justice to the Americans, this is not their attitude; they are not so unreasonable; they are quite willing to negotiate with Canada, a British colony by choice. Some prominent American journals take the ground that Canada ought to get reciprocity only by throwing in her lot with the Republic; but this is not the general, much less the predominant, attitude of Americans. The general feeling there appears to favor the removal, by mutual concessions, of all the causes of difference between the two countries. The opposition of interests, local and partial, stand in the way of a general good understanding, and the great object of diplomacy is to overcome it, by giving a due dominance to the general interests of both countries.

The decision of the Pope that the Roman Catholics of Manitoba are entitled to Separate Schools will surprise no one who has noted the views expressed by Leo XIII. on the Belgian school question. In the case of that country he condemned precisely such an arrangement as has been made for Manitoba. If we may trust the published abstract of the Pope's conclusion on the question submitted to him, his decision is based on a historical view of the case, which non-Catholics would regard as stronger ground than an *extra cathedra* deliverance. But his view of the historical evidence is not likely to be accepted either by Manitoba or the Dominion, and there is no reason to believe that it will lead to the annulling of the settlement arrived at. But it will, by supporting the contention of Bishop Langevin, make such of the Roman Catholics of Manitoba as are favorable to separate schools, believe that they have a grievance, which the civil power refuses to redress. To that extent, the question is re-opened. At the last general election, the Roman Catholics of Quebec fused to back Manitoba's demand for separate schools. If the politicians take the ground, as they probably will, that when the Catholic population of Canada decides against separate schools, that decision is one against which they have no mandate to appeal, the question will no more divide parties. In this light, what looks like an appeal to the Pope for a decision on the contention, which is now given, appears unfortunate. But if the appeal was confined, as it probably was, to a complaint against certain of the clergy for undue interference in the elections, it would not be without excuse.

THE SEALING QUESTION.

On technical points, the sealing experts of the United States, Great Britain and Canada, at Washington, have reached a general agreement. The fact that there has been a great decline in the Pribyloff herd is established; but it was impossible to show the precise ratio of the decrease. The number of seals at present on the islands, is loosely put at "from three to five times" less than it was in 1884. It looks as if these figures covered a difference in the opinion of the experts, and they suggest that the Americans may have contended that the decrease represents five to one, while the British experts did not allow it to have been more than three to one. As a common agreement on any specific figure was not possible, the difficulty was dealt with—it can hardly be said to have been got over—by saying in effect that the decline might have been three to one, or it might have been five to one. There is no attempt to say, with a nearer approach to accuracy, what it was. But the lower of the two numbers named is high enough to show that the herd is diminishing at a ratio which might, in a short time, end in the catastrophe of practical destruction. This fact agreed upon, it becomes important to know what is the cause of this decline in the number of seals? The experts tell us that it is not due to killing male seals on land, the polygamous habits of the animals permitting one male seal to serve several females; to the killing of females at sea the mischief is admitted to be due. The conclusion is reached that the herd can only be kept up if the destruction of females be less in number than the increase by birth of seals that are reared to maturity. With the decline in the number of animals, pelagic sealing, the cause of the mischief, declines, and is reaching a perilous condition, the catch at sea being reduced in a greater degree than the herd. Perhaps it is superior wariness, the result of excessive hunting, which enables the seals to show some slight power of recuperation, but not enough to save the race, in its past efficient condition, under present conditions of exposure.

Both the United States and Canada are interested in pelagic sealing, and, it would now seem, in restricting it; but their interests are not the same in extent, the catch at sea of Canada being much greater than that of the United States. And as the United States has the monopoly of killing the animals on land, there is another difference in the attitude of the two countries towards the sealing enterprise. It is in the power of the United States to prescribe any conditions it pleases for pelagic sealing by its own subjects; but Canada can only be dealt with by agreement. Will such an agreement be reached?

MINERAL PRODUCTION IN ONTARIO.

A summary of the mineral production of Ontario for 1896, given in the report of the Ontario Bureau of Mines, shows the aggregate value of such production for the year to have been $5,235,003; the number of hands employed 5,010 and the amount of wages paid out at $1,521,726. Subdivided into metals and minerals, structural materials and other products, we find the values of products as under: Metals, $963,288, of which sum iron and nickel appear at about $350,000 each; copper and gold at $130,000 each. Petroleum and other oils, or derivatives, are put down at the large sum of $1,955,295; natural gas, from 141 wells, $276,710; salt, from 14 salt works, $204,910. Cement is a considerable item, while stone, lime, brick and tiles mount up in value to a million and a half. Particulars are given in the following table:—

SUMMARY OF MINERAL PRODUCTION.

Product.	Quantity.	Value. $	Employees.	Wages. $
Building stone, rubble, etc.	....	394,000	780	273,000
Cement, natural rock..brls.	60,705	44,100	56	15,200

* Net tons of 2,000 lbs.

The production of pig iron during the year was 28,302 net tons, all by the Hamilton iron furnace; value, $353,780, or about $12.50 per ton. To produce this, 51,138 tons of ore was required, of which 35,868 tons was United States ore, the remaining 30 per cent. being Canadian, namely, a mixture of magnetic, hematite and bog ores, mostly raised during the year. It is satisfactory to learn from the report that the deposits of hematite and specular ores in the townships back of Bruce Mines are being explored and developed; and "it is confidently expected that during

1897 large supplies for the furnace will be procured from that quarter." Hematite ore is known to exist in Lanark County, notably the Playfair Mine, 12 miles from Perth, not now worked. There are indications of hematite in other parts of that county, and in the townships traversed by the Irondale, Bancroft and Ottawa railway, bodies of magnetic ore have been found, some of them of large extent. All that the report can say, however, of the development of these is that it is "hoped for."

The pages devoted to nickel and copper are interesting. There were 485 workers engaged in the mines during the year, and $247,000 in wages was paid; 109,097 tons of ore was raised, 73,505 tons melted. The nickel contents were 1,948 tons, of a value of $357,000, and the copper contents 1,868 tons, value $130,660. The total value of the product of the mines for the five years, 1892-1896, computed at the selling price of matte at the smelting works, has been $3,269,460, whereof the nickel represents $2,420,189, the copper $834,658, and the cobalt $14,613—not an unimportant industry.

Considering all that has been heard of the activity of gold mining operations in Ontario for a year or two past, one naturally expects to find that more than eight gold mines were producing in 1896. But this is the statement of the report; 8 mines; 189 workers; $91,210 paid in wages; ore treated, 13,292 tons; gold product, 7,154 ounces, of a value of $121,848. The average product of the ore was $9.16 per ton, so that much lean ore was treated. But there were some rich out-turns, too; for example, the Mikado mine yielded an average of $48.94 per ton (3¼ ounces that is) from a run of 297 tons treated at Rat Portage. The number of stamps in operation was 45, but it is considered probable that 130 stamps are working now. It is fair to remember, however, that the production figures quoted above of working gold mines do not give a fair idea of the work done last year, because account is not taken of development work on locations where no mills exist for treating the ores. A dozen pages of the report are devoted to records of development work done on the Sweden, the Nonesuch, the Scramble, the Norway, the Regina, the Hammond Reef, the Gold Cliff, the Hawk Bay, the Foley, the Empress, the Ledyard, the Deloro, and other mines, not only in the Lake of the Woods and Seine River districts, but in Hastings and Peterboro counties. We hope to return before long to a consideration of some features of this valuable report.

OUR EXPORTS MISREPRESENTED.

Some weeks ago we had occasion to show that by the British Customs returns the imports of Canadian bacon into the United Kingdom, in the nine months ending Sept. 30th, were 197,719 cwts., as compared with 318,129 cwts. in a similar period the previous year. A somewhat extended enquiry as to the shipments of Canadian exporters of bacon leads us to believe that these figures do not accurately represent trade conditions. Instead of decreased exports of bacon in 1897, we find good reason to believe that a considerable increase has taken place. There is little doubt that the customs figures of the British Government are carefully compiled by the officials in charge of them, and the misrepresentation is rather due to the fault of consignees. Instead of shipping by Canadian ports, the packers of this country have preferred to use the American ports. The United States is credited with an increase of about 700,000 cwts. during the period in which Canada is made to appear to have lost ground. A part of this gain is, however, without doubt due to the larger shipments of Canadian packers. Import and export statistics are worth comparatively little, unless they are accurate, and the Government should take steps to secure this desirable end. A penalty exacted from consignees who failed to mark the name of the country of origin on the package, would probably prove effective.

If the figures quoted above do not show a decrease in our exports, they are, at least, important in indicating that our shipping interests are failing to hold the pork packers' export trade. The exporters of bacon assert that by using the American lines they are able to place their products in the British centres of trade more regularly and with less delay than by the use of Canadian lines. In this connection it is interesting to note that American dairymen are accustomed to use Montreal as a port of shipment for cheese and butter. It is possible that what we lose in one way we gain in another. But Canadians are interested in knowing the true course of trade from this country, and any customs regulations which will assist them to a better understanding of it will be greatly appreciated.

OUR COAL MINES, EAST AND WEST.

The Nova Scotia coal mines are busy. The production of the Cape Breton mines is being well maintained. Shipments to date from the Dominion Coal Company's collieries are in excess of those to the same date a year ago, and a good movement is looked for by this company until the close of the present month. Considerable quantities of slack coal are being held and the company hopes to find a market for this when the present movement declines. In several of the mines improvements have been made and new plant added, with a view of bringing about more economical production. Recently the cost of mining or producing one ton of coal in four different countries has been compiled by the United States Commissioner of Labor, and the results which he arrives at are given in the table below:

Per Ton for	United States.	Canada.	Great Britain.	Belgium.
Labor, wages	$0.79	$0.84	$0.78	$0.85
Officials and clerks ..	3	2½	3	1½
Cost of timber	2¼	2¾	6¼	8¾
Repairs and supplies..	4½	9	11	8
Taxes	⅝	6¼	2½	3½
Owner's royalty......	2¼	none.	12½	1
Interest	1	2	¾	1
Depreciation of plant	⅝	1½	2¼	3¾
Total cost per ton at mine..............	$0.93¼	$1.08	$1.16¼	$1.12½

A plea of the United States operators in asking for protection in the Dingley Bill, it will be remembered, was that their workmen might be protected from the "cheap" Canadian labor. How much truth there was in this assertion can be seen from the above table, which shows that the Canadian miners receive, on the average, five cents per ton more for the coal they mine than the American workmen. It is, of course, impossible to take the wage per ton as an accurate gauge of remuneration for work in the mines, as the difficulty of mining must also be taken into account. The miners of Belgium receive more per ton for the coal mined than the workmen of any of the other countries; but this is due to the fact that the Belgian mines are almost exhausted, and the energy required to take out a ton of coal is relatively very great. The true measure is the standard of comfort, which, if it could be gauged, would, we believe, give an even more favorable showing to the Canadian workmen. We remember the expression used by a Pennsylvania gentleman when he visited one of the Cumberland Coal Co.'s mines near Parrsboro, several years ago. When he saw the width of the galleries below ground and the character of the appliances, he exclaimed, "Why, this is palatial!" Some bjection may be taken to a number of the items in the table above given. The cost of timber should be no greater in Canada than in the United States. It is difficult to understand, too, why supplies and repairs are more costly in our workings. The difference in the taxation is probably accounted for by including in the Canadian account the royalty paid to the Government. The returns, so far as Canada is concerned, were based, we believe, upon the Nova Scotia mines alone.

In the far West coal mining is being vigorously carried on. Floods in the McNeil mines at Anthracite, near Calgary, last spring, as a result of the mountain freshets, caused serious damage. Pumping was kept up continuously for four months, from June 15th to the middle of October, and in that period 30,000,000 gallons of water were drawn out, a tonnage equal to the total of coal, rock and slate taken out of the mine during the previous six years. Mining operations have been resumed, and are now running to full capacity. The Canmore mines are turning out 10,000 tons per month, and the capacity of the Anthracite mines is about 3,000 tons per month. Nearly 500 men are at work, and the monthly expenditure for provisions, clothing, and other articles, which aggregates from $15,000 to $20,000 a month, is a factor in maintaining the prices of farm products in the West. Shipments of anthracite coal are being made, not only as far east as Winnipeg, but also to Victoria in the West.

The British Columbia mines are actively at work, and large foreign shipments are being made, principally to San Francisco. The exports during the past three months have been distributed as follows:

	Aug.	Sept.	Oct.
New Vancouver C. Co.	12,270	11,794	13,716
Wellington	11,090	10,675	20,575
Union..............................	2,524	15,277	16,616
Total tons.....................	25,884	37,696	50,907

HEMLOCK TIMBER.

Canadians have become so accustomed to the use of pine wood, and use it in such quantities for house-building, fencing, paving, wharfing, street sidewalks, and a further variety of purposes, that they seem to have forgotten that the supply of pine on this continent will not last for ever. We are guilty as a people, too, of a contemptuous neglect of the valuable qualities of minor woods, which are quite as serviceable as pine for many uses; and in this we are extravagant, for these minor woods are cheaper, and yet of equal relative utility in many ways. Take hemlock as an example. This wood is plentiful enough, and forests of it are accessible enough. It combines the qualities of strength and durability with toughness and comparative lightness; and for purposes of construction, such as framing, joisting, sheeting, wharf-building, and intents which do not require color and grain to be the first consideration in a wood, is held in esteem by architects, as well as contractors. It is some years since hemlock began to come into use in the Middle States of the Union as a substitute for pine in cheaper jobs. In Pennsylvania this wood was used ten years ago, and is now being used for bill-stuff, and later in Illinois for paving. It is no longer a despised material. The forests of Pennsylvania and western New York have turned out, we are told, as high as a billion feet of hemlock annually, which has found consumption in those States, New Jersey, New England, and to some extent in Ohio. The *Timberman* tells us that in these States it is put to many uses which require a good quality of lumber. In Ohio the same condition of things is coming to pass; it is already the chief piece-stuff wood of the State. The journal mentioned says that:

> Michigan lumber producers long ago began to utilize their hemlock timber resources, and in the markets which are reached by rail from Michigan, hemlock has a large place. Indiana also has to some extent used hemlock, but west of that it is a comparatively new material as part of the retail dealer's stock. Hundreds of miles of Chicago streets are paved with cedar blocks resting upon a stratum of hemlock. It has been used for bridge planking, and to a certain extent for timbers, etc., for a good while, but it is only within a few years that retail dealers, generally, have come to look upon it with favor, and have asked their customers to buy it. But that condition of things is changing, and while Wisconsin hemlock will probably never fill the place that the hemlock of Pennsylvania does, inasmuch as its quality is not so good, it will grow in favor as white pine becomes more scarce and as its own merits become familiar to the consumers through the west.

Three or four years ago Mr. Gibson, the well-known New Brunswick lumberman, urged the people in the Miramichi region of that province to utilize more largely this wood, which is so plentiful in their forests. In 1894 or 1895, indeed, some American gentlemen proposed the erection of a 4,000,000 feet mill on the Canada Eastern Railway to saw hemlock logs into boards, which should be planed and dried, and shipped to the United States market. In that province, as in Ontario, doubtless, has been noticed the wastefulness with which the hemlock trees on acre after acre of forest have been hewn down for the sake of the bark, so useful for tanning purposes. But what becomes of the trunks of these trees from which the bark has been stripped? With shameful prodigality they are left mostly to rot. In Ontario we hear of hemlock logs being offered lately to saw-mills at $1.50 to $2 per thousand feet, but the mills cannot use it even at such a price because builders prefer coarse pine. Hemlock boards can be had at the mills up north to-day at $5 to $5.50 per M, which means perhaps $7.50 per M in Toronto. It does not pay to saw hemlock at such prices, say the operators. The price in Toronto a few years ago was $11 per M. It is not a sufficient reason for this waste of wood to say that carpenters or joiners find hemlock harder to work than pine and more apt to splinter. It is a coarser wood, to be sure, but can we afford to waste it and to go on using pine for all purposes? Shall we persist in national extravagance and the denudation of our forests because our carpenters and builders have a prejudice in favor of pine for purposes that another wood fits equally well? As well say that all classes of our householders are justified in the extravagance of using fine linen for sheets, and their wives and daughters in wearing silk underclothes, because of an old country prejudice which affirms that these, and not cotton, are the proper thing for such purposes.

A NATION'S MERCANTILE MARINE.

It would appear that the American people, or at least some of their observers and writers, are becoming aroused to the influence of sea power upon national commerce, industry and finance, and to the enormous disadvantage under which the United States suffers in being so little represented by shipping on the ocean. The current number of the *North American Review* contains an article entitled, "The Commercial Value of the Shipyard," in which the author, Mr. Lewis Nixon, shows that for sixty years England fought the nations for sea domination, and she gained it. The result has been the control of the carrying trade; that "every one who has anything to sell or buy, pays toll to her;" hers is "a master-voice in every international question or controversy, a dictatorship of values, and an arbitership of exchanges the world over." To the earnings of England's commercial fleet, the United states contributes roundly $300,000,000 per annum, and for thirty years she has paid from $112,000,000 to $300,000,000 a year. He urges, therefore, that the maritime spirit must be revived among Americans, and that "the desire to see the American flag abroad must be not merely a feeling of patriotic pride. but must become an instinct of trade." "Let us begin," he says, "to build ships, for which we have splendid resources, and carry our own commerce —only so will we get rid of this tribute to England of three hundred millions a year."

In the same direction a recent bulletin of the Bureau of American Republics tries to rouse the American heart by showing that the experience of all commercial nations demonstrates "the great value of the control by each maritime country of its carrying trade on the seas, not only as augmenting the profits of its existing commerce, but as contributing more or less directly to the extension of its sales abroad." If, therefore, the domestic exports of the United States exceed this year, as they did in 1892, one thousand millions of dollars in value, and the present year so far exceeds this ratio; if with these products carried in foreign bottoms the country is able to show such wealth and progress, what might it not be able to show if its products were borne in American ships? The last issue of the *Marine Review* shows a deep interest in the subject of a United States merchant marine on the seas. It says that influential men are determined that the subject shall be fully considered at the next session of Congress. Impressed with the immensity of British interests in ships and shipbuilding, Mr. Frank J. Firth, of Philadelphia, one of the vice-presidents of the Lake Carriers' Association, sends, upon his return from Europe, a communication on the shipping question. He applauds the support Great Britain has always given to her merchant marine, and desires that steps may be taken to restore the American merchant marine upon the ocean. It is doubtless galling to patriotic Americans to see that their country, in an eagerness for railway-building and internal development these last thirty years has neglected so important a matter as the ocean carrying trade. "Out of 1,458 vessels, of 4,105,000 tons, which passed through the Suez Canal in six months of 1897 *only one* was an American bottom!" cries a Chicago journal, which wishes such a reproach removed. Certainly it ought to be removed, and it can be removed with time. But even the United States, with all its immense resources, cannot make up such enormous leeway all at once. It is a gradual process.

BANK CLERKS.

The writer of a letter in to-day's issue on the subject of bank clerks brings forward some considerations worthy of attention. First, in regard to the responsibility of such officers, it is pointedly remarked that there is no position in a bank's service wherein very serious responsibility does not rest, daily and hourly, upon them, from the messenger upwards. And as to the bank teller, the ground is taken that "his position has in every sense a gravity of responsibility beyond that of even his next superior officer, the accountant." It is possible that so strong a view as this of the responsibilities of a teller's position has not been taken by all general managers of Canadian banks, else the scale of wages arranged for the tellers might have been more liberal. But on the other hand, while it is true that responsibility ought to be adequately compensated, it is argued that there are other compensations than money—such as prestige and the hope or promise of promotion; also that there are plenty of young men to be had for the positions, and that with reasonable care the shortages or other like difficulties that are said to beset the teller rarely come to pass. There are facts enough coming to light in every banking town in Canada to lend force to our correspondent's suggestion that very meagre pay has its dangers to the banks. To fix the salaries of responsible officers on no higher ground than that there are plenty of applicants, and if one does not care to accept the responsibility of a teller's post at a certain salary other people will, may result in disappointment and loss.

BANKING RETURN.

We give below a condensation of the figures of the statement of Canadian banks for the month of October, It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

	Oct, 1897.	Sept., 1897.
Capital authorized	$73,258,684	$73,258,684
Capital paid up	62,285,196	62,279,925
Reserve Funds	27,223,999	27,233,999
Notes in circulation	$41,580,928	$38,616,211
Dominion and Provincial Government deposits	5,708,238	6,716,316
Public deposits on demand	78,210,044	76,137,117
Public deposits after notice	137,156,188	135,682,927
Bank loans or deposits from other banks secured	22,000	80,000
Bank loans or deposits from other banks unsecured	2,873,741	3,304,066
Due other banks in Canada in daily balances	132,923	143,696
Due other banks in foreign countries	280.250	279,397
Due other banks in Great Britain	890,096	2,031,777
Other liabilities	338,208	456,158
Total liabilities	$267,192,690	$263,446,774

ASSETS.

	Oct, 1897.	Sept., 1897.
Specie	$8,754,736	$8,750,689
Dominion notes	17,283,787	17,586,188
Deposits to secure note circulation	1,881,704	1,779,454
Notes and cheques of other banks	8,214.133	9,093,759
Loans to other banks secured	22,000	28,500
Deposits made with other banks	4,175,721	4,094,247
Due from other banks in foreign countries	29,133,777	27,939,204
Due from other banks in Great Britain	13,038,952	12,462.134
Dominion Govt. debentures or stock	3,097,574	2,767,379
Other securities	28,394,466	27,802,361
Call loans on bonds and stock	18,308,707	17,314,047
	$132,305,557	$129,617,962
Current loans and discounts	208,485,640	206,779,863
Loans to Dominion and Provincial Governments	1,473,431	1,353,197
Due from other banks in Canada in daily exchanges	224,209	172,376
Overdue debts	3,615,117	3,622,730
Real estate	2,062,194	2,062,722
Mortgages on real estate sold	569,591	567,829
Bank premises	5,678,853	5,677,406
Other assets	2 124,683	2,420,619
Total assets	$356.539,468	$352,274,880
Average amount of specie held during the month	8,771,666	8,743,943
Average Dominion notes held during the month	17,455,407	17,462,464
Greatest amount notes in circulation during month	42,401,336	39,077,427
Loans to directors or their firms	7,079,839	6,897,049

—Writing on the decline of the West India export trade of Digby, Nova Scotia, and its effect on that town, the *Courier* says that another market which bids fair to be to Nova Scotia as much and more than the West Indies ever were, is South America. Lumber has already been sent thither from Lower Province ports, and it is urged that a good trade can also be worked up with Brazil and the Argentine in fish and farm produce, especially desirable since the war in Cuba has largely demoralized the trade of our Maritime Provinces with that Island. A firm in Westport, N.S., has purchased a steel barque, which is now loading at Philadelphia for the Canary Islands, and after the present charter is completed she is to be engaged in the South American trade. We learn also a Montreal merchant proposes pushing the West India trade from Maritime Province ports, having a warehouse in Halifax, a branch at Digby and a branch at Yarmouth. At each place storage warehouses are to be built. We shall hope to hear of satisfactory results from these proposed enterprises.

DANGEROUS CLEMENCY.

In March last year, George Elisha Alger, of Whitevale, Ont., was found guilty of conspiracy, along with Dr. Francey, to defraud a life assurance company by issuing a policy on the life of Alger's wife when she was plainly in a consumption. Mr. Justice Falconbridge sentenced the culprit to seven years in the penitentiary, pointing out at the time, what is gravely true, that such a crime is far-reaching in its effects, and that society, as well as life assurance organizations, must be protected against it. It is now learned, not without surprise, and we believe not with general approval, that the Minister of Justice has ordered Alger's release from incarceration, on the ground that the nineteen months' imprisonment which Alger suffered was sufficient punishment. There is danger that such leniency may be misplaced, and that scoundrels may be encouraged by it to risk a few months' imprisonment for the sake of the blood money they may earn by their dastardly crime.

CHRISTMAS BAZARS.

Already preparations are being made for the usual series of Christmas bazars in the aid of churches and charitable organizations. We leave it for our contemporaries who devote their columns to the discussion of religious questions, to pronounce upon this method of raising money, to say whether it exhibits the purely Christian spirit with which this work is supposed to be carried on. The standpoint from which we view the question is naturally that of the trader. In the beginning of the season the merchant, we will say, in a country place, buys a quantity of goods for the Christmas trade, and when about to place them on his counter and in his windows, expecting to reap the benefit of his investment, he finds an unexpected competitor in a neighboring church. It may be the church to whose support he has contributed for years. If the competition were a fair one the objections to it would not be so strong. The church undertakes little of any risk; the church pays no taxes; the work of preparing its bazar goods is performed by voluntary labor. Customers are solicited, not on business grounds, but are asked to spend their money in the bazar by reason of sentiment. The merchant, as a consequence, is very likely worsted in the struggle, and finds the goods upon which he had hoped to realize a legitimate profit thrown back upon his hands. As a rule, fancy goods, which form the bulk of the offerings at the bazar, are sold in small stores, the proprietors of which can ill afford to bear this loss.

SALVATION ARMY INDUSTRIES.

One reads in the Montreal *Witness* of one day last week, an item, "communicated," respecting the effort of the Salvation Army to reap, by means of a November week of self-denial on the part of itself and its friends, what is termed a financial harvest. This is in addition to what money it gets in by a persistent canvass, it "collects from door to door." And the item tells of the Army's poverty, sacrifice, and toil. One cannot but recall, however, the processional display in the streets of Toronto some weeks ago by this same Army, on the occasion of the coming of Miss Booth, the commandant. The assemblage of Army officers from other towns, the bands of music, the flags and banners, the children costumed to heighten the effect. These are all very well; but is it consistent with the vaunted poverty and sacrifice to have mounted men in the procession? Horses cost money to hire. Railway fares cost something. And the holiday dresses and streamers were hardly of a kind to correspond with the simplicity that should characterize these soldiers of the cross.

There was something in the industrial features of that procession which impels one to reflect upon the relation this Army sustains to other workers in the field of labor. Here were lorries. carts, wagons, filled with Salvation Army workers, plying their trades—and various were the trades. A car containing bakers at work; another with photographers; a third with printers setting type and running a Gordon press. A car illustrating the dairy work—for the Salvation Army has a dairy; a car representing a laundry—for the Army carries on a laundry; and so on through other branches of production. Now, if these enterprises can be made self-supporting by ordinary and equitable business methods; if the Army can give employment to men and women, and save their souls at the same time; let us bid them Godspeed. But we do not forget that this body, which is aided, in fact subsidized, by the contributions of a great many well-meaning people, uses the money thus paid them to go into competition with the baker, the grocer, the dairyman, the laundryman, who pays taxes in this and other places. It is one thing to get money for evangelizing purposes; it is another thing to use that money to go into opposition in business to the very people who contribute it.

LAKE MARINE ROUTES.

Information has reached Owen Sound that the steamers of the Ogdensburg Transportation Company, eight in number, now running between Chicago, Duluth, and the port of Ogdensburg, New York, will be placed on the route between Parry Sound, Chicago, and Duluth next season. The steamers are owned by the same interest as control the Parry Sound and Canada Atlantic lines of railway. The improved freight facilities will make Parry Sound rival Owen Sound on the Georgian Bay. The news impels the Owen Sound *Times*, in view of the 1,500,000 bushel elevator to be ready next year at Parry Sound, to call loudly for effort on the part of Owen Sound to secure an elevator for Owen Sound on the Grand Trunk side of the harbor. "If there is anything in the report that the G.T.R. accept a bonus of $25,000 from Collingwood and expend $150,000 in the erection of an elevator there, the contention that the company cannot go into an undertaking on capital account is disposed of, for if they can build an elevator at Collingwood there is no reason why on that score they cannot at Owen Sound." This fact should be placed very prominently before Mr. Hays. The destruction a few days ago of the elevator at Goderich leaves the company the problem whether Owen Sound or Goderich will make the better distributing point for Western Ontario.

DISTRESS AT WINDSOR, N.S.

A month has passed since the desolating fire of 17th October, at Windsor, Nova Scotia, and the condition of suffering and discomfort to which many of the residents of that devastated town are reduced, is indicated by incidents like the following: "The winter is staring us in the face, and not a single dwelling is erected by the local committee. Attempts at rebuilding are of the most pitiful kind, owing to want of skill and suitable materials." * * * "People are housed sixty-three to sixty-five in one small cottage, ten sleeping in a bedroom." * * * "Thousands of dollars in the hands of the committee are locked up in banks, or being frittered away in casual charity." In these pitiful circumstances the suggestion is made by Mr. H. P. Scott, in a letter of last week to the Halifax papers, that the relief committees of Halifax and Windsor empower Mayor Stephen, of Halifax, to call for tenders from provincial contractors for the erection of fifty or more temporary houses for the people, to cost from $150 to $350 each, according to size, and to be completed within one month. "Land," he says, "can easily be procured to build on. The unoccupied lots in Avontown, and probably lots on Chapel Hill, or between Clifton Grove and College roads, near the Long Pond, would be available for the purpose."

The proposal that part at least of the money subscribed in other places for the relief and assistance of these hundreds, possibly thousands, of homeless people at Windsor, shall be devoted to provide homes, albeit even temporary, for them, seems commendable. It is pitiful to think of persons, some at least of whom are able to pay rent, being unable to find decent house accommodation. "There are families here," writes Mr. Scott, "accustomed to the enjoyment in their homes of every comfort, now crowded into insufficient apartments, or having their members scattered about among different families, who can pay a reasonable rent, while, of course, many are not able to do so." Besides, in the future interest of the place, if it is ever to recover from this fearful disaster every effort must be made now to keep the population together. "Should they go away for this winter, many will never return, and the ruin or decline of the town is assured." It is of course natural for persons at a distance to think first of the necessity of clothing and feeding the sufferers by such a calamity as that which has overtaken Windsor. But their hunger is in the meantime averted, and in view of approaching cold weather, housing is a matter that cannot in common humanity be delayed. Let us hope then, that the authorities of the town will take steps, by borrowing money or otherwise, to secure buildings that will decently house those of the population who cannot afford to build dwellings for themselves.

ANSWERS TO CORRESPONDENTS.

Inquirer, St Mary's, desires to know "In what year was the right of issuing notes by banks in England cancelled? I understand there are still a few which have the right to issue." [Ans.—The Act of 1844 restricts the privileges of issuing notes ;to those banks, whether private or joint stock, which possessed the privilege at that date.]

2. "Is there any record of the amount of notes in circulation other than the Bank of England?" [Ans.—The Journal of the Institute of Bankers, published in London, gives the circulation returns of banks of issue. Of 42 private banks in England the circulation in March, 1897, average £427,659; and of 33 joint stock banks the circulation at the same time averaged £987,348, which was very far below the sum they are authorized to issue.]

Merchant, Brantford, propounds the following: "A firm in England draws on a customer in Canada for, say, £100. The bill is sent to a Canadian bank for collection. Is it customary to remit payment on demand or 60 day draft? Which rate should the acceptor of the bill be charged?" [We reply that it depends upon how the bill is drawn. A bank here would remit by demand draft on London, unless otherwise instructed. If the bill were ordered to be remitted for "at current rate," that would be understood to be the 60 day rate.]

Subscriber, in one of the Maritime Provinces, who does not wish his name or address used, appears to be in some doubt as to the likelihood of the modern building and loan associations making good their promises. He writes: "Will you please give me some information through the columns of The Monetary Times about the Globe Savings and Loan Co., of Toronto. Are they reliable? They state in their circular that by paying 50 cents monthly for 120 months the company will return $100, which is $40 more than was paid in. This means about 10 per cent. interest on the investment compounded, which seems like an extravagant assumption. Do any of the reputable and old-established loan companies in Toronto make such promises?"

[If our subscriber has filed his Monetary Times, and will turn to page 1559 of Volume xxix., June 5th, 1896, he will find something on the subject of their "extravagant assumptions." These companies do charge, just as he figures it out, from 10½ to 14 per cent. He must keep paying, according to the rules—he pays a sum periodically for expenses —and if he borrows, say, $1,000 for six years, he does not get the use of that $1,000 for six years, because he is paying back part of it to the society every month or fortnight. *He gets the use of only about* $640. If he likes to stand this shave, all right. The best that can be said for the system is that it offers facilities for saving on certain conditions, and these by no means cheap ones. Such companies offer a prospect, merely a prospect, that *if* all the payers continue to live and to pay, and *if* the borrowers will continue to stand a certain premium, the result is likely to be so-and-so at the end of eight or ten years. The old-established loan companies of Ontario do not make such promises.]

For further replies, see page 654.

BOOKS RECEIVED.

Report of the Loan Companies and Building Societies of Canada for 1896; compiled by Nicholas F. Garland, F.S.S., F.S.A., Assistant Deputy Minister of Finance, Ottawa, 1897.—This publication embraces returns by ninety-four companies, namely, 90 loan companies and building societies, and 4 trust companies, scattered over four provinces. No distinction is made in compiling the return, between the different classes of companies, as is done in the Ontario return of a like nature, and therefore the recapitulation of totals and the laborious comparative statements, which occupy the first twenty pages of the pamphlet, include the transactions of widely differing concerns, such as the various trust companies, the permanent mortgage loan companies, and the terminating building societies. The number of associations whose reports are given is the same as in 1895, though there are some changes in the list. For example, the Homestead of Hamilton is insolvent, the Ottawa B. & L. Society is winding up business, and the Orangeville B. & L. Association is realizing on its assets. But the returns of three companies appear for the first time here. Some totals from the recapitulation may be given: The paid capital of all the companies of all kinds (83 in Ontario; 7 in Quebec; 3 in Nova Scotia; 1 in Manitoba) amounts to $42,038,794. They have deposits of $19,404,000; debentures payable in Canada, $11,769,000; debentures payable in Britain, $44,736,000 (reduced from $49,408,000 in 1893). They have total assets of $143,887,376, of which 84 per cent. consists of current loans secured on real estate. Their cash on hand or in banks amounts to $3,650,718, and they own securities, such as municipal or Government debentures, etc., to exceed three millions more. The growth, year by year, of financial companies reporting to Ottawa, from nineteen in number in 1867 to nearly one hundred now, and from total assets of three millions then to a hundred and forty-three millions now, forms an interesting exhibit among the earlier pages of the pamphlet.

Town Streets, and How to Build Them.—We consider that the Canadian Wheelmen's Association has done a sensible and practical thing in publishing this brochure for free distribution. Probably no better authority on the subject could have been secured than the writer of the main portion of this pamphlet, Archibald Campbell, C.E., Roads Commissioner for the Province of Ontario. He deals with the subject broadly, dividing his remarks under headings such as Classifications of Streets—System of Oversight—Appropriations—Assessments—Width of Roadway, road metal, curbing and sidewalks —Drainage—Rolling—Implements. The last five pages are written by Isaac B. Potter, president of the L.A.W., who takes as his subject, "Country Road Drainage and Levelling." The illustrations on every page add to the interest and value of the book. Persons wishing to make use of these booklets may obtain a supply by applying to H. B. Donly, Simcoe, Ont., who is secretary of the Canadian Wheelmen's Association, which maintains a national committee on the improvement of highways.

A Link in the Chain.—A pamphlet devoted to the advocacy of building a canal through the counties of Essex and Kent, from Lake St. Clair to Lake Erie, thus avoiding the navigation of Detroit River. Besides maps and particulars as to the proposed enterprise, it contains a report of the Deep Waterways Commission.

Saint John and Thereabout.—Not only St. John, but Sussex, Sackville, Moncton and Amherst find abundant illustration and description in this publication, which is a special issue of the *Gripsack* devoted to the Intercolonial Railway, Halifax and Truro, the Bay of Fundy and the Bras d'Or lakes—all that stretch of picturesque country along the I.C.R. so interesting to travellers and attractive to sportsmen finds pleasing depiction. The educational buildings at Sackville are most interesting.

"Quo Vadis: A narrative of the time of Nero."—No ordinary story, this, but a purposeful and stirring account of a striking epoch in history, the conflict of moral ideas with the Roman Empire—a conflict from which Christianity issued as the leading force. The contrast between the imperious, sensual, selfish life of the then world's centre, and the humility and self-sacrifice of the followers of the lowly Nazarene is admirably brought out. And the stormy passion of the patrician noble for a lovely Christian, its rebuke and subsequent chastening, its domestic issue are described with dramatic fervor. The introduction of Paul of Tarsus and the bold Apostle Peter, under the very eye of the tyrant Emperor is a fine episode in the story. The writer shows an intimate knowledge of Rome and her great personages in Nero's time, and the tale of the burning of the glorious city is a terrible tale. Henryk Sienkiewicz is an artist in narration, and his translator appears to have done him full justice. The publisher is George N. Morang, Toronto.

FOR GROCERS AND PROVISION DEALERS.

Two steamships are discharging cargoes of raw beet sugar in the harbor of Montreal for the local refineries.

A telegram of Tuesday last from Saratoga, N.Y., states that the first instalment of 500 car loads of potatoes in bond from Canada to Cuba passed through that city on that day, but does not state what part of Canada they came from.

An Amsterdam despatch of Tuesday last says there was considerable excitement in the coffee market that day. Average spot, Java declined 9½ cents, an unprecedented fall. This is ascribed to large receipts and heavy crops, especially in Brazil.

The expert employed by the Ontario Government to trace the San Jose scale, has conclusive evidence to the effect that the pest came from nursery stock imported from California. Fruit growers are alarmed and a meeting has been called for early in December. The Dominion Government will be asked to prohibit the importation of all nursery stock from the States, and in default of this being granted the

Dominion Government will be asked to appoint inspectors to examine all such imported stock.

A gradual but steady advance in both beet and cane raw sugars is reported from abroad and the New York granulated market is excited. The anticipation of an advance in Canadian prices has caused a revived activity in demand since our last, and yellows are firmer by a sixteenth.

The heaviest shipment of German refined sugars that ever reached Montreal, some 7,000 to 8,000 bags, arrived at that port on Monday, and has had some effect, probably, in checking an advance in Canadian refined, which was deemed probable by reason of the bull news from abroad about sugar.

There is great actirity in the potato trade around Shediac, N.B., says the Moncton *Times*. The purchases of them will reach between 60,000 and 70,000 barrels, or nearly 200,000 bushels. The price paid was $1 a barrel for some time, but is now 90 cents. Nearly all will go to the West Indies and Bermuda. Commencing nearly twenty years ago in a small way, it has grown until now there are seven or eight warehouses, mostly frost-proof and some of very large size with stone basements.

An order-in-council has been passed permitting United States fishing vessels on the Pacific Coast to land their fish from the deep sea at Canadian ports and have them exported in bond to the United States. The city of Vancouver has been for some time past pressing upon the Government to permit this, as it would bring a large trade to the port which at present was done at American ports. On the other hand, the city of Victoria was not in favor of it. Instructions have been forwarded to the collectors of customs on the Pacific Coast to permit the landing of fish from the deep sea and exporting in bond to the United States for six months only. As there is no arrangement for American ships purchasing supplies, it is doubtful how the order will work.

The sugar-refining interests have been often accused of extorting money from the public by means of unlawful combinations in restraint of trade. The following extract from the annual report of the Acadia Sugar Refining Company, to be presented at the fifth annual meeting, on December 2nd, is in this connection significant.: "The directors beg to submit herewith the balance sheet of the company for the year ending September 30th, 1897. The business of the year has resulted in a loss of $21,082.19, which was due to continued depression in trade, extreme competition, and a further decline in the value of sugars. The balance at debit of profit and loss at the close of last year was $68,354.24, to which has been added the present year's loss, making the amount at the debit of this account $89,436,43, which is carried forward. The insurance on the property destroyed and damaged by fire at Moncton was duly collected by the Eastern Trust Company, as mortgagees, and the amount, with accrued interest, $59,198.57, is held by them, as shown in the financial statement. The efficiency of the refineries at Woodside and Richmond has been fully maintained."

The position of tea during the month, says a Colombo circular, October 7th, has altered considerably. Telegrams from Calcutta give a considerable reduction of the estimate, and from the following figures relative to manufacture and original estimate, it will be seen that it is quite possible that even the present estimate may not be obtained, the more so as indications point to the early setting in of the cold weather. This strengthens the position of both Indian and Ceylon tea very materially, and it seems quite possible that even higher prices may be reached than those yet obtained. Figures referred to: Manufactured to August 31st, 1897, 79,435,429 lbs.; original estimate of crop for 1897, 156,669,112 lbs.; revised estimate of crop for 1897, 148,011,705 lbs. The Ceylon official estimate for September was 7 to 7½ millions, whereas only 6¼ has gone forward to the United Kingdom. October will probably be about 7 millions. Owing to a breakdown in the railway, caused by a landslip, supplies in the immediate future are likely to be curtailed, as it is reported the slip will take a fortnight to remove, and transport by cart is necessarily slow.

ITEMS RELATING TO DRY GOODS.

Crimping or gauffering, as applied to materials, is making rapid progress in Paris, and promises to constitute a very important feature of fashion.

A novel weave is produced in Berlin by a machine that weaves two colors in the warp and two in the woof. The effect is very tasteful, and the design does not become apparent unless the cloth is moved or falls in folds.

News comes from Paris that the new prefect of police, M. Blanc, has issued an order forbidding women to wear high hats in the theatres. Well done, and pluckily done, M. Blanc. But we may remember that the chief authority of Chicago issued an edict of the same kind, but high hats are still worn in Chicago.

"Our minister preached a sublime sermon, Sunday," observed madame. "I did enjoy it so much. And right in the middle of it I hit on how to have my black serge fixed over. The whole scheme came like a miracle, and will work out no end of swell. That frock has been such a torment—I have had no good of it at all. It hung in the wardrobe, a reproach and a waste of material. Sermons are so beneficial. You really ought to go to church oftener. I am ashamed that you missed that one last Sunday."—*Chicago Post.*

Some observant hatter has been keeping track of the sizes of men's heads and writes the result of his observations to the *Apparel Gazette*. He has found that the demand for the various sizes run about as follows: Of his total sales, one-fifth consisted of hats 7⅛ in size; for 7 and 7¼ the demand was represented by 17 per cent each; for 6⅞, it was 15.6 per cent., and for 7⅜ size 12½ per cent. Sizes No. 6¾ and 7½ sold in the proportion of 7.3 per cent.; size 7⅝ at 1.66 per cent., while only .83 per cent. of his customers asked for the unusually large size of 7½.

Even the big monopolistic concerns, with tens of millions of capital, cannot always show monopolist profits. Last week, we are told by cable, shares of the Coats, as the great thread combine is known, dropped 11 points when an unfavorable annual report came out showing that the profits during the past year have fallen off $500,000. It is some eighteen months since the announcement that J. and P. Coats, Clark and Company, Jonas Brooks and Bros., and James Chadwick and Bros., amalgamated under the name of "The Coats Thread Company, and it was added that the company would raise the total nominal capital from $28,850,000 to $36,500,000. Great as the decline in profits appears when we hear the words "half a million," it represents only one-and-a-third per cent. on the enormous capital of this concern.

The furs to be worn this season are very elaborate, and resemble closely those worn by the beautiful women who sat for Sir Joshua Reynolds, Gainsborough and Romney. A set of chinchilla is typical of the present trend of taste in furs. The cape is very full and falls to just below the shoulders. Below the edge of the cape is a mass of foamy ruffles of pink satin and white lace. The high, flaring collar is lined with a mass of pink and white frills, and a broad pink satin ribbon comes around the neck outside of the collar and fastens in a big bow in front. The ermine capes, lined with Marie Louise blue satin, are as old-timey looking as those moth-eaten heirlooms from our great grandmothers. The soft, fluffy, blue-gray moufflon fur, so pretty and becoming for young girls and young women, is much worn. Pretty sets, including toque, muff and boa, are made of ostrich feathers in the natural tint, half brown, half gray, and trimmed with ruched frills of chiffon. An odd set of mink has a toque with crown of panther-spotted beaver, with two long plumes and a blue velvet bow for trimming.

The movement for the creation of a European Exporters' Association for the protection of creditors' interests in connection with Canadians on Canadian estates, is proceeding apace. In connection with it I have been shown a letter from a large Manchester firm, expressing pleasure at the news of the movement for "the rectification in some greater or lesser degree of the existing inequalities to which British houses are subject in the laws of Canada relating to insolvencies." Referring to recent failures in Canada, the writer of the letter says that "the circumstances connected with one or two of them have not been such as to inspire unbounded confidence in the methods of working such matters. In one case we see steps taken, in a matter of appointing a liquidator, in opposition to which the major interest (in this case European) have ranged themselves. In another case we find that the committee of inspection is presided over by the largest creditor in Canada, and that during the proceeding this creditor firm has had its goods returned (by a back door), to the detriment of the estate." These and other expressions of opinion show that the commercial community has been thoroughly roused as to the necessity of action in the matter, and I am glad to see that in Canada also the movement is receiving support. The presence of the Hon. W. S. Fielding, the Canadian Minister of Finance, at the meeting referred to, greatly increases the importance with which the proceedings will be regarded by the commercial community.—*Draper's Record.*

METALS AND HARDWARE.

A despatch of 12th instant from Ishpeming, Mich., thinks it safe to predict that throughout the Lake Superior iron mining districts the close of navigation will see less ore in stock at the mines than at the end of any shipping season since 1890, at the close of which year the stock piles were swept with brooms to get the last pound of ore. The Gogebic mines are more completely cleaned out of ore than at the close of any season for the past ten years. The Menominee, Marquette, and Vermilion ranges are also engaged in shipping the last of a large number of big stock piles which have been eyesores for several years.

A record for quick work has been made by the Buhl Steel Works, at Sharon, Pa. A new 20-ton electric travelling crane arrived at the plant, and the first piece was unloaded at 7 a.m. on Sunday. At 3.10 p.m. the crane was in operation, and at 4.15 was putting the ingots into the soaking pits.

A Philadelphia despatch of last week says the Baldwin Locomotive Works has received most extensive orders, involving, as it does, an expenditure of about $600,000, calling for 59 locomotives of varying types; are, with one exception, from foreign countries. These contracts have heretofore been awarded to English and other foreign makers. The largest single foreign contract that the company received preceding this was recorded early last winter from Japan, when one order, calling for 44 locomotives, was placed for the Japan Railway Company. Included in the latest order is one for 22 locomotives, 10 passenger and 12 freight for the Finland State Railway.

The Annapolis *Spectator* contains an extraordinary story about an Annapolis county boy named Eugene Cleveland—the boy is forty years of age now—who "has patented one of the greatest inventions ever known to man." While at work on a thresher in Manitoba, the story goes, he "conceived the idea that it was possible to have a cylinder whereby the exhaust steam would be utilized. He wondered why only 20 per cent. was used and 80 per cent. wasted." So he thought out a plan to cure the waste, and is now said to have fitted an I.C.R. locomotive at Moncton with devices whereby the consumption of coal is reduced from five tons to one. It is said that he has patented his plan (is it anything more than an expansion cylinder?) got Toronto men to go partners with him, and that all hands are on the high road to wealth. We trust it may turn out all that is expected.

THE CHEESE TRADE.

Only seven board meetings were held during the week. The offerings were, however, comparatively large, as 45,720 boxes were offered. The close of navigation at Montreal is almost at hand, and already estimates are being made as to the aggregate production of the year. In the season of 1896, 1,711,104 boxes were shipped from Montreal, which with shipments made after the close of navigation on the St. Lawrence, made a total of 2,062,446 boxes. Up to November 13th, more than 1,950,000 boxes of cheese had been sent forward from Montreal, so that it is reasonable to expect a much larger movement in the present year than in 1896. It is estimated by competent authorities that stocks west of Toronto amount to 171,000 boxes, and east of Toronto (not including Montreal), 150,000 boxes. The stocks in Montreal, 8th Nov., 1897, amounted to 240,000 boxes. If these estimates be correct, the total production of cheese in Canada is 2,514,310 boxes, and exceeds that of last year by about 452,000 boxes. Against this the total exports to date exceed that of the same period last year by 321,000 boxes, thus leaving stocks to-day in Canada 131,000 boxes in excess of what were held at the same time last year. We append the usual table:

Boards.	Date of meeting.	No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price. Cts.	Date of next meeting.
Listowel	Nov. 11	..	25,200	....	$7\frac{3}{4}$-8	Nov. 26
Kingston	" 11	..	1,085	....	$7\frac{3}{4}$-8	......
Perth	" 12	..	2,000	2,000	$7\frac{1}{2}$-$8\frac{3}{4}$	......
South Finch	" 12	..	150	....	..	May, '98
London	" 13	17	7,413	2,785	8-$8\frac{1}{16}$	......
Ingersoll	" 16	..	1,575	....	7-8	......
Woodstock	" 17	13	8,297	1,140	$7\frac{3}{4}$-8	......

INCREASED LIFE PREMIUMS.

It is proposed by a number of American life companies, notably the Mutual Life of New York, the Equitable Life, and the New York Life, to adopt on the 1st January ensuing a new table of rates, which will advance their premiums somewhat. The reason given for this is that the three companies named have decided upon a basis of 3½ per cent. interest, instead of 4. We are told that one or two Canadian companies are also anxious to adopt a scale of slightly higher premiums, and that the matter is likely to be discussed at the meeting to-morrow of Canadian life underwriters. Other American companies than those named above do not seem to consider any increase necessary; neither the Ætna nor the Metropolitan has adopted the new scale. It is true that the declining rates of interest procurable on investments of late years render it necessary to calculate reserve at a lower rate. But there is another consideration which should have weight. It appears to us that if more care were exercised in the expense accounts of certain companies, among them the trio of big New York companies first named, it might not be necessary to raise rates of premium. Rebating of life premiums is by no means dead on the other side of the lakes or upon this, and the price paid for business is distinctly too high. While discussing the general subject of reserve earnings and what other matters come before the association, we trust they will not neglect the important topic of expenses of companies – commissions and rebates among the rest.

FIRE INSURANCE MATTERS.

Our readers were told some months ago of the resignation of eleven out of twenty-four aldermen of the Ottawa common council, because, as they claimed, the city was being forced by the majority in the council to pay more than the fair market price for a steam fire engine furnished to that city by an American manufacturing firm. An Ottawa despatch now tells us of a novel feature in the case, which is this: The stated price of the engine was $4,200 in the United States, and the purchase was put through the city council by the aid of letters from the makers, the Lafrance Company, stating that that was their rock-bottom price in the United States. Now it turns out that the Lafrance Company entered the engine at the Niagara customs at a valuation of $3,500, and the Government will seize the engine for undervaluation, unless the Lafrance Company can prove that $3,500 is the usual price of sale in the States. It is the firm conviction of the people of Ottawa generally that there is boodle in this transaction somewhere. And it will be well if an investigation by Government authorities shall establish the overcharge alleged, and at the same time throw light on the parties who profited by the wrong done the municipality.

A committee of the Brantford council has had a demand from several manufacturing establishments of the city regarding better protection from fire, and in view of the need to enhance the safety of these establishments, and also in view of the great number of men that would be thrown out of employment should any factory be burned down, have recommended, and the council has agreed to, the provision of water-pipe and eleven new hydrants. The cost is estimated at $3,812.

A number of his friends were down last night saying good-bye to Mr. H. M. Boddy, who has left Toronto to take up his residence in Ottawa, where he will be manager of the Ottawa branch of the Imperial Life Assurance Company's business.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Nov. 18th, 1897, compared with those of the previous week:

Clearings.	Nov. 18.	Nov. 1t.
Montreal	$14,164,381	$15,099 019
Toronto	7,788,394	9,101,462
Winnipeg	3,641,495	3,578,282
Halifax	......	1,489,410
Hamilton	622,080	775,147
St. John	......	639,244
	$...	$30,682,564

Aggregate balances this week, $ .... ; last week, $4,286,291.

—A very welcome instance of procedure in the direction of what we may hope may prove to be an amended system of departmental conduct is noted by the Montreal *Gazette*. It is therein stated that when the position of Inspector of Inland Revenue became vacant, by the death of Mr. J. L. Vincent, the party managers in Montreal decided that the position be given to Mr. Joseph Mercier, a brother of the late Premier of Quebec. Accordingly a number of politicians went to Ottawa to direct the Minister of Inland Revenue in the premises. "Sir Henri Joly de Lotbiniere received the deputation politely, as is his wont, but after hearing their request, replied that he did not want anyone to meddle with the administration of his department; that he believed in the system of promotion, and that the late inspector's assistant would secure the coveted place." Well done, Sir Henri Joli. May we speedily hear of more instances of a like kind.

—There is but trifling difference from the earnings of recent previous half years in the figures of the Bank of Montreal statement for the six months ended with October last. The net profits for this period are stated at $609,940. For the same period in 1896 there were $603,350, and in 1895, $608,150. It might have been expected that the better trade of recent months would be reflected in the latest statement of our largest bank. But there was, perhaps, not time enough for the trade improvement to show itself in earnings. The next half year will exhibit larger earnings, though net profits exceeding twelve per cent. per annum are not to be despised,

Correspondence.

BANK TELLERS AND OTHER CLERKS.

Editor MONETARY TIMES.

SIR,—The Evening *News* of the 20th ulto., in raising the question of a bank teller being paid the small salary of $48.50, or say, $50 per month, scarcely excuses or accuses banks in paying such officer so small a salary. Nor, on the other hand, beyond the general and unquestionable proposition that there is no excuse for dishonesty, is it quite clear whether default in a teller receiving such salary is to be condoned or condemned. It hints, however, significantly, that such pay is too low, and the subject is one that admits of ventilation because of some mistaken views as to bank clerks.

It may be said generally of the responsibility of bank clerks that there is no position in a bank's service wherein very serious responsibility does not rest daily and hourly on such, from the messenger upwards. But in the position of ledger-keepers, bill clerks, and book-keepers, mistakes are clerical. Carelessness may easily involve a bank in loss or law-suit, and the guarantee bond of the clerk be rightly called on for his act of omission or commission, but these are very rare cases. As regards the bank teller, however, his position has in every sense a gravity of responsibility beyond that of even his next superior officer—the accountant. The accountant, on his part has much to see to, and if he flag in diligence great harm may ensue. But the handling of hard cash in and out across counter is a very different thing. And this brings into prominence the mischances to a teller, able and honest, thinking of what shall happen, looking forward at every thirty days' end to such salary payment as mentioned—in the meantime, making a mistake of $10 or $20, or possibly $500.

Doubtless, in the chief offices of the city and elsewhere, tellers receive a quite different salary, but in no case does a salary admit of a margin for making good losses; and the writer has to learn that any of the Canadian banks recognize the liability of even the ablest teller to money mistakes, excepting only, if rightly informed, the one leading institution, which provides a covering sum for mistakes. This operates on the one hand as a premium for careful work, and protection against the hardship that comes on a teller in being required to pay his losses out of his salary, whatever it be. On the other hand, it will be easy to advance banks' arguments that such grant in respect of tellers' misfortunes in institutions with numerous branches begun *de novo*, might be a serious draft on such bank. But this will not hold, for we are bound to presuppose that the character and life of the often very young tellers have been taken into consideration as a primary qualification and fitness for the trust, and so the call on such grant must be rare. If finding a teller apt to avail himself of it,it would very soon be discovered whether it was unfitness or something else. It is not to the question that in a small branch bank the amount of teller work is trifling. There is the liability to make a loss—and experience shows how almost always it is irretrievable (hence the unsound argument of tellers, that if charged with "shorts," they should be accredited the "overs"); but if loss is made, such small salary will not stand much draft on it to help, and can hardly be called on twice.

The writer in this is considering rather than condemning banks in requiring shortages to be made good by a teller, for he understands that some large banks in the Old Country require the same in their numerous branches. But the rule is not absolute, nor by any means largely acted on by the central provincial offices. In such banks as are referred to a teller or cashier is quite a superior grade officer, holding the position very often without expectation or wish to hold any other, and such officer is rarely condemned for a mistake rarely occurring.

An extensive acquaintance with the subject by the old bankers of Canada as to the hardship of an able and honest teller being mulcted for a loss he cannot pay, has, I doubt not, made them keenly alive to it. The teller must be smart—there is a string of impatient customers at his wicket, and money paid out, once gone, what are the odds that the overpaid one brings it back? Hence it is advanced that the method hinted at is a wholesome and reasonable condition. It is to protect the honest man; the dishonest is not long being discovered. But if it is to be insisted on, on principle (say, rather, on precedent), what is to be done in the case of a teller receiving a small salary? Clearly, he cannot pay any important amount, even in tens, so he becomes burdened for a lengthened period by a process of monthly liquidations; perhaps his bond will be called on.

The question of a teller's shortage by mistakes does not enter into the recent enquiry by one of the Canadian banks, but that matter has brought into prominence the slender salary that is probably paid to many young tellers, and although it is not to be advanced that higher pay is to ensure integrity, yet very meagre pay has its dangers to the bank, for his position, serious as it may be to himself, is full of gravity as to his means of doing mischief with the bank's funds. Hence it becomes of the very highest importance to know closely his manner of life, his associates, avocations, expenditure, and his moral life. This, however, ought not to be less so of every bank official, who each in his way is a trustee. The recent exposition of the manner of spending the evenings of a bank teller are not such as to keep a clear head and the mind free, nor to check the dishonest hand.

If, however, on implying that tellers' positions may perhaps be usefully reconsidered on the lines advanced, it be replied that the banks know their own business, that young officers covet the position, that the hardships very rarely do occur, that it is a question with banks, as with trade, to get the best service at the lowest rates, that they are trustees in the interests of the proprietary, then I say that—viewed in relation to the trust reposed in bank tellers—the argument is unsound. It is not advanced on the part of bank clerks that they have special claims for better payment because of better status in society. As was well observed in a recent issue of THE MONETARY TIMES, they are much of the same clay as other young men, and in relation to culture and business acumen it is to be doubted if they stand on the same plane as our bright young merchanting men. It is the attempt of the earthen pot to sail down the social stream with the brass pot that is the trouble with many, for roundly speaking they are fairly paid. While the position of tellers might receive fresh consideration, because he is a bank clerk, the young man is not called upon to take on him the expenses of a society man.

The Bankers' Association might do more to inculcate better views amongst the young bankers on all these points—they might more encourage bank reading—might instead of offering a first and second competitive prize, offer several, and thus by broader chances for success, bring to the front the best men, letting the men who think the bank made for the men rather than the men for the banks, be left behind.

And let the young bank officers understand that to be a sport, that the fast life, the exaggerated extent to which athletics is pushed—the extravagance in dress, is inconsistent all round. Let the managers, too, feel a deeper responsibility in the lives and conduct of the young men, extending a little more courtesy to them than frequently obtains, and some good results will be found.

16th Nevember, 1897.

BEHRING SEA CONFERENCE.

AGREEMENT OF THE EXPERTS.

The unanimous agreement of the experts brings the Governments together for the first time on all the facts relating to the seals. This agreement was reached after painstaking comparison of notes, and the results were announced in an official statement made public by General Foster, as follows:

"The delegates to the fur seal conference have agreed unanimously on certain propositions touching the fur seal herd of Behring Sea. The report contains sixteen propositions, which are briefly epitomized as follows:

"That the Pribyloff herd has declined in numbers from 1884 to 1897; that the number was formerly three to five times that which now exists; that the death rate among pups is great, not more than one-half to one-third surviving to the age of three years; that the number of breeding females in 1890 and 1897 was between 100,000 and 130,000; that the decrease from 1896 to 1897 was notable, though its extent could not be definitely determined; that land killing of males, as now practiced, does no harm to the herd; that the pelagic sealers respect the limitations of the law; that pelagic sealing involves indiscriminate killing; that the catch at sea contains a marked excess of females; that the killing of males on land is the cause of this; that among the females killed are not only those both nursing and pregnant, but also many who are immature, or who have already lost their pups; that the fur seal being polygamous, a large number of males may be killed with impunity; that females cannot be killed in similar numbers without checking the increase of the herd or bringing about an actual decline; that a small number of females, less than the annual increment of breeders, might be taken without producing actual decrease; that excessive pelagic sealing has led to a reduction in the herd; that pelagic sealing has of late fallen off in greater ratio than the herd has, thus producing a tendency toward equilibrium in numbers; that in estimating the future conditions of the herd, there must be taken into consideration the reduction in the number of surviving pups caused by the pelagic catches of 1894-1895; that the herd is not in danger of actual extermination, so long as its haunts on land are protected, and the protected zone is maintained; that both land and sea killing now yield an inconsiderable profit either to the lessees or to the pelagic sealers themselves."

The delegates signing the agreemnt are Charles Summer Hamlin, David Starr Jordan, D'Arcy Wentworth Thompson, and James Melville Macoun.—*N. Y. Times*, Oct. 17.

ROUNDABOUTS OF COMMERCE.

A little incident in the world's complex trade is related in the London *Times*. It is the export of a large quantity of Queensland beef and River Plate mutton from London to Cape Town. All the meat was, of course, frozen, and had been transported some 6,000 miles before resuming its journey for another 6,000 to its final market. London had drawn it from two widely separated continents to dispose of it in still a third. And the statement is made by the "Colonial Consignment Company" that "the meat could be purchased in England at a much lower rate than in the countries of production. Beef at 2¼d. per pound and mutton at 2½d. per pound, free on board, could not be supplied in the colonies, but was procurable at home." *N. Y. Times.*

—Diplomats have to be so courteous to everyone outside that they must be exceedinly disagreeable in the privacy of their own families.—Somerville *Journal.*

—"I know at least one man who fully believes that the higher the tariff duties are, the better it is for business." "A large importer, I suppose?" "No, he's only a smuggler."—Boston *Transcript.*

THE GASPE OIL FIELDS.

A very highly colored account of the oil fields at Gaspe, Que., finds place in the St. John *Gazette*. We print a part of it, leaving out the spread-eagle portions :

"The oil fields at Gaspe would have been closed down for several weeks, have once more begun to flow, and the refineries are working day and night. The management is believed to have shut down for a specific purpose, but having failed to accomplish what they desired, the works were re-opened last week. The extent of the work being done no one knows, everything is kept so quiet, but it is known that the output is enormous.

For the past two or three years an English company, known as the Petroleum Oil Trust, Limited, has been carrying on operations with great secrecy, all the employees being bound not to divulge anything they might learn about the company's business, so that up till recently it has been very difficult to obtain anything like complete or reliable infirmation. But certain facts have now leaked out. and the potential wealth of the Gaspe oil fields no longer remains a secret. The proprietary company referred to, owns over 48,000 freehold acres of oil-bearing lands, and of mineral and oil-bearing rights in perpetuity, which are free of rent and royalties. All the necessary features which usually betoken the existence of petroleum in quantities, obtain in the Peninsula of Gaspe.

The geographical position of Gaspe, and the fact of its being on the seaboard, within seven days' passage of London, and 1,000 miles nearer to European markets than the United States oil fields, give it many advantages in the matter of carriage and freight. Labor, timber, and fuel are cheap and abundant, while the climate is favorable for petroleum mining all the year round.

Dr. N. C. Smilie, of Gaspe, has given notice of his intention to ask the Legislature at its next session for letters patent authorizing him to lay pipes on Crown or private property, where necessary, to develop oil wells, etc., in that district."

A MINISTER'S VIEWS ON GOLD MINING.

Rev. Robert McIntyre, a Methodist minister, of Chicago, grub-staked a miner to go to Klondike, and was hauled over the coals by some of his brethren for doing what they considered to be so worldly a thing. Mr. McIntyre has the courage of his convictions, and stoutly and eloquently defends his action. Among other things he said: "The fact is I admire a miner's wealth. It's clean. There are no blood or tears upon it. It is acquired away from the scheming and cut-throat competition that characterizes ordinary business ventures, where the success of one man so often means the disaster and downfall of some other man, or perhaps a number of men. Nobody has been pinched. Nobody has been wronged. The miner who digs a fortune out of the ground has the satisfaction that he has not robbed a soul, even though he becomes a hundred times a millionaire. Then, too, there is another factor to take into consideration. The man who makes a fortune on the Board of Trade, or in the Stock Exchange, or in the building up of a gigantic business house, adds nothing to the world's store of available wealth. The world, in other words, is no richer because he is richer; he is rich, rather, because somebody else is poorer. The miner, on the other hand, whether he digs out $100 of $100,000, adds that much to the world's wealth.

"The fact is, God put the gold in the valley of the Yukon for His children. Any man, consistent with such regulations as are necessary for fair play and the protection of individual rights, has the undeniable right to go there and dig and delve all he chooses. If he pulls out $100,000 he simply makes a draft, not on somebody's bank account, but on nature's treasury. There is no more wrong in that, therefore, than there would be in a man planting corn and trusting to nature to yield twenty, fifty, or a hundred fold. It's a private matter between man and his Maker."—*Rossland Miner.*

MUNICIPAL FIRE INSURANCE.

Municipal fire insurance has received a decided set back, the Association of Municipal Corporations having definitely pronounced against it. The autumn general meeting of the association was held at the Westminster Palace Hotel last Friday, when the question of municipal fire insurance very naturally came up. Mr. Ward (Middlesbrough) moved a resolution urging the desirability of taking steps to obtain the necessary powers to enable corporations to insure property within their boroughs against fire. He maintained that it was an injustice that the cost of the fire brigades should have to be borne by the ratepayers when those who received the chief benefit from their work were the insurance companies. Mr. Alderman Garrett (Dunstable) seconded the resolution, which was opposed by the Lord Mayor of Liverpool, who expressed the opinion that the municipal authorities were already clothed with such multifarious powers as gave them quite sufficient opportunity of exercising all their judgment without being called on to enter upon such a hazardous business as was now proposed. The Mayor of Bolton supported the view of the Lord Mayor of Liverpool. Apart from the fact of the great practical difficulties in the way of local authorities arranging insurances, he maintained that corporations and municipalities, if they did thoroughly and well the work that was already put upon them, had quite as much as they could do. This statement was received with cheers, and the resolution, on being put, was defeated by a large majority. So it is quite plain that, although there may be a tendency in a few towns to favor municipal fire insurance, the great body of official municipal opinion is entirely opposed to it.—*Insurance Observer*, London.

SENSE ABOUT JOB PRINTING.

One of the younger generation of American men has written a book on printing, and it has been reviewed by a writer in the *Inland Printer*, who gives advice to advertisers as to how to advertise, and how not to advertise. The title of Deist's book is, "An Out-of-the-Ordinary Printing Shop," and it has a sub-title, "Being a Business Book, wherein will be found a Business talk with Business men who are after Business." Mr. Deist starts off in this style: "It's very easy to buy stock, and hire a room, and hang out your sign as a printer. Anybody with a few hundred dollars can do that. But it takes more than this to produce effective printing. Almost any man can set type. A boy can kick a press. There are few who can do both these things in a fashion to produce the best results."

There are many printers in this country who will tell you that they can print anything from a blanket sheet to a visiting card. Maybe they can. But how do they do it? There are but two ways—the right and the wrong. Especially is this true of printing. Printing must be errorless or it is spoiled. It can't be a "little wrong."

"As soon as a printer begins to answer your criticisms of his work with 'That's only a little wrong,' or 'That's but a little mistake—it doesn't hurst,' look out for him. A printer with any pride never talks so. A printer who has no pride in his work is the printer you do not want to patronize. He won't care if he is a hundred or so short in printing you two or three thousand circulars. He will use a $1 red ink when he should use a $2 red. He will save ten pounds on the weight of the paper, or he will pinch the size of the page a little and say nothing about it. Look out for the printer who says a mistake in the job he does for you does not count.

If you pay his account of $10 with a check of $9.50, he will roar his objections."

What is said above is all true; there's knowledge of human nature in it, and here's something he (Deist) owes to this department of the *Inland Printer:* "But I am a great believer of exclusiveness. I believe a successful man must give his clients what his competitors cannot give them before he can be successful permanently. I make a special study of each client's wants. But I never experiment on my clients."

Here are more extracts:

"Buyers haven't any sentiment. Business men haven't any use for failures. The user of printer's ink should get as much brains with his job as possible—just as he gets thirty-seven inches for a yard if he can. If there were more brains mixed with printer's ink there would be lots more of printer's ink used. That's the theory I am working on.

I never coax a man to give me an order. I never 'jolly' him. That kind of custom is short-term custom. Make it to-day and lose it to-morrow. I don't want it.

Keeping the old custom and making plenty of new is the way bank accounts are permanently enlarged. I have done this by giving my customers my personal attention. I have made a suggestion about the paper for a job—used a cheaper paper, perhaps, that would give a better effect. I have suggested the use of an illustration here or there, and perhaps a change in the wording. My way may have cost the client less. It may have cost him more. But if he got an advantage it increased his confidence."

JAPANESE CIVILITY TO FOREIGNERS.

Japan has set the whole of civilized Europe an example by the establishment at Tokio of the "Kihin-Kai," or Society for Welcoming Foreigners. Its object is to provide strangers with every facility for transacting their business or pursuing their pleasure without discomfort or exorbitant expense. On application at an office which has been opened in the chief hotel, a visitor can procure all the information he requires. Introductions are supplied to personages of distinction and to business firms. Honest guides are provided, who will prevent extortion on the part of innkeepers, curio-dealers, and all the other classes who prey on the innocent natives of the West. No fee is charged, the society willingly incurring considerable expense with the conviction that the whole community will reap the benefit. Moreover, the Japanese "bobby" is rapidly being taught English, and in Otaka the past summer seventy-five of them passed an examination in our tongue.—London *Chronicle.*

—In a Western town a wealthy but illiterate storekeeper sent his man to get a wagon load of goods from a wholesaler, giving him a written order. After a time the man came back with his wagon empty, and on being asked by his employer where the goods were, said he didn't know what he had been sent for, and the wholesaler could not read the note. The old man took the paper, and opening it, said: "Why, that's plain, c-o-l-t, salt; I should think any fool could read that."

Commercial.

TORONTO MARKETS.

Toronto, Nov. 18th, 1897.

Dairy Produce.—Choice dairy butter is in good demand. Receipts consist principally of large rolls and offerings of choice tub butter are scarce. We quote:—Rolls, 16c.; tubs, 15 to 16c.; pound prints, 16 to 17c. per lb. There is an abundance of inferior butter on the market which can be had at low prices. Creamery shows little change. We quote:—Prints, 20c.; tubs, 18 to 19c. per lb. The local cheese market is without change, and dealers are jobbing at about 9c. per lb. The egg market is steady. We quote:—Strictly fresh, 16c.; held fresh, 12 to 13c., and limed. 12½ to 13½c. per dozen.

Flour and Feed.—Some large transactions are reported this week in flour, and active trading is taking place. Values remain about at last week's basis. We quote: Manitoba Patent, $5.10; Strong Baker's, $4.85, and Patents (winter wheat), $4.30 per barrel. Mill feed is steady, shorts being quoted at $11.50 and bran $7.50 per ton.

Grain.—During the past two weeks the wheat market has been comparatively steady, and quotations, although subject to temporary fluctuations, are practically unaltered. Foreign markets have been influenced by crop reports from Argentina, indicating damage by frosts. There is no doubt that the losses will not injure the world's stores of wheat as much as the bulls would assert. As a United States authority says: "While the Argentine Republic does not produce such a very great deal of wheat, it appears to have much to do with the price of wheat the world over. Why this is, we cannot say. There are years when the State of Kansas produces a great deal more wheat than Argentine. Last week's world shipments of wheat were 4,440,000 bushels to United Kingdom, 1,536,000 to France, 1,200,000 to Belgium, 720,000 to Holland, 608,000 to Italy, 584,000 to Germany, 280,000 to Greece, 280,000 to Austria, 128,000 to Sweden and Norway, 680,000 to other European countries. The local barley market is steady and unchanged. Oats have advanced 1c. per bushel, and are in good demand. The chief interest in the trade is centred in the export movement. For rye there is strong export enquiry, and in consequence prices are 1c. per bushel better than last week. A firm market exists for peas, at 42 to 43c. per bushel.

The stocks in store at Port Arthur on Nov. 5th were 1,487,517 bushels, and there were received 1,011,848 bushels and shipped 1,253,001 bushels, leaving in store on Nov. 13th, 1,246,364 bushels.

Groceries.—With the advancing season, an improved movement is taking place in general grocery supplies. Sugars are finding good enquiry. Large supplies of dried fruits, and other supplies for the Christmas trade are coming forward, and are going rapidly into the hands of the retailers. The market for teas and coffees remains steady. Country roads, in some districts, are in poor condition, and reports say that the unfavorable weather of the past few days bad a bad effect opon trade.

Hides and Skins.—In spite of a considerable duty the local market in hides continues to be regulated largely by Chicago and the course of trade in the United States. The market has gained in strength since our last report, and merchants are asking for cured a fractional advance on last week's quotations. A report from Chicago, Nov. 15th, says: "At the close of business Saturday there was a fair amount of activity to the trading, and sales were made of about 8,000 native steers, November take off, at 11½c., and 5,000 branded cows at 9½c. It was also learned that sales were made at Kansas City at the close of last week of 8,000 Texas, but the terms of sale were kept private. To-day the market was firm, exclusive of Colorados, of which a fairly large number of September and October take off could be had at 9c. Swift & Co. advanced the price for native steers to 11½c. The close was at 11¼ to 11½c. for native steers, 10¼ to 10½c. for butt brands, 9½c. for branded cows, 9c. for Colorados, 10⅜c. for heavy native cows, and 10⅝c. for light ditto." For the moderate offerings of sheepskins being made 90c. is paid. Calfskins remain nominal. Trade in tallow is quiet, prices continuing unaltered.

Hops.—For 1897 hop dealers are quoting 10 to 13c. per lb., but trade is very quiet and few transactions are taking place. Yearlings are dull at 6 to 7c. per lb. A London report, date of November 3, says: "There is a steady trade passing especially for choicest descriptions, while other qualities meet with rather more inquiry at late rates." The Waterville, N.Y., *Times*, November 9th, reports as follows: "A steady, but not very extensive, business is doing all the time here, nearly all our dealers buying a few from time to time. The prices paid are still without material change from those that have prevailed for the past ten days. While in Cooperstown in the regular trade as high as 17c. has been paid, the most that growers are getting here is 14½c."

Leather.—Tanners maintain that the position of leather from a statistical point of view is strong. In most descriptions trading is, however, limited, and only nominal supplies are being taken. Improvement is looked for soon.

Provisions.—The colder weather is having the effect of bringing out more liberal supplies of dressed hogs For medium and selected weights (90 to 150 lbs.), $5.25 is being paid, while heavier weights bring 10 to 25c. per cwt. less money. As noted last week, the packers are busily making shipments of products in preparation for the close of navigation. Values remain about as last quoted.

Seeds.—Only light deliveries are being made, and in neither local or foreign markets is there active trading. We quote:—Red clover, $3 to 3.25; alsike, $3 to 3.40 per 60 lbs., and timothy, $1 to 1.25 per 48 lbs. These prices are for standard quality, and are given at country points. Choice descriptions would bring better value. Recent London advices say: "Clovers and grasses are steady in value, with, however, but little business just now passing therein." J. F. Faben & Co., Toledo, have the following on clover in their last circular: "Speculation has not been very active, nor has the trade in cash seed been very large. The bulk of the receipts have gone to store. The stock here shows another increase this week. There has been some cash seed sold to Eastern parties, and also some sold abroad, but the volume of said business was small.

MONTREAL MARKETS.

Montreal, Nov. 17th, 1897.

Ashes.—Receipts continue small, and business quite dull and likely to remain so for some time, now that the season of navigation is about closing. We quote as nominal figures pretty much, first pots $3.50 to 3.55, seconds $3 25, pearls $4.50 to 4.75.

Boots and Shoes.—Spring orders in this line are reported to be coming in particularly well. Most of the larger houses report business as much ahead of what it has been for quite a few years; in some cases the repeat fall orders that the late change in the weather has induced, are spoken of as rather an embarrassment, and it is said that one leading Quebec house finds itself constrained to decline further commands for the present at least.

Cements and Firebricks.—With the advent of frost, business in cements is slackening off, and no important transaction has been put through since last report. A lot of 2,410 brls. of English cement has come to hand, and is about the last lot expected this season, unless the "Boston City" with 3,000 brls. of Belgian, now *en route*, should manage to make port before close of navigation. Quotations are just as last given. Receipts of firebricks for the week are large, some 265,000; quotations range from $16 to 21.

Dairy Products.—The cheese market is dull for finer grades, but goods worth 7½ to 8c. per lb. are fairly active. The general situation is not any stronger than a week ago; fine Western September would hardly bring beyond 8½c., and fine Townships, 8¼c. The total shipments of cheese from this port from May 1st to Nov. 8th, are figured at 1,928,310 boxes, as against 1,607,360 boxes for same period of 1896. For creamery makes of butter there is but a dull market, but dairy goods are moving very fairly. We quote:—Fine creamery, 17 to 18¼c.; fine dairy, 15 to 16c.; under grades, 13 to 14c.

Fish.—There have been some fair receipts of green cod of late, also of herrings, but future supplies of the latter will, it is claimed be limited. The demand is fair for the season. We quote:—For green cod, No. 1, large, $4.25 to 4.50; No. 1, ordinary, $3.75; No. 1 herring, $4.00 to 5.00 for brls; $2 50 half brls.; N.S. salmon, $12.00 to 12.50 for No. 1; British Columbia salmon, $10.50; sea trout, $7.00 to 7.50; dry cod, $3.50 to 4.00; finnan haddies, 6 to 6½c; kippered herrings, $1.25 per box; Yarmouth bloaters, 90c. to $1.00 a box. Oysters are high in price: Malpecques, $3.50 to 3.75 for ordinary; hand-picked, ditto, $4.50 to 5.50.

Furs.—There is as yet no business of any consequence doing in raw. A few small lots, principally in prime skins, have been offered, bringing poor returns to the shippers. We quote:—Mink, large dark, $1.25; small, ditto, 75c.; marten, $1.50 to 2 00; fisher, $4.00 to 6.00; lynx, $1.00 to 2.00; otter, $10.00 to 12.00 for dark; pale, $4.00 to 7.00; red fox, large, $1.30 to 1.40; small, $1.00; cross fox, $2.00 to 5.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 15 to 75c.; rats, fall, 8c.. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The distribution going on in this line is quite an active one, especially to river points. Steamboats are having their carrying capacity well tested on their last trips, and some of them, it is reported, have not been able to accept all the freight offering Winter rail rates went into effect last Monday, but owing to the late arrival of heavy shipments of dried fruits, etc., now discharging in the harbor, the railways have agreed to accord summer rates for the distribution of these goods. There is some revival of activity in sugars, owing to anticipation of probable advance in the market. Foreign advices report a steady gradual advance in both beet and cane raws, and the New York market for granulated is described as somewhat excited. On spot yellows are firmer by about one-sixteenth, and some slight advance in granulated would have been likely, but for the fact that a shipment of some 7,000 to 8,000 bags of German refined sugars is now being discharged in the harbor; this is the heaviest shipment of these goods yet brought to this market Two steamships are also discharging a large quantity raw beet sugars for the local refineries. For molasses there is a good request at firm prices; for Barbadoes the jobbing figure is 26c. in puncheons, barrels 28½c, half barrels 29½c.; Porto Ricos a cent higher; New Orleans molasses is quoted 17 to 27½c. for ordinary grades; bright open kettle ditto, principally for confectioners' use, 40 to 45c. The demand for teas shows no special revival, but buyers are apparently more disposed to accept the views of holders, which are generally of pretty firm character. Some enquiry is reported for low grade Congous from the lower provinces. In London Ceylons are quoted stiff, and advices from Japan indicate a firm market there. All lines of dried fruits continue to rule very firm; evaporated and dried apples are following the general trend of values, 10c. being asked in a jobbing way for the former and 6c for the latter, whereas at this time last year dried apples were hard to sell at 2½ to 3c. Fresh supplies of French and Bosnian prunes are to hand, the former selling at 5½c. for 120's, and 12 to 15c. for large sizes, Bosnians 6½c. for

110's. Gallon apples are first-class property; a wholesale firm reports a sale of a fair lot at $1 95, for which they paid $1.50 a few months ago, and some packers are said to be asking $2 to $2.25. Canned vegetables, too, are all held very firmly. Lobsters are scarce, and are being jobbed at $10 for talls, and $11.50 for flats; salmon, $1,10 to $1.25 per doz. for talls $1 45 for flats.

Hides.—There has been an advance in hides locally, as well as in Chicago, in which city No. 1 buff is now quoted at 9¾c. The general quotation for No. 1 hides by dealers on spot is now 8¼c., but in the competition for business some city butchers are said to be realizing 9c. per pound. As yet no sales have been reported to tanners beyond 9c., but they have been notified that future orders will be subject to advance. Lambskins continue at 80c. each.

Hops —No special movement is reported, but the market is steadier if anything. Quotations range from 12½ to 15c. for new hops of good to choice quality; yearlings dull at 6 to 8c. per lb.

Leather.—The extremely favorable reports from the shoe manufacturing trade are reflected to some extent in this line.. Actual business in sole, and the various grades of fancy leathers that now are so largely used in the make-up of spring and summer footwear, shows improvement, especially in dongolas, of which some quite considerable sales are from time to time reported. Hides are firmer, and tanners of black leather claim that the prices they are getting are not what they should be. A sale of inferior Western splits, some three or four tons of inferior quality, was reported a few days ago at 19c., but for choice light stock 22 to 25c. would be asked; in Quebec tanners are said to be asking 18c. in fair quantity. We quote: — Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 30 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—There have been some fair shipments of heavy goods by last boats, but now that winter rates are in force on the railroads, and navigation about closing, matters will quiet down. General trade enquiry does not result in showing any changes in value. We quote:—Summerlee pig iron, $18 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16 50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, $15.50 to $16.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16 50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates —Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; bes; cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

Oils, Paints and Glass. — Most of the houses in these lines report that they are still pretty busy with the closing fall shipments, but expect matters to quiet down after this week. Turpentine rules very steady at 49c. per gal., and linseed at 46c. for boiled in a jobbing way. The high price for castor oil has checked the demand. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to

TIMBER IN LIVERPOOL.

The wood circular of Farnworth & Jardine, dated Liverpool, 1st November, 1897, says: "The arrivals from British North America during the past month have been 26 vessels, 20,142 tons, against 33 vessels, 22,722 tons during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1895, 1896 and 1897 has been 360,888, 447,399 and 495,414 tons respectively.

"The volume of business during the past month has been fair, but values of most articles are unsatisfactory and difficult to maintain; stocks are all ample, some much too heavy.

"CANADIAN WOODS.—*Pine Timber.*—Waney and square have been imported moderately, the demand, however, has been very small and affected by the Engineers' strike; stocks have accumulated, and are now too heavy; there is no change in value to report. Red pine has moved off fairly well, but the stock is sufficient and values rule low. Oak has come forward more moderately, there is fair enquiry and prices are steady; the stock is sufficient. Elm has not been imported, the demand continues good without change in value, and the stock is moderate. *Pine Deals, Boards, etc.*—The import has again been too heavy, and although the deliveries have been fair the stock is most excessive; values rule low and under the cost of import.

"NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The arrivals have been more moderate, but prices show no improvement, and even recent low rates are difficult to maintain; the stock is still much too heavy. Pine deals have not been imported.

"BIRCH.—Logs are in slightly better request, but prices rule low, and the stock is excessive. Planks have been imported more freely, there is a fair demand, but prices have again declined, and are now at the lowest point touched this season; the stock is sufficient.

"UNITED STATES OAK.—The arrivals have been small, but there is no improvement in the demand to report, and stocks are sufficient; prices rule low. *Oak Planks.*—The import shows a decline, and the consumption has been fairly satisfactory, but the stock is too heavy; recent sales have been at slightly better prices, but shippers should be very cautious in consigning until stocks are considerably reduced. The total stock is about 368,000 cubic feet.

"UNITED STATES STAVES.—The import has again been moderate, and with a rather better demand, values have slightly improved; stocks, although not excessive, are ample for present requirements.

"OREGON AND BRITISH COLUMBIAN PINE.—One entire cargo of planks from British Columbia has just arrived; the demand continues quiet, and only moderate headway has been made with the cargoes recently imported; stocks are heavy, but there is no change in value to report.

"SEQUOIA (CALIFORNIAN REDWOOD.)—Recent sales have been entirely by the dealers; a large cargo has just arrived which is being stored.

"PITCH PINE.—The arrivals during the past month have been 4 vessels, 3,465 tons, as against 1 vessel, 1,478 tons, during the like period last year. Of hewn we have had a small importation; the consumption has been very limited, and the stock is ample. Of sawn we have had a fair importation, and a satisfactory consumption, leaving a moderate stock on hand. Deals and boards have again come forward freely; there has been a good consumption, but the stock is still too heavy."

PATERSON & SON,
General Agents for Dominion
Montreal, Que.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN
Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.

CHINESE WHEELBARROWS.

The wheelbarrow man wears across his shoulders a strap which is attached to the shafts on each side. Boxes, bales of goods, or whatever the load may consist of, are secured to the wheelbarrow by ropes. There are seating accommodations for four people, two on each side, and a cushioned seat is provided for the passenger, who generally sits with one leg resting on the front of the barrow and the other hanging over the side in a rope loop, which serves as a foot-rest. On the Great Plain wheelbarrows are occasionally seen with a sail set, when a fair wind proves to be a great help to the trundling of the barrow over a level way.

Since the institution of cotton mills at Shanghai, the wheelbarrow has been extensively used as a passenger vehicle, especially for carrying workwomen to and from the mills. One man can wheel six women for a distance of about three miles, morning and evening, the charge being 1s. 5d. per month. The average earnings of a wheelbarrow man are about 8½d. per day. About 4,000 licenses are issued monthly to the same number of wheelbarrows plying for hire in the streets of the foreign settlements at Shanghai, where, being under the municipal regulations, they are perhaps the best in China. Sometimes as many as fifty barrows may be seen in the streets, travelling one behind the other, each carrying two barrels of English Portland cement and pushed by one man.

THE WINTER PORT.

Now that the clouds have blown away and the tempest in the teapot has subsided, the people have an oportunity to realize that they have been fooled by the enemies of Mr. Blair. A few days ago the *Sun* was howling lustily that the winter trade of St. John had been ruined because the ships of the Beaver line were to call at Halifax for the mails. The attitude of Mr. Blair has been daily misrepresented, the policy of the Government was sneered at, and no effort spared to render the winter steamship service a failure this year. But the *Sun* has failed in its plans. The Government has brought the steamship companies to its terms, and we will have a better service this year than ever before. The London service will be performed by the Allans and Thomsons, of St. John. Contracts have been signed by the Donaldson and Head lines. The Furness line will come here as usual, and the Beaver line will give a weekly instead of a fortnightly service. The winter trade of St. John will be doubled this year, as compared with last year. The credit for this is largely due to Hon. A. G. Blair, who, in the midst of many difficulties, and in the face of opposition that would have discouraged a less bold man, has proved himself a genuine Canadian, and has accomplished what Mr. Foster failed to do—cut off all Canadian subsidies to steamers making their port of destination in a foreign country. The undoing of the *Sun* is a great victory for Mr. Blair and the people of St. John.—*St. John Gazette.*

FISHING NOTES FROM NOVA SCOTIA PORTS.

The off-shore fishing business is about over for another season, says the Shelburne *Budget.* One or two of the Shelburne boats are already laid up, and others will shortly go into winter quarters. The boats have done poorly this year. The fishermen at Cape Negro Island are making immense hauls of herring. Boats from other countries are on the scene and sharing in the harvest.

A prominent fish dealer of Halifax has been talking to the *Herald* about herring and mackerel, and he says that Nova Scotia fishermen do not cure fish properly, and that they are too careless about coopering. The result, he says, is that they do not get as large a price for their fish as they otherwise would. He thinks the Government should send a capable man around the fishing districts to teach the fishermen how such work should be done.

Clark's Harbor *Coast-Guard* says: "The herring fishery at this place has far exceeded in volume and value the output of any previous year. The run of fish was large and steady withal, and the continued moderate weather was in the highest degree favorable to netting operations. Fishermen thought they would do well if they secured enough for lobster bait. Fully 8,500 bbls. have been taken here, nearly half of which has been reserved for the purpose. About 5,000 bbls. have been sold, principally in Halifax, at an average price of $3 for large. These shippings have cleared in the aggregate $10,000."

A cargo of 2,000 qtls. of dry Bank codfish from Lunenburg has been sold to arrive at Boston, and is the first cargo of Nova Scotia codfish to be sold in this market for a number of years. These fish take the place of French codfish, on which the duty is now prohibitive. The provisions of the new Tariff bill provide that the duty on fish coming from foreign countries shall be levied acording to the bounty paid by that country to its fishermen, and as France gives her fisherman a very liberal bounty, the duty on French fish is tremendously high.—*Cape Ann, Mass., Breeze.*

A CARGO OF SALMON.

Particulars of a load of British Columbia canned salmon are given by the Victoria papers of the 9th instant. Its value is almost a quarter million dollars. The Swedish ship, "Lady Lina," Captain Svensen, is now fully loaded, says the *Times*, and to-morrow she will leave Steveston for the Cape. She will take in all 59,825 cases of salmon, the total value of her large cargo being $240,975. The individual shippers who are sending salmon to the United Kingdom on the "Lady Lina," and the amounts they are sending, are appended:

LECTURES ON BUSINESS SUBJECTS.

A very desirable series of lectures by leading men of Winnipeg is arranged by the Collegiate Institute of that city. The second was delivered last week by Mr. F. H. Mathewson, manager of the Canadian Bank of Commerce, the subject being "Banking." The lecturer, after defining a bank, gave a brief history of the origin and development of banking institutions. The various functions of these were then clearly explained, the English, the United States, and the Canadian banking systems being compared in outline, and the excellencies of the Canadian system pointed out. The qualifications of young men seeking to enter the banking profession were then dwelt on. Good character, good manners and intelligence, are essential. After admission to the service of the bank, promotion is made on merit, seniority counting when other things were equal. The system of transfer from place to place is part of the system of bank education. A man thus got acquainted with every kind of business.

A very interesting illustration of the variety of business operations with which banks in Winnipeg had to deal was then given as follows: "We cashed a draft on Monday, drawn upon us by a bank in Hamburg; on the same day we were advised of a payment made at Malaga, Spain, on a letter of credit issued by us for the purchase of nuts. A few days ago we cashed a cheque drawn on a bank in New York by a railway company at Buenos Ayres. A draft was paid by us drawn on another bank here by a bank at Nice, France. A letter of credit was issued on us by a bank in Sydney, New South Wales, against a shipment of flour. We recently issued a letter of credit to provide for the purchase of teas at Yokohama, China; and not long ago established a credit by cable to provide for the purchase of currants in the city. Not long since this bank negotiated a draft drawn on London by a bank in South Africa, and about the same time paid a draft issued from Uraguay. A credit was presented to us not long ago by a wealthy sugar planter residing in Hawaii, and we occasionally cash drafts on us by a bank in Calcutta. We get remittances from Newfoundland and yesterday we received a cheque from the other extremity of the North American Continent, viz., the Yukon."

The next lecture of the course will be delivered on December 2nd by Mr. Bole, on the subject of "Credits."

COST OF BUILDINGS.

With materials and labor at the same price, two buildings of the same character, although of different sizes, will be found to cost approximately the same per cubic foot; hence the cost of a proposed building may be closely estimated by multiplying its cubic contents by the known cost per cubic foot of a similar structure built in the same locality. The cost of similar buildings in other localities can be estimated according to the difference in cost of labor and material.

The cost per cubic foot of well-known buildings in various cities was as follows:

Rookery building, Chicago, 11 stories, iron and steel interior, 10 passenger elevators, 32 cents per cubic foot.

Monadnock building, Chicago, 16 stories, rich marble work, 42 cents.

Masonic Temple, Chicago, 20 stories, 14 passenger elevators, rich marble work, 58 cents.

New England Mutual Life Ins. Co.'s building, Boston, granite, fireproof, 60 cents.

Herald building, New York, 200x140, 2 stories and attic and damp-proof basement, 46 cents.

Six to ten-story office buildings in New York, 30 to 60 cents.

Wainwright building, St. Louis, 10 stories, 25 cents.

Union Trust building, St. Louis, 14 stories, 28 cents.

Equitable Life Ins. Co.'s building, Denver, Co., 9 stories, first story marble wainscoted, 9 feet high, 42 cents.

Ernest & Crammer building, Denver, 8 stories, pressed brick fronts, 17 cents.

Crocker building, San Francisco, 10 stories, steel-skeletoned, 63 cents.

Athletic Club buildings, about 24 cents.

Libraries, from 26 to 44 cents.

Dwellings, Boston, frame, 8 to 10 rooms, 11 cents.

Dwellings, Denver, first-class, stone, steam heat, 17 cents.

Brick cottages, East, one-half story, 10 cents.

Brick cottages, East, one-half story, 10 cents.—*American Architect.*

HALIFAX AND ST. JOHN.

St. John Tory papers declare that in the matter of the Beaver line contract St. John's interests have been sacrificed to those of Halifax.

Halifax Tory papers say that Halifax has been side-tracked by Blair in the interests of St. John.

Intelligent people say that—pending the establishment of the fast line, when Halifax must necessarily be the winter port—the arrangement as a temporary one is satisfactory—it places Halifax in as good a position as she was before, it substitutes St. John for Portland, and it obviates the necessity of Canadian mail steamers making their Atlantic terminus at a foreign port.—Halifax *Chronicle.*

PUBLIC NOTICE

Is hereby given that all persons who take out ordinary participating Policies in the

Canada Life Assurance Company

before 31st December, 1897, will at the next Division of Profits, receive

Three Years' Profits

being one year's additional bonus over those policies issued in 1898. Enquiry should be made without delay from LOCAL AGENTS by intending assurers.

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT PLAN OF THE

NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of Insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of Insurance furnished on application to

WM. McCABE, Managing Director

Head Office, TORONTO.

British Empire Mutual Life Assurance Company Of London, Eng.

Established Half a Century.

SPECIAL ADVANTAGES:

● ● ●

Inquiries respecting Investments freely answered

DECISIONS IN COMMERCIAL LAW.

RAINVILLE V. GRAND TRUNK RAILWAY CO.—Action for damages for negligence resulting in the burning of the plaintiff's property by sparks from an engine of the defendants. There was evidence that there was dry and inflammable material on the property of the defendant company, and that sparks or cinders from the engine might have fallen upon this and ignited it, and that fire might have thence spread or run to the plaintiff's property. Held by Ferguson, J., that proof that the fire was communicated by sparks or cinders from the defendants' engine might be by circumstantial evidence, and there were here relevant circumstances, given in evidence, fit to be submitted to the jury; motion for non-suit refused.

ATTORNEY-GENERAL V. CAMERON.—Rose, J., held, in addition to the findings already reported in THE MONETARY TIMES, the special case having been amended for the purpose of raising the question, that, under the Succession Duty Act, the duty payable on the capital was deferred until the final distribution thereof, and that the duty then payable would be on the amount then actually distributed, whether increased by accumulations, or by the rise in value of lands or securities, or decreased.

HOLWELL V. TOWNSHIP OF WILMOT.—Appeal by plaintiff from judgment dismissing with costs. One A. Kaufman, who was the treasurer of the defendant township, being in default for moneys collected by him, mortgaged his chattels to one Irwin, and on the 27th February, 1896, received a cheque for $3,400 from Irwin's solicitor. The same day or the next morning he endorsed the cheque and sent it by mail to the manager of the Canadian Bank of Commerce at London, who, on the 29th of February, placed it to the credit of the "Township of Wilmot; A. Kaufman, treasurer," in the books of the bank. Kaufman was insolvent prior to the 24th February, 1896, and on the evening of the 28th February he made an assignment to the plaintiff for the general benefit of creditors under the statute. The plaintiff claims the cheque or its proceeds for the benefit of the creditors. It was held below that no right to the money passed to the plaintiff by the assignment, having special regard to the language of sec. 43 of the Post Office Act R.S.C., ch. 35, and that there was no preference of the township which could be attacked by the plaintiff. The Court of Appeal for Ontario held that plaintiff was not entitled to succeed; that the money had gone beyond revocation before the assignment.

BAKER V. FOREST CITY LODGE, INDEPENDENT ORDER OF ODDFELLOWS.—Appeal by plaintiffs from the judgment dismissing the actions which were brought for a declaration that the plaintiffs were entitled to sick benefits upon the same scale as that provided by the by-laws when they joined the dependent lodges, and to recover arrears of such benefits, notwithstanding a change in the by-laws. Appeals dismissed by the Court of Appeal for Ontario with costs.

THE following resolution has been passed unanimously by the North-West Assembly: "That in the opinion of this House, the Northwest Mounted Police should be largely increased, in consequence of the opening of the gold fields of the Yukon and adjacent districts; and that, in view of the vast country over which the police have to exercise control, it is desirable this increase should take place immediately, so that the recruits may be prepared for active service in the spring."

JOHN BARBER

Mercantile Summary.

SOME shares of new Electric Railway, Quebec, were bought by tender last week, the Union Bank paying 112½ per cent.

A NEW packing house for the Windsor Salt Company is being built in Windsor. It is 50 by 130 feet, and will hold 12,000 barrels of salt.

A. G. HALSTEAD has been appointed to succeed the late P. H. Snider as manager of the local bank of Alloway & Champion at Portage la Prairie, Man.

MESSRS. TROOP & SON, says a Maritime Province exchange, have placed an order in Britain for a 300-foot steel steamer, to be named the "Canada."

A CABLE from Argentina of 20th to a New York house says there has been an excellent crop of wheat, and there will be a surplus of 1,000,000 tons for export from that country.

ACCORDING to the Charlottetown *Guardian*, Messrs. Hodgson, of Montreal, have handled about half the cheese produced in P.E. Island this year, that is to say, in the vicinity of 25,000 boxes.

A SUCCESSOR to Mr. Rogers as manager of the Bank of Montreal branch in Peterboro, has been appointed in Mr. H. G. Parker, who goes from the charge of the Seigneurs street branch in Montreal.

THE council of St. Henri, a suburb of Montreal, authorized the mayor of that municipality to buy a site for a new fire station, and the architect was instructed to prepare plans for a building to cost not more than seven thousand dollars.

THE gold produced in New South Wales during the September quarter amounted to 94,991 ounces, and during the first nine months of 1897 to 222,240 ounces. The total yield for 1897 is expected to exceed that for 1896 by at least 3,000 ounces.

UNDER the present manager of the branch of the Bank of Commerce at Simcoe, Mr. Edmund Cowdry, additions are being made to the banking premises there. The offices are being extended and refitted, the latest improved fixtures being used, and when completed will be both neater and more commodious.

THE Dominion Coal Company having notified their intention to shut down the Victoria colliery, after December 15th, a public meeting was held at Victoria Mines, C.B., to protest against that course, and a resolution adopted appealing to the Provincial Government to take action to induce the Dominion Coal Company to continue operating the mines.

THE council of the London Chamber of Commerce formally approved of the issue of a circular to country chambers, requesting them once more to take up actively the question of commercial education in their districts, and suggesting the formation of local branches in connection with the Chamber's scheme.

IN a law passed in October, 1894, it was stipulated that mercantile vessels should pay on entering the port of Buenos Ayres, sailing vessels twenty centavos gold per ton, steamers ten centavos, and vessels carrying the national flag one centavo. Countries having navigation treaties demanded the benefit of the last mentioned rate, but the Minister of Finance of Argentina objected that it was only ceded to coasting vessels. Congress has now made this quite clear by adopting a *projet de loi* in these terms: "Sailing or steam vessels engaged in coasting navigation shall pay on entering the port of the capital a due of one centavo gold per ton register."

THE New South Wales Government states that it has found such difficulty in placing in England an order for 2,000 tons of steel rails of high carbon quality, that it has been compelled to order them in America, where, the *Times'* Melbourne correspondent states, the manufacturers readily undertook the contract at the price of £5 per ton.

A BARGAIN has been made between the International Steamship Company of Philadelphia and the States Steamship Company, which engages in the Klondike trade, for the sale of its five steamers. All the vessels will be turned over to the new owner by the first of the year or thereabout. The steamers are to ply regularly from San Francisco or Seattle to St. Michaels.

A PROPOSITION has been made to sell the Ronald steam fire engine lately exhibited at Ottawa to the village of Hawkesbury. The mayor reports that the majority of ratepayers seen are in favor of the purchase according to the Hawkesbury Lumber Co.'s terms, who offer to pay half the cost of the engine, and if kept on their property will look after it and furnish the horses in case of fire.

THE plan of cheap return transportation rates of fare by rail, which has proved so popular with the customers of New York jobbing houses, has approved itself to San Francisco merchants. The proposal of the Manufacturers' and Importers' League to provide free return transportation to country dealers visiting that city and buying from the members of the League goods to the value of twenty times the amount of the single fare, was adopted. The lines of travel upon which the system operates are the Southern Pacific West of El Paso, and Ogden and South of Portland; the San Joaquin Valley Railroad, and the Pacific Coast Steamship routes. The League consists of a number of leading manufacturers and wholesale dealers.

IN the course of an interesting memorandum about Aylmer, our travelling correspondent, Mr. Oliver, tells us, respecting Mr. W. E. Murray, of that place, that he is claimed to be the oldest private banker in Ontario. He came from the old country to Canada in 1829, and reached the vicinity of Aylmer in 1839, when a young man, and commenced the banking business in 1852. He is now 88 years of age, and is in the enjoyment of good health, and attends to his banking business every day. Adjoining Mr. Murray's establishment, which is on Talbot st., are the newly erected residence and banking office of Mr. N. Warnock, who has been in business in Aylmer nearly twenty years. The offices are among the neatest and best finished of their kind. They are as nearly as possible fire-proof; the woodwork of the interior is of quartered oak, and the metallic roof is tastefully ornamented.

WE learn from an exchange that suit has been entered in the Circuit Court at Grand Rapids, Mich., against the Alabastine Company, by its president, Melvin B. Church, to recover $250,000 on a contract made six years ago, and which expired on October 1st, this year. Plaintiff alleges that according to the contract he was to have a certain percentage of the profits of the company, also stock in the company as a consideration for the use by the company of certain valuable patents of which he is the sole owner—particularly the patent covering the present process of manufacturing alabastine in such a way that by mixing it with cold water it is ready for application. Mr. Church is still a stockholder in the company, and states that the amount of damages claimed is not exorbitant, and that facts will be brought out to substantiate his statement.

-- of --
Oxford Boilers and Radiators

FOR HOT WATER OR STEAM

Has been proved by their immense popularity all over Canada, the States and England. They make a reliable heating system that never fails in any weather.

Oxford Boilers are very powerful, economical with fuel and simple to manage.

Oxford Radiators are the standard of mechanical and artistic excellence, made with perfect iron-to-iron joints.

Don't risk your indoor warmth. With our peerless Oxford lines your satisfaction will be sure and lasting.

We guarantee their capacity and the cost is moderate. Let us give you full details and estimates.

The Gurney Foundry Co., Limited,
TORONTO.
The Gurney-Massey Co., Limited, Montreal

Mercantile Summary.

THE largest shipment of American copper recently made, was the one per steamer "Spaarndam," from New York for Rotterdam, on her last sailing. Its total value was $72,522, and consisted of plates and bars. The trade in copper for export has been dull so far during this month, and is not encouraging.

SCOTCH shipbuilders launched in October 42 vessels of 31,082 tons, as compared with 20 vessels of 35,729 tons in October, 1896. To the total the Clyde contributed 29,262 tons, the Forth 1,330 tons, and the Tay 490 tons. The contracts placed during the month represent about 40,000 tons, and of the total 10,000 tons went to establishments on the East Coast.

FARMERS and fruit growers in the Hamilton district are getting $2 and $2.15 per barrel for apples. The Dundas *Banner* says: "The apple packers thereabout are pretty well advanced in their work. The crop is very good in some parts of Wentworth, one man in East Flamboro having about 3,000 barrels for shipment. John Nicholson has shipped about 1,000 barrels, mostly for the German market.

THE appended table shows the Spanish exports of mineral ores during the seven months ending with July last, as compared with the corresponding period of 1896:—

	Jan , 1897. Tons.	July, 1896. Tons.
Iron ore	4,187,743	3,958,781
Copper ore	473,051	421,096
Zinc ore	20,860	19,057
Lead ore	4,600	4,133

THREE sales by auction of bankrupt stock took place in Montreal. The stock of Drouin & Trudel, Abenaquis, Dorchester County, valued at $4,927, and the book debts, 361, were sold to E. C. Brochu for 65½c. and 43c. respectively, and the rolling stock, $160, to Mr. Brochu for 55c. on the dollar. In the case of J. B. Prevost & Co., grocers, Quebec, the stock, $1,000, was purchased by A. Toussaint & Co., for 73½c. on the dollar. In the case of Ernest Cloutier, trader, Notre Dame du Lac, the stock, $827.37, was sold to Duchene & Co., at 57½c., and the book debts, $442.71 to Methot & Co., at 25c. in the dollar.

A MEETING of the Ottawa Board of Trade was held last week, when a communication was read from the Guelph Board of Trade, asking the co-operation of the board in the way of petitioning the Government to appoint a fire investigating committee to ascertain and report upon every fire. An address delivered before the Guelph Board by Mr. O'Connor, of that city, suggests holding an investigation before any insurance money is paid. A committee will consider and report. A letter was also read from the Montreal Board of Trade which desires the passage of an insolvency law by the Dominion Government. The president, Mr. McRae and Mr. Scott will consider the matter. The annual address of President Ross will be discussed at the next meeting, Nov. 29th, as well as the adjourned question of a Board of Control for the city and the matter of insolvency legislation.

THE people of Canada have burdened themselves, says the Cleveland *Marine Review*, with a bonded debt amounting to $80 for each inhabitant, in a resolute attempt to cut a way from the St. Lawrence to the Atlantic, and their efforts should be rewarded by a fair share of the immense export business that reaches the Atlantic seaboard by way of the lakes from the northwest, but it would seem that when their canals are completed they will be no better off than they are at present. "Their 14-foot waterway, great as its advantages may be, on account of avoiding the breaking of bulk at any point through to Montreal, is probably already discounted by ships of 7,000 net tons capacity on the lakes, and by combinations in the grain business of the United States that will control freight and elevator charges all the way from the grain fields to the Atlantic seaboard."

CALCIUM carbide of American manufacture is finding more acceptance in Germany than that of German make, according to the *Iron and Coal Trade Review*. The German carbide is gray or black, porous and crystalline, and always gives a yield less than the theoretical. The American is like anthracite, dense and bright black, with a conchoidal fracture, and gives a yield which seems sometimes even to exceed the theoretical. Carbide of German make is not kept long enough in the electric furnace, so that impurities—carbon, lime, sulphur or arsenic compounds—remain in it, and the acetylene made has a smell like garlic, due to arsenic, while the American has no garlic smell at all. The apparent paradox of the yield being higher than the theoretical can be explained by the use of dolomitic limestone, which causes the calcium to contain some carbide of magnesium as well.

MR. JOHN SHIELDS is the contractor who owns the stage line that runs between Ashcroft and Barkerville, a point 300 miles north, and carries Her Majesty's mails to the Cariboo and Cassiar districts. "No, we do not expect that our business will increase to a burdensome extent owing to the Klondike boom," he said last week. "The greater portion of the people who go in by this route, which I think is the best entrance way to Klondike, will go in with pack trains. Horses can be purchased, Mr. Shields says, at Ashcroft for $15 apiece and the trail is good all the way to Teslin Lake. A traveller takes the famous Cariboo route to Quesnelle, 220 miles; he then crosses the Fraser river by ferry and follows the telegraph trail to a point 450 miles further north called Telegraph Creek; from there to the Stikine river it is only 135 miles, and after that it is easy work to float down the river to Teslin Lake and on to Klondike. The navigation is first-class, and there is no difficulty in securing seven feet of water."

AT the Avonport brickyards, on the Bay of Fundy, owing to the extensive demands upon them by reason of the late Windsor fire, extraordinary activity prevails. Double gangs of men are working night and day to keep up with the orders that have poured in, and the material of which will be utilized in the rebuilding of the town.

FOR the first time since the new tariff law went into effect the receipts of the treasury from customs begin to show an increase over the receipts from the same source at a corresponding date last year, says *Bradstreets'* This fact has been noted with pleasure by the treasury officials, who expect that by the first of next year the Government will have sufficient receipts to meet current indebtedness.

IT is stated by the Whaleman's Shipping List that the total number of whales taken north the past season was 84, of which 58 are bowheads and 26 right whales. Of the bowheads, five, as far as known, are on board the imprisoned vessels off Point Barrow, the bone from which may not be received this fall. The estimated quantity of whalebone received and yet to arrive, including trade bone, is about 170,000 pounds of all kinds.

Mercantile Summary.

McFarlane & McLaclan, general storekeepers at Hall's Siding, B.C., in 1895 purchased the branch store of R. Grant & Co. They have assigned within a few days.

The authorities of the Windsor Foundry which suffered so heavily in the recent fire that almost destroyed Windsor, have decided upon rebuilding their plant on a scale larger and more complete than before.

Word comes from Montreal that the Dominion Cotton Mills Company is about to cease the use of steam for power purposes. On Saturday last, we are told, they gave a contract to the Lachine Rapids Hydraulic Company, by which the latter will supply electricity for power for a period of twenty years.

After having been in business as furniture dealers in Petrolea for twelve years, Endress Bros. have assigned. Owing to their disposition to overtrade, they have always been financially cramped.——James Stanton has been postmaster and grocer at Port Dalhousie a long time, but never accumulated much property. He has made an assignment.

Nearly the whole of the output of the Manitoba creameries this year, exceeding in value that of 1896 by $105,000, was sold for consumption west of Port Arthur.

Going to press on Wednesday evening, by reason of the holiday yesterday, we did not learn the result of the voting by Winnipeg property-owners on the 24th on a by-law to raise $700,000 for installing of a new system of water works by artesian wells. The directors of the old Water Works Company will double the water rates charged the city for flushing the sewers and watering streets. They also threaten, if the by-law is carried, to advance rates to private users 75 per cent.

The B. C. *Mining Critic*, commenting on the bargain reached between the owners of the Pilot Bay smelter property and Messrs. Braden Brothers, says that Messrs. Braden have taken a lease of the property with an option for the purchase of it within a certain time. It is, therefore, probable that before long the works will again be in full operation.

A lumber transaction of considerable amount is reported from Nova Scotia. The timber lands of Hill, French & Co., lumber operators at Musquodoboit Harbor, have been transferred to a syndicate represented by D. B. Cummings, of Truro, and Fulton Logan, of Stewiacke. The lands sold are understood to comprise about 25,000 acres of wooded lands, with a milling plant and water power at Musquodoboit Harbor. The price paid is said to have been $50,000 or thereabout.

A recent paragraph about the Montreal, Ottawa, and Georgian Bay canal speaks quite grandly about the prospects of this project. Some English capitalists, it is declared, have "interested themselves in the scheme," while contractors and a consulting engineer have been approached, and matters are painted quite rosily. It is to cost a trifle of fifteen millions, but this does not deter the vigorous promoter. It is even said that "the work of construction is to be vigorously entered upon as soon as the weather permits next spring, and will be completed within three years," —more or less, we presume.

Mercantile Summary.

MR. DAVID BURKE, F.S.S., manager of the Royal Victoria Life Insurance Company, visited Toronto last week and appointed Mr. J. Alex. Culverwell sole general agent for Central Ontario. Mr. Culverwell has been in the life business in Montreal, and lately in Toronto.

RUSSELL JOHNSTON, of Pictou, N.S., who has done a moderate lumber trade for some years, has become involved, it is said, through being security for a brother, and has had to assign. He has given preferences to the amount of $2,127, and confessions of judgment to amount of $3,109.

ON Saturday the assets of S. McAdam, manufacturer of shingles will be sold.——The general stock of J. R. Jaynes & Co. will be disposed of on Monday next.——To-day the men's furnishings stock of C. R. Shane & Co., of Goderich, is to be sold.——Next Wednesday the general stock of W. H. Thomson, of Schrieber, will be offered for sale.

IN March last Pearce & Co. bought the bankrupt stock of M. C. Dale at Mitchell, amounting to $5,500 at 52 per cent. Of this sum $1,000 was advanced to Mrs. Pearce, the owner of the business, by her uncle. The business was managed by her husband, who lately became very negligent in looking after her interest, consequently she now assigns.——Three years ago, Pierre Strasbourg left Hull, Que,, and purchased a hotel in Massey, Ont., doing a fair trade, but the two chattel mortgages for $3,100 that covered his assets were too much for him to struggle under, and now he makes an assignment.

AN effort is being made by D. M. Smith, grocer, at Beaverton, to arrange a compromise with his creditors, but so far nothing definite has been accomplished in this direction. He owes $500 and his nominal assets are somewhat less.——A. E. Ham & Co., dry goods dealers, Chatham, have been unable to arrange a compromise at 60 per cent., and now assign to Joel Hallworth. The stock amounting to $23,000 will be sold next week.——A similar case is that of J. A. Francis, general storekeeper at Essex, who consulted creditors a short time ago, when they expressed their willingness to accept 60 per cent. in settlement of their claims, but owing to his inability to secure the amount he has assigned. His assets are put down at $8,000.

A MEETING of the creditors of Wm. Carter, manufacturer of overalls, etc., Toronto, was held just as we were going to press. He has been in business about twenty years, and, unfortunately, has locked up considerable capital in North-West properties.——About six months ago Hobberlin & Co. opened a tailoring shop here, and already we hear that they got into trouble over liabilities of $700. They have assigned and their stock is being sold.——Hereward Spencer & Co., dealers in teas in Toronto, dissolved partnership a little more than a year ago and H. P. Mullen, who represented the company, continued alone. A bailiff took possession of his premises a week ago, and this is followed by an assignment:

THE Rossland *Miner* objects thus vigorously to the inadequacy of the statement made, not long since, by the Victoria *Province*, that the estimated cost of the mining plants of Rossland is only $33,000. "As a matter of fact, there are thirty-five mines in the immediate vicinity of Rossland which use steam plants that cost in the aggregate $370,000. The Le Roi heads the list as far as size is concerned. Early in the present year it installed a 40-drill compressor to increase its output. The mine is equipped with a 200-horse power hoist, an electric light plant, tramway and large crusher and other machinery. The plant cost $150,000. The other mines using steam hoists and compressors are the War Eagle, O.K., Centre Star, Josie, Red Mountain, Cliff, Monte Cristo, Kootenay and Columbia, Iron Colt, Alberta, Commander, Crown Point, Palo Alto, Robert T. Lee, Red Eagle, Nest Egg, Homestake, Deer Park, Silver Bell, City of Spokane, Monita, White Bear, St. Paul, Georgia, Morning Star, Great Western, Hattie, Sunset, No. 2, Lily May, Gopher, Iron Horse, Colonna, 35 in all.

KINDLY ADVICE TO SPECULATORS.

"How many Canadian merchants speculate in the New York stock market?" was asked by a gentleman the other day. And the reply was: "More than you or any other old-fashioned man thinks." People are certainly not without enticements to risk money in the lottery of Wall street gambling. Within the week we have seen, in one Toronto daily, a double column advertisement a foot in length, signed by a Wall street man, who professes to make profits for his patrons by "no guess-work," but by what is called inside information and by long experience. He gives instances of his gains and quotes account sales—of course, he does not relate any losses. He wants so many dollars per week (in advance) for his daily information, which is to make his customers rich. Another man, or rather firm, in the same paper, writes from Broadway offering to make "big money" for any one who will send him $15 per month for advice when to go in or get

$12,000 Reward

AS FOLLOWS:

The Dominion Bank offer a Reward of $5,000

for information which will lead to the conviction of any person concerned as a principal in the theft of about $20,000 from the bank's premises, in Napanee, on 27th or 28th August, 1897.

They also offer a reward of $5,000 for information enabling them to recover the money stolen, and in like proportion in case any part of such money is recovered.

They also offer a reward of $2,000 for the return of certain uncountersigned $10 bills, amounting in all to $10,000, stolen on the same occasion, and in like proportion in case only a part of such bills are recovered. The numbers of such bills are: **Nos. 46001 to 47000—Series A. Dated 2nd January, 1888.**

Apply to Head Office of the Bank at Toronto, to either the General Manager or Inspector.

Dated Toronto, 21st October, 1897.

TENDERS FOR SUPPLIES
1898

The undersigned will receive tenders for supplies up to noon on MONDAY, NOVEMBER 29, 1897, for the supply of butchers' meat, butter, dairy and creamery, giving price of each, flour, oatmeal, potatoes, cordwood, etc., for the following institutions during the year 1898, viz.:—

At the Asylum for the Insane in Toronto, London, Kingston, Hamilton, Mimico, Brockville and Orillia; the Central Prison and Mercer Reformatory, Toronto; the Reformatory for Boys, Penetanguishene; the Institutions for the Deaf and Dumb, Belleville, and the Blind at Brantford.

Two sufficient sureties will be required for the due fulfillment of each contract.

Specifications and forms of tender can only be had by making application to the Bursars of the respective institutions.

N.B—Tenders are not required for the supply of meat to the Asylum in Toronto, London, Kingston, Hamilton and Mimico, nor to the Central Prison and Mercer Reformatory, Toronto

The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

(Signed)

Suckling & Co.

We have received instructions
from

Joel Hallworth, Jr.
Assignee

To sell by auction, at our warerooms,
64 Wellington St. West, Toronto, on

Wednesday, December 1st

at 2 o'clock p.m.,
the stock belonging to the estate of

A. E. HAM & CO.,
CHATHAM

Consisting of—

Dress Goods, Silks and Linings	$9,569 16
Fancy Goods, Hosiery, Gloves	4,453 20
Gents' Furnishings	1,477 15
Staples	4,880 57
Curtains, Carpets, Mantles	1,977 87
Crockery and Silverware	299 46
Fixtures, Furniture, etc.	623 44
	$23,280 85

This is undoubtedly the best stock that has been in the market for years; it is exceedingly well assorted and especially adapted for the present season.

TERMS—¼ cash, 10 per cent. at time of sale, balance 2, 4 and 6 months, satisfactorily secured, and bearing interest at the rate of 7 per cent. per annum. Stock and inventory may be inspected on the premises at Chatham, and inventories at the office of the assignee, Gray's Building, 24 Wellington Street West, Toronto.

out of the market, and who will send him money to speculate with, and declaring to every one that "you cannot lose if you follow as we direct." Much more follows to the same effect, plausibly written, and calculated to attract the imagination of sanguine people, and they are asked to write at once for full particulars.

We trust none of our readers will be induced by these attractive lures to plunge into the vortex of stock speculation. No broker, however experienced, can tell exactly how a stock is going to move, and the most lucky guesser misses his guess sometimes. "Runs of luck" do not last, whether at cards, roulette, betting on horses, or anything else into which the element of chance enters. Therefore the man who tells you that you cannot lose by gambling on stocks is leading you astray. If any young man has saved up $50 or $100, and is tempted to risk the loss of it by "blowing it in" at some gambling place, we say to him, don't do it; you had much better be sure than sorry. Go straight to a life insurance office and ask some intelligent official to explain to you how best you can invest it in that direction. Or buy outright some shares with it in trusty Canadian mines, if you like (not wildcats). Buy your mother something with it; or put in a savings bank. Do anything in reason with it, but do not venture your money in Wall street gambling.

A CANADIAN WINTER PORT.

The visit of Mr. W. S. Fisher, president of the St. John, New Brunswick, Board of Trade, to Ontario cities, is opportune, stimulating our merchants as it does to welcome the fact that we have a valuable winter port in St. John and reminding us to our duty by it in so far as it gives a desirable outlet. Mr. Fisher addressed the Toronto Board of Trade on Monday and the Hamilton Board on Tuesday of this week, showing that St. John has now a weekly steamship service to Liverpool, a fortnightly service to London, Glasgow, Dublin and Belfast, and during the winter there will be three sailings to Aberdeen. Her true rival as a winter harbor is the United States port of Portland, and the question is one of whether we should build up our own or foreign ports, urged Mr. Fisher. He also pointed out that effort should be made by Canadian millers or flour dealers to sell to the West Indies a portion at least of the flour they need, and not allow 600,000 barrels of American flour to be sent thither from New York, as had been done last year. On the conclusion of Mr. Fisher's address, the meeting passed a resolution, moved by Mr. Kemp, reaffirming the policy of the board to use its influence in fostering the export and import of Canadian goods through our own ports.

The Hamilton meeting was well attended by the importers and exporters of that city, at the Board of Trade rooms. After considerable discussion, the following resolution was carried unanimously:

"Having heard the address of Mr. Fisher, president of the St. John Board of Trade, and the advantages offered through their magnificent harbor and dockage, by means of which every advantage is offered in the rapid handling and despatch of goods in transit, and feeling that it is the duty of Canadians to patronize their own avenues of trade in preference to those of a foreign country, we pledge ourselves to do all in our power to encourage and direct a large share of our trade over our Canadian routes so far as it may be found practical, and to give such means as are promised by Mr. Fisher every encouragement in our power."

Debentures.

THE SITUATION.

There is a proposal to make retroactive a measure for doubling the stamp tax on Bourse transactions in foreign State securities, in France, and also to bring foreign companies which now escape without taxation, into the fiscal net. The duty will be 20 centimes per 100, or one franc in 500. No less than 2,455,000,000 francs may become subject to this tax, though there is, in reality, a good deal of uncertainty as to what the real yield of the tax would be. The province of Quebec would feel the weight of the tax, in case any of her securities held there underwent conversion; and it would be operative even if the arrangement made no actual exchange of bonds. A conversion which diminished the income of the bondholders would, nevertheless, give birth to a tax. The worst part of the measure is the proposal to make it retroactive. As a market for raising loans, France, under this measure, would be at a disadvantage as compared with England and Germany, where a similar tax is lower. The French bankers, as might be expected, oppose the measure and have tried, with what success remains to be seen, to bring over the Minister of Finance to their view.

Mr. McLeod Stewart, report comes from Ottawa, is back from England, reporting that he has found both capital and contractors to undertake and complete, in three years, the proposed Ottawa and Georgian Bay Canal. When we bear in mind the efforts made to obtain a parliamentary subsidy for the project, this announcement is almost enough to take one's breath away. If the time had come for asking for particulars, there are some among us who would want to know what is meant by the statement that arrangements have been made for the capital required in this enterprise; is it the whole capital necessary to build the canal? Or does there lurk behind the scheme the expectation of a Parliamentary subsidy? This point will have to be cleared up before long. Meanwhile, the statement that the work will be accomplished in three years is made without hesitation; as if there were no contingency respecting any portion of the capital. Promoters are proverbially sanguine, and their enthusiasm is sometimes liable to get ahead of the sober facts; but, here the story is told without circumlocution, without if's or an's But, in fact, has any financial scheme been put on the stock market, any stock floated, in the regular way, or in any way? An issue of stock could not take place in secret, without the facts escaping over the cable in the ordinary course. What has really happened, seems to be that Mr. Stewart found a firm of contractors, somewhere in the United Kingdom, who were not unwilling to take a contract. So much may be accepted as accomplished. But "the arrangement for the capital" is another matter. With whom it was made is a bottled secret, for which there are, doubtless, reasons good or bad. An engineer, the report adds, was found in the person of Mr. Alfred Baker, of Forth Bridge fame, whose consent to become engineer of the canal mentioned. Why not? Engineers and contractors are always on the outlook for employment. Only the mystery of the "arrangement for the capital" requires to be dispelled. It will be a relief to see the mist of the mystery vanish. When the mystagogue is ready, the anxious public will lend an ear.

Judge Dugas, a few days ago, when a case came before him in which law authorized him to make whipping part of the punishment, not only refused to do so, but gave his motives for refusing. His principal reason was that, in the case of the prisoner, the best thing was to protect society as long as possible from the depredation of such creatures. Beyond the maximum of punishment permitted by law, in the form of detention in the penitentiary, he could not go, but so far he went, in preference to subjecting the miserable creature to whipping. The revival of flogging in prison, after this punishment had been abolished in the British army, was confined to a vile class of criminals, and thus restricted, it appeared to carry public opinion with it. There are, however, people who object to barbarous punishment as unworthy of a civilized people. Only three countries inflict this form of punishment. The Russian knout is a survival; with us the cat-o'-nine-tails is a revival. In the case of Judge Dugas, we are scarcely warranted in seeing a reaction against the limited use of this form of punishment; it is more likely an individual repugnance, such as must always have existed, and does not necessarily represent a growing phase of public sentiment.

If when Mr. Foster, on behalf of the United States, asked Canada to cease, for a time, killing seals at sea, the proposal had volunteered that the animals should, at the same time, cease to be killed on the breeding islands, the proposed agreement would have contained an element of equality. As it was, the proposed arrangement was unequal; it would, if accepted, have given a distinct advantage to the United States and taken from Canada a source of profit. If the reduction which the herd has undergone in the last few years is a reason for stopping sealing at sea, it would seem also to be one for stopping the killing of the animals on land. To found an argument against pelagic sealing on the reduction of the numbers of seals, and at the same time to claim the privilege of killing the animals on the islands, is inconsistent. Killing at sea may, as alleged, tend more rapidly than the other process to diminish the herd; still, both methods produce the same result, though in unequal degrees; and when the country which employs one method of destruction urges the other to hold its hand, it ought itself to be willing to act upon its own advice. If this cannot be done, owing to the American Government's contract with the Alaska Company, a willingness to grant some other equivalent would be in order. But when Mr. Foster says, in effect, to Canada: "grant us our demand, and then trust to what we may do in return," he is simply asking us to surrender a profitable right which we possess, without the assurance of any return. Perhaps the fact that the different subjects to be treated between the two countries had been segregated, with different negotiators for three several matters, on the American side, accounts for the preliminary overtures containing an element of embarrassment which threatened to block the way to the first step in the success which, we must assume, both sides desired. Mr. Sherman seems to have found a way out of the difficulty. A joint commission, which appears to have been a Canadian suggestion, can, of course, cover the whole ground, and if it cannot reach a conclusion which will meet the sanction of the United States Senate, we shall, at least, learn exactly where and what the difficulty is.

RECIPROCITY.

Among the strange things said, in the reciprocity discussion, we sometimes hear that the political connection between Canada and England prevents this country making a bargain with the United States that she would otherwise make. The idea is put in two different ways: sometimes it is said that the United States will not make a reciprocal trade arrangement with a dependency, apparently for no other reason, for none is given, that Canada is a dependency and not an independent nation; anon it is insinuated that Canada is not free to make such a commercial arrangement with a foreign country as she desires to make and would make if she were not under some implied restraint. If it were true that the United States refused to deal with Canada, as she would otherwise deal with her if Canada were independent, what is the motive that moves the Republic to this decision? Is she afraid that any bargain she might make with us would fail in the execution? This cannot be, for England being a party to it there would be a double guarantee for its execution. Does the Republic object to the status of Canada as a dependency of Great Britain, and if so, why? What form does she desire our status to assume? Independence? And if so, why does she desire to see Canada assume an independence which this country could maintain only at the sufferance of her great neighbor? The other assertion, that Canada would make a different commercial arrangement from any that is now possible, if she were at liberty to do so, has no basis of fact. Canada is practically under no restraint in this particular; she is not under any external compulsion which prevents her making any arrangement, through the proper channels, which she desires to make. The mistake is in assuming that she desires to make an arrangement of a kind which she absolutely refuses to make. Canada, like the United States, though in a less degree, is in the hands of the Protectionists, who desire nothing so much as to make it difficult for the manufactures of other countries, American or British, to come into competition with their own. Their organs have, for years past, deprecated almost any form of reciprocity with the United States, especially one that included manufactures similar to those made in Canada. The general public, in this country, objects to a form of reciprocity which would curtail our freedom of purchase, and oblige us to buy manufactures from a country whose manufacturers are constantly telling Congress that they cannot compete with the productions of other countries. In some manufactures, the United States can compete successfully with the world; among these are iron and cotton, but in these products Canadian manufacturers are competitors, at a disadvantage, with the Republic, and our producers of iron and cotton, following the example of their neighbors, demanded protection, and having obtained the object of their wishes, are not willing to surrender it. The real obstacle to reciprocity in manufactures is the Canadian manufacturer. But there is a general sentiment in Canada in favor of a limited form of reciprocity.

FINANCIAL REVIEW.

As we predicted a month ago, the circulation of the banks has risen to the largest amount that has ever been known, the figure for 31st October being considerably beyond $40,000,000. The exact amount is $41,580,000, an increase of nearly $3,000,000 during the month, and being nearly $6,000,000 more than the circulation of last year. This enormous volume of bank circulation has enabled the country to move an exceptionally valuable crop without the slightest disturbance to the monetary position, and has demonstrated again, what has so often been demonstrated before, that the system of circulation now in practice in Canada is of inestimable value to the country, *in carrying on its business*, while it is at the same time perfectly safe to the holder of notes. When the proposal was made by the banks, and agreed to by the Government in 1881, that the notes should be a first lien upon all the assets of a failed bank, including the double liability of the stockholders, it was hardly conceived, even by those who proposed it, of what inestimable value the provision would prove, and what far-reaching effects would flow from it. When the still further additional security was adopted by a "Redemption Fund" to be contributed by the banks and placed in the hands of the Government, it was said by some at the time that no further security was needed, that in fact the proposal for additional security was like gilding refined gold. Events have proved the soundness of this opinion, for in the case of the two banks that have failed since the additional security was adopted, the notes were redeemed within a very short time without the security fund being disturbed at all. Yet both these banks had been most grossly mismanaged, so much so that not only was the whole Capital and Revenue Fund lost, but apparently a considerable amount beyond. Yet for all this, their notes were promptly retired. It is hardly conceivable that worse cases can arise than the two above mentioned; it may be considered, therefore, as a certainty that the notes of our banks are as abundantly secure as any human device can make them, while yet the circulating powers of the banks are not impaired, and all its advantages fully developed for the benefit of trade and commerce.

There are unmistakable sign of a considerable improvement in business conditions during the last few months, especially in the diminution of failures, and the better payment of notes and obligations. The volume of our exports of agricultural produce has immensely increased, and the values of such exports have been on a profitable scale for the farmer and producer. In some districts of the country there are numbers of farmers who have been in debt for years, who have now paid their obligations and have round amounts of money at their credit in the bank. When the farmers of the country generally get into a position of this kind it is a sure precursor of enlarged expenditure, which expenditure will cause a demand for lumber and various other articles that are traded in by our merchants. Farmers who are in this position naturally look round and desire to improve their barns, their outbuildings, their sheds, and their fences; all which is a very rational and legitimate expenditure of money. In some cases the dwelling house itself is improved, enlarged or rebuilt, but this is a much less desirable style of expenditure than the other, for many a farmer knows to his cost that he has been embarrassed by building too fine a house, of which the family has made very little use, while it has been a perpetual burden to him. It should not be forgotten that while good outbuildings, fences, stables, etc., all add to the value of a property if they are properly laid out and constructed, a house that is too good for a farmer's family to occupy is a positive drawback rather than a benefit. A farmer's expenditure on his property should always be remunerative. When this is kept in mind he will be free from future embarrassment; if it is forgotten, he will be overladen with it. It must not be forgotten, too, that farmers who have money at command will spend some of it on household comfort for the family.

A Winnipeg contemporary has taken strong exception to our recent remarks respecting the uncultivated prairie lands which stretch so widely around that city. We then hazarded an opinion that it would remunerate the city of Winnipeg itself to take some interest in a great system of drainage as applicable to these lands. To which it was replied that Winnipeg had enough irons in the fire already. But then it was overlooked that our opinion was based solely on business considerations, viz., that the largely increased business which would flow into Winnipeg, were these lands occupied, would lead to an increase of population; increased population to an increased of revenue, and increase of revenue would pay the interest on the increased burden at the very least, but it is probable that it would do a great deal more.

We did not say that Winnipeg should bear the whole burden of this great system of drainage, but only a share of it. For a part of the expense should certainly be borne by the Government of the province, and a part also by the owners of the lands. A comprehensive scheme upon this basis could, we are sure, be framed without difficulty, and if it were, there is no reason why Winnipeg should not be surrounded with a community as populous and productive as that which surrounds the city of Toronto.

Although there has been so steady an increase in the aggregate deposits of the country, by far the larger proportion of which is in the banks, it is noticeable that the aggregate commercial loans and discounts have slightly decreased during the year. Bank deposits have increased from $201,000,000 to $223,000,000, but the discounts, which were $218,000,000 in October, 1896, are only $214,000,000 in October, 1897. This is a style of movement which is not conducive to the profits of the banks. The largely increased deposits no doubt mostly bear interest; while the money has had to be employed in call loans, or purchases of bonds, or increased amounts of cash reserves. Call loans and investments are twelve millions more than they were a year ago, and the cash on hand is $3,000,000 more.

All this leads to the conclusion that the enormous increase of deposits shown has been of no profit to the banks at all. It is doubtful if a large amount of the money the banks receive on deposit yields them any profit, when expenses are deducted, average losses provided for, and reserves maintained. Indeed it is tolerably certain that the deposits which are not lent to other business, but stand on their own merits pure and simple, are a source rather of loss to the banks than profit. The fact is the banks are driven by Government competition not only to allow a higher rate of interest than money is worth, but to allow interest on masses of deposits which properly speaking are not entitled to interest at all.

There seems to be in the minds of some depositors an idea that a deposit in a bank should carry interest from the day it is lodged to the day it is withdrawn, by a sort of natural law, but there is no natural law in the case. The whole system is purely artificial; the natural law would be that the person who deposits money with a banker for the purpose of being taken care of, should remunerate the banker for his risk and trouble, exactly as a person does who lodges goods in a warehouse.

It is true that a banker can lend some of the money again, which a warehouseman cannot do with goods, but he cannot lend the whole of it, for otherwise he could not repay the amount on demand; and lending is a risky business.

We have got into altogether too artificial a condition in this regard in Canada, and in some respects the mercantile community suffers for it. It is certain that the mercantile community suffers by the action of the Government in keeping up deposit interest to so high a rate. And the practical working of the Government system is defective in the fact that no adequate reserve is kept against these immense demand liabilities.

The financial world not only of England, but of every other country was startled not long ago by hearing that the Bank of England had consented, on certain conditions, to hold one-fifth of its reserves in silver; an extraordinary position for a bank to take which has no liabilities small enough to be paid in silver. The action produced a very strong protest from the financial community of London, and was taken up by the Bankers' Association of Canada, whose members well know that the whole stability of the gold fabric of the world rests upon the maintenance of gold payments by the Bank of England. A carefully worded, but emphatic resolution was passed at the meeting of the association, affirming the fact that Canada had always paid its obligations, both public and private, in gold; that gold was the only proper medium of exchange for commercial and banking transactions; that the true function of silver was in the furthering of retail transactions, and that no tampering with the gold standard could take place in England without irreparable injury. The resolution was cabled over to London and communicated to the Chancellor of the Exchequer and to the press, and it was well received.

ABOUT PINE LUMBER.

Possibly some who advocate a policy of surrender to the Americans in the matter of pine saw logs, for fear of what the Americans may do to us if we do not yield, are not aware of some important facts. In the first place, so wastefully have the pine forests of Michigan and Wisconsin been cut, that, in the opinion of a well-informed lumberman, there does not remain in those States pine lands for more than seven years' cutting at the rate of the last dozen years' consumption. Nay, more, there are at least a dozen lumber mills in the southern peninsula of Michigan which would have to shut down if it were not for the pine logs supplied to them from Ontario forests. Good pine trees are getting very scarce in the Green Bay and Menominee region.

And in that part of Michigan whose streams run northward into Lake Superior, the supply of pine logs is so limited that it cannot be long before the customers of these mills, too, will need to look to the forests of Canada for a supply. This being the case, is it not wise in us to husband our resources of this valuable wood against the time when, the too profuse cutting of American lumbermen having exhausted Michigan and Wisconsin pine trees, they must come to Canada for the pine lumber they will need? And why should we be concerned to keep Michigan mills running by means of our logs floated across the Georgian Bay, when we may properly and profitably keep our logs for our own mills to saw, and supply our neighbors with the sawn lumber rather than the raw material?

There is a vast district of Ontario north of the Georgian Bay, extending from the eastern boundary of the Province west towards the Nepigon, mostly unfit for cultivation, portions of which are timbered with pine. Let us keep our eyes upon this and preserve it with care, for it is the source whence the States west and south of Lakes Superior and Michigan must soon look to receive their supplies of pine lumber. Our trees will be needed in the future both by the Americans and ourselves. And the superior quality of our best pine is an element in the value of this great and precious asset that should never be lost sight of or sacrificed "in the raw" to enrich a neighboring and none too friendly nation.

Here is another consideration with respect to Ontario pine. Our timber operators should discriminate in their cutting. The markets of this province are filled with low grade pine lumber, an increasing quantity of which is produced as the pine gets scarcer. Now our coarse pine is not wanted in England, and it is practically shut out of the States by the Dingley tariff. What chance, therefore, have we of getting rid of the superfluous stocks if we do not restrict our cut. If, in the meantime, we adopt a conservative policy in cutting our pine timber lands, it would be for the benefit of not only the lumbermen but ultimately of the country.

OUR FLOUR MILLERS.

Since the wheat harvest of 1897 was marketed, there has been an unusually active movement of Ontario flour in our export trade. To the British markets, Ontario 90 per cent. patents have principally been sent in sacks of 140 pounds, while our neighboring colony, Newfoundland, has purchased straight roller and extras, the shipments having been made, for the most part, in barrels. Although sacks mean a great saving in the space occupied by a cargo, the Newfoundland merchants prefer barrels, as they can be used in the exportation of fish, which is, of course, the island's staple industry.

It cannot be said, that the Ontario wheat was of good quality this year. The unfavorable weather during the harvest season caused a serious depreciation in flour-making qualities. But for the fact that the millers of this Province possess the most improved machinery for working up the wheat, a sad waste must have followed; as it is, while the millers have been put to increased expense in milling, this has been offset by the lower prices paid for wheat.

Canadians have a foothold in the British flour markets; as compared with the exports from the United States ours are small. There is plenty of room for development, and with care and honesty the millers in this province may widen their trade opportunities abroad. The millers of Manitoba hard wheat patents and strong bakers' flour, have already won an enviable reputation in the United Kingdom. The shippers of Toronto and other Ontario centres have used Montreal largely as a port of shipment, but as all the space in the outgoing vessels until the close of navigation has been taken for some weeks past, Portland, St. John and New York have obtained a share of the trade. There is little difference in the freight rates by way of these different shipping routes. A speaker at the Monday meeting of the Toronto Board of Trade made some suggestions to ocean flour carriers, which are worth regarding. One of these was that in loading sack flour, canvas or other material be used for hoisting slings, and not chain or wire, which was apt to tear the bags. The same gentleman warned steamship companies not to make platforms out of sack flour on top of which to unload other goods, as was sometimes done.

OUR AUSTRALIAN LETTER.

TRADE WARNINGS, AND HINTS TO EXPORTERS.

Good showers still make the prospects of harvest in November good. The effect on the prime product here, wool, cannot be realized until a year hence. The hope brightens business a little just now, and gives expectations of more activity early next year.

Hog's hair, not bristles, would hardly be supposed to be a product that can be sold here, but such is the case. If any Canadian packer prepares it as it is prepared in Chicago, he should write the Canadian Commissioner. It is used to mix with horse hair for stuffing cushions and other articles of that sort. Moss is sold to some extent for the same purpose. The beauty about such articles is that they cost nothing for freight, as they can be packed as filling in bulky but light goods that are carried by measurement.

The chief trade paper in Sydney has been discussing the reports of the Canadian commercial agent to the Canadian Government. It admits that the Sydney business men are conservative, but states that it is because their Australian customers are very conservative. He says that it requires fighting to get into the trade here, but does not think that the agent's scheme of a general show-room will serve the purpose. Like the higher critics, generally, he objects but does not show a better plan. The answer of Mr. Larke is that his information is not that the people are so conservative in their purchases as commonly reported. The Massey-Harris management, who sell directly to the consumer, assure him that the Australian farmer is as ready to buy a new article as the Canadian; but you must convince that farmer that the new article is a good thing. The merchants here make it their standing rule to sell what the people want, and they will sell any article that is wanted regardless of from where it comes, or whether it is new or old. They won't, as a rule, attempt to introduce a new thing, but they will run after an article for which a demand is created, and pay a good price for it. The essential thing, therefore, in order to create a profitable trade, is to awaken a demand. To force any article on the market without so doing, is to get a low price in a market overstocked with such goods. The show-room scheme is, therefore, one of the means, and but one of the means, recommended by Mr. Larke to create a demand for Canadian goods.

THE MONETARY TIMES of Aug. 20th, is right in pointing out the necessity of expending some money in creating a market. There is a trade here for Canada, if courage and common sense be used to secure it. The first item is not always manifested. Here, for example, is a Canadian at this moment making a fourth attempt to get in with his goods. Each time he has done just enough to lose money, and it looks as if this fourth attempt may end the same way. If his manufactures are as good as I am told, then a little boldness in making them known would give him a good grip on this market.

The North American Bent Chair Company is just now showing grit of the commendable sort. They have sent out a first-class man, who is visiting the retail trade in the towns personally. He has a large lot of chairs now landing. They have to meet the competition of the chairs made in Germany, but they can do it, and I shall be badly mistaken if within a twelvemonth they have not secured a large share of the trade of New South Wales for their goods and got good standing ground in all the colonies.

One of the prime qualifications in a commercial agent appears to be character. I was in the office of the Canadian Commissioner a little time ago when a prominent wholesale merchant of Sydney came in and said: "I am offered goods from a Canadian manufacturer, but before I will touch them I want your assurance of the character of this manufacturer, the general opinion of his wares in Canada, and whether he is able and willing to carry out his engagements. Upon being satisfied on this point, he was asked by a gentleman why he took Mr. Larke's word and not that of the traveler. "Oh! was the reply, "the traveler is a stranger, but Mr. Larke has been here two years, and a man can't be before the public for two years without our being able to learn whether his judgment and word can be depended on." He had scarcely left when the head of one of the largest and oldest houses in Australia came in with a letter from another Canadian firm soliciting the Australian house to take up their goods, and information was asked about the goods and the maker. This appears to be the regular rule now, and there is no article sold in any quantity without first getting such information as that asked above.

I have been waiting for a chance to write a letter without a complaint, but it does not look as if I am going to get an opportunity. Two years ago a gentleman came out here and opened a good trade. His connections were excellent; he secured prices very satisfactory to himself, and it looked as if the trade would develop into very considerable dimensions. Alas! it appears now as if in two years he has lost it all. The causes given by his customers are, first, unconscionable delay in filling orders; second, carelessness in shipping; and the last straw that broke the last customer's connection was putting up the freights by the C.P.R. and Canadian steamers to a figure beyond reach. The goods could come via New York, but the customers here say that the past transactions have been so unsatisfactory that they will not try to get them that way.

I met a well-known manufacturers' agent on the street a couple of hours ago, and asked him if he had any news for Canada. His answer was: "You can say that I can do business in the two lines I represent if your people will pay some attention to what I write, but they seem to think we are a pack of fools out here and don't know our business. Tell them this won't do. We may not be as smart as your people, but we do have some idea of what we want, and we must have it as we want it." This was borne out by an application at the headquarters of another Canadian article. "Look at that stuff," was said to me. "It is just what I told them not to ship here. It is no good for this country. They send them to me all the same, and write me they expect me to sell them well; that because they sell in Canada they ought to sell in Australia." They won't, though, as these companies will find to their serious loss in both money and trade. The surprising thing about it is that all the firms referred to, and they are good ones, have had representatives in Australia. They have all shown skill and courage, and spent some money to get this trade, and just when there was a chance of getting the money back, they destroy it in this unpardonable fashion.

THE AUSTRALIAN FEDERATION CONVENTION.

The second session of the Federal Convention has adjourned to meet again in Melbourne later on. It has not done much in its month's session to advance Australian unity. At Adelaide, South Australia, they wrangled over the financial aspect of the matter. Here in Sydney it was over the form of the Senate and the provisions for deadlocks between the two Houses. They first resolved that they should have a constitution of the British pattern, where the majority ruled, but then the smaller colonies insisted on a Senate and a dead-lock provision that would enable the minority to control the situation. The whole trouble is the petty selfishness and narrow jealousies between the colonies. The members of the convention cry out that unless this or that provision is inserted in the constitution, our people will vote it down, but it is the common opinion that the mass of the people are wiser and broader in their patriotism than their representatives.

The convention is likely to produce one good result for th city. Sydney is in possession of the most shameless, undeserving, able-bodied, male beggardom outside of Italy or Egypt. The city people actually seem to cherish this brazen disgrace as an ocular demonstration of the charitable instincts of its people. This shameless lot so beleaguered the representatives from the other colonies that their remonstrances seem to have aroused the government of the colony to take some action to suppress the nuisance. I would congratulate your people on their happier position in this regard, did not a Canadian paper now and then tell of a tramp plague that may not be so numerous, but is quite as discreditable and dangerous in its elements.

A brand new four-penny restaurant floats the name "The Canadian" in big letters, indicating that the Dominion is becoming a bit known and popular out here. The place looks clean enough, but I don't know that I could commend meals and beds to any Canadian troubled with unnecessary sensitiveness in either palate or skin.

Sydney, Oct. 15, 1897. F. W.

THE GREAT FIRE IN LONDON.

On Friday last a fire broke out in a busy part of the city of London and burned all night and until eleven next day, destroying between one and two hundred warehouses and manufactories. Some three hundred firms were on Saturday looking for new quarters. The official report says the cause of the fire is unknown. A large number of warehouses of from five to six stories high were burned and partly fell, the whole covering an area of two hundred by one hundred and fifty yards, bounded by Nicholl Square, Edmunds Place, Jewin Crescent, Australian avenue, Paul's alley, and Red Cross street, a district close to the general post office.

A fire of such extent and duration, in a district closely built with narrow streets and tall houses, many of them fur, mantle, feather, button, and other factories, millinery houses and lace houses, was naturally presumed to imply an enormous loss. But the first statements of the insurance companies' risks were much exaggerated, possibly for stock-jobbing purposes, and instead of the many millions of pounds sterling damage done, the loss is now estimated at from £1,500,000 to £2,000,000. The insurance losses cannot be obtained, but from the fact that the district was not a favorite one with the underwriters, it is not supposed that the leading fire offices of the city have very heavy lines. Probably the companies with headquarters in other cities are more largely interested.

There was costly delay in getting engines at work upon the fire, and for this the curiously leisurely method of giving alarms in London is to blame, also, perhaps the fact that there are six different companies supplying water to the city, with their different turnkeys, who have to turn on the hydrants. Judged by an American standard the London fire engines are inefficient in cases of conflagration. The twenty-five engines which were got together at the scene on the first day would not throw as much water as eight or ten American or Canadian steamers, and neither hydrants nor hose are as plentifully provided in London as are considered necessary in cities on this side the Atlantic. It is not unlikely that this costly fire, the greatest since Tooley street in 1864, will cause the London authorities to set about better protection against conflagration hazard.

LIFE ASSURANCE BY BRITISH COMPANIES.

Life assurance has made great progress among Old Country companies in the last quarter century. And, perhaps, nowhere is growth so marked as in the industrial feature. The progress of some companies has been remarkable, of others slight; but the increase in the volume of aggregate business has been almost threefold in a period of twenty-six years. This is clearly and interestingly shown by a compilation of the premium income of 74 British life offices (ordinary and industrial premiums united) in 1871 and in 1896-7 respectively, given in the London *Review* for November 3rd. The incomes of companies for the two years in question are given in parallel columns, and the relative standing of each as to volume of premiums indicated by numbers.

At the head of the 1897 list stands the Prudential, with the enormous income of £7,122,056, out of a total of premiums for 81 companies of £25,800,010. Next in extent of premiums come the Refuge, the Scottish Widows' Fund, and the Gresham, with approximately a million pounds each. The Standard, so well known in Canada, is fifth in the list, its premiums reaching the handsome total of £766,225, where in 1871 it had only £536,890. Of the companies doing business in the Dominion, the Star has come up from £149,000 at the earlier date to £501,491 in 1897, surpassing the United Kingdom Temperance and General by some £50,000. The British Empire Mutual has an excellent record of progress from a premium income of £84,000, in 1871, to no less than £275,194 this year. The London & Lancashire made remarkable gains, from the £28,000 of 1871 to the £218,659 of 1896-7.

Familiar names appear in the list of English life companies which do fire business in the Dominion of Canada. The North British and Mercantile shows life premiums next in extent to the Standard. The Norwich Union Life has the respectable income of £342,000, followed by the Scottish Union & National with £315,000. The Liverpool & London & Globe shows £230,247 ; the Guardian and Commercial Union nearly £200,000 each ; the Caledonian and the London Assurance Companies are next, with some £160,000. A group of later-formed companies, dating from 1876 to 1896, show remarkable progress, especially the London, Edinburgh & Glasgow office, with £271,000 premiums. The whole list is interesting and instructive, as showing the vitality of life assurance business in the United Kingdom.

EXPORTING POULTRY.

Several firms in Canada and the United States have been attempting to build up a trade in poultry with the United Kingdom. Shipments made last year from Ontario were not, on the whole, successful, and considerable losses resulted. The trade failed mainly on account of the poor and incomplete cold storage facilities. With the improvement of storage arrangements in the vessels carrying Canadian produce to England, it is probable that this business will be developed during the present winter. A Toronto merchant is reported to have made arrangements to ship fifteen cars of poultry, principally turkeys from St. John, N B., about the second week in December, to reach Great Britain for the Christmas markets. The Department of Agriculture at Ottawa recently issued a bulletin on the subject of dressing, packing and shipping poultry to the United Kingdom. The grower is told to fast the birds for twenty-four hours before killing, which operation is to be performed by wringing the neck. They are to be plucked when warm, the intestines then removed, the wings twisted to the back, and the bird then allowed to hang until cool. In packing, cases holding one layer of birds should be used. Hens and cocks ought to be packed separately, and the cases, as far as possible, should contain birds of about the same weight. The cases must then be marked, showing the kind of poultry, number of birds, whether cocks or hens, the average weight, gross weight, net weight, and the tare of the case. A quantity of straw or wood pulp should be placed over a paper which has been put at the bottom of the case. The birds should be separately wrapped in heavy paper, placed with backs down, and not more than twenty-four birds put in a case. It is needless to observe that cleanliness should always be observed ; the birds should be selected and kept constantly in a cool place. Country merchants who are interested in this trade should not only observe these instructions, but see that the farmers follow them.

IMPORTING WOOL DIRECT.

For years the project of buying Australian wool in the country of its production, rather than in Great Britain, has been under discussion by Canadians. It needs little consideration to show that this method of procedure would secure a considerable saving in the time required in shipment. The difference in freight rates is not so considerable as might be expected, since importation by way of British Columbia necessitates a long rail shipment, because most of the mills are situated in Eastern Canada. There is, however, a greater economy in handling the wool by direct shipments. At the present rate of freight charges it is estimated that the Canadian woolen manufacturer or wool merchant can save one-half cent to one cent a pound by purchasing wool in Australia. The advantages are greater in the case of scoured than unscoured wool. Efforts are being made to revive the interest shown some time ago in this matter. The London trade has, however, secured a strong hold on the market, and it is difficult to bring about a change. In the nine months ending September 30th Canada imported 473,800 pounds of wool from Great Britain. If this volume of trade was diverted to the Canadian-Australian steamers, it would assist in solving one of their transportation problems. At present they find great difficulty in securing cargoes from Australia to Canada, and goods exported from this country must bear charges sufficient to make good the deficiency.

EVADING ASSESSMENTS.

The risk that people take in connecting themselves with assessment societies which profess to give members assurance is shown forcibly by a notification sent last month to the delinquent members of the Farmers' Live Stock Assurance Association of Des Moines, Iowa, by Mr. J. P. Hewitt, receiver of the association, when calling upon them to remit their overdue assessments. Thus:—

"The fact that you are no longer a member of the association, or that your policy was cancelled or expired, or that you withdrew from said association long prior to its failure, would made no difference. The assessment was made by the court independent of all these considerations, upon the theory that you, being a member of a mutual association, are liable for your proportionate share of the losses and expenses that occurred while you were such member." Victims of the erroneously styled mutuality idea are here brought up with a round turn, and are likely to be made to see that cheap-and-easy forms of so-called indemnity, wherein members think they can evade their responsibilities by simply dropping out and refusing to pay are not so facile as cowardly and selfish members think. They can be made to contribute, and having danced must pay the piper.

FOR GROCERS AND PROVISION DEALERS.

The cheese season of 1897 is almost over. During the week, since we last wrote, only three boards, Kingston, Brantford, and London met, offering 9,918 boxes, as compared with 45,720 boxes offered at seven meetings a week ago.

There is a great deal of dissatisfaction over the dishonest methods employed in Michigan in packing and shipping peaches. Many of those who have bought the fruit claim that it is all green, miserable stuff below the top layer, sometimes unfit to eat.

It costs but little more to run a store right than it does to conduct it in an indifferent, careless and slovenly manner, remarks the *Grocers' Criterion*, and customers whose patronage is worth having and retaining, particularly ladies, do not like a dirty store or filthy goods.

A cable from Sidney says that the wheat crop of New South Wales this season is approximately 9,343,000 bushels, against 7,400,000 bushels last year. In 1891 the crop was only 3,963,000 bushels. In the last five years the crop has ranged from 5,195,000 bushels up to 7,400,000 bushels.

Our Montreal correspondent tells of a sale of 500 packages made in that city of cheap Congou teas to parties in the Maritime Provinces. Also, that offers from the same quarter for 800 or 1,000 packages are being considered. Stocks of Japans in Montreal are low, and late sales have been made at a cent advance.

The United States consul in Germany warns American importers of chicory against a bogus chicory made of burned beet-roots, which is being extensively shipped to this country. A French consular report also shows that wholesale quantities of artificial coffee berries were discovered in Paris recently. These berries were seized by the police. A chemical analysis showed the presence of ash, gum, dextrine, etc. Under the microscope grains of wheat, starch and vegetable debris were traceable.

Mr. D. Pasqua, writing from Patras, Greece, on the 2nd inst., says of the currant situation there: "A very active business continued up to the end of last month at well sustained values, and shipments as shown below, fully bear out what I have already reported as to the probable importance of our exports in October. The comparative list of shipments to Oct. 31st, is:

To.	Season 1897-98, to Oct. 31.	Season 1896-97, to Oct. 31.
England	40,414	36,530
United States and Canada	8,723	7,280
Holland, and Germany, Austria and Belgium	14,100	12,600
Russia	....	2,444
France	613	1,428
Sundries	60	93
Total net tons	66,710	62,575

SHOE AND LEATHER PARAGRAPHS.

Evidences of coming labor troubles are being seen in Haverhill, Mass. Several large concerns are said to have cut the wages of their help from 10 to 20 per cent. and mutterings of discontent are heard.

The Leather Belting Manufacturers' Association, at their annual meeting in New York this week, unanimously decided to advance the price of leather belting 25 per cent., which is an indication of a more confident feeling.

For the spring trade colored leathers are, from present appearances, going to maintain their hold on public favor. Canadian authorities say that the dark shades, brown and chocolate, will be most conspicuous in the footwear of the spring and summer, 1897. Although much has been said of the growing popularity of dark greens, there is little evidence that they will be favorites in Canada next spring.

The long continued strength of the hide market is at last having a visible effect upon the leather market. Prices are moving up, slowly, it is true, but on that account tanners hope that the advance may be the longer maintained. Splits and grain appear to be in the best position from the standpoint of values. Wax upper, long neglected, is beginning to show life, and enquirers are finding that stocks are light. Although tanners are obtaining one cent a foot or two cents a pound advance over quotations made some months ago, there is still room for an upward movement in leather in order to place its prices on an equality with those of the hide market.

"There is quite a revival in the general feeling in New York leather circles," says *Hide and Leather* of 20th. "Large orders have been, this week, placed by people who were very gingerly about taking stocks a few weeks ago. This shows they are well supplied with orders for their manufactured goods, which, of course, is encouraging to the tanners. The demand seems to be a general one and not confined to any special class. In fact, owing to the scarcity of the cheaper grades, buyers are more or less compelled to take the better grades of stock. Prices are firm, but unchanged. Tanners seem willing to accept ruling quotations for stock on hand, but they do not care to book orders ahead."

A paragraph on rendering shoes waterproof, taken from *Le Moniteur de la Cordonnerie*, says that one of the first essentials is the proper preparation of the upper. All superfluous flour and paste should be removed (from the bottom and lining), and the parts reunited by means of a solution of caoutchouc. Apply the solution freely with a brush, and when the solvent has evaporated, press the parts to be joined together. After the insole is attached the seams are impregnated with solution of caoutchouc; and in general, the caoutchouc solution is used as a substitute for ordinary paste. In most cases these directions will suffice for producing the desired result; in difficult cases, the following method should also be employed: *Hide and Leather* translates: "About a pound of paraffin is cut up into small pieces and placed in a bottle of benzine, and frequently agitated. When the benzine is saturated with paraffin the solution is ready for use. The solution is applied to all parts of the shoe, especially the seams, with a brush or sponge. Several coats are applied. The solution penetrates the leather easily and dries rapidly. When the leather will not absorb any more of the solution, the operation may be considered complete."

INSURANCE ITEMS.

"Is underwriting a profession?" asks *Insurance*. In New York it is an art; in Hartford, a science; in Chicago, a hustle; in San Francisco, demd hard lines. In Kansas it is a misdemeanor, and in Texas a miracle.—*Insurance Herald.*

The statement of the affairs of the Massachusetts Benefit Life Association, filed at Osgoode Hall, cannot rejoice the Canadian creditors of that institution. The document was produced by Mr. Sutton, the liquidator, before Mr. Hodgins, Master in Ordinary, showed that the Canadian assets are $130,000, while the death claims aggregate $87,000, and the total disability $68,000. The aggregate amount claimed is accordingly $155,000, showing an apparent shortage of $25,000. Of the death claims so far examined, certain of them amounting to $25,000, have been agreed to, while others to the amount of $14,000 are in dispute. The balance has yet to be investigated. The disability claims allowed aggregate $39,000.

The law does not compel you to insure your life—at least, the statute law does not, says the *Weekly Statement*. But the law with which lawyers and courts have to deal covers only a minimum part of human duty. The most sacred duties—those so delicate that legal phrases cannot make them effective—lie beyond all juridical terms, outside of the functions of State. Nearly all of these, however, are overwhelmingly important. Among the first that is to be considered is life insurance. Merely to live up to the civil law is better, of course, than to be hauled into court, but doing this alone makes a very poor specimen of the *genus homo*.

The report of the New York department on the Provident Savings Life was issued on Thursday, last week, and shows total assets of $1,982,733. Total liabilities on policyholders account, $1,703,207; gross divisible surplus, $252,562; capital, $100,000; total liabilities, $1,982,733. The report says: "Since Dec. 31st last, the company has added over $200,000 to its reserve fund and has largely increased its volume of new business, as compared with any corresponding period in its history. The corporation's accounts are correctly and concisely kept, the system of checking accounts in vogue being admirably adapted to insure accuracy.

The meeting of representatives of Canadian life assurance companies mentioned in our last issue, took place on Saturday afternoon, in the Toronto office of the Canada Life Company. Those present discussed the advisability of advancing rates in conformity with the recent circulars of American companies, but the matter was left over until the next meeting, which will be held at Hamilton in February. The general feeling of the gathering appeared to be unfavorable to the proposed higher rates, as those now in use are considered sufficient with our home mortality rate. A resolution was passed admitting to the association British companies doing business in Canada.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Wednesday, Nov. 24th,* 1897, compared with those of the previous week:

CLEARINGS.	Nov. 24.	Nov. 18.
Montreal	$11,304,796	$14,164,381
Toronto	6,555,265	7,788,394
Winnipeg	....	3,641,495
Halifax	958,369	1,260,228
Hamilton	570,672	622,080
St. John	544,177	520,978
	$...	$27,997,556

Aggregate balances this week, $........; last week, $4,171,180.

*Thanksgiving Day on 25th; five days' transactions only.

—A series of questions, concerning the advisability of establishing Governmental Bureaus of Information abroad about commercial matters, was lately sent out by the British Board of Trade to the various Chambers of Commerce. It was asked for example, whether British traders could be thereby better supplied with commercial intelligence, and whether spending public money for special commercial agents in British colonies and foreign countries would be justified. The Glasgow Chamber of Commerce does not take kindly to the idea. Its reply says that British foreign traders are already well supplied with detailed information as to suitable goods for exportation. The concluding paragraph says: "The only suggestion this chamber has to make is that merchants should be left to conduct their own business at their individual cost and risk, in their own way, for their own advantage, under laws securing as far as possible, freedom of trade, and that goods are honestly sold *suum tribuit* to buyers and sellers."

—It is possible that British employers, who are having their own troubles in connection with dissatisfied labor, may with advantage study the plan which German capitalists are adopting for their own protection. They are forming, in Vaterland, an insurance society, to be called "Industria," with a capital for the present of 5,000,000 marks, for the purpose of insuring themselves against loss by strikes of workmen and other labor disputes. It is stated that this Mutual Insurance Company is acquiring members among industrial employers all over Germany, says the *Chamber of Commerce Journal*, "We have employers liability insurance here to cover the cost of compensation for accidents to workmen. Why not strike insurance, to cover loss by revolts of labor?"

—Not a little discussion has arisen of late regarding the legality of aking affidavits by telephone. It is still an unsettled question, to the extent that a rule of general application cannot be formulated, says *American Investments*. Something depends upon the condition of the telephone to so transmit a voice that it can positively be recognized. In a recent event some $9,000 of funds in a New York city were tied up on the strength of an attachment, the affidavit to which was obtained over a long-distance telephone, and the court held it to be good. In this case, and from a decision of the New York State Court of Appeals we understand the rule must always apply, if the voice of the one making the affidavit was recognized, and was capable of positive identification.

—That well known official of the London Stock Exchange, Sir Henry Burdett, has resigned his position as secretary of the share and loan department of the Stock Exchange. The *Economist* refers to Sir Henry as follows: "Only those who remember the Share and Loan Department in former days can form an idea of what not only members of the Stock Exchange, but all interested in financial questions owe to Sir Henry Burdett. He has created a unique storehouse of financial information, his *opus magnum*, 'Burdett's Official Intelligence,' being so well known that it is sufficient for us to mention it.'"

—Noting and commending the refusal of Mr. Haultain, Premier of the North-West Territories to use the title "Honorable" because of the office he holds, the *Canadian Gazette*, of London, says: "Mr. Haultain at least is sensible enough to have none of this [display of titles]. Another wise determination to which Mr. Haultain has come is to keep North-West local affairs clear of federal politics. What on earth Gritism, Toryism, has got to do with road-making, bridge-building, municipal life, and such local matters, we never could see."

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending Oct. 31, 1897.

			CAPITAL.					LIABILITIES.					
			Capital authorized.	Capital subscribed.	Capital paid up.	Amount of Rest or Reserve Fund.	Rate per cent. of last Dividend declar'd	Notes in circulation.	Bal. due to Dom. Gov. after deducting advances.	Bal. due to Provincial Governments.	Deposits by the Public payable on demand.	Deposits by the Public payable after notice or on a fixed day.	
	ONTARIO.

Molsons and Imperial Banks bonus of 1%, making dividend of 9%

J. M. COURTNEY, *Dep'y Min. of Fin.*

ROSSLAND ORES IN LONDON.

If there are any disbelievers in the mineral wealth of British Columbia let them step round to Winchester House, Old Broad street, London, where for the past few days an exhibit of gold-copper ores from the great mines of Rossland—including the Le Roi, the Centre Star, the Iron Mask, the Triumph, and the Victory vein—has been on view. Mining experts have passed most favorable criticisms on the exhibit, and the fact that it is placed near the window of one of the rooms facing Old Broad street has enabled passers-by to judge for themselves as to Canada's mineral resources.

The Messrs. McGarvey, of Rossland, who are in charge of the exhibit, brought over half a ton of ore, the greater part of which is in bulk samples. They are specially representing the Canadian Goldfields Syndicate, who exhibit ores from the Sunset No. 2 mine in various stages of development. The capital of the company is, it may be stated, £200,000, divided into 10,000,000 shares of 10 cents, which are sold in blocks of not less than 500 at £10. Up to Wednesday afternoon of last week about 300,000 shares had been taken up privately by people attracted by the good quality of the ores exhibited, whilst about 300,000 shares still remained. The mining property is located about half a mile from the town of Rossland and 4,000 feet from the Le Roi mine. * * * Sample assays vary from $12 to $60 in gold and copper. From thirty sample assays carefully taken (by Mr. Adam, and assayed by Messrs. Robins and Long, and Clewett and Merry, of Rossland) an average of $30 in gold and copper was obtained.

The following list of samples from the mine may be of interest: From No. 1 vein a mass of ore weighing 1½ cwt., assaying 2½ oz. in gold. The following are the values of samples from the discovery shaft on No. 1 vein: 2.4 oz. gold, 4.5 oz. silver, 5.3 per cent. copper. Rock taken from No. 2 vein at a depth of only 5 ft. is valued as follows: 1.4 oz. gold, 7 oz. silver, .22 per cent. copper. Samples from No. 3 vein at a depth of 40 ft. show: 1.4 oz. gold, 2.5 oz. silver, 11.9 per cent. copper. Iron capping from No. 2 vein is on exhibition, valued at $28 per ton.

The Le Rio mine is represented by a mass of ore assaying from 5 to 20 oz. of gold per ton. The Triumph mine displays milling gold quartz, averaging 2 oz. of gold per ton. From the Victory Vein mine comes some rich silver and copper ore. The Iron Mask mine is also represented. By no means the least interesting of the exhibits is a sample of coal sent by the Recordia Syndicate, Limited, from White Lake, Osoyoos district, 12 miles north of Fairview. The width of the seam is given as 4 ft. and the depth 40 ft. Analysis proves the coal to be of excellent "coking" quality.—*Canadian Gazette*, Nov. 5.

NATIONAL DEBTS OF THE WORLD

A recent return gives some interesting figures respecting the national debts of all countries. They amount in the aggregate to £5,800,000,000, against £4,750,000 twenty years ago. Great Britain, the United States, Germany and Spain are the only countries which have reduced their national indebtedness since 1875, our reductions being from £780,000,000 to £660,000,000. France has increased her debt from £900,000,000 to £1,200,000,000, and now has the greatest indebtedness in the world. Russia, Italy, Austria, Hungary, Turkey, Portugal, Brazil, and Egypt, have also created a greater national debt. Considering her population and wealth, Great Britain's debt is now very moderate, as it only costs her annually in interest and charges £24,540,000, or 12s. 9d. per head, while France pays £37,000,000, or 19s. 8d. per head. Our colonies have been piling on their debts, and the total indebtedness of the Empire is now £1,097,166,600, India and New South Wales being the greatest culprits.—*London Shareholder.*

ADDITIONAL SUMMARY.

The Western Canada Loan Company has declared its usual dividend to-day.

J. S. Fairley, lumber, Boiestown, N.B., and J. E. Clair, general dealer, Clair Station, N.B., offer compromises. J. W. Correll, dry goods, St. John, has assigned.

A dry goods dealer in Ottawa, G. H. Megloughlin, who only began business there last spring, and was reported a few months ago as asking an extension of time, has now assigned to P. Larmonth.

Mr. Max Murdoch, president last year of the Dominion Commercial Travellers' Association, is in the field for the presidency of that body, the other candidate for which is Hon. J. D. Rolland, president for 1897.

Parties in Hamilton, Welland, and Glanford are incorporated by Ontario letters patent under the name of the Odorless Crematory Closet and General Heating Company, of Hamilton, limited, to make and sell closets and furnaces; capital $24,000.

There is announced by the New York *Herald*, as being quietly organized and to be formally announced within a few days, an alliance of the companies engaged in making insulated wires and cables for electrical purposes. Among the companies interested is the General Electric .

The Dominion Line steamship "Labrador" left Montreal on her last trip of the season on Saturday, taking a big cargo, viz.: 16,000 bushels wheat, 43,000 bushels corn, 3,000 cases canned meats, 3,000 pails lard, 1,500 boxes meats, 300 standard deals, 4,000 barrels apples, 200 tons pulp, 3,000 boxes cheese, 1,000 cases canned apples, 4,100 bags flour, 2,000 cases eggs, and 200 tons phosphate.

Quotations of lower province stocks, dated Halifax, 24th inst., received too late for insertion in the stock and bond report, are as under: Bank of Nova Scotia, 210 to 220; Bank B.N.A., 119 to 125; Merchants Bank of Halifax, 179 to 183; Union of Halifax, 137½ to 143; People's, 110½ to 114½; Halifax Banking Co., 147½ to 153; Commercial Bank of Windsor, 105 to 112; Bank of Yarmouth, 113 to 116; Exchange Bank of Yarmouth, 96 to 98.

R. Young & Son are an old established firm of general merchants and fish exporters at Caraquet, who have always stood well heretofore. Latterly they have made a considerable loss by the failure of a firm at Naples, Italy, to whom they consigned fish, also by the shipwreck of a cargo of fish to Oporto, Spain, and they are now asking creditors to accept a compromise at the rate of 60 cents in the dollar.

Arthur Castonguay, many years in the milling business at Notre Dame de Lourdes, Que., has found it necessary to assign. He was burned out in 1896 with some loss, and rebuilt evidently beyond his means. He owes about $6,000, and has assets of about $5,000.——Forty per cent. is offered creditors by E. Duckett, general dealer, St. Gregoire de Nicolet, Que. In 1893 he settled at 60c., and latterly has been travelling for a Montreal wholesale house, the business being principally managed by a clerk.

A somewhat prominent firm in Bridgewater, Nova Scotia, selling dry goods, has been obliged to assign. The concern has been reported a slow paying one for some time past, but was supposed to have a fair surplus. Mr. Logan is at present ill, and in the hospital in Halifax. Some $10,000 to $12,000 of liabilities are preferred.——Owen P. Hill, tailor, Halifax, N.S., reported as insolvent several week sago, is trying to get a settlement through at the rate of 50 cents on the dollar, spread over sixteen months, liablities being about $2,500.

Accounts continue to be given by the Canadian Pacific Railway of satisfactory transcontinental traffic over its line. The company is overhauling its rolling-stock as well as adding to it. The list of cars now shows 91 sleeping cars, 45 tourist cars, 15 diners and 8 private cars. The tourist cars will soon be centering in Winnipeg, because 20 of them will be required for the Christmas excursion business. Last year 13 were in use, which with the two each week returning from Seattle, were found to be sufficient. But the prospects are even better now than last season.

MONTREAL STREETS.

The requirements of the Montreal Road Department for 1898 were laid before a meeting of the Road Committee on Monday. It refers to the need of improved drainage, for lack of which so many suits are brought for floodings. The wooden block paving on Craig street, from Victoria square to Lacroix street. The balance of the street can be repaired at the cost of $112,000. St. Catherine street wooden blocks can be repaired at a cost of $18,000. The balance due on Notre Dame street paving is $27,000.

On account of the many damages for floodings, caused by the city allowing the municipalities to connect their sewers with the city system, the engineer suggests, to temporarily avoid these damages, to build an overflow on Alexander to intercept the water, and also storm overflow at the east end of St. Catherine street, to relieve the Coteau Barron main sewer, at a cost of $24,330.

There should be constructed a relieving sewer on St. James street, from McGill street to the western city limits, at a cost of $103,871. This sewer is necessitated by the municipalities of St. Henri and St. Cunegonde having diverted the Little St. Pierre river into their sewers, which are connected with the St. James street sewer, consequently overflowing the last mentioned sewer. It will also be necessary to build a main sewer to drain the northeast portion of the city, and also the new St. Denis Ward, which ward naturally drains towards the Back River, but as it would cost a large sum of money to drain in that direction, I propose to connect the drainage of that ward with the proposed de Livis street sewer; this main sewer is absolutely necessary to be built if the city continues to increase in that direction; the cost of the same will be $332,000.

The engineer says there are three thousand two hundred gullies wanted throughout the city at a cost of $144,000. Say that 25 per cent. are built this next year, this would cost $36,000. Across the Grand Trunk Railway tracks, a bridge which is absolutely necessary to carry the traffic in that portion of the city will cost $116,250. The Canadian Pacific Railway Company owes the city $35,800, if the court decides against them in this matter. We therefore owe the contractors $424,000.

It will be absolutely necessary to spend, he says, say $50,000, over and above our annual appropriations for plank sidewalks, on account of the accidents which are occurring daily, and for which claims against the city are taken.

The total amount of the appropriation needed by the Road Committee for next year, will in consequence be $1,088,410.

A FOOLISH COMBINATION PLAN.

That trade combinations often cause serious injury to the best interests of commerce is every day indicated by the practical workings of these associations. An instance in point lies in the fruit trade. The control of the business of exporting Persian dates is largely in the hands of English merchants, who have associated with them the Bussorah packers. The trade interests have been united in a combination, one of the purposes of which is to regulate market supplies and to prevent new goods from coming on the market until stocks of the old have been exhausted. All the shipments are regulated. Recently the steamer "Laristan" arrived in London, laden with dates, one week earlier than was expected. The combination agents, however, refused to allow her to discharge her cargo, in spite of the fact that convenient transhipments to Canada and the United States could have been made. As a prominent New York importing firm says: "These arrangements are made in order to force buyers to use up the stock of old crop, but advices from London are to the effect that the old goods have not yet been moved off, and, to us, it appears sheer idiocy to sacrifice the very choicest consuming period of the new crop in order to work off a few boxes of old, as the majority of buyers only wish the new fruit, and will not have the old at any price, even though the quality is good."

TRANSACTIONS ON TORONTO STOCK EXCHANGE.

We last week reported the transfer of six shares of Farmers' Loan Company's stock, which, it was evident, was a mistake, that company being in liquidation. The Dominion Savings sold at the rate mentioned, 76½. The following are the transactions for the past week: Ontario Bank, 102 shares at 100½; Bank of Commerce, 91 at 134; Imperial Bank, 16 at 188⅝-188¾; Dominion Bank, 20 at 252; Western Assurance, 200 at 166½-167; Consumers' Gas, 38 at 210-212; C.P.R. Stock, 430 at 79⅞-81; Toronto Electric, old, 34 at 132-133; new, 45 6-7 at 110½-111; Commercial Cable, 220 at 181½-182; Commercial Cable, registered bonds, $8,700, at 104¾-104⅞; Toronto Street Railway, 176 at 83-84; Canada North-West Land, common, 187 at 12; Canada Permanent Loan Company, 28 at 112-113; 20 at 98-99½, 20 per cent. Freehold Loan Company, 44 at 90.

NORTH-WEST BUTTER IN BRITAIN.

The Dominion Department of Agriculture exported recently a considerable quantity of butter made at the Government creameries in the North-West Territories. The prices realized were comparatively large, but not as satisfactory as was hoped for on account of a glut in British markets when the shipments were received. George and John Nickson & Co., Liverpool, write as to this transaction under date November 10th, as follows: "Enclosed herewith we have pleasure in handing you account of sales for butter ex "Labrador." We regret that your shipment to us should have met with such a depressed market as ours has been for the last three months, which is chiefly owing to the very open weather we have experienced during that time. We are pleased to be able to report the quality of butter shipped by you very satisfactory, and with regular shipments we are certain we could build up a demand for your brands." Similar letters have been received, with satisfactory account sales, from Messrs Andrew Clement & Sons, Manchester, and Messrs. Hodgson Bros., Liverpool.

—Cowansville has organized a fire brigade with the following officers: 1st chief, Ed. O'Halloran; 2nd chief, J. C. McKinnon; 3rd chief, Dr. Cotton; captains, George Sisco and George Boright; secretary, W. N. Gibson.

—The Winnipeg *Commercial* of last Monday says: "A new freight tariff on cattle in car loads to St Paul, Minneapolis, Como, Minneapolis Junction, and Minnesota Transfer via Neche, has been issued. Among the quotations are the following per 100 pounds: From Winnipeg to the points named, 30 cents, Manitou 28½, Killarney 30, Souris 35, Carman 27, Glenboro 30, Portage la Prairie 35, Brandon 35, Yorkton 44½, Minnedosa 35. Reduced rates are made this season on coal shipped from the Souris mines. To points within 100 miles of the mines, the rate has been reduced from $1.50 to $1 per ton. To points distant from 100 to 200 miles from the mines, the reduction is not so great, gradually decreasing as the distance from the mines decreases. For points over 200 miles distant there is no reduction, the rates remaining the same as last year. The rate to Winnipeg is $2.25 per ton, which is the same as last year."

CREDITS AND COLLECTIONS.

While there is a close relation between credits and collections, they are, in fact, distinct subjects, and the attention given to them refers more directly to securing uniformity in terms and discounts than to any concerted means of determining the financial responsibility of customers, although the importance of the latter feature is by no means ignored. The convention of the National Wholesale Druggists' Association at Richmond last month, gave extended consideration to both subjects, as a result of the able report of the committee, but the feature which excited the most general expression of opinion on the part of the members was the desirability of fixing uniform terms of sale and rates of discount. As to this, it is safe to say that there is a practical unanimity of sentiment among the members of this trade, as well as those in other branches of business, although there is less agreement upon the question of its practicability. As clearly indicated at the Richmond meeting, the varying rates for money in different sections of the country make it difficult to establish a rate of cash discount which shall apply uniformly to all parts of this broad domain. But the maximum rate of interest is gradually but surely approaching the 6 per cent. basis, and it is easily foreseen that on thirty-day invoices a discount of 1 per cent. for cash in ten days affords a premium which no buyer, wherever he may be located, can long regard as unprofitable, as against what loans from his local bank would cost him.

One per cent. for cash in ten days on thirty-day sales is equivalent to 18 per cent. per annum, not 12 per cent., as is frequently erroneously stated, and however profitable it may prove to the buyer, it is an extravagant rate for the seller to pay for money, especially when it is considered that it comes from the best class of buyers, as to whose responsibility there is no risk. If all buyers either discounted their bills in ten days, or paid them promptly in thirty days without deduction, the latter would be the more profitable customer, and his comparative profitableness would be the greater as the rate of discount exceeded one per cent. In fact, it is cheaper for the seller to borrow money at the average bank rate and carry his accounts for 60 days than to pay one per cent. to the buyer for the use of the money for 50 days. But there is another feature of the case which the seller should not ignore, and that is the unequal advantage which is allowed to buyers by not strictly enforcing the terms of sale. When a buyer chooses not to avail himself of the 18 per cent. per annum the privilege of discounting his bills affords, there is no occasion for him to find fault with his more thrifty neighbor, but there is reason for the man who pays for his goods promptly at 30 days to object to the extra time allowed a competitor who takes 60 or more, and thus gains an advantage of at least the legal interest for the extra period. This consideration gave rise to the suggestion by a member at the Richmond meeting, that the terms of sale should be changed to net, say, 10 days, with interest added after that period, thus placing all buyers upon a basis of equality. The man who took 30 days would then pay 20 days' interest, and his competitor who paid in 60 days would be charged with 50 days.—*Oil, Paint, and Drug Reporter.*

THE PACIFIC CABLE.

In his speech from the chair at the meeting of the Eastern Extension, Australasia and China Telegraph Company last week, the Marquis of Tweeddale spoke of the Pacific cable project. He said that when he last addressed the shareholders he mentioned that the commission appointed by the Imperial and Colonial Governments to consider the question of laying an "all-British" cable across the Pacific had concluded its labors, but that its report had not been made public. This report was still withheld, but, according to newspaper statements, the question was under consideration at the conferences held between Mr. Chamberlain and the Colonial Premiers a few months ago, together with the counter-proposal which the Eastern, Eastern Extension, and South African companies had submitted to her Majesty's Government for an "all-British" cable between Great Britain and Australia via the Cape of Good Hope. This cable would at the same time bring into telegraphic communication the important coaling stations of St. Helena and Ascension, as well as other British possessions at present unconnected by cable. This project had, he said, many advantages over the proposed "all-British" communication with Australia from Canada via Fanning Island, and appeared to be preferred to the Pacific scheme—at any rate by some of those who were chiefly interested. The whole question was, however, to be considered by a departmental committee, and he was not therefore at liberty to discuss the matter in any detail at the present moment; but they might re[illegible] assured that their interests were being carefully watched by the directors, and any decision that might be come to in relation to this important matter would be intimated to them as soon as possible.—*Can. Review.*

—"I don't know about the feasibility of the single tax." "Why, man; it covers the whole ground.—Indianapolis *Journal.*

—"There are things in this world more valuable than money, my son." "I know it. That's the reason I want money to buy them with."—Detroit *Free Press.*

—Referring to the ferry-boat "Chebucto," built on the Clyde, to run as a ferry between Halifax and Dartmouth, W. A. Crichton writes to the *Marine Review*, of Cleveland, Ohio: "It does seem strange to me that the Province of Nova Scotia, that raised such men as Donald Mackay, the Moseleys, and the ship-builders of Windsor and Maitland, and other towns down in the 'Bluenose' country, should send across the Atlantic for a ferry-boat, but perhaps the reason is that the original ferry boats, built sixty years ago, had Scotch engines in them, and they never wore out. I believe they are running yet. Nova Scotians like things that last, but they could have built a boat themselves that would have answered every purpose." Mr. Crichton clearly belongs to the Canada-First party.

Commercial.

TORONTO MARKETS.

Toronto, Nov. 24th, 1897.

Dairy Produce.—Receipts of dairy butter, and especially of large rolls have increased. It requires constant hard work to keep stocks well sold up. Values are in consequence a shade easier. and 15c is quoted for the best rolls. Dairy tubs are not so plentiful. There is an abundance of inferior butter in the market. There are a number of new creameries about to enter the market. Pound prints are in the best demand, and are disposed of without difficulty at 19 to 20c per lb. Tubs and boxes are slower in moving. There is nothing doing locally in cheese, and the season is about over in the country. Receipts of new-laid eggs have declined, and there are scarcely sufficient supplies for local requirements. We quote, new laid, 16c, cold storage and held fresh, 12 to 13c, limed, 13½ to 14c, per dozen.

Grain.—Firmness characterizes the wheat market. Values are firm and the demand is good. The bad condition of the roads is interfering with deliveries at country points; but so soon as an improvement is shown, it is reasonable to look for an increase in offerings. At the close of last week, there was a falling off in demand in reference to which the *N. Y. Journal and Bulletin of Commerce* thus comments: "There were two reasons for this. The first and chief was scarcity of ocean freights, which are taken up in January; and, in many cases well into that month, and in some into February and even March. The second was that arrivals on other side are in excess of weekly requirements at Liverpool and other United Kingdom ports, and exporters are holding off, as at their prices millers on other side will only buy from hand-to-mouth." Later developments have been more favorable, and exporters both American and Canadian, have been active. Oats are firm and in active request. Barley is steady and wanted for export. A dull market is reported for corn. In buckwheat, trade is slow and values unchanged. Rye is firm at an advance of 1c. per bushel.

Hardware and Metals.—The volume of trade is keeping up well. Orders are coming forward freely, and for fall specialties, such as sleigh bells, axes, saws and the like, there is brisk demand. In tinware trade is active. Metals are moving well. An advance of 10 cents per box was made last week in Canada plate; this affects all orders. The demand in the galvanized iron trade is about equal to the supply, and is divided about equally between American and British supplies. Stocks are not heavy here. Tin plate is moving freely, the principal request is for 20 x 28 size. In heavy hardware there is some improvement. Wire nails are active, but cut nails remain slow of sale. There is a free demand for rope. Wire, with the exception of supplies for baling hay, is slow and without change in price. For window glass there is a strong demand and stocks are low, especially Star and Double Diamond. Substitution of sizes is quite an ordinary feature of trade. We understand that several Toronto houses have been placing orders with Montreal jobbers for different lines.

Hides and Skins.—There is little or no change in the situation. Dealers are paying 9c for green hides to city butchers, and 8½ to 8¾c per lb. for offerings from outside the city. Sales of cured have been made during the week at 9¼c per lb, but it is difficult to obtain this figure, and it can by no means be considered an established quotation. For calfskins 12c per lb. is being paid by local dealers, and there is but little remuneration in the trade, as buying and selling prices are separated by a bare fraction. For lambskins 90c is quoted; this price has been paid for a month past, but it is impossible to say how long it will be continued. Tallow is dull at unchanged quotations. Advices received from Chicago, Nov. 20, say: Week closed with a fair market; packers generally were sold close up to their kill, and showed no disposition to hurry business. Tanners were moderate buyers of small lots, closing at 11 to 11¼c for native steers; 10¼ to 10½c for Texas, 10 to 10¼c far butt brands, 9½c for branded cows, 9c for Colorados, 10⅝c for heavy native cows, and 10⅝c for light do.

Provisions.—A firmer feeling has marked the provision market the past few days. Receipts of dressed hogs are light, and values have, as a result, improved. Dealers are bidding $5.25 to 5.40 for heavy weights, and $5.50 to 5.60 for light weights. Provisions are going out very actively, in fact almost so soon as cured. The demand for long clear bacon and barrel pork is very active, while hams and breakfast bacon is also good. The following in reference to the United States markets is interesting: "It was shown by the recent statement of the *Price Current* that the Western packing of hogs for the eight months of the summer season, ending November 1st, was approximately 11,750,000 hogs—a number largely exceeding any previous year. Adding this number to the winter killings, makes a total of 18,700,000 hogs for the past twelve months, which has never been previously equalled. Returns of the Eastern slaughterings are not yet sufficiently available for the summer season to afford a precise statement, but it is not much out of line to say that the aggregate for the twelve months is 6,000,000 hogs, or somewhat more. This implies in round numbers a visible slaughtering of hogs for the year, reaching 25,000,000 in number. The meat product of these hogs was approximately 3,250,000,000 pounds, and the lard product 875,000,000 pounds, making a total of 4,125,000,000 pounds."

Wool.—A quiet market exists in the wool trade. Only nominal receipts of wool are coming forward, and these in very small quantities. Dealers are paying 20c. per lb. for the occasional lots received, with 21c. per lb. for anything of choice quality. Foreign wools are fairly active. Reports coming to hand indicate some considerable purchases having been made recently. The market values are very steady, having shown no fluctuations during the past two months.

MONTREAL MARKETS.

MONTREAL, Nov. 24th, 1897.

CEMENTS AND FIREBRICKS.—The movement in cements is now a light one. At the moment of writing, prices remain as last quoted, namely, $1.90 to 2.00 for Belgian; $2.10 to 2.20 for English; but as the wharves are being cleared, and all stocks will shortly have to be delivered from store, prices are likely to go up 5 to 10c. a brl. any moment. Firebricks are also liable to similar advance, and $17 will likely be the lowest figure next week.

DRY GOODS. — Business is rather quieter, and in most of the warehouses preparations for the stock-taking among importers, usual at this season, are in order. Retail business in the country seems relatively better than in the city, and quite a fair number of letter sorting orders are still coming to hand. The improvement in payments is still sustained, and people seem to think they have some reasons for Thanksgiving.

DAIRY PRODUCTS.—The cheese shipments of last week, by last outgoing direct steamships, footed up 76,862 boxes, as compared with 55,539 boxes for the corresponding week of last year. This brings total shipments from the 1st May up to 2,035,586 boxes, as against 1,707,571 boxes for same period of 1896. Cable quotations dropped sixpence Saturday, bringing the Liverpool market down to 42s. 6d., but Monday's advices recorded a recovery to the old level. The local market at the moment is dull, with fine Ontarios quoted at 8 to 8¼c., Townships 7½ to 7¾c., and Quebec 7¼ to 7⅜c. per lb. Good dairy makes of butter are scarce, with prices ruling firm at 15 to 16c.: for creamery there is fair local demand, at about 18c. for fine. Last week's shipment of butter from this port were 9,884 pkgs., making the total for the season 216,458 pkgs., as compared with 157,969 pkgs. last year.

FISH.—There have been some very fair transactions reported in green cod, and as stocks both here and in Quebec are reported in small compass some advance has been developed. Herrings continue to be firmly held. We quote:—For green cod, No. 1, large, $4.50 to 4.75; No. 1, ordinary, $4.00; No. 1 herring, $4.00 to 5.00 for brls; $2 50 half brls.; N.S. salmon, $12.00 to 12.50 for No. 1; British Columbia salmon, $10.50; sea trout, $7.00 to 7.50; dry cod, $3.50 to 4.00; finnan haddies, 6 to 6½c ; kippered herrings, $1.25 per box; Yarmouth bloaters, 90c. to $1.00 a box. Oysters are high in price: Malpecques, $3.50 to 3.75 for ordinary hand-picked, ditto, $4.50 to 5.50.

FURS.—Receipts of raw furs are yet small, and can hardly be expected to increase much until fair snow roads set in in the interior. We quote: —Mink, large dark, $1.25; small, ditto, 75c.; marten, $1.50 to 2.00; fisher, $4.00 to 6.00; lynx, $1 00 to 2.00; otter, $10.00 to 12.00 for dark; pale, $4.00 to 7.00; red fox, large, $1.30 to 1.40; small, $1.00; cross fox, $2.00 to 5.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 15 to 75c.; rats, fall, 8c.. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—With the stoppage of the running of Western river steamers, there has been a slackening of the active distribution in this line recently noted, still there is a very fair movement for the season. The demand at refinery for sugars is naturally not so brisk, but the strength in the market, noted last week, is firmly held. Granulated is quoted at 4 1-16 to 4⅛c. as to lot, at the factory, and yellows run from 3⅜ to 3¾c. per lb. In New York raw centrifugals are now quoted up to 3 15-16c., this figure covering all goods testing 96 per cent. pure, and the European markets for raw beet are firm and somewhat excited. Of the large lot of German refined beet sugar, which arrived last week a considerable proportion has been placed. We hear of one 1,500.bag lot being bought by a large confectionery manufacturing concern, and a 1000-bag lot has been bought on speculation. Molasses is in fair demand at the firm prices quoted last week. Teas have developed no special activity of late, but we hear of a sale of 500 packages of cheap congous to the lower provinces, and offers for some 800 or 1000 packages from the same quarter are reported to be under consideration. Stocks of Japans are low on spot, and some recent moderate sales have realized an advance of a cent on former prices. The market in Japan is said to be in sensitive shape, and liable to advance. Ceylons in London are reported up a halfpenny on low grades. The situation as regards dried fruits, canned goods, etc., has been fully covered in late reports.

HIDES.—The increased firmness, which we reported last week, is fully sustained, and strong markets abroad are also reported. On spot the regular market quotation is 8½c. for green No. 1 hides, tanners being asked 9½c. for cured. A sale of one car lot for the West is announced, and other Western tanners are reported to have been looking for stock here. Lambskins continue to be quoted at 80c. each.

HOPS.—The demand is a little better, with some shortness of crop reported, and values are a shade firmer. Transactions have taken place in good to choice Canadians at 13 to 15c., and in British Columbians at 18 to 19c. Yearlings continue dull at 6 to 8c., and old olds 1 to 2½c. per pound.

LEATHER.—Further fair sales of dongolas are reported at firm prices, also moderate business in manufacturers' B.A. sale at 22c. Of black leather there is really little stock on spot, nor, as far as can be learned, in the hands of tanners, who are disposed to be stiffer in their views, owing to the advancing tendency in hides, though no actual business is reported at higher prices. We quote:— Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 12 to 13c.:

polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—We learn of nothing specially new in these lines. The rush of shipments to catch last boats is over, and there will likely be a quiet interim before any demand for goods for shipment by rail sets in. Quotations are without change. We quote:—Summerlee pig iron, $18 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16 50; Shotts, $17 25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No 2 Siemens, $15.50 to $16.00; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16 50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5 90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; bes; cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

OILS, PAINTS AND GLASS.—Business has quieted down materially, but there is still quite a fair demand for glass and putty, probably largely due to the overhauling of double windows usual at this season. A general advance in prices of glass is not improbable; English makes are already advanced, and it is claimed stocks of German make could not be replaced at old figures. In other lines there is nothing new. We quote:—Turpentine one to four barrels, 49c.; five to nine barrels., 49c., net thirty days. Linseed oil, raw, one to four barrels., 43c.; five to nine barrels, 42c.; boiled, one to four barrels, 46c.; five to nine brls., 45c., net 30 days; olive oil machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 10 to 11c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 1.55 to $1.60 in bulk, $1.70 to 1.75 in bladders, $2 to 2.10 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00; window glass, (German and Belgian) $1.30 per 50 feet for first break; $1.40 for second break; third break, $2.90. English, $1.40 for first break; $1.50 for second break.

WOOL.—A wool salesman who has just made a round among Western woolen manufacturers reports finding the mills much better employed, most of them reporting orders as coming in well. Stocks of raw material are also low, as a rule, and millmen more disposed to buy. Stocks on spot are also in very limited compass, and a cargo of Cape wool for this market, shortly due, is already about half sold to arrive. Capes are quoted at 14½ to 17c.; B.A. scoured, 30 to 35c. In domestics we hear of little doing.

PATERSON & SON,
General Agents for Dominion
Montreal, Que.

TEN DOLLARS A MINUTE!
This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the
METROPOLITAN
Life Insurance Co. of New York
Assets, ... $25,592,003 78
The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.
Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE
5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.
CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.
Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.
Sixty Thousand Families will receive the proceeds of its Policies this year
Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY

ARGENTINE JUSTICE.

The extraordinary inequalities of Argentine justice are well exemplified by comparing the case of Tentori v. Norwich Union and Commercial Union Fire Insurance Companies, in which, as our readers will remember, a judge was found who condemned the companies to pay a claim for a fire which occurred ten days after the policies had lapsed: and that contained in the following note, which we take from the columns of *La Nacion:* "*On the Collection of an Insurance.*—The Commercial Appeal Court has confirmed the sentence of Judge Figueroa acquitting the El Ancla Insurance Company in the suit brought against it by Sr. Saturnino Lopez, for payment of an insurance on account of the burning of a thresher and stack of wheat, which took place on the night of January 11, 1894, in the department of 25 de Mayo. The sentence condemns the plaintiff with costs, based upon the fact that M. Lopez did not pay his premium until the day after the fire, when the insurance contract was no longer in force." The sentence is, of course, the only one possible to an upright judge; but our readers will note that whereas Judge Figueroa gives sentence against Senor Lopez because he did not pay his premium until after the date upon which the fire took place, when the policy had already lapsed: Judge Anzoategui gives sentence in favor of Senor Tentori, whose fire took place ten days after his policy had ceased to be in force, and who never paid his premium at all! Further comment is superfluous, and we shall now await with interest the decision of the Appeal Court in this case."—*Revew of the River Plate.*

LIFE INSURANCE OF WOMEN.

. The German office *Germania* has just issued interesting statistics on the mortality of women, in respect of 300,898 females insured by the company. Of this number, 46,535 persons have died. Up to the age of 36 years the rate of mortality was higher than the average percentage established by the tables, but from this age forward, the mortality was far below the ratio of the entire population as based upon experience. It is a curious feature, that the mortality during the first five years of the life insurance of women, is much higher than of those of the same age, whose policies were in force for more than five years. The *Germania* fancies that the examination must be responsible for this difference. It is relatively difficult to conduct a trustworthy examination of women in general, and frequently impossible to recognize the germ of certain sexual maladies. So, at least, the report of the *Germania* states, and adds to this somewhat extraordinary opinion, a hope that female doctors may render great services in this direction, both to the members of their own sex and to the life insurance companies.—*Spectator.*

FREE STORAGE BY RAILWAYS.

A hearing of more than ordinary interest has been in progress at Washington before the Interstate Commission, and the arguments having been concluded this week, a decision on the part of the commissioners is expected soon. The case was that of the American Warehousemen's Association against a number of railroads, the subject of complaint being the free storage given by railroads to certain shippers. The commission has taken a large amount of testimony upon the subject in the past three or four months, visiting a number of cities for that purpose, and it is alleged that the investigation has unearthed a system of discrimination toward certain shippers through such methods which deserves severe treatment. The contention of the warehousemen is that the practice which has grown up with many railroads of giving free storage, is used as a cloak for cutting of regular rates for the benefit of favored shippers to the detriment of others and of the public at large. In fact, there is a suspicion that this is one of the ways by which roads which indulge in such practices drive around the law, and that its suppression by the Interstate Commerce Commission will have a tendency to insure a more universal observance of the legal provisions against discriminations. * * The counsel for one important company admitted that free storage afforded by the railroads to shippers was a widespread evil, and that many of them would be benefited by its disappearance.

The grounds upon which the action of the Interstate Commerce Commission is invoked are contained in two clauses of the Interstate Commerce Act. The first is section 3, making it unlawful for a carrier to give undue and unreasonable preference to particular shippers, and the other, section 2, which prohibits special rates, rebates, drawbacks, or other devices involving a difference in charges to different shippers. Free storage, it is argued, comes within the definition of "other devices" for the purpose of carrying out discrimination.—*Bradstreets'.*

THE PARIS FIRE CONGRESS.

The approaching congress in Paris of exhibitors of fire apparatus, firemen, or fire superintendents, and those interested in the subject of fire extinction promises to be an interesting affair. Preparations for it are being actively made. Mr. Fred. Hoare, the British Commissioner, reports that the authorities have allotted the Esplanade des Invalides for the Congress and the exhibition which will accompany it. The site in question is divided into two portions by a broad roadway. On one side will be erected two immense buildings of fireproof wood, one devoted to the congress hall, committee rooms, and other adjuncts. The other will be occupied by the exhibits. These will include non-inflammable wood and paper, metallic fire-resisting building materials, fire extincteurs, alarms, pumps, sprinklers, theatre plans for securing ready exit, appliances for ventilation and heating theatres and public buildings, the equipment of fire brigades, etc. English exhibitors are requested to communicate with the British Commissioner at 249 High Holborn. Le Nord Railway has conceded half rates in France for the transport of exhibits, and all customs duties have been remitted, so that every official encouragement is being given to manufacturers and inventors to bring their devices before the congress.

ANTHRACITE COAL.

In their efforts to bolster up the hard coal trade, the anthracite presidents have called a halt on the rate of production, and every colliery in the Schuylkill region has shut down. An official of the Reading Company said that under normal conditions, with the colleries working full, and the market absorbing the coal, the November output would have reached five million tons. Under the curtailment insisted upon, he thought the production for the month would aggregate between 4,000,000 and 4,500,000 tons. The curtailment of the production he thought would have a favorable effect upon the market, and would stiffen prices.

—A little work recently published in Berlin by order of the Minister of Public Works, gives an interesting collection of statistics concerning the German capital. Founded in 1225, Berlin had 6,000 inhabitants in the seventeenth century. In 1712 it had 61,000; in 1804, 180,000; in 1845, 322,000; in 1861, 500,000; in 1877, 1,000,000. To-day it is over 1,500,000. It is the most crowded of all German cities. Since 1840 property has increased in value twelve times, and since 1872 (that is, about the close of the triumphant war with France) State and municipal taxes have nearly doubled.

THE SALVATION ARMY AND ITS LIFE INSURANCE DEPARTMENT.

We have frequently had occasion to recount the experiences, and to criticize the methods of the insurance department of the Salvation Army, which, as our readers are aware, was formed by the taking over of the title and good-will of the business of the Methodist and General Insurance Company, formerly of Salisbury Court, Fleet street, E.C. We need not now reiterate our views as to the present financial status of the company, or as to its prospects of ultimate success or failure. But we wish simply to draw attention to an action at the St. Helen's Police Court, in which several persons are shown to have found it necessary to seek to compel the company to keep in force certain policies by receiving the premiums thereon, and to sue for damages. It appeared that the whole of the policies were issued in February, 1893, and that payments were regularly kept up until about the middle of 1897, when some correspondence took place with respect to promised bonuses. During that time the subscriptions remained unpaid, and the plaintiffs ultimately received a notice that unless the premiums were paid up within sixteen days the policies would lapse. The premiums were tendered in respect of all the policies except those on the lives of two children; but the local agent refused to accept them unless those on the lives of the children were also paid. This the counsel for the defendant company admitted was a mistake on the part of the agent; but he resisted the claim for damages. The result was, that the St. Helen's bench of magistrates decided that all the policies were valid and subsisting, providing that all arrears, with premiums up to date, were paid within eighteen days. Also that the defendants, the insurance company, should pay £5 5s. as costs to the plaintiffs. We are afraid that the insurance department of the Salvation Army are not exhibiting that spirit of generosity and lovingkindness which should be inseparable to the conduct of an ostensibly Christian institution. The permanent success of the department as much depends on this, as upon the possession of funds ample enough to meet the liabilities on existing contracts as they fall due.—*London Review.*

PECULIAR PETROLEUM.

A Russian paper gives particulars of a new grade of crude oil found in the Caucasus, near Kooba, from which the following is taken:

"The mineral oil discovered near the town of Kooba, in the Caucasus, possesses such peculiar qualities that it may be considered as representing a type of its own. It is entirely different from all the Caucasian oils that have been heretofore analyzed. The Kooba oil is a transparent blood-red liquid; its specific gravity at a temperature of 15 degrees centigrade is 0.81465, and its distillation yields 62.89 per cent. of petroleum distillate of 0.79116 specific gravity. In the distilling vessel there was left 32.46 per cent. of a dark red mass, from which, at 15 degrees, solid matter was separated, changing the whole to a thick, semi-liquid pulp, which contained 3.61 per cent. of paraffine. Treatment with concentrated sulphuric acid showed that but 7.03 per cent. of the crude is absorbed by the acid, 92.96 per cent. consisting of saturated hydrocarbons. Neither aromatic combinations nor naphthenes could be ascertained in the crude. The oil produced from Kooba crude possesses but little illuminating power. According to the opinion of experts the homogeneousness of the components of the crude points to the conclusion that it has passed through a natural, subterranean distillation."—*Oil and Paint Reporter.*

—Books and Books—"I'm anxious to meet Mr. Hobbey; they say he talks just like a book." "Yes, he does—just like a blank book."—Detroit *Free Press.*

PUBLIC NOTICE

is hereby given that all persons who take out ordinary participating Policies in the

DECISIONS IN COMMERCIAL LAW.

GRAND TRUNK RAILWAY v. PORT PERRY.—A wharf used by a railway is not assessable. Lands used as railway will include, not merely the line of railway, but also all land and works thereon, physically necessary for the use of the railway as a railway. The platforms at a railway station, the roof covering the railway, and the sidings are all lands used only as a railway. Under the authorities, it would appear that the water tanks, platforms, etc., are not assessable apart from the land, and come within the same category as the rails, ties, fences, etc.

THE QUEEN v. BRADLEY.—Appeal from the judgment of the Exchequer Court. The respondent, who is chief reporter of the official reporting staff of the House of Commons, claimed $3,235.35 for services as reporter, editor and secretary of the Prohibition Commission, under engagement by the late Sir Joseph Hickson, chairman of the commission. The Government contested that part of the claim which is in excess of the actual reporting authorized by Order-in-Council, and also contended that no portion of the claim could be sustained by reason of the provisions of section 51 of the Civil Service Act, which forbids employees being paid extra salary or additional remuneration. Held by the Supreme Court, that the provision of the Civil Service Act only prohibits extra payment being made for the specific services an employee is appointed to perform. Appeal dismissed with costs.

DELISLE v. PARENT.—Action to set aside a sale of land for taxes. Held by Meredith, C.J., that notwithstanding the provisions of section 188 of the Assessment Act, the lot in question not having been included in a list furnished by the treasurer to the clerk in the middle of January preceding the sale, as required by statute, the sale was unlawful and invalid.

SMITH v. MCARTHUR.—Appeal by Louise Warner, the claimant, under a chattel mortgage in an interpleader issue from the judgment of the Fifth Division Court in the county of Victoria, in favor of the plaintiffs, the execution creditors, upon the trial of the issue. Held by the Divisional Court that if the chattel mortgage were made for a pre-existing debt, and when the mortgagor was in insolvent circumstances to the knowledge of the mortgagee, still the mortgage was not on that account invalid, if made under pressure.

UNION COLLIERY COMPANY v. ATTORNEY-GENERAL.—The case arises out of a reference made by the Lieutenant-Governor of British Columbia in Council for an opinion of the Supreme Court of British Columbia as to the constitutionality of the British Columbia Statute of 53 Vict., chap. 33, respecting coal mining regulations by which Chinamen were forbidden to be employed below ground. The full court in British Columbia heard the parties interested, and came to the conclusion that the legislation was within the jurisdiction of the Legislature. Appeal quashed by Supreme Court for want of jurisdiction, on the ground that the opinion or decision of the court below is not a final judgment or conclusive decision susceptible of appeal under the Supreme Court Act,

BOULTBEE v. GZOWSKI.—A broker who buys bank shares for an undisclosed principal and does not accept the shares himself, but pursuant to a general power to transfer given by the vendor, transfers them to his principal, is not liable to indemnify the vendor against the statutory "double liability," which the principal fails to pay.

Mercantile Summary.

TWENTY miles of the Inverness and Richmond railway in Nova Scotia were located last week by the engineers.

MEMORANDUM FOR THE BOOK-KEEPER.—Pay up our subscription for THE MONETARY TIMES to 1898. Also see price list of calendas, page 703.

IT is said that the formal transfer of the Drummond County Railway to the Government will not take place until abont the middle of December or about the 1st of January.

THE total customs duty collected at the port of Toronto for the month of November, 1897, was $276,877, as against $228,561 for the same month of 1896, an increase of $48,316.

WHAT is termed a Christmas excursion to the Old Country, is announced by the Beaver Line of steamships, which has put on the 5,000 ton steamer "Gallia," to sail from St. John, December 8th, and Halifax, December 9th.

SOME of the people of the Nova Scotia town of Westville, think they ought to have more liberal banking facilities than are afforded by a brief session of the Bank of Nova Scotia representative on Monday and Thursday of each week.

THE partnership between Addison Bowman and Howard N. Shaw, doing a tanning and grocery business at Hawkshaw, N.B., has been dissolved. Mr. Shaw will continue the business, while Mr. Bowman intends going into business at St. John.

WE learn that the firms of Thos. Marks & Co., George Clavet, and Dobie & Co., all carrying on business separate at Port Arthur, Ont., nntil recently, have formed a joint stock company under the name of the Marks, Clavet, Dobie Co., Limited.

MR. HUNT, the chairman of the Summerside town council, has received from Prof. Lee an estimate of the cost of waterworks and sewerage for that town, reference to which is made elsewhere. The estimate for the waterworks system is $72,000, and for the sewerage $30,000.

WE are told that the eastern excursions over the C.P.R. will this year be run from the 6th to the 31st of December. The rate will be $40 between Winnipeg and Montreal, and west thereof in Quebec and Ontario. Tourist cars are to be put upon all trains over the branches and main line.

THE editorial page is the chief thing that keeps a journal above the level of a purely commercial enterprise, says *Profitable Advertising*. The mere selling of news is much like the selling of potatoes. A newspaper without honest opinions, ably and frankly expressed, is like a body without a soul.

ACCORDING to the Westville *Free Lance*, the Drummond and Acadia coal mines were running full time last week, and the shipments from the Drummond Colliery for October amounted to 26,000 tons. The long north levels in the Drummond Mine are completed; a distance of 3,500 feet.

THE Minister of the Interior was presented at Rossland with an address which, among other things, asked the Government to give British Columbia representation in the cabinet by creating a department of mines. Mr. Sifton in reply said: "The question of adding a Minister of Mines to the cabinet was one that deserved serious consideration." His personal views, he said, were favorable to the proposal.

OUT of six tenders made for the waterworks debentures of Windsor, Ont., that of G. V. J. Greenhill, manager of the Merchants Bank, acting for the Standard Life Insurance Co., of Montreal, was accepted as the highest. The amount is $20,000, to draw 4 per cent. interest, and the city receives $400 premium.

THE first shipment of Canadian domestic fruit to the West Indies was made on Saturday last, Messrs. T. Carpenter & Son, of Winona, sending forward about two hundred packages. The fruit was all specially packed and was shipped by way of Halifax. The shipment was an experimental one and consisted of apples and pears.

A LETTER from Roger's Hill, Nova Scotia, to the *New Glasgow Chronicle*, announces considerable excitement over the alleged discovery of gold at the head waters of the Six Mile Brook. It has long been known that there are indications of gold here. This summer a company from Truro came and mined a quantity of the quartz. It is reported that it contained gold to the value of $48 per ton, and that the company is sinking a shaft in order to test the merits of the property.

A DISASTROUS fire broke out on Sunday, the 21st ult., in Melbourne, Australia, and a number of the prominent merchants of the city were burned out. Within three hours, an entire block of buildings, bounded by Elizabeth, Flinders and Swanston streets, and Flinders Lane, with the exception of two buildings on the Swanston street front, was destroyed. The insurance companies lose £730,000, of which amount £500,000 will fall on British companies. Australian companies lose the remaining amount.

IF the following announcement from St. Louis be true, it is something very unlike what George Gould's father, the late Jay Gould, would have done in his life-time. The despatch says: St. Louis, Mo., November 26th.—It is announced to-day, that as a Thanksgiving present, George Gould, of the Missouri Pacific system, has advanced salaries along the line ten per cent. The advance, which will date back to November 1, affects 15,000 employees and will result in an additional expenditure of $900,000 a year.

A WEEK ago, the preventive officers discovered and raided an illicit still in a yard in St. Henri, near Montreal, where whiskey was being made out of rice. The still was smashed. The owner is missing. Later in the same afternoon, 187 Moreau St., in the East End, was raided. On the first floor a still was found in operation. There the officers discovered thirteen barrels of fermenting liquor, a still in full blast, and three barrels of whiskey. Pierre Robidonx was taken into custody, and remanded by the police magistrate.

ANOTHER consolidation of manufacturing interests perfected last week, says the *Shipping List*, has been that of the St. Louis Stamping Company (Neidringhaus Brothers) and the Granite City Steel Company. The plan is to concentrate at St. Louis the manufacture of enameled ware, which will hereafter be entirely under the patents of the Neidringhaus concern. While the interests involvek are most heavily St. Louisan, there are also other companies which will be under the control of the new corporation. The other plants are located as follows: Two in New York, three in Chicago, and one each in Milwaukee, Baltimore, Boston and Philadelphia. The total capitalization of tbe new corporation will be $25,000,000. The president of this huge concern will be F. G. Neidringhaus. The other officers have not been selected.

Mercantile Summary.

THE Peninsular and Oriental steamship "China" has made the run from London to Adelaide in twenty-seven days.

NEW YORK city, for the week ending Nov. 23, exported $10,041,468 worth of general merchandise, against $7,477,068 the preceding week.

A CARGO shipment of flour, valued at $72,000, for the old country, was sent out recently. It was exported by Messrs. Miller & Spink, of Toronto, which firm, we are told, is shipping about one thousand bags daily.

A COMPROMISE at 50 cents on the dollar is being arranged by J. P. Barnes, dry goods dealer, St. John, N.B., lately doing business as Barnes & Skinner. The Canadian creditors are understood to have signed the deed, and the consent of the European creditors is now being sought. The liabilities foot up abou $15,000.

EX-MAYOR BORTHWICK, president, and Mr. L L. Brophy, secretary, of the Retail Merchants' Association, ask the co-operation of the board of trade of Ottawa in securing the passage of an act to prevent auctioneers selling after hours, and that the sales of all goods and merchandise be placed upon the same basis. This was agreed to by the board.

THE dry goods firm of Hilton, Hughes & Company, which failed in 1893, (they were successors to A. T. Stewart & Co.), on Monday last notified its smaller creditors that their claims would be paid in full on presentation. The larger claims, it is said, have almost all been bought up by Judge Henry Hilton on a basis of 90 per cent. cash. The liabilities were $2,200,000.

MANITOBA merchants and public men have another railway project in view. The Brandon *Sun* contains interviews with the local members of the Legislature, Messrs. Fraser and Adams, in regard to a railway from Gladstone to Brandon, thence south to Boissevain. Both speak favorably of the project. Mr. Adams says: "My idea would be to run a railway from the terminus of the Dauphin road to Brandon and then south, probably to Boissevain."

THE fire at Carberry, Manitoba, on Tuesday morning last was a serious one. Starting in the office of *The News* the flames swept the east side of Main street to Third avenue, then it crossed Main street and destroyed everything between Henderson's dry goods store and Third avenue. Ten or a dozen business places were burned or injured, and the loss is placed at somewhere near $40,000. The Massey-Harris Co have $4,000 insurance; Sylvester Bros., $3,000; E. Morton, $1,000; Kennedy, confectioner, $1,100; H. Robertson, furniture, $1,500; J. B. Henderson, $2,500 smoke damage); Logan & Co., $500.

A DEMAND of assignment has been made upon Trahan & McNulty, dry goods dealers, at St. Hyacinthe, Que. Mr. Trahan was formerly in business at Notre Dame de Stanbridge, unsuccessfully, and the present business was started two years ago. For the last six months, Mr. Trahan has been the only partner——H Chene, general merchant, Cheneville, Que., has secured a compromise at 50 cents.——W. Genereux, general store, Grand Piles, Que., and formerly at Radnor Forges, has assigned. ——The assignment is reported of N. Gelinas & Co., dry goods dealers, at Three Rivers, who arranged an extension last August, on liabilities of about $6,000. Mr. Gelinas has been in business here some time, but with only a limited measure of success. He failed in 1890, and has since been doing business under cover of his wife's name.——A voluntary assignment has been made by P. Gelinas, general dealer, St. Alexis des Monts, Que. He was formerly employed with the Laurie Spool Co., and began business a year ago last May.

IN 1897 Great Britain and Ireland produced 54,622,706 gallons of whiskey, over 5,000,000 gallons more than in the previous year. Of this 32,126,238 gallons were consumed in the United Kingdom, and 4,790,181 gallons exported. There are 193 distilleries at work in Scotland, twenty-nine in Ireland, nine in England, and one in Wales.

AT a recent meeting of the St. Johns, Que., town council, the by-law granting Messrs. M. Lefebvre & Co. a bonus of $22,500 was unanimously passed. For this sum the firm binds themselves to keep their vinegar and pickling factory in operation for at least ten years, and that their minimum pay list shall be $30,000 annually. The guarantee for the faithful fulfillment of the contract is a first mortgage on a property, the valuation of which must be at least $35,000. The by-law will be submitted to the ratepayers next week.

A STARTLING piece of news comes from Detroit to the effect that the building of the Detroit Chamber of Commerce has been sold under the hammer in default of payment of a first mortgage of $430,000 and interest held by the New York Life Insurance Company. The structure is thirteen stories high and quite fully occupied by tenants, and was recently appraised by experts to be worth $600,000. But it sold on Monday last for $422,650 to Leopold S. Fecheimer, of Cincinnati, and William S. Winslow, and Francis A. Winslow, of Chicago. who were the only bidders.

A NEW YORK exchange tells us that a wood-working trust has been organized at Williamsport, Pa., which will control most of the wood-working in the United States, and will be known as the American Wood Working Machinery Company. The capital is $8,500,000. The firms that have pooled their interests are Goodell & Walters, of Philadelphia; Glencoe Machine Company, of Brooklyn; Hoyt Brothers, of Aurora, Ill.; Globe Machine Company, of Chicago, and firms or companies in Cincinnati, Oshkosh, Wis.; Rochester, N.Y.; Norwich, Conn.; Green Bay, Wis.; Montgomery, Ala.; Williamsport and Lockhaven.

FROM Nova Scotia we hear of the following business casua ties: A grocer of Halifax, H. W Ross, has assigned after three years' trial of business. His liabilities amount to about $4,000, including preferences of $1,426, $130 and $72. ——Monaghan & Sutherland, a firm of building contractors at Halifax, have also assigned, making preferences of $900.——Louis Komiensky, a peddler, who established his headquarters at Digby several years ago, has come before his creditors with an offer of compromise at 40 cents on the dollar, which does not seem to impress them very favorably.——The insolvency of D. J. Morse, a trader, of Bridgetown, is also announced.——A grocer in a moderate way of business at Annapolis, Robert Malcolm, who has been lately in weak shape, and under bill of sale, has made an assignment.——J. T. Chisholm, dry goods merchant, of Windsor, another of the victims of the late fire in that town, is seeking a compromise and offering 40 cents on the dollar. He had a stock of some $18,000 to $20,000, with insurance of about $12,000, and saved nothing.

Mercantile Summary.

THE "Parisian" of the Allan Line, arrived in St. John on Saturday last, having made the run from Moville in seven days nineteen hours, in the face of fresh winds most of the way. She had nearly 300 passengers.

OWING to a dissolution of partnership, Mr. John Bowman is retiring from the firm of Bowman, Kennedy & Co., of London, Ont., and is opening a new business. The new firm will be known as the John Bowman Hardware and Coal Company.

A PITTSBURG despatch of Wednesday foreshadows a great combination of river coal interests. It says a committee is considering the schedules of property values as presented by the separate coal companies operating on the river. The scheme proposes the organization of one company with a capital of $11,000,000, controlling the river coal interests from Lock No. 5, on the Monongahela River, to New Orleans, to reduce expenses.

MR. JONCAS, of Gaspe, sounds a warning note on the subject of the increasing denudation of the fisheries of the Gulf of St. Lawrence by the depredations of porpoises. Mr. Joncas is Superintendent of Fish and Game in the Province of Quebec and he declares that one kind of fish after another is so rapidly leaving the St. Lawrence that the once famous fisheries, formerly a source of great wealth, are being gradually abandoned. All the experts who have been consulted agree that this is chiefly attributable to the increase in the number of white whales or porpoises in the gulf, and their extraordinary destructiveness as regards most of the smaller fish.

SOME weeks ago we stated that S. K. Stewart, cigar dealer, in London, had called a meeting of creditors, and made an offer of 50 per cent. cash, which was afterwards accepted. His father furnished money for the same. Liabilities were $2,500, and S. K. had nominal assets of $1,850.——Wm. McHattie has been in business as a butcher, etc., at Niagara Falls for twenty years. This week he makes an assignment. About six years ago he locked up considerable capital in a block of brick stores. Since then he has "had to hustle" to make ends meet.——Between Massey and Gore Bay, Jas. Leask has been tailoring for a dozen years or so, but never accumulated any means. Now he assigns.

MR. CAMPBELL, manager of the Beaver Line of ocean steamers, tells the Halifax *Recorder* that the Beaver Line will take all the freight offering from Nova Scotia, and also unload all the freight for this port here. All passengers will be disembarked here, except those for New England points, putting on an additional steamer in the spring. Mr. Campbell says: "But we will carry to Halifax and treat Halifax merchants as liberally as possible. I trust the importers of Halifax will look upon our line with favor and give it all the business possible. Importers in Quebec and Ontario are helping us all they can. Our undertaking is a purely Canadian one, and the people of Halifax and St. John, in common with the people of the rest of Canada, we hope will look upon it in a purely national light."

Mercantile Summarv.

DUTIES collected at the Montreal Custom House during November amounted to $578,772, an increase of $97,960 over the duties paid for the previous November.

AN assignment has been made by M. A. Kerouack, fancy goods dealer, St. Boniface, Man. But this is not his first failure, which was made at St. Hyacinthe previous to his western venture, in 1882. He does not appear to be specially adapted to business or up in business methods.

THE cheese season of 1897 closes this week. On November 26 a meeting of the Listowel board was held, at which 10,138 boxes were offered. At the London board meeting, the following day, 2,785 boxes were offered for sale. Both boards adjourned until the spring.

THE traffic earnings of the Grand Trunk Railway for the week ending 21st November, were $508,177, which is an increase of $46,480 over those of like period in 1896. Canadian Pacific earnings were $553,000 for the same period, as compared with $424,000 in same week of 1896, an increase of $129,000.

EARLY this year Saxby & Harrington opened an engineers' supply store in Toronto. In May they dissolved partnership, and Robert Saxby continued the business, and gave his partner $450 for his share. Since then Mr. S. has been shy of cash, but claimed to be worth about $3,400 in the shape of real estate. He makes an assignment.

THE voting on the by-law providing for the St. Thomas electric railway resulted in a majority of 550 for the by-law, the vote standing 915 for and 365 against. Under the agreement, which this vote endorses, the company agrees to build six and one-half miles of track; second-hand tee rails, to be laid on common wooden ties, with wooden poles; the road allowance is to be kept up by the city, the city to strengthen Wilson bridge and keep it in repair for thirty years, thereby assuming the entire liability.

DELEGATES representing the employers and operatives in the cotton industry met at Manchester on Monday last to consider the question of a reduction of 5 per cent. in wages, which has been proposed by the masters. The operatives rejected a proposal made by the employers to submit the matter to arbitration, basing the question upon the condition of the cotton trade since Sepember 22 last. The conference then closed, leaving the matter exactly where it stood before the meeting.

ABOUT two years ago W. R. Boyce removed from Staples to St. Mary's, and opened a clothing store at the latter place. But he has been cramped for want of capital. This fact, and the excessive competition he encountered obliged him to consult his creditors at Hamilton yesterday. As yet we have not learned what decision they came to.——John Johnson opened a jewelry store at Atwood in the fall of 1889. Six years later he failed, owing nearly $1,500. To pay this he had nominal assets of $800. Then his wife purchased the stock, but has had no better success, and she makes an assignment this week.

CUSTOMS collections at Hamilton for November amounted to $51,630, an increase of $8,000 over November last year.

AT the annual meeting of the Acadia Sugar refinery, held in Halifax yesterday, all the directors were re-elected. No dividend is declared for the second time. New machinery will be put in, and it is expected, with the large stocks of raw sugar on hand, that there will be a better showing next year.

IN April, 1890, Thomas S. Walls became so tired of farming that he sold his property near London and abandoned the business of cultivating the land. Shortly afterward he opened a coal and wood yard in that city. In order to secure trade he contracted to supply a number of large concerns. Several of these contracts were at rates below cost, and consequently the more business he had at this rate the worse off he became. Now the farce ends, for a season at least, in an assignment.——Last week we noted the assignment of Endress Bros., furniture dealers at Petrolia. At a meeting of creditors held on Wednesday, they made an offer of 25 per cent. This will be accepted if the amount is properly secured. They owe about $9,000, and have nominal assets of about half this sum.

IN Hamilton on Tuesday the City Council had a lively meeting, the Mayor in the chair. The Heinz Company's proposed exemptions were passed by resolution, but not with a majority that will make a by-law legal. The County Council asked what proportion the city would be willing to contribute if the county should decide to purchase and free all toll roads, or would the city free the market if the county should free the roads? Among the communications received was one from J. J. Scott, offering to give the Heinz Pickle Company a free site of 20 lots, the company agreeing to allow other concerns that may locate in the vicinity the use of their railway switch, upon such other concerns paying a proportionate part of the cost. On behalf of the Simcoe Canning Company, Mr. W. P. Innes stated, and the Aylmer Canning Company also contended that they, in a measure, do the same sort of business as the Heinz Pickle Company, and that they have never received exemptions, etc., and asking that they be given the same privileges as the Heinz Com-

one cent morning newspaper in the United States, "The Record" still LEADS WHERE OTHERS FOLLOW.

pany. There was also a letter from C. A. Birge, asking that exemptions enjoyed by the Canada Screw Company during the time it has been in operation in this city, be extended for a further period of five years.

Correspondence.

BANK TELLERS AND OTHER BANK CLERKS.

Editor MONETARY TIMES.

SIR,—I have read carefully what your correspondent "V" says on the above subject in the last issue of your journal And there are portions of his letter which I think are hardly called for; at least, some of the conclusions of "V" do not agree with mine—and I am not without experience in dealing with young men.

Quoting THE MONETARY TIMES, which stated that bank clerks are made of much the same clay as other young men, "V" goes on to express his opinion, that "in relation to culture and business acumen, it is to be doubted if they stand on the same plane as our bright young merchanting men." I do not, of course, know in what part of Canada your correspondent lives, or has formed his opinion of bank clerks as compared with the occupants of merchants' counting-houses. But I cannot think he is fair to the average bank clerk when he relegates him, as he seems to do, to a lower plane than the general run of clerks at mercantile desks. A clerk in a bank, it is useless to deny, has a better standing in a community than an entry clerk in a wholesale warehouse, or an invoice clerk in a factory. No matter whether it is in a city or a village, you will find this is the case. I do not propose to argue at any length why it is so, or whether it ought, perhaps, to be different; I am only stating the thing as I have found it in half a dozen places that I am pretty familiar with in Quebec and Ontario. That the bank clerk has less business acumen than the average clerk in a store, I do not admit; and that the bank clerk is behind the other in culture, is a proposition that does not seem to me capable of being sustained. I am assuming, of course, that "V.," when he speaks of the two classes being on different planes, means to put the bank clerk on a lower plane than the "bright young merchanting man." The better standing a bank clerk usually holds in a community may arise from the fact that he has generally better manners than store clerks, and in the majority of cases that I have observed he is also better educated. At any rate it seems to me that there must be some personal reason why what are known as the best people, of both large and small places, like to have bank clerks at their houses. They certainly cannot consider the bank man on a lower plane than the merchanting man in education, whatever they may think about his relative business smartness, or they would hardly prefer him.

In saying this, mark you, Mr. Editor, I am not contending that a bank clerk, or any other clerk, should aim to be a "society man," if that phrase means anything inconsistent with his salary and his circumstances. What is known as "society" differs much in its tone in different places There is such a thing as "good society" properly so-called, entrance into which will do a young man nothing but good. But there are also circles of what is dubbed "society," the tone of which is rude and low; other circles where people are snobbish, purse-proud, shallow; others, again, where back-biting is indulged in, and contempt poured upon those in a different social scale. And, in my humble opinion, the young bank clerk would be far better reading his book and smoking his pipe in his room, than mingling in any of the three circles of "society" I have mentioned

But I have extended my letter beyond what was intended. Let me conclude by saying that I agree with "V" that bank reading might well be encouraged and the young men advised and assisted therein by their superiors and elders. Many a lad, by a little pains, might be interested in his profession and got to devote regular periods to reading (I do not mean books on banking alone), forming thereby a habit which would result in his great present benefit and future delight.

November 26th, 1897. X.

BANK JUNIORS—AND SENIORS.

Editor MONETARY TIMES.

SIR,—Your article of October 22nd, on "Bank Clerks and Other Clerks" has, I perceive, resulted in a number of letters on the subject from correspondents of THE MONETARY TIMES.

Bank clerks are indebted to the affair at Napanee for a good deal of criticism, both adverse and in their favor, and this will, perhaps, be of much assistance to some who are too apt to follow the example of those persons whose habits of life are not altogether what befits a gentleman, who seem to make a practice of running into debt, and living, generally, in a reckless sort of way.

I have been strongly impressed, at times, with the small amount of consideration shown to the juniors, and the bad example set by their elders to those just entered on a bank's service; mere youngsters in most cases, inexperienced, and easily led into bad habits. The older men I complain of have, perhaps, knocked about a good deal in the world, and have acquired evil habits and associations. These men, far from showing any sense of shame, seem to take a pride in relating their experiences—often discreditable ones, before those who are, very often, new hands, and think it the correct thing to admire and applaud the stories. And I have no doubt, it is sometimes their starting point for steps in the wrong direction. They do not seem to realize the fact that they are looked up to by the younger fellows, and that their bad example produces, too often, a strong influence on the boys' minds.

As a general thing, the salaries of bank clerks are, I think, as high as, for instance, those clerks working in the wholesale houses, but in most cases the bank men find it harder to live within their incomes than the others. I think that there are more temptations thrown in our way for spending money. But young fellows in banks often possess the erroneous idea that they must live up to a certain standard, because such and such a thing is expected of them. And I think that in some cases the boys are brought up to expensive habits at home, and on entering a bank they find it still harder than at home to keep within an allowance. The fault does not always lie with the boy.

Speaking more especially of the tellers in our banks, I certainly think that there should be some special fund to provide against losses by tellers. One of the banks has, I believe, such a fund, but only one. Some bank tellers start work on the cash at a very small salary, often not more than $350; and though the "box" may be a light one to start with, it is quite possible, and indeed, no matter how careful a teller may be, almost inevitable, that in some cases he will lose a sum which, out of his small salary, he will be unable to meet. Such a loss may occur not only in the handling of cash, but sometimes by forged cheque, or forged endorsement of cheque, etc.

Tellers often find themselves placed in an awkward position, perhaps at a busy time of day, by the consideration they feel to be due to customers of the bank. They find themselves called on to trust the customers to a certain extent, or else offend them by a too close reference of their affairs to the manager or accountant. The customer does not always consider the teller's position and duty in a case of this kind, and that he as an officer is himself liable to the bank in the event of losses.

BANK CLERK.

Toronto, Nov. 29th, 1897.

—Not So Bad.—Perry Patettic—"I see that they have found a mine of natural soap up near the North Pole." Wayworn Watson—"Oh, that ain't so bad as it sounds. The water up there is all froze."—Cincinnati *Enquirer*.

—Greater New York embraces 359 square miles, has 1,200 miles of streets, 700 miles of sewers, 54 theatres, 112 hotels, 218 banks, 63 libraries, 30 art galleries, 1,093 churches, and 73,336 acres of parks. It has a bonded debt of $217,000,000.

—Dr. Crawford, of St. John, last week recovered through the courts $100 damages from the city for depriving him of his franchise at the last civic election by accidentally omitting his name from the list of qualified electors. Mr. Crawford paid his taxes but was not properly credited on the city books.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Electric Elevators. Public Building, Victoria, B.C.", will be received until Monday, December 20, next, for the construction of two elevators at the Public Building, Victoria, B.C.

Plans and Specification can be seen and form of tender and all necessary information obtained at this Department, and at the Public Works Office, Victoria, B.C.

Persons are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an *accepted* bank cheque, made payable to the order of the Honourable the Minister of Public Works, equal to *five per cent. of the amount of the tender*, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY,
Secretary.

Department of Public Works,
Ottawa, Nov. 28, 1897.

TORONTO, FRIDAY, DECEMBER 3, 1897.

THE SITUATION.

A bill relating to timber licenses is promised in the opening speech of the Ontario Legislature. This is assumed to have reference to the conditions on which future licensees will be permitted to make the lumber, and to imply that the exportation of logs will be forbidden. This may raise the question whether the province has power to prevent the exportation of logs; if it has, the admission of the fact would clear the way to the intended action; if it has not, the decision of the question would be remitted to Ottawa. The appointment of a commission of enquiry into the whole timber question by the Government of Ontario, seems to imply a broad treatment of the problems to which the forest resources of the province give rise. The time has come when the conservation and perpetuation of forests growing on lands not in their nature arable, may well demand the application of a special policy. There are different ways of taking off the merchantable timber; one conservative, the other unduly destructive; one that spares the young trees, the other that looks to nothing but immediate realization of the greatest amount of money at the least cost. If the inhibition to export logs checked the too speedy realization of our forest reserves, we should find ample compensation in the conservation of a resource which another policy would draw upon faster than the forces of recuperation could keep up the timber supply at a prudential level. Looking at the future of our vast prairie country in the West, it is easy to see that Canada needs to husband her forest supplies; and the day is not far distant when any reasonable measure, which tends to produce this result, will be regarded as the dictate of wisdom and true statesmanship.

Within the last few days, it became known that the Canadian Government had resolved upon the policy of reducing the rate of letter postage with the United Kingdom and the different British colonies to three cents per half ounce, the present rate being five cents. This step looks to more intimate relations between Canada and the other portions of the British Empire. There is very little correspondence, between these different places, of a social character; of whatever there is, or is likely to be for some time, the greater part has a commercial motive; and on this line development is likely to take place. The circumstances are not such, at present, as have often, in other places, where the rates were high, given rise to evasion of the postal law, by the intervention of secret carriage of letters by private and and unauthorized persons. There is practically no diminution of postage returns from this cause, and the lower rate will, consequently, have no compensatory force, in a revenue point of view. The loss will not be serious, though it may be taken for granted that three cents will not pay for the carriage. It is one of the benefits of the postal system, that it does not aim at making every transaction pay; if it did, many bye-places in the country would suffer. The postal system of the different nations is the most wonderful system of organization, for a purely public purpose, which has yet been invented; before it, the private expresses, with their relatively high charges and limited area of operation, shrink into insignificance and disfavor. The general effect of the new arrangement will be to give greater efficiency to the postal system of the British colonies. There will still remain the question of making the new facility world-embracing. There is a question whether notice of the change will have to be given of Canada's withdrawal from the Postal Union; if so, the change could not take place for three months; if not, it might go into effect sooner.

Toronto Centre election has made no change in the relative position of parties in the House of Commons. The member elect, Mr. Bertram, represents the principle of compromise, on the tariff question. He denies, as he might in a sense, that the Government's policy is free trade and if we accept the figures of an expert on the other side—Mr. Foster—the tariff reductions last session were less than three-quarters one per cent. (70-100ths). The Opposition candidate, Mr. Howland, was even more pronounced in his utterances, being an avowed protectionist. Both declared for preferential trade, with a difference. If ever both political parties come to vie with one another in the advocacy of protection, the cause of free trade will be hopeless. But this is not quite the actual position. Mr. Bertram is a shade more protectionist than the bulk of the party to which he belongs, as readers of the *Sun*, which speaks for the farmer, and of the *Montreal Witness*, which speaks for the merchant, will discover. Ever since he has had anything to do with the late changes in the tariff, Mr. Bertram has represented compromise in action. As far as the tariff was concerned the two candidates had, personally, very little to fight about; but the general tendencies on the question, of the two parties which they represent, show a divergence which is bound to crop up from time to time.

At Dawson city, three Canadian officials, representing the Mounted Police, the Customs Department, and the Gold Commissioners' office, have sounded a belated note of warning to all who are unsupplied with provisions, that the alternative before them is death from starvation if they stay, or on immediate move down the river Yukon. How is escape possible? To get down the river without provisions is out of the question. Unless those who have food be willing to part with a share of it to set the pilgrims on the way, they could not even start. If they did start, the river might freeze at any time, and would certainly freeze in a few days, and if their slender stock of provisions gave out, there would be nothing for them but to die. The coming ice would permit of the use of water only for a few days, and the distance is 400 miles. That they would meet boats with provisions may not be impossible, even though none are likely to reach as far as Dawson city. This affords one gleam of hope. If, without an attempt to escape down the river, death is certain, it is difficult to say whether the probability would be in their favor, if the attempt were made. The officers on the spot hold out no hope of outside relief being available. But, they say, at Fort Yukon or other points below there are large stocks of food. These words leave it uncertain whether supplies are to be found at Fort Yukon; if not, they are to be found further on. But what the officers probably intended to say was that, if the destitute reached Fort Yukon, they would find supplies of food. It would take the empty-handed miners several days to press from Dawson city to Fort Yukon; and they would have to race against Jack Frost, without assured certainty that they would come in first. It was foreseen, long ago, that no warning would move men who were determined to make a desperate venture of their lives in the hope of making a fortune, in a short time. If it were known that miners are in danger of suffering death for want of food, public sympathy would urge an attempt from outside to save them. Such attempt the American Government is likely to make, for their own citizens.

Other accounts from Dawson city say that nothing is talked of but the food famine. The new comers are most unwelcome visitors if they have not food enough to supply themselves. It seems that the Mounted Police not only advised the new comers without food to make the best of their way to Fort Yukon, but offered them free transportation. Of such as had the means of supporting themselves at Fort Yukon, during the winter, many figured that they would be left in the spring without the means of getting back to Dawson city. Besides the new comers, hundreds who have worked for wages in the summer have to leave now on account of scarcity of provisions. With them it was a question whether they should attempt to live where they were, on half rations, or accept the offer of the Mounted Police to go down the river. The restaurant at Dawson city, which had been selling beefsteaks at $2.50 each, had closed. Flour sold for $75 a sack—what will not a man give for his life?—and now there is none to be bought; no bacon, nothing in the stores but sugar, baking powder, and a little dried fruit, all the supplies being in the hands of private persons, who with prudent care provided themselves in advance against winter's want. A large number availed themselves of the offer of the Mounted Police to go on towards Fort Yukon, the movement receiving an impetus from the news from Fort Yukon that the "Hamilton," on the way up, after unloading half her cargo, so as to draw only 2½ feet, was unable to get over the bar. Great activity is shown by large numbers in getting away, and the difficulty of the operation may be judged by the fact that as high as $250 was offered for a passage on the little steamer "Kiukuk" to Pelly, a distance of 175 miles. The exodus will greatly relieve the congestion. When these people saw their lives in danger, they were in greater haste to get away from Dawson city than they had been to get there.

The battle of the winter ports continues to rage down east. While St. John objects to the subsidized steamers calling at Halifax for the mail, Halifax demands equal freight rates with those to St. John, on the Intercolonial Railway, the distances being unequal to the extent of about one hundred miles. The question is full of difficulties, and as the spirit of the exclusiveness rises, the difficulties increase. The decision to have the winter port in Canada added a new step to the complication. The demand that Portland, a foreign port, should cease to hold this position, was made in the name of the National Policy, and it had its national side; but local spirit borrowed the semblance of the national voice, and pleaded its cause in the name of the nation. We used to be content with the most convenient winter port, before we had the Intercolonial, and even after its advent. It was necessary to build the Intercolonial; it had, and still has its uses, if it entails some loss; but the compulsory use of any port, in time of peace, is a narrow policy, which nothing could justify except the menace that the bonding system may, at any time, receive a fatal blow, at the hands of the Washington Legislature. The question of railway distance is not alone a determining element; cost of construction and cost of haulage enter into the account. Sir Louis Davies, at the St. John banquet, told his entertainers that the road to Halifax could compete with that to St. John.

The telegraph credits Mr. Charles Sonnenberg, now in New York, said to be a member of the Cape Legislature, with the statement that a commercial treaty existing between Germany, Great Britain and the United States, is to be terminated, Great Britain having already given notice to that effect, and that a new one is likely to be made. This treaty is represented as having been in force many years, and under it the United States are said to have sent to South Africa "a great quantity of machinery, petroleum, agricultural implements, hardware, canned and dried fruits, fish boots and shoes, cigarettes and tobaccos." The statistics of South Africa rather spoil this story. In 1885, Great Britain got for her share of the trade of South Africa no less than 95 per cent. Ten years later, other countries than Great Britain, principally Germany and the United States, had among them 14 per cent. of the whole, but the American exports consisted largely of breadstuffs, which were required in consequence of the failure of native crops. Mr. Sonnenberg is opposed to a new treaty, and is evidently anxious to see it defeated. Apparently he hopes for aid in that effort from the Orange Free State, which he says must be a consenting party, and also the United States, in some impossible way. He represents Canada as a party to the proposed exchange of treaties, or at least anxious to be. Will this gentleman honor Ottawa with a visit? He ought to see Sir Wilfred Laurier.

ONTARIO IRON DEVELOPMENT.

Our readers were told six or eight months ago, that five magnetite iron locations had been taken up near Greenwater Lake, fifty miles west of Port Arthur, and that pits had been dug and a shaft sunk on parts of the Mattawin hematite iron deposits near Finmark Station, not far north of Port Arthur. These ore beds are not difficult of access, and are comparatively easy to mine—the operation is mainly one of quarrying—and the expectation was, in the spring of this year, that marked progress would be made in development during 1897. But it now appears that very little has been done in this direction. At least, the efforts that have been made have not resulted in much success. A gentleman well informed in such matters, says the Hamilton Iron Works people have not been as successful as they anticipated in the opening up of deposits of the hematite and specular iron ores on the north shore of Lake Huron. It has been the unfortunate experience in this direction that a large sum of money was wasted in exploration by men who did not properly understand the business. Recently they have been doing work near the mouth of Spanish River, but it is stated that work has been stopped owing to the fact that the deposit was discovered to be on another lot than their own. The company are now negotiating with the owners for working it under a royalty.

CROWN LANDS IN QUEBEC.

The story of the transactions of the Department of Crown Lands for the Province of Quebec makes interesting reading. The report of the Commissioner was the first to be laid before the Legislature. In it are included the business of the Department for twelve months ended with June last—a change having been made to that date from January, the previous fiscal date.

The total receipts for the twelve months were $878,477. Of this total, timber dues, ground rents, bonuses on sales and transfers, etc., brought to the Crown $782,303. The area of land sold by the department was 182,674 acres, for $60,586. There was collected, of arrears, a sum of $53,295. Land intended for farming purposes yielded $52,607.

An increase of nearly a hundred thousand acres has been made in the surveyed farm lands of the Province. An area of 96,717 acres was surveyed and divided into farm lots during the year. The total area subdivided and available on the 30th June, was 6,872,266 acres, including 40,584 acres that reverted to the Crown through cancellations of sales. It is interesting to see what was done in the direction of free grants of land to settlers. Free grants to the extent of 3,496 acres have been given on certain colonization roads, and 8,700 acres have been given to fathers of families of twelve children.

This reminds us of the efforts of Louis XIV., the Father of New France, to increase the population of what is now Quebec. Not only were bounties offered on marriage in the seventeenth century, but Colbert, his minister and Talon, his Canadian Intendant, offered 300 livres a year to such couples as had ten living children, born in wedlock, and 400 livres to those who had twelve. This was about the year 1670. But Colbert had previously offered a reward of 1,200 livres to each married couple who had produced fifteen children, and 800 to those who could show ten little ones.

The sale of clergy reserve lots, realized on the sale of lots and for arrears $573. The area sold comprises 1,993 acres, a remarkably small total. It cannot be termed economical to pay out 56 per cent. of the receipts for the management of any portion of the Provincial lands. But we find that while the collection of rents in the seigniories and other properties, called the Jesuits' Estates, has amounted to $4,971, the expenses under this head have been $2,779, more than half.

Receipts from the Crown Domain property, so called, and the beach and deep-water lots were $3,167. This collection cost $290, or only about 9 per cent. One wonders why the lands of the Jesuits' Estates should cost six times as much to administer in any one year.

Curious it seems to find that while the province should have received within twelve months as much as $24,000 from the game and fisheries service, there should have been derived from miners' fees and the sale of mining lots only $2,000 or less. But we find that the total receipts from the fisheries and game service in Quebec Province for the twelve months amounted to the sum of $24,574, as follows: Lease of fishing privileges in lakes and rivers, $22,211; hunting permits and leases of hunting territories, $2,363. Contrast this now with the figures of receipts from the payments of miners' prospecting fees up to the 9th January, 1897, which amounted to $687, and the sale of mining lots up to that date yielded $1,288. Of course, we are required to bear in mind the difference in dates. But if we double the figures, and say the amount received for twelve months was $3,950, it is but an insignificant and altogether disproportionate sum.

SOME TRADE SUGGESTIONS.

The freedom with which retailers in certain trades are accustomed to cancel orders is disastrous to sound business methods. Should the market fall after order has been given, or should a competing producer offer a more attractive bargain, the buyer too often repudiates the undertaking he has made. The fault at the bottom, lies in the loose ideas that some people have of business morals. The remedy is not merely ethical education, for, however desirable this may be, it is tedious work, and not always suited to mercantile men. A more convenient way of righting the wrong is to insist upon signed contracts and maintain them even to point of legal proceedings. In the long run, we believe this plan means money. It may at first result in the loss of a number of accounts, but, after all, there are few men who will object to the manufacturer protecting himself by reasonable and equitable business methods. The manufacturers of woolen goods and footwear have suffered in a special way from these practices, although others have been injured by them. It is within the power of several strong houses to introduce more desirable methods, and not only conserve their own interests, but those of all the trade.

There is apparently need for restrictive regulations as to the quality of tea imported into Canada from foreign countries. The United States and Great Britain have both taken action to secure purer teas, and it is feared that, shut out from these markets, tea exporters abroad will make Canada a dumping ground for their refuse stuff. Merchants say that already considerable quantities of over-colored, dusty and impure tea, rejected in San Francisco and Tacoma this year, have been re-exported to Canada. A letter from a firm in Japan to a Montreal house says: "It would astonish the consumer if he knew the sources of the stuff now being exported to Canada from Yokohama and Kobe. The sweepings of the year of native godowns (storehouses), the refuse from the tea gardens, leaf that has already been infused and redried, and leaves that are not tea at all—these are collected, re-fired, heavily colored, and packed with a handsome label setting forth that this is the 'finest uncolored Japan tea,' and shipped to Canada." The Dominion Government has frequently passed laws to secure greater purity of food. It would seem desirable that energetic action should be taken in this matter. There are few commodities of which the public is less capable of judging as to purity than tea. The work can be satisfactorily done by experts alone, and to these the Government should give strict instructions as to the standard quality to be admitted into the country.

Hog's hair is suggested by our Sydney correspondent as a likely article to sell in Australia. It is used for mixing with horse-hair for stuffing cushions, etc., and can be transported cheaply across the Pacific. It should be prepared by our pork packers as it is prepared in Chicago, whence the Australian users are getting it, and if this be done it is thought considerable sales of it can be made. Some weeks ago a Scotch tanner was in the Province of Ontario surveying the ground with the idea of opening a tannery here. Among the specialties which he proposed to tan were hog skins. Supplies of raw material for this particular item, could not however, be had in our markets. If the hair could be sold at a profit, it is possible that it would also pay packers to take the skins from the hogs with a view to their utilization as leather. Within recent years the industry of packing hogs has shown a tendency to centralization, and this will undoubtedly lead to more economical methods of disposing of by-products.

ASSESSMENT LIFE ASSOCIATIONS.

In his earlier efforts at defending the assessment system as a good one on which to build up an enduring society for life insurance, Dr. Oronhyatekha held strongly to two untenable points. Firstly, that the death-rate would not necessarily increase with the increased life of a society; and secondly, that $1,000 of insurance could be paid on the natural premium system for very much less than $1,000 paid in, because of the great gain from lapses. He maintained that the lapses were a huge source of profit to the regular companies, and that the gains from them would enable the assessment societies to grant life insurance at one-third the rates previously charged.

Lest any one should doubt that the Independent Order of Foresters was boomed, and is still being built up upon these false pretences, we quote from a prospectus of that society written by the Doctor in 1880: "On a whole life policy for $1,000, some insurance companies charge as high as $26 at 35 years of age, while the very same thing (!) can be got in Forestry for about $6 or $7 a year, and upwards, according to age." And in another such article printed as late as 1887—scarce ten years ago—the following figures were used to show how little money a person would have to pay for $1,000 of insurance in that Order, even if he lived out his full expectancy:—

"COMPARATIVE COSTS OF INSURANCE."

"FOR $1,000 OF INSURANCE IN THE I.O.F. AND IN THE CANADA LIFE, SHOWING THE AMOUNT THAT CAN BE SAVED BY JOINING THE I.O.F."

Age at Entry.	Canada Life.	I.O.F. Rate.	Expectation.	Approximate Total Cost.
18..........	$16 80	$ 7 20	44 years	$318 96
20..........	16 80	7 33	42 "	313 96
25..........	19 00	8 04	38 "	311 95
30..........	22 30	8 64	35 "	304 94
33..........	24 30	9 00	33 "	298 80
35..........	25 70	9 36	32 "	297 64
40..........	30 50	10 56	28 "	297 79
45..........	35 90	12 24	24 "	299 88
50	42 60	17 40	21 "	360 16
54..........	51 40	22 20	18 "	355 20

We have omitted the fractions in the "expectation" column, and given samples at ten different ages. It thus appears that the public was led to believe that every man joining at 54 years of age, and living out his expectancy of 18 years, would have paid to his heirs, from some source, a full $1,000 for only $355.20 paid in. And not only so, but for two extra monthly assessments each year (viz., $3.70, amounting in 18 years to $66.60 more), he could, at 72 years of age, draw the whole $1,000 in cash for only $421.80 contributed.. As, five per cent. of this would go for expenses, the available balance would be just $400.71. Where the other $599.29 was to come from was a puzzle, on the face of it. But the great doctor was equal to the occasion, and made it appear that the wicked old-line companies made a heap of money from lapses, and why not the I.O.F.? It used to be argued in behalf of the Iron Hall's ability to pay $1,000 in seven years on an assessment of $50 a year, that the A.O.U.W. got only $14 a year for $2,000, and had paid all its claims as they came along, and if it could do that on $14, why could not the Iron Hall pay $1,000, in seven years, out of $50 per annum? And the Iron Hall did pay $1,000 to all the first-comers, just as the Woman's Savings Bank of Boston paid ten per cent. interest per annum on deposits for some years, and just as all assessment societies are now doing. First come, well served, is the basis they work upon, with no thought for the misery and disappointment they are piling up for those who trust them most and live the longest, and are finally duped the worst.

Even down to the present time, with such inadequate rates as are above shown (producing a total sum of only $297.64 on age 35), and with only about $20 per member yet saved up, there has been no change made in the rate charged. Not only so, but in a very recent document it is announced in bold black letters, "There is only one assessment each month. No assessments on death," And so the balance between $297.64 and $1,000 remains staring every member in the face—unless made up from the enormous lapses which are to come to the rescue some time in the future,

But now we have a good view of what lapses mean to a society. It is presented to us in a whole-page table in the last number of Dr. Oronhyatekha's own monthly journal, the *Independent Forester*. The table gives figures respecting 40 fraternal assessment societies, collected at their recent fraternal society convention, at Port Huron, showing that in 1896, there were 338,678 new members admitted, and no less than 175,543 lapses. One large society succeeded in inducing 8,538 new members to come in, while 24,800 go out of it alive, and 2,137 died during the year. That was the Knights of Honor. Another society had 31,916 lapses, and still another 19,911. Therefore, these societies, according to Dr. Oronhyatekha's ridiculous contention, must now be getting rid of a lot of onerous liabilities, and in that way making money fast for their remaining members, so that assessments are few and far between. But exactly the reverse is shown to be the case in the following ten instances taken from that table of 40 societies:

Name of Order or Society.	Year Started.	New Members.	Lapses in '96.	Death Rate.	Membership
Chosen Friends........	1879	1,970	4,577	$18 28	24.768
Golden Cross..........	1876	7,820	2,653	10 20	32,506
Knights of Honor......	1374	8,538	24,800	19 01	96,633
Knights and Ladies of Honor	1878	6,294	10,527	14 02	70,927
Mutual Protection	1878	1,244	811	8 78	4,303
Royal Arcanum.........	1877	22,452	4,520	9 45	190,261
Royal Templars........	1870	1,668	1,544	16 15	12,401
Shield of Honor......	1877	411	879	11 00	9.737
United Friends........	1881	637	2,936	16 34	14,264
United Workmen......	1867	48,614	31,916	10 52	369,098
Totals....................		99,678	78,167	......	824.628

For every 1000 new members coming in, 784 pulled out. And, as might be expected, those societies having more lapses than entrants have the heaviest death losses. It is the heavy lapses, mainly, that produce the heavy death rate. The young and healthy, who can get into other societies or companies at a lower rate, are the ones who let their parchments blow away as worthless. The old and sickly stay and pay until the whole establishment blows away. The Canadian Mutual Aid, the Massachusetts Benefit, the Bay State Beneficiary, and a hundred others are only samples of the result, the inevitable result, of the assessment system. An inadequate price for any article, continued year after year, must produce unsatisfactory results in the end. It could not be otherwise.

THE BANK CLERK AGAIN.

A banker in Manitoba, who has followed the correspondence and recent editorials in this journal dealing with bank administration, says, in a letter of last week: "I read with a great deal of interest what you said about the recent unfortunate affair at Napanee, and fully approved of everything you wrote. I cannot understand how some newspapers claiming respectability could have taken the stand they did."

Another correspondent, formerly a banker in this province, commenting on the letter of "V." in our issue of November 19th, says that it brings up some good points, and its suggestions to the Bankers' Association, as well as to bank managers generally, are deserving of approval.

"Bank Clerk," in to-day's issue, mentions some points of vital interest in any discussion of the inner management of banks. The occasional conflict in the mind of a teller, between duty and interest, which is referred to in the closing paragraph of his letter, as "an awkward position, perhaps at a busy time of day," is apt to be embarrassing. And there is, undoubtedly, force in his criticism of the *blase* elder clerk who relates his questionable adventures to admiring juniors. Something like resentment of a comparison which seems to depreciate bank clerks, as compared with other clerks, is found in the letter of "X." He very evidently dislikes the implication that bank clerks can possibly be less clever than counting-house employees or factory bookkeepers, But from the paragraph of his letter next the last, he must have had experience of the various classes of society which his collection of strong adjectives so disdainfully describes.

—It cannot be said that the business men of Canadian towns and villages are, as a rule, either careless of or averse to the provisions of fire-fighting appliances in town municipalities, whatever the other residents may think or say. At any rate, we have lately been made aware of some noteworthy exceptions. A gentleman, whose business brings him into contact with town councillors and merchants especially, tells us that in Oakville, Burlington, Norwood and Hastings, "the business men are hot for fire appliances." He instances some places, on the other hand, whose residents show a short-sighted niggardliness on this subject. "In Drayton, for instance, there is not a fire bucket, and in Bolton the people cannot be got to vote a cent for fire protection. Burlington, too, is badly off, and the business men are at issue with the other residents on this essential matter." Strange that people *will* live on in the belief that, while other places, within from ten to a hundred miles, may be swept by fire, *their* particular town is running no risk of destruction.

EXPORTING LIVE STOCK.

In point of numbers exported, the Canadian shippers of cattle have completed an active season. In 1897, 119,188 head of cattle were sent eastward from Montreal, as against 96,825 head in 1896, and 92,433 cattle in the previous year. The number of cattle-carrying vessels that sailed from Montreal during the season was 304, as against 274 in 1896, 249 in 1895, 254 in 1894, 235 in 1893 and 260 in 1892. The leading shippers of the season were Messrs. Gordon & Ironside, with a total of 35,836 cattle, showing an increase of 8,779 compared with 1896, James Eakins comes second, with 8,037 head, which shows a decrease of 1,714 head from a year ago. Brown & Snell stand third, with a total of 7,101, an increase of 1,425 head compared with 1896, and Alex. McIntosh fourth, with 7,080 head. It is one thing to do a large trade, and another to make a profit out of it. A number of events contributed to reduce the profits of Canadian cattle exporters The prolonged strikes in the United Kingdom had the effect of rendering the markets there unsettled and depressed. But a more serious cause of losses is found in the statement that the cattle failed to fatten as well as was expected, and when they reached the centres of consumption were in poor condition. Dissatisfaction of this nature must always arise in a cattle trade conducted on conditions such as the situation of this country necessarily impose. The one adequate remedy appears to be a change from the exportation of live cattle to that of dressed meats.

TRADE WITH JAPAN.

The banquet given some days ago by citizens of Vancouver to Hon. T. Nosse, consul-general for Japan in that city, was a gratifying tribute to a faithful official and a public-spirited gentleman. The mayor occupied the chair and many representative citizens were present. Mr. Nosse, who is leaving Canada to represent his country in Chicago, made some suggestions to his entertainers, which may well be noted by Canadians elsewhere. Noticing the quantities of lumber sent from the Dominion to Japan within a year or two, he spoke also of a recent large consignment of Canadian salted salmon to that country. We had previously been shipping only salmon in the can, but no one thought of shipping them with their heads and tails on. Mr. Nosse advises us strongly to give attention to the manufacturing of the salmon offal into fertilizer. Speaking of Mr. George Anderson's visit to Japan as Canadian commissioner, he predicted that increased trade would be the result. Canada could export to Japan, besides lumber, meat, flour, butter and salt salmon. Vancouver is so situated that she must control, he said, the Japan trade, as well as that with Corea, Formosa and China. He thought that the iron-producing industry had been too much neglected. The countries of the Orient are awakening from a long lethargy and will want great quantities of iron in the industrial development that is bound to take place. They had talked a while ago of the danger of San Francisco being swamped with Japanese cheap coal. As a matter of fact coal is so scarce in Japan now that she is importing from Australia. Why, he asked, do not the coal producers on Vancouver Island make enquiries and secure some of that trade?

CANADIAN BUTTER ABROAD.

During the ten months ending 31st October, the British colonies contributed 289,429 cwts. to the butter supply of the United Kingdom, as against 2,714,589 cwts. imported from foreign countries. Thus the share of the colonies was a little less than one-tenth of the whole. The colonial supplies are shown, with their relative losses or gains, in the following table:—

Country.	10 months ended 31st Oct.		
	1895. cwts.	1896. cwts.	1897. cwts.
Colonies—			
Canada	28,333	69,351	92,968
New South Wales	38,256	6,394	19,028
New Zealand	48,935	47,053	62,456
Victoria	161,645	93,977	114,977
Total	377,169	216,775	289,429

The only country of these to make a steady gain in this trade is Canada. In 1895, standing lowest among the colonies, the Dominion has advanced to second place in 1897. Victoria still retains first position. The Australasian colonies, it should be noted, export large quantities of butter in the last two months of the year, and statistics at the close of the year may not be as favorable to Canada.

Nations, as well as individuals, sometimes resort to small things with the hope of injuring a competitor. A recent report of the United States Department of Agriculture contains the following: "The products of the United States and of Denmark have been found to be the only absolutely pure butter imported into England, all others, including the product of British Colonies, contain more or less injurious ingredients, used as preservatives—a statement that Canadian butter makers will be prompt to deny." This may be taken as an indication that butter makers in the United States are beginning to fear the competition of Canadians. Not only were the authorities at Ottawa prompt, but emphatic, in denying this canard. The Dominion Commissioner of Agriculture and Dairying says: "The statement so far as it refers to Canadian butter, is entirely untrue. I do not know of even an unfounded rumor published in Great Britain or Canada which could give pretext to such an assertion. The statement is most unfair Canadian butter and cheese are free from adulteration. Imitation butter and cheese, although manufactured in enormous quantities in the United States, are not made in Canada. The manufacture, importation and sale of them are prohibited by statute."

MONTREAL IMPROVEMENTS FOR 1898.

We gave in last issue a *resume* of the recommendations of the Engineer to the Common Council of Montreal, through the Road Committee of that body. The various projects in the way of improvement proposed last week would have cost, if carried out in their entirety, over a million dollars, the exact amount being $1,088,410. On Monday of this week, however, when the Road Committee met, it discussed the City Surveyor's report, asking for over a million of dollars for permanent improvements. After much talk it was decided to cut down the amount asked for the Boulevard St. Denis sewer, the St. James street sewer, Sherbrooke street sewer, and the Mountain street bridge, and to ask next year for a sum of $650,000. If the Legislature allowed this sum, the amount over and above the $650,000, it is proposed, will be asked for the year after.

As to the waterworks department of Montreal, there are pressing needs in the direction of improvement, which are a work of time and cannot be immediately provided. For these $100,000 a year for the next four or five years is likely to be spent. But as to permanent works, three times this sum will be necessary, and it is recommended that the city incur an expenditure of $1,955,072 for permanent works, to be spent probably as follows: 1898, $399,560; 1899, $250,258; 1900, $249,000; 1901, $273,400; 1892, $282,827.

The chairman of the fire committee of the council, Ald. Stevenson, asked for $85,000 for the wants of the department, chiefly for repairs to stations. The absolute requirements of the Health Committee are stated at $72,000, which includes $10,000 for repairs to the Civic Hospital, or, if reconstructed, $25,000; new Morgue, $27,000, and to complete the stables of the scavenging department, $10,000. Repairs to the different markets of the city are declared by the Market Committee to be absolutely necessary, and $44,000 is asked for this purpose. The Parks and Ferries Committee are disposed to get along with $2,250 for 1898.

There is needed, it appears, in addition to the sum of $10,000 already voted to put the city hall building in a sanitary condition, a sum of $65,000 for the purpose of meeting the following requirements, viz.: $70,000 to improve and renew the interior and exterior of that building, and $5,000 for the requirements already mentioned in the report now before the Finance Committee. The sanitary improvement of the city hall is one thing that cannot be neglected.

TIMBER AND LUMBER ITEMS.

A New Brunswick dispatch says that the Victoria saw mills will close down for the season this week, and the Phœnix mill management expect to finish sawing about the same time.

At Fredericton, on Saturday last, six timber berths were sold at the Crown Lands Office: J. D. Buckley got a two-mile block on Bay du Vin River, at $32 per mile; R. D. Richardson, a three-mile block, head of Salmon River, Kent County, at $21 per mile, and T. M. Richards, a two and one-half mile block on west branch of Rockway River at $12 per mile. A nine-mile block on big Tracadie went to the applicant, the Tracadie Lumber Co., at the upset price; a two and one-half mile block, on Piskehagan River, to the applicant, John Dewar, and a two-mile block on Portage Road, Stanley, to applicant, John Gibson, at the upset price.

Referring to the subject of hemlock lumber, dealt with in our issue of 19th November, and especially as to the mill for sawing hemlock logs therein referred to, a letter of 23rd ult., from Chatham, Mirimachi, says, in speaking of that part of New Brunswick: "We have no mill here especially given to cutting hemlock, but at Blackville Mr. Gibson has a mill which he built with the intention of cutting all hemlock, and I understand he intended shipping it to American markets. He, however, was unable to dispose of all his stock of that wood, and had to saw spruce to keep his mill running the past season. There is a large lot of hemlock to be had in this section of the country, but the demand for this class of lumber at present is not very great. Hemlock boards are now used in preference to spruce for boarding in buildings, and for laying under floors. It is claimed that rats will not eat through hemlock, and on this account it is especially good for granaries."

St. John continues to ship lumber to Brazil, the Argentine Republic and other parts of South America. One of the largest cargo of lumber that was ever shipped from that port for South America was cleared on Saturday last by J. R. Warner & Co., in the Norwegian ship "Maren." The vessel is bound to Buenos Ayres and carries 1,198,224 feet boards and scantling.

Remarking upon the close of the deal shipping season at Parrsboro, N.S., last week, the Amherst *News* says that intended shipments were curtailed by the heavy fall in the price of lumber at about the middle of the season, and on this account fully ten millions of deals are held over expecting to rise in the price by spring. But notwithstanding this, Parrsboro has again this year forged ahead, having shipped 44,397,133 feet, against 43,315,244 feet in 1894. In carrying this, there were employed thirty-three vessels of 40,598 tons register, and comprising the following class: Ten steamers, four ships and nineteen barques. Below is a list of the number of vessels loaded by each shipper, the tonnage and the cargo carried:

Shippers.	Vessels.	Tons.	Cargo.
W. Mckay	14	19,767	22,091,171
George McKean	18	19,767	20,846,918
A. C. & C. W. Elderkin	1	1,647	1,459,044

Long and short cedar bolts of the required quality are wanted by the Pacific Coast Lumber Co.'s mill, which, says the *Columbian*, is steadily turning out shingles and lumber, orders for which from the North-West have continued to come in very much later in the season than usual. Some difficulty is experienced in getting empty and flat cars, but there will be plenty of these in the spring, when a busy season will open. "The chief drawback, however, has been the scarcity of suitable cedar. This mill is now offering fifty cents a cord more than the Vancouver mills, a fact which may be not generally known. At the prices now current, it is possible for men to make bread and butter."

SALVATION ARMY INDUSTRIES.

A letter reaches us from the general secretary of the Salvation Army, complaining of the strictures we felt called upon to make upon the industries carried on by the Army. The earlier portions of this communication, dealing with the objects of the processional display on which we commented, are of no consequence. It does not matter to our argument whether the coming of Miss Booth or the celebration of an anniversary was the occasion of the display. The question is, at whose expense was it made, and still more strongly, whom does the Salvation Army industries injure? As to the hire of horses, it is not specifically denied that horses were hired; but we are told that some were loaned gratis, some were paid for by friends, and some belonged to the Army. Our information is that some of the horses used on that occasion were hired.

The secretary is quite ingenious in his discriminations as to what trades were represented in the procession, and how. The letter says, that while a Gordon press was running, there were no printers setting type. It is true, that a person may stand at a compositor's frame and go through the motions of setting type and yet not set any. We had not thought of this dodge, and so may have been misled when we thought type was being set. Therefore, we must stand corrected in this particular. Again, the secretary says there was no laundry work represented in the procession. As to this, all we can say is that what was being done on one of the vans by women and girls bore so close a resemblance to what is done in other laundries, that we called it, and still call it, laundry work. It will not be denied that the Army has a laundry, as it has a dairy and a printing establishment.

But let us get away from Army hair-splitting and see what is said as to the essential criticism we made of the Army's methods. The paragraph of the letter about its rescue work we take for granted. We have no word to say against that work. But to the statement that the money contributed by the public to the Army is not used to compete with other tradesmen, we must demur. The Salvation Army is a whole—and as a whole it is contributed to by many who take no pains to know what is done with their money. One portion of the Army visits houses or dives and parades the streets to uplift fallen men and women—a noble aim; another portion chooses to work at various handicrafts to make money for the Army that way. And we contend that they thus come into competition, and unfair competition, with many hard-pressed tradesmen.

SYDNEY, C.B.

We take pleasure in reproducing in another part of this paper the deliverance of the Board of Trade of Cape Breton with respect to the geographical and other advantages of the port of North Sydney. We have been favored by the secretary with some further particulars about Sydney, which we now place before our readers. The water area of the harbor is twelve square miles; while the depth of water for entering is at spring tide 48 and low spring tides 44. The length of piers in the harbor is 6,000 feet. There are three coal piers, capable of shipping 10,000 tons daily, having a depth of water 25 to 30 feet. Then it is claimed that the facilities for loading cargoes and coaling steamers are the best, and there are good facilities for repairing vessels and machinery. The General Mining Association and the Dominion Coal Company are large exporters of coal at that port.

HAVE THE SALMON CANNERS COMBINED?

There have been frequent reports circulated within the past several years that the salmon canners of British Columbia have united in a trade combination. Investigation has shown that although efforts have been made to that end, nothing has been accomplished. The press of the Pacific Coast province now say that it is officially announced that a pool has been formed, including "practically all the leading houses of the province—R. P. Rithet & Co., Limited, Robert Ward & Co., Limited, J. H. Todd & Son, Turner, Beeton & Co., and Walter Morris & Co. (the Federation Brand Canning Co.) from Victoria; and Evans, Coleman & Evans, Malcolm & Windsor, and George I. Wilson, representative of the mainland—while the Anglo-British Columbia Packing Co. (Bell-Irving & Paterson) will unite with the combination on the other side of the water. The first object of this union of interests has been to fix a uniform price for all the unsold pack upon the market, including some 100,000 cases held from last year, and considerably more than half of the present year's output, or 500,000 cases at the very lowest estimate. For the flats a price of 16 shillings has been made, and for the talls 15s. 6d.—decidedly reasonable figures, but necessarily so, as a very large supply has to be provided for. The combination does not intend that its usefulness shall terminate with this making of a uniform price for the remainder of the pack; it is already taking steps towards the limitation within reasonable bounds of the cannery output in 1898."

The clause introduced into the recent tariff legislation of the Dominion Parliament threatening combines with tariff reduction will not of course affect the salmon canners, as their interests are primarily export, while they are in a position to hold the market against all comers. The centralization of the canneries may carry with it a number of advantages, and among others it would certainly facilitate the work of inspecting the different factories. A combination of packers is by no means easily regulated, as the packers of fruit and vegetables in Ontario know to their cost.

LINEN AND CORDAGE IN CANADA.

At the Manitoba Experimental Farm, attempts have been made we are told, to cultivate flax suitable as material for the manufacture of linen. A quantity of flax plants has been carefully pulled and sent to the experts to be scutched, with a view of ascertaining its value in the production of linen. The idea of building up in Canada a profitable industry based upon the cultivation of flax is by no means new. As long ago as the French *regime*, when the domestic system of industry was all-prevailing, the housewives of what is now Quebec were accustomed to make coarse linen cloth. A census of 1754 notes an annual production of 858,000 ells of linen and cotton stuffs in the colony. Twenty years before this date, the authorities reported to the Home Government that the Canadian farmers had grown 92,246 lbs. of flax in the year 1734. Linseed oil was also produced in New France, and a few years prior to the conquest, 14 mills existed for its production.

When the British acquired possession of Canada determined efforts were made to induce the farmers to cultivate flax and hemp. When the naval strength of Britain depended upon the efficiency of her fleets of sail vessels, it was natural that her statesmen should view with alarm the dependence that was placed to so great an extent upon foreign powers for material with which to make linen sails and cordage. The legislature of Upper Canada granted in 1804 an appropriation of £1,000 for the encouragement of the cultivation of hemp. Commissioners were appointed to regulate the trade, and it was provided that in no case should more than £40 per ton be paid for the purchase of hemp. This was the first of a series of acts passed almost annually to provide for the cultivation of hemp and flax. In 1810 regulations were passed looking to the utilization of flax by provincial manufacturers. In 1816 the sum of £1,000 was appropriated for the usual purpose, and every person who raised five quintals of hemp fit for the manufacture of ropes and cordage was entitled to a bounty of 20 shillings per quintal. Two years later this statute was repealed, on the ground that "no part of the said sum of £1,000 has as yet been called for." The money was devoted to municipal improvements.

The question of the possibility of establishing successful industries in Canada for working up flax and hemp has been so long discussed, that it might well be the subject of a thorough investigation by the Dominion Department of Agriculture. In this way, the resources of the different provinces would be made known. The opportunities in the cultivation of hemp are apparently, through the very general use of substitutes, not very great, but flax offers a more attractive outlook. During the American Civil War, when the price of raw cotton reached an exorbitant figure, a linen mill was established near Hespeler, Ont., and successfully converted Canadian flax into linen cloth. The declaration of peace between North and South, and the re-establishment of the cotton markets on a normal basis, killed the industry. Since that time many changes have taken place in the textile trades, and it is possible that, encouraged by expert skill, and with new territory, say, in the West, in which cultivation of fiber can be carried on, the linen industry might exist in Canada.

QUEBEC ASSOCIATION OF DAIRYMEN.

On yesterday and the day previous, the sixteenth annual meeting of the Province of Quebec Dairymen's Association was held at Nicolet. An elaborate programme had been prepared, which included the reports of the general inspector of syndicates, Mr. Elie Bourbeau, and the assistant general inspector, Mr. J. A. Plamondon, and a discussion thereon. Also a report on the dairy industry in the Province of Prince Edward Island, by Mr. A. W. Woodward; with observations by Mr. J. C Chapais. An opportune feature of the first day was Mr. J. D. Leclaire's report on the creameries of the Province of Quebec. Much has been expected from these creameries, and we believe they must have an enormous influence on the dairy output of the province. The discussion on this topic was followed by a lecture on the branding of butter and cheese, by Mr. J. De L. Tache. Nor must we forget the report on the cheese competition and object lesson, by Mr. A. McLaren, president W.O.D.A., which elicited interesting questions and replies. A very sensible subject of discussion was arranged for the evening of Wednesday, namely, that of good roads, the making of which was illustrated by magic lantern. It is pleasing to find the Quebec farmer being aroused to the improvement of country roads, which are needed there even more, if possible, than in Ontario. And the Rev. Father Rondot lectured on farmers' clubs for young men. Hon. S. A. Fisher, of Brome, Minister of Agriculture in the Dominion Cabinet, added interest to the proceedings by his presence and his words. Also, Hon. F. M. Dechene, Provincial Commissioner of Agriculture.

The president of the association, M. McDonald, M.L.A., who is a practical man in the dairying business, conducted the proceedings from the chair. Parochial co-operation, as a means of reducing the number of small butter and cheese factories—and presumably of concentrating effort in larger ones—was lectured upon by Mr. J. N. Paquet, and a committee reported on the subject of diplomas to butter-makers.

In any gathering of Canadian dairymen, Mr. Robertson, the Dominion Commissioner of Agriculture, is a welcome guest. And he never fails to say something sensible and stimulating. We shall look next week, therefore, for his words on the sale of farm products in England. On the second day, the agenda included lectures on farm manure, its confection and its use, by L. B. A. Richard; on progressive transition from extensive farming to intensive farming, by Dr. C. J. Rinfret, M.P., a weighty subject, and on farmers' clubs and agricultural societies, by H. Bourassa, M.P. Good roads was again a topic on Thursday evening, after which the proceedings took on the nature of a *causerie*, which means a chat, led by Mr. L. T. Brodeur, and the chairman closed the meeting.

FOR GROCERS AND PROVISION DEALERS.

Advices from Bombay are that the appearance of the growing crops continues satisfactory.

A cable received from London states that a quarter of the European orange crop has been destroyed, and they expect to have a good demand for California oranges there this season.

Out of 400 tests of sugar beets made at the South Dakota experiment station, in Brookins, S.D., many give over 20 per cent. sugar. Some farms gave the remarkable figures of 22 and 23 and 25 per cent.

The shipment of produce for use as Christmas cheer in Great Britain from Canada this year is very much larger than usual, and includes a long list of supplies. There is a great demand for refrigerator cars from Ontario West.

Coffee growing in British Central Africa continues prosperous. It is estimated that for this year the crop will yield about 450 tons, and as every year new plantations are being opened up, and areas planted in previous years are coming into bearing, there is every prospect of the supply of coffee from Central Africa assuming very large proportions.

The *West Coast Trade* says that Commissioner Baker estimates the amount realized from Washington's fruit crop this season to be $6,000,000, of which $5,250,000 was derived from shipments outside that State. The fruit crop of Washington State is becoming a surprising revenue producer—the prune yield alone this year being estimated at $2,000,000.

George H. Mills, Government inspector of fruit trees for the county of Essex, has discovered a section where over 2,000 trees are infected with the San Jose scale. He expects that at least 1,000 will have to be burned, causing a loss of $6,000 or $8,000. The infected trees are said to have been part of a large consignment from New Jersey. The county council has been asked to assist the Government officials.

In Montreal, our correspondent says, the sugar market is stronger, and granulated is advanced a point. Teas are quiet with firmness shown in Japans. Dried fruits are strongly held as a rule. A feature that possesses something of novelty is the awakening in dried and evaporated apples, the former, which were a drug last year at 2½c. per lb. are now realizing 5 to 6c., and old ones at that. Evaporated are bringing 10c. in a jobbing way. Canned vegetables show continued strength.

We have heard of Canadian shopkeepers getting tired of their job, but here are two Connecticut grocers who have chartered and are loading a vessel to sail to St. Michael's. These people are not going, says a contemporary, because they are failing in business—their stores will be conducted by their wives during their absence, but they are simply going because they believe they can improve their financial condition. The party will sail shortly by way of Cape Horn, and up the Pacific Coast to San Francisco and Alaska.

Referring to the establishment of a new pork packing factory at Charlottetown, the Summerside *Journal* says: "The new pork packing establishment is the beginning of a great industry in this Province, and it is next to the great dairying industry in importance, or at least our farmers can make it so, by going more extensively into hog raising, and by producing the class of hog required, namely, those weighing not more than two hundred pounds each. A few years ago Denmark, for example, produced only about 60,000 hogs annually, but last year that country exported the product of 1,500,000 hogs. What is to hinder Prince Edward Island from following such an example, and what a position so great an industry would place this country in.

On Tuesday last a deputation of the Montreal Retail Grocers' Association left for Quebec to have an interview with the provincial ministers about the Pharmacy Act. The deputation, which is composed of Mr. John Scanlan, president; Ald. Valleries (of St. Henri), Ald. Turner and ex-Ald. Thos. Gauthier, intends to ask that the Act be repealed, or that the meaning of the word "drugs" be better defined, as under it at the present time comes such articles as flour, sugar, syrup, epsom salts, etc. The grocers wish to be permitted to sell patent medicines.

The grocers are beginning to prepare their windows for the holiday season. Very attractive displays of fruit and other Christmas specialties are being arranged, recalling the lines of Keats:

> He from forth the closet brought a heap
> Of candied apple, quince, and plum, and gourd;
> With jellies soother than the creamy curd,
> And lucent syrups, tinct with cinnamon;
> Manna and dates, in argosy transferred
> From Fez; and spiced dainties, every one
> From silken Samarcand to cedared Lebanon.

It will be seen from the subjoined extract from the *Cape Ann Breeze*, that Nova Scotia codfish is going into the American market in place of French fish, on which the duty is prohibitive: "A cargo of 2,000 quintals of dry bank codfish from Lunenburg has been sold to arrive at Boston, and is the first cargo of Nova Scotia codfish to be sold in this market for a number of years. These fish take the place of French codfish, on which the duty is now prohibitive. The provisions of the new tariff bill provide that the duty on fish coming from foreign countries shall be levied according to the bounty paid by that country to its fishermen, and as France gives her fishermen a very liberal bounty, the duty on French fish is tremendously high.

The shipments of butter from the port of Montreal continue to show an increase over those of last year. During the week ending November 20th, 4,256 packages were sent forward from Montreal, as compared with 3,474 packages in the corresponding week last year. The total shipments to date are 220,191 packages of butter, as against 157,907 packages to date last year. As a quantity of butter made in the creameries of the United States goes by way of Montreal, Canadians cannot claim the whole credit of this material increase in exports. It is but fair to note, however, that Canadian butter is also shipped to the United Kingdom through other ports, and there is good reason to believe that the season has shown phenomenal strength, so far as the exportation of butter from the Dominion is concerned.

FOREIGN TEXTILE CENTRES.

While the Canadian dry goods traders are in the midst of the activity of winter business, signs of preparations for the spring of 1898 are not lacking. A glance at the operations of manufacturers in the great foreign textile centres may thus be helpful in the work of purchasing supplies for the coming season. We give the following reports from abroad, which have been collected from most reliable sources:—

MANCHESTER.—There is not much to report regarding the shipping trade, orders from South America being still poor, while there is practically nothing doing with Cuba. The linen trade with Havana has been very quiet, and business has been practically impossible. Canada, however, buys freely, and some fair consignments of fancy cotton goods for blouse and other purposes have been shipped recently. The silk departments are moderately active. There has been a feeling of greater confidence, however, shown by many houses, and the position of taffetas for the spring trade seems to be assured. The demand for Plauen embroideries does not appear to be satisfactory from the producers' standpoint. There is a large business passing in dress goods, and the number of new styles in woolen materials is large. There does not seem to be a large movement in other goods of this class. Carpets are quiet, but it is a source of considerable satisfaction to makers that they have apparently succeeded in stemming the tide of invasion flowing for some time past from the direction of New York.

BRADFORD.—The general volume of trade in the export yarn market is disappointing in the extreme. Mohairs are active, and the genappe trade is healthy, and in these sorts spinners are being pressed for delivery. Some special sorts which move in sympathy with mohairs are also wanted, but the weft and coating yarn trade shows no improvement whatever, and the conditions are most unsatisfactory. In pieces there is a great scarcity of business in the home trade warehouses, and travelers' reports are generally disappointing. The export trade is very quiet, but a little more is doing for Canada.

NOTTINGHAM.—In millinery laces trade is slow, with no special change of any kind. There is only a moderate demand for curtains and window blinds, and a good number of machines are only partially employed. Little is doing in silk laces, and veilings are quiet. Makers-up of fancy goods are short of orders. In the hosiery things are slack; the demand for underclothing is, however, better than that for hosiery.

ELBERFELD, GERMANY.—Both hat and millinery ribbons have had a rather dull fortnight, but the latter have during the last week or ten days enjoyed a reviving American demand, which has resulted in the placing of a good many orders. Cordings, braids, and lace have shown some irregularity, but a good many articles in this branch are well under order. Velvet bindings have taken fair orders, and a welcome revival has taken place in superior mohair braidings. Soutaches and hollow cords of genappe and mohair sold in considerable lines. Mohair laces show a steady, though slow improvement, with good prospects for the winter season. Business in lace collars is still hesitating, and it is expected that another week or two will pass before this market can be properly gauged. Meanwhile there is a considerable run on a novelty in collars made of mohair and artificial silks, so much so that the stocks of artificial silk are insufficient for the requirements of the makers, who are trying to replace it with natural silk, but find that the latter has neither the lustre nor the hardness of the artificial material. In silk stuffs the only notable change is an improved inquiry for black figured dress goods.

CREFELD, WESTPHALIA.—Fashion continuing to run on silks, makers generally are full of orders, in most cases until spring, and there is a scarcity of hands both for hand and power-looms. The demand favors pretty much the whole range of dress goods, especially moires, damasses, plain and highly finished, and with plaid grounds, taffetas of all kinds, armures and merveilleux plaid effects are still getting the preference.

LYONS, FRANCE.—The statistics regarding the export business in French silk fabrics confirm the belief that silks remain pre-eminently fashionable, and that the disproportion, which existed for such a long time between the production of the raw material and its consumption, has at least during this season disappeared and changed into a demand exceeding the supply. The consumption appears to be steadily increasing, while the production of raw silk shows a decided diminution. The quantities registered during the present week evidence a material falling off in comparison with the preceding weeks, but they still remain above the average, and it is quite certain that if similar quantities continue to be taken out of the market stocks will be lower May 31st next than they have ever been. The smaller quantities changing hands during the present week are the more significant through the absence of any lots bought for speculation; they therefore represent the requirements of legitimate business.

SPRING COLORS IN DRY GOODS.

Great importance is attached by the dry goods trade to the color cards issued twice each year by the Chambre Syndicate des Fleurs et Plumes. The announcement of this chamber for the spring of 1898 has just been made, and will be interesting to merchants handling silks, ribbons, velvets and millinery. It applies only indirectly to dress goods. The yellow shades are most prominent in the 1898 scheme. The range commences with Paille, and has the shades shown in the Fall card of 1897, only under different names, and the list is carried down to the burned orange tint that appeared in 1896 under the name of Capucine, now Coq de Roche, then the lighter Regent, our familiar Tournesol, Ble d'Or, Epis, and finally Paille. Water blue is second in favor, one shade of which appeared in 1896 under the name of Pecheur, the range of tones having been worn some twelve years ago. The new blue is slightly greenish, yet far from being a turquoise—more of an ocean blue; it embraces six shades: the delicate Martin Pecheur, Kollier, Nacelle, Navigateur, and two quite dark shades, Aerostat and Explorateur. These two colors combine well, and are becoming to many women. After the leaders there follows red in all its tints, greens, grays, browns, and purple effects in the order named. In purchasing supplies for the spring, it will be well to remember the Parisian favorites.

—For some weeks there have been reports at intervals of an improved feeling among Canadian woolen manufacturers. They were more actively employed in November at any rate; and now we hear from Montreal that some of the mills are working overtime, while others have actually had to decline orders. There is a fair demand for foreign wools at steady prices, and the 1,000-bale cargo landed at New York for Canadian account has been about half sold.

IMPURE WATER SUPPLY.

The question of a pure water supply is again presenting itself to the minds of the inhabitants of Summerside, Prince Edward Island. Some two years ago, our readers may remember, we made reference to the subject, describing the analyses then made of water from some of the wells in use in the town, and the danger of disease from the drinking of water so impure as that was found to be. Quite recently Mr. Richard Hunt, a resident of Summerside, took samples from three wells in that town and sent them for analysis to Professor Shutt, of the Experimental Farm, who makes a report showing the water of all three to be impregnated with deleterious matter, and advises the residents to boil all the water they intend to use for drinking or cooking purposes. The *Journal* comments as follows upon the result of the test: "The analysis of water from the Summerside wells gives unmistakable evidence that the wells of this town, generally speaking, are in a truly alarming condition, and that many of our people, who imagine they are using good water, are using only liquid filth and slow poison. The analysis in question is one of the strongest possible arguments in favor of waterworks for Summerside." There are many more places than Summerside, in other provinces than P. E. Island, whose residents would do well to take some such step as is described above, and ascertain whether they are drinking sewage. The water of many a village and town well, we are convinced, is impregnated with injurious matter from house and stable drainage, and the residents are in danger of typhoid therefrom.

WESTERN LOAN AND TRUST COMPANY, LIMITED.

The report of this Montreal company states that, in spite of the reduction in rates of interest obtainable on mortgage loans, it has been able to earn as much as in the previous year, in fact a little more, and was able to pay its dividend of seven per cent. and carry forward a few thousand dollars, which is very satisfactory reading. But on turning to the balance sheet and profit and loss account to see what the company's resources are, and what its income and out-go, we find, that whereas the capital stands in the liability column at $2,201,200, the earnings were only some $69,000, or at the rate of a trifle over three per cent. This curious anomaly is intelligible when we perceive that the *subscribed* capital has been placed in the account instead of the paid-up capital. This is ingenious, and serves to make the totals look big, but we submit that it is a practice which would be more honored in the breach than in the observance. The company's paid capital is $561,722, so that its earnings are over 12 per cent. gross. Among the assets is "cash in bank, $21,865," and among the liabilities "due company's bankers, $17,000," so that the amount of cash in bank is $4,865, and on hand $6,001. Debentures to the amount of $450,000 have been issued, and there is also $153,900 of debenture stock, which we understand bears 4 per cent. interest. We observe that Mr. Stephens, the manager, deprecates the passage of resolutions at every annual meeting thanking the staff for their application to business. He says, very sensibly, that annual thanks to employees for performing the duty they are paid for are not necessary. The directors do not lack boldness and enterprise, for they propose to expend $63,000 in acquiring and refitting the Stock Exchange building on St. Sacrament street, where the company's head offices at present are in Montreal.

BOOKS RECEIVED.

Canadian Magazine.—Special Christmas features characterize the December issue of this magazine, which contains illustrations in unusual number. Gilbert Parker has a story in it called "The Tune McGillvray Played. Louis Frechette, Florence Randal and others contribute poetry. Dr. Bourinet continues his series of papers on the "Makers of the Dominion of Canada," the second of which deals with "The Founders of New France." Professor Goldwin Smith has a paper upon the Bacon-Shakespeare controversy, and Dr. Parkin reviews that delightful book, "Tennyson's Life," by his son. Mr. Colquhoun deals with current events abroad. The issue is a very creditable one in all respects.

Mr. George Anderson, Canadian Commissioner to Japan, has presented The Monetary Times with a couple of goodly volumes, on varicolored paper, which he tells us are Japanese reference books similar to those published in this country by R. G. Dun & Co. and Bradstreet. As there is no word of English in the books, except the addresses of business firms on the advertising pages, we take Mr. Anderson's word for it.

Report of the Superintendent of Insurance.—This is the completed report for the calendar year, 1896, extracts from whose contents we have already given from time to time as the separate parts appeared in smaller pamphlet form.

ANSWERS TO ENQUIRERS.

Dinkie, Orangeville.—Yes, we omitted to add that the Canadian Life Managers' Association at its November meeting elected the following officers: President, A. G. Ramsay, Canada Life; vice-president, J. K. Macdonald, Confederation Life; secretary-treasurer, H. Sutherland, Temperance and General Life.

Old Subscriber, Ottawa.—The area of the lately organized Canadian territories of the far North-West, is given in the Year Book for 1896; Ungava, Franklin, Mackenzie and Yukon, land, 1,589,650 square miles; water, 57,700 square miles; total area, 1,642,350 square miles. Inquire of the Department of the Interior for particulars.

J. C., Truro, N.S.—The largest production of Canadian phosphate of lime, or apatite, was in 1890, namely, 31,573 tons. It has declined ever since.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, December 2nd, 1897, compared with those of the previous week:

Clearings.	Dec. 2.	Nov. 24.*
Montreal	$13,523,223	$11,304,796
Toronto	8,630,186	6,555,265
Winnipeg	2,275,360	2,883,357
Halifax	1,372,094	958,369
Hamilton	685,134	570,672
St. John	570,608	544,177
	$27,056,605	$22,816,636

Aggregate balances this week, $3,709,613; last week, $3,795,173

*Thanksgiving Day on 25th; five days' transactions only.

—We have heard the complaint made by bank tellers that the resemblance of the new $1 Dominion notes to the $2 ones is such as to cause an official counting bunches of bills rapidly to confuse one with the other. And now we find the *Free Press* saying that "the $1 bills of the new Dominion issue are not safe to leave in circulation." It is pointed out that the ground work is the same as that of the revenue stamps used on cigar boxes, "and by simply cutting out a figure from the latter and pasting it over the figure 1 of the bill a five dollar bill can be manufactured that will be accepted ninety-nine times out of one hundred without detection." Several of such bills have been passed in Winnipeg.

—It is probable, in the opinion of the London *Economist*, that the Bank of England will now endeavor to maintain rates at the present level; at all events, until the end of the year, "and it will possibly succeed, although the task is likely to prove a somewhat difficult one, for at the beginning of next month the gold taken by the Scotch banks will be coming back, while, as the year goes on, the probability of gold being taken for shipment to the United States diminishes. The tendency, then, is for the money which was withdrawn for the purpose of moving the crops to flow back to the reserve centres, and to help to depress rates there."

—We hear of the following changes in the staff of the Bank of Montreal: Mr. Henry Lockwood, manager of the branch at Amherst, N.S., has been promoted to the position of manager of the Guelph, Ont., branch, while Mr. R. W. Travers, of Hamilton, goes to take charge at Amherst. Mr. A. G. Parker, sub-agent at Seigneurs street branch, Montreal, is to be manager at Peterboro, and Mr. A. S. Henshaw goes to Seigneurs street.

—A Winnipeg business man, writing on the subject of commercial and financial affairs in Manitoba and the North-West, takes a very hopeful view. Referring not alone to actual conditions, as shown by payments and new enterprises, but to the cheerful spirits of both farmers and merchants, he says: "Things are looking very bright in the North-West; in fact never brighter during the fifteen years that I have resided here."

—The directors of the National Bank of Scotland (Limited), have resolved to declare a dividend of 13 per cent. and a bonus of 3 per cent. from the profits of the year ending 1st November, as we learn from the Glasgow *Herald*. The dividend of the Commercial Bank of Scotland has been declared at the rate of 16 per cent.

—The People's Bank of Halifax has opened a branch at Hartland, N.B., and also one at Danville, Que. The agency of the bank at Windsor, N.S., has been closed.

Meetings.

WESTERN LOAN AND TRUST CO., LIMITED.

Minutes of a meeting of the shareholders of the Western Loan and Trust Company, Limited, held in the office of the company, Montreal, on the 16th day of November, 1897.

Present: Hon. A. W. Ogilvie (in the chair), J. N. Greenshields, Q.C.; W. L. Hogg, John Hoodless, Hamilton; Wm. Strachan, W. Barclay Stephens, R. W. Knight, Woodstock; and others, representing in person and by proxy 23,950 shares of stock.

On motion, the minutes of the last annual meeting were read and approved. The directors then submitted the annual report, which was as follows:

REPORT.

Your directors beg to submit the annual report of the company and accounts for the year ending October 31st, 1897, together with the auditors' certificate certifying as to the correctness of the same.

During the last year the rates of interest obtainable were considerably reduced on first-class security, hence the net earnings of the company for the year are little in excess of last year. At the same time we have been able to pay two half-yearly dividends of 3½ per cent to shareholders having 25 per cent. paid on their stock, and have carried to the credit of the Profit and Loss account about $6,000.

We found it necessary (in order to retain desirable loans already made) to reduce the rate of interest, or otherwise accept payment of the loan, as was the borrowers' privilege.

The expenses of the company for the last year have been very moderate. The rent $750, the total amount of directors fees for the year $355.00, leaving the amount paid for salary $3,866.00.

In the item of sundry expenses, including interest and exchange, the item interest and exchange for the year amounted to only $51.00 and some cents.

The assignee and liquidation branch is steadily growing, and much of this year's profits from that source will appear only in next year's business, as the estates have not been wound up nor our fees voted by the inspectors of the estate, hence it has been impossible to have them appear in this year's statement.

Your directors during the year increased the authorized capital $250,000, thus making the authorized capital $2,250,000.

The amount of stock subscribed during the year was $439,750, on which $116,740 was paid.

There is still a little less than $50,000 of the company's stock unsubscribed.

Your directors likewise recommend the purchase of the Montreal Stock Exchange building as a head office for the company.

Yours respectfully,
A. W. OGILVIE,
President.

It was moved by Mr. Hoodless that the report as read be received and adopted. He remarked that in moving the adoption of the report but few words were necessary, as it spoke for itself, but he wished to particularly call the attention of the shareholders present to the fact that the expenses of the company for the past year barely exceed $8,000, including rent, etc., and thought that there was no company in Canada that transacted the same amount of business at the same expense.

After a few congratulatory remarks by some of the shareholders, the report was then adopted.

It was resolved that the shareholders do now proceed to elect directors for the next ensuing year, and that the president be instructed to cast one ballot. On the ballot being cast, the following gentlemen were declared duly elected: Hon. A. W. Ogilvie, Wm. Strachan, R. Prefontaine, M.P., R. W. Knight, W. L. Hogg, W. Barclay Stephens, J. N. Greenshields, Q.C., John Hoodless, W. H. Comstock.

It was then moved by W. Barclay Stephens, seconded by John Hoodless, that Alex. Woods, of Montreal, and J. J. Mason, of Hamilton, Ont., be appointed joint auditors of the company for the next ensuing year. Carried.

Mr. Hoodless said that he had wished to present a resolution as to increasing the manager's salary, but that Mr. Stephens had requested him not to do so this year; nevertheless, he thought it should be done.

He also stated that he wished to make a slight recognition to the president. Two years ago he took the trouble to enquire if the president gave the time and the trouble that they in the West deemed necessary to the company's business, and found that he was giving more time than was expected, and especially so as he was receiving no remuneration whatever, so he proposed the following resolution:

Moved by Mr. Hoodless, seconded by Mr. Knight, that in view of the constant care and careful supervision given by the president, for which no remuneration has been given, and having in view the increased volume of business which our company is doing, and the need of his constant advice, it is hereby resolved that the sum of $500 be tendered to him as a token of esteem and a slight recognition of his services. Carried unanimously.

Mr. Knight expressed his satisfaction at being present, and stated that a few years ago all that he knew of the company was what he saw on paper, and what he learned from his interviews with Mr. Stephens, and that last year he went home from the annual meeting very well satisfied with the company and directors. I might state that it is in my opinion a very slight recognition to Senator Ogilvie, and a resolution that I am very much pleased to second.

Senator Ogilvie. Gentlemen: "To say that I am not pleased would be far from the truth. In my early days I had very good luck and very hard work, and amassed wealth. I did not enter this company for money (not that the money would not have been of use to me) and I may say that I do not think I have ever been called upon by any officer of the company and been found unwilling to give my time and advice. It is worth more to me to know the feeling that the shareholders have for me. It is worth a good deal more to me than money, because when you are getting old, odium is apt to be connected with your name and deeds, but I thank God that so far no one has been able to say that I have been anything but an honest man. I am about seventy years of age, and it is too late now to leave these tracks."

It was moved by Mr. Hoodless, seconded by Mr. Hogg, that section 42 of the by-laws, page 11, be changed, and the words: "First Monday in December" be substituted for the words "Third Tuesday in November," and that in future the dividends be paid half yearly, on the first of January and the first of July. Carried.

It was moved by Mr. Hoodless, and seconded by Mr. Hogg, that section 26 of the by-laws be changed by adding the words, "or assistant manager" after the last word "manager," and that the word "accountant" be struck out between the words "president" and "vice-president." Also that section 29 be changed by inserting the words, "or assistant manager" after the word "manager," in the first line. Carried.

It was moved by Mr. Hoodless, seconded by Mr. Greenshields, that the board of directors be authorized to purchase the building that is at present occupied by the company, comprising about 80 feet frontage on St. Sacrament street, known as the Montreal Stock Exchange, at a cost of $43,000, and to expend in refitting and putting in first-class order, a sum not to exceed $20,000. Carried.

Mr. Hoodless then moved, seconded by Mr. Strachan, that a vote of thanks be tendered to the manager and employees of the company for their faithful and efficient work, as well as application to business, during the last year. Carried.

Mr. Stephens said in reply: "I am very much obliged for the kind resolution that has been tendered to myself and the other employees of the company. I do not think, however, that these resolutions should be made or passed at every annual meeting. Of course when reading the usual annual reports, it is always customary to see such resolutions. I take the stand that when a person is paid to do a certain work it is but right to do it to the best of their ability. No thanks is due to him who but faithfully performs his duty. I can assure you on behalf of the employees of this company that they will continue to look after your interests in the future as efficiently as they have done in the past."

On motion the meeting adjourned.

At a subsequent meeting of the directors, it was moved by Mr. Hoodless, seconded by Mr. J. N. Greenshields, that Hon. A. W. Ogilvie be re-elected president. Carried.

It was moved by Mr. Hogg, seconded by Mr. Knight, that Wm. Strachan be re-elected vice-president. Carried.

W. BARCLAY STEPHENS,
Manager.

To the President and Directors:

Gentlemen,—I hereby certify that I have checked every entry in the books of the company and found them to be correct. I have also checked the foregoing statement and certify that the same is correct in every particular.

I went through the mortgages of the company and found in every case a certificate of title issued by the solicitors and insurance policies with the mortgage.

The average of your loans is less than 50 per cent. of the appraisers' valuation.

Respectfully submitted,
ALEXANDER WOODS,
Auditor.

SALVATION ARMY INDUSTRIES.

Editor MONETARY TIMES.

Dear Sir,—In your issue of November 19th there appears a notice under the above heading, referring to "an item" communicated to the Montreal *Witness*, respecting the Army's week of self-denial, and at the same time calling attention to a recent Salvation Army demonstration in the city of Toronto.

We are not in a position to know who is the author of the notice appearing in your paper, but we could wish that whoever contributed the same had made themselves better acquainted with the actual facts of the case before committing to the public press information of a somewhat unreliable character. Permit me, therefore, to kindly call your attention to the following:

The occasion of the "processional display" was not the "coming of Miss Booth, the Commandant," but the 15th anniversary demonstration of the Salvation Army's advent to the Dominion.

Reference is also made to "Army officers from other towns, and expenses connected with their coming.

These officers would have been in the city of Toronto for the annual congress, whether the demonstration referred to was held or no, experience having taught us the wisdom and value of holding these annual congresses.

Bands.—There were but two bands from outside cities, and one of these was composed of officers; the other was from Peterboro, and the bandsmen having paid their own expenses, were no cost to the demonstration whatever.

Children's Costumes.—The children's costumes were provided by their own parents, and therefore no expense to the Army.

Banners.—The banners were simply white calico ones, painted by an Army officer, telling what the different sections of the procession represented.

Mention is also made of horse hire. Perhaps you were not aware that some of the horses were loaned gratis, and several were paid for by a wealthy friend of the Army, while quite a dozen belonged to our own institutions. Again: Reference is made to Salvation Army workers plying their trades. Here there are several errors. There *were neither* bakers at work, nor was there laundry work represented. Neither were there any printers setting type. A Gordon printing press *was* running.

The industrial representations were as follows: Women's Rescue work, Men's Social Work, the League of Mercy, and the Industrial Farm Colony. The only object of these institutions is to gather in the poor, the fallen, the homeless, and outcasts, and to endeavor, by surrounding them with good influences, to improve their condition temporarily and spiritually.

The money contributed by the public for Salvation Army purposes is *not* used to go into competition against other tradespeople. The only competition the Salvation Army knows is that of good influence against evil, in order to win the bodies and souls of men to virtue and Godliness.

In conclusion, permit me to say, that money got for "evangelizing purposes" is spent upon the objects for which it is raised, and no money is used to go into business in opposition "to the very people who contributed it." Perhaps it would be interesting for your readers to know that the merchants and farmers, etc., who know the most about the Salvation Army's operations, are those who contribute the most generously to the support of them, and personal investigation produces the most friends and supporters.

Yours truly,
A. GASKIN,
General Secretary.

—Adelaide has been reached from London in 27 days by the Peninsular and Oriental steamer "China."

—The nomination of officers for the Maritime Commercial Travellers Association is announced to be held on December 8th.

CAPE BRETON BOARD OF TRADE.

The board of trade at North Sydney, C.B., issues, under date November 20th, 1897, the following circular:

The port of North Sydney, including Sydney, as stated by Lloyds and the Admiralty sailing directions, constitutes one of the finest harbors in the world. It is the nearest first-class North American port to Europe, and has been designated, in order to facilitate rapid trans-Atlantic travel, as the first port of arrival for the new Canadian fast steamship line.

From its excellent maritime position, at the confluence of the St. Lawrence and American seaboard, on the ocean highway between Canadian, American and European ports, with its deposits of economic minerals and abundant supply of coal for export and for bunkering ocean steamers, it is destined to become one of the leading commercial ports of North America.

The following figures from the North Sydney Harbor Commissioners' reports show the increase in arrivals and coal shipments for the past seventeen years:

Years.	No. ocean steamers arrived.	Total arrivals.	Coal shipments from harbor.
1879..	41	1,153	147,051 tons
1886..	289	1,486	386,823 "
1896..	623	2,190	913,549 "

North Sydney already ranks fourth in the Dominion in shipping arrivals. In 1895 the number of arrivals reported at the principal shipping ports of Canada was: St. John, N.B., 3,114; Victoria, B.C., 2,574; Halifax, N.S., 2,190; North Sydney, C.B., 2,119. But including vessels for orders, and arrivals at Upper Sydney and other customs entries within the harbor limits, the total is 3,401, the greatest number by 287 at any port or harbor in the Dominion.

It is easily the first Canadian Atlantic coal port. The shipments from the respective piers during the current year will aggregate one million tons.

This is also the Eastern terminal point for the Intercolonial and North American railway systems, and with the completion of the Intercolonial Railway deep-water terminus here, during the next few months, will afford ample accommodation for the largest class of shipping.

GEO. H. DOBSON,
Secretary.

WHEAT AND FLOUR.

The following statement shows the quantity of wheat and wheat flour imported into and exported from the Dominion of Canada during the fiscal year ended June 30, 1897. It is compiled for the *Globe* from a statement furnished by the Minister of Customs for Broomhall's (Liverpool) *Corn Trade News*:

EXPORTS.

Countries to which exported.	Wheat, bush.	Flour, brls.
Great Britain	12,948,889	248,441
Australia	100,805	91,641
United States	16,603	5,218
Germany	20,559	3
Newfoundland	15	124,766
Belgium	54,467	.. ....
Brazil	......	300

	13,141,338	481,764
IMPORTS.		
Great Britain........	20	28
United States........	5,845,119	84,797
	5,845,139	84,825
Exports, less imports..	7,296,199	396,939
Net exports wheat and flour, equal bushels, wheat	9,082,425	......

Wheat and flour received from the United States and transhipped at the port of Montreal (not included in above exports):—

Great Britain	219,542	811,766
Argentine Republic ..	......	1
Newfoundland	......	220,026
Germany	......	715
	219,542	1,032,508

It will be seen that the net imports of wheat and flour during 1896-97 amounted to 9,082,425 bushels, as compared with 9,808,898 bushels in 1895-96; the quantity transhipped in bond at the port of Montreal in 1896-97 was 219,542 bushels wheat and 1,032,508 barrels flour, as compared with no wheat and 1,363,683 barrels flour in 1895-96.

—The plant and property of the Guelph Norway Iron and Steel Company was sold at the mills on Nov. 24th for $9,700 to Mr. John Taylor, who has been employed in the yard. Forty-eight thousand dollars was put into the enterprise. Work on the building was commenced in May, 1895, operations began in January, 1896, and the mill ran off and on until May, 1897, when it was closed. The stockholders will lose everything. It is said the creditors will get about 85 cents on the dollar.

The British Canadian Loan and Investment Co., Limited

DIVIDEND NO. 40

Notice is hereby given that a dividend at the rate of SIX per cent. per annum on the paid-up capital of the Company for the half-year ending 31st December, 1897 has this day been declared, and that the same will be payable on the

Third Day of January Next

The Transfer Books will be closed from the 22nd to the 31st proximo, both days inclusive.

By order of the Directors.

R. H. TOMLINSON,
Manager.

Toronto, 30th November, 1897.

THE

UNION LOAN AND SAVINGS CO.

66TH HALF-YEARLY DIVIDEND

Notice is hereby given that a dividend at the rate of SIX per cent. per annum has been declared by the directors of this Company, for the half-year ending 31st inst., and that the same will be paid at the Company' Offices, 28 and 30 Toronto Street on and after

Saturday, the 8th Day of January prox.

The Transfer Books will be closed from the 20th to the 31st inst., both days inclusive.

TORONTO MARKETS.

TORONTO, Dec. 2nd, 1897.

DAIRY PRODUCE.—The supply of butter is somewhat in excess of the demand so far as the local market is concerned, The shutting down of numerous cheese factories has naturally led to an increased make of butter. Of both dairy and creamery, the supplies coming forward are liberal. Quotations remain about as quoted last week. The cheese trade is very dull and prices depressed. There is a good active demand for all strictly fresh eggs offered, and the supply is scarcely equal to the demand. Limed eggs are in demand, both for export and by way of local consumption. We quote:—Fresh, 16c.; cold stored, 12 to 14c., and limed, 13 to 13½c. per dozen.

GRAIN.—A firm market exists in the wheat trade, and values remain very steady. The roads are in improved condition, and free deliveries are being made at country points. The world's wheat shipments were large again last week. With the heavy purchases of Europe in all the export markets of the world for five months past for forward shipment, it was reasonable to expect considerable movement in wheat during the present month. The surprise expressed by operators at the continued large movement was mainly for speculative purposes, the idea being to bear the markets. The week's figures were 9,089,000 bushels, of which 3,256,000 were Russian, which was cause for some surprise in face of reduced crop estimates and talk recently of closing of navigation in Russian rivers tributary to the great wheat ports. These were 500,000 over last week's shipments, and 1,200,000 over those last year. Oats in the local trade have been in good request, and prices have advanced 1c. per bush. Peas remain firm, with quotations steady.

The stocks in store at Port Arthur on Nov. 20th were 1,209,222 bushels, and there were received 806,403 bushels and shipped 1,305,783 bushels, leaving in store on Nov. 27th, 1,719,843 bushels.

VISIBLE SUPPLY OF GRAIN.

The visible supply of grain in the United States and Canada, with comparisons, is as follows:

Bushels.	Nov. 27, 1897.	Nov. 28, 1896.	Nov. 29, 1895.
Wheat	33,656,000	58,914,000	63,903,000
Corn	42,058,000	18,228,000	5,517,000
Oats	15,261,000	12,474,000	6,397,000
Rye	3,595,000	2,559,000	1,423,000
Barley	5,891,000	5,357,000	5,310,000

Wheat increased 948,000 bushels last week, as against a decrease of 1,057,000 bushels the corresponding week of last year. Corn decreased 1,283,000 bushels last week, oats decreased 253,000 bushels, rye increased 30,000 and barley increased 860,000 bushels.

Corn "	11,000	....

HIDES AND SKINS.—There is little change in the local situation. Dealers are paying 9c. for butchers' green cow hides, and quote cured at 9¼ to 9½c. per lb. There has been one of the usual outbursts of competition in the trade, and as a result merchants are paying $1 for sheepskins. Merchants, generally, are dissatisfied with the condition of affairs. A report from Chicago, Nov. 30th, says: "Business was moderately active, but no important lines reported sold; prices unchanged and steady to firm, closing at 11 to 11½c. for native steers; 10¼c for Texas 1; 10 to 10¼c. for butt brands; 9¼ to 9½c. for branded cows; 9 to 9¼c. for Colorados; 10¼c. for heavy native cows, and 10¾c. for light do." In the local market tallow is dull and prices are unchanged.

HOPS.—The market is very quiet and Canadian hops quoted at 10 to 12c. are slow of sale.

LEATHER.—Only a moderate trade is being done by tanners. The excessive price of raw material continues to be a serious barrier in the way of profits in trading. There are few incidents of trade that need to be recorded. Dongola leathers continue to meet with active demand at prices ranging from 15 to 20c. Imitation dongola is being imported from the United States, and at 14c. the very best class of these goods can be had, while inferior stock is selling as low as 7½c. The shoe manufacturers report about the usual average trade of the season.

PROVISIONS.—There have been more liberal receipts of dressed hogs on the street, and by way of rail shipments, as was to be expected from the colder weather and more favorable shipping opportunities. The proportion of heavy hogs to the total receipts is much less this year than last; the light hogs are quoted $5.50 to 5.60, and the heavy and less desirable weights $5.25 to 5.35 per cwt. Provisions continue active.

SEEDS.—The general movement of seeds is, at present, very limited. Alsike is quiet, dealers quoting $3 to 4.50; red clover finds better enquiry, with $3.40 to 3.75, the quoted price. Timothy is worth $1 to 1.25 per bushel. New York advices, December 1, report: There is nothing new or even old to be said of the seed trade, as it is absolutely neglected at old quotations asked, exporters being out and the season too early for home trade. We quote: Clover at $5.50 to 6 00 for common to fair and $6 to 6.25 for choice to fancy in job lots; No. 1 clover, export, $3.40 per bushel f.o.b. New York; $2.75 to 3.00 for fair timothy in car lots, and $3 to 3.25 for high grade.

WOOL.—The local wool market is very quiet. Only occasional lots of wool are coming forward, and for these 20 cents is about an average price, with 21 cents paid for choice descriptions. The main interest is turned to the foreign centres. The last series of wool sales of the year opened in London, Nov. 25th, with a full attendance. The catalogues offered include good merinos and a poor supply of crossbreds. Continental buyers purchased largely of merinos, and home buyers took what crossbreds were offered. Prices were unchanged, except for inferior and faulty, which ranged from par to 5 per cent. decline. Slipes sold well at the old rates. Geelong scoureds realized 18d., and Victoria new clip grease 10½d. The American representatives have made only very small purchases.

MONTREAL MARKETS.

MONTREAL, Dec. 1st, 1897.

ASHES.—The market has assumed a very quiet phase indeed since the close of navigation, and we do not hear of a recent transaction. Quotations are easier, and it is questioned if more than $3.25 to 3.30 could be realized for first pots; seconds, $2.90 to 3.00. Pearls are relatively firmer at $4.75 per cental.

CEMENTS AND FIREBRICKS.—As anticipated last week, prices of cements have been advanced from 5 to 10c. a barrel, as all stocks are now in store, and we quote British $2 20 to 2.25; Belgian, $1.95 to 2.10. The belated "Boston City" is reported in the Gulf with 5,000 barrels of Belgian cement, which she will endeavor to discharge at Quebec. Firebricks are advanced to $17 to 22.00 per M.

DAIRY PRODUCTS.—There is naturally a lull in the cheese trade since ocean export is over; but the local market is rather steadier than it was a week ago, although latest cable quotation indicates a decline of sixpence in the Liverpool market. Finest Ontarios may be quoted at 8⅜ to 8⅝c.; Eastern Townships, 8 to 8¼c.; Quebec, 7¼ to 7¾c. per lb. The market for butter, except fine creamery for local consumption, is flat. We quote:—Creamery, 17½ to 18c.: fine dairy, 15 to 16c.; under grades, 12½ to 14c. per lb. Selected boiling eggs readily bring 17 to 18c.; No. 1, candled, 13 to 14c.; No. 2, ditto, 11 to 12c. per dozen.

DRY GOODS. — The wholesale dry goods trade, generally, are now in the throes of stocktaking, but there is, nevertheless, a fair amount of business doing, and there have been a certain number of large buyers in the city, who generally come to town about this date looking out for job lots; wholesalers being disposed to make concessions on some goods, rather than carry them over for another season. Retail business in the country is evidently very fairly active. In the city, while the larger stores are all busy, there is a disposition to grumble at limited sales on the part of the general run of retail dealers. As regards prices there are not any new features.

FISH.—The market continues very firm for green cod, with continued reports of scarcity at eastern points, and expectation of further advance. Of real Labrador herrings there is no supply at all this year. Those in market are mainly Cape Breton fish; of these few are offering. We quote:—For green cod, No. 1, large, $4 50 to 4.75; No. 1, ordinary, $4 to 4.25; No. 1 herring, $4.00 to 5.00 for brls; $2 50 half brls.; N.S. salmon, $12.00 to 12.50 for No. 1; British Columbia salmon, $10.50; sea trout, $7.00 to 7.50; dry cod, $3.50 to 4.00; finnan haddies, 6 to 6½c; kippered herrings, $1.25 per box; Yarmouth bloaters, 90c. to $1.00 a box. Oysters are high in price: Malpecques, $3.50 to 3.75 for ordinary hand-picked, ditto, $4.50 to 5.50.

FURS.—Prices as quoted below have not been subject to any revision since opening of the season, and there is nothing of interest to note. We quote: – Mink, large dark, $1.25; small, do., 75c.; marten, $1.50 to 2 00; fisher, $4.00 to 6.00; lynx, $1 00 to 2.00; otter, $10.00 to 12.00 for dark; pale, $4.00 to 7.00; red fox, large, $1,30 to 1.40; small, $1.00; cross fox, $2 00 to 5.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 15 to 75c.; rats, fall, 8c.. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—Sugars are not so active, but the market is stronger, and refiners have advanced granulated a point, declining to entertain offers below 4⅛c. for largest lots, which is a sixteenth better than a week ago; second grade granulated, branded "German refined," is quoted at 3¾c., which is also a shade higher; yellows range from 3⅜ to 3⅝c. Molasses continues firm at last quotations. There is still an absence of any activity in teas, but stocks of Japans in first hands are really low, and the market for the same very firm. The sale of 560 pkgs. of Sargune Congous, a low grade to the Lower Provinces is reported at a figure about ten cents. Other lines of black are dull. The rush of deliveries of dried fruits is over, but the market holds up well in all lines. Currants and sultanas continue to show strength at primary points. Tarragona almonds are advancing, also Grenoble walnuts, in the latter case due to the manipulation of the market by a French syndicate, and quotations are advancing six francs per 100 kilogrammes. Evaporated apples are dear, and could not probably be had below 10 cents in a jobbing way, and some holders of dried apples are realizing 5 to 6c. for old dried apples, which last year they would have been glad to sell at 2 to 2½c. In canned vegetables and fruits the upward move continues. Packers are said to be practically sold out of tomatoes, and corn and peas are scarce. In gallon apples there has been a veritable boom; a packer's agent reports a sale of a 1,000 case lot lately at $2.20, a big advance on last year, and he is instructed now to take nothing below $2.35.

HIDES.—The only change to be noted is the usual monthly advance in lambskins, which are now quoted at 85 to 90c. each. Hides are firm at 8½c. per lb. for No. 1; being the price realized to butchers for green, the quotation to tanners for cured being 9½c. There is evident scarcity, and some Western tanners write that they think of looking for supplies in Europe.

LEATHER.—The situation is practically without recent change. Boot and shoe men continue to report good orders, and jobbers are reported to be placing a good many orders with Quebec manufacturers. Of dongolas and colored leathers there are continued very fair sales, but in ordinary grades of black leathers there is little movement. In these latter lines, however, there is great firmness, owing to low stocks and the advancing tendency in the hide market. Tanners generally are talking of higher prices; some Western tanners find a difficulty in getting a supply of hides, and talk of buying in Europe. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22 to 23c.; No. 1 ordinary Spanish, 22 to 23c.; No. 2, 19 to 20c.; No. 1 slaughter, 25 to 27c.; No. 2 do., 21 to 23c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 17 to 20c.; juniors, 15 to 17c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c; colored calf, American, 25 to 28c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.. extra heavy buff, 15c.; pebbled cow, 12 to 13c.: polished buff, 11 to 13c.; glove grain, 12 to 16c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—While there is not much demand for pig iron, the market shows no weakening, and a shaded offer for 100 tons of No. 1 Hamilton iron was declined a few days ago. The sale is reported of 250 tons of Scotch iron, Govan brand, which had served for ballasting on several trips of an ocean steamer, at a pretty low figure, for pipe-making purposes. No further supplies of Siemens iron are available; all the No. 2 that was here has been sold, and the stock at the furnace is held for their own foundry, etc. Canada plates are very dull at the moment, also tinplates, which are rather weaker in England. The home market for lead is barely steady, and a decline from present high prices is not improbable. We quote:—Summerlee pig iron, $18 to 18.50; Carron, No. 1, $18.00; No. 3, $17.25; Ayrsome, No. 1, $17.00; No 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $16.00 to $17.00, ex-store; Siemens pig No. 1, none; No. 2 Siemens, none; Ferrona, No. 1, $00.00; Hamilton No. 1, $16.00 to 16.50; No. 2, ditto, $15.50 to 16.00; machinery scrap, $1400 to 15.00; common ditto, $12 00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D.Crown, I C, $3 60 to 3.75 do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, tc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.75; English ditto, $2; hoops and bands, $1.90 to 2.00. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1 50; three-sixeenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3 65 to 3.75; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 15¾ to 16c. for L. & F.; Straits, 15¼ to 15½c.; bar tin, 16½ to 17c.; ingot copper, 12 to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.75; antimony, 9 to 10c.

OILS, PAINTS AND GLASS.—Matters have now assumed a comparatively quiet phase in these lines, and, indeed, quietude will likely prevail for the next couple of months. In prices there are no changes of note. Livingston & Co., the Baden, Ont., linseed oil crushers, have put up their quotations a cent, but local quotations are as below. Turpentine is also unchanged. Glass remains very firm at quotations, and though there has been no actual advance, some firms have withdrawn the discounts sometimes

English, $1.40 for first break; $1.50 for second break.

Wool.—The cargo of Cape wool for this market, spoken of last week, is now unloading in New York, and comprises 1,000 bales, a good portion of which has already been placed at good prices, ranging from 14½ to 17c. Further reports of reviving activity are reported among the woolen mills, several of which are working overtime, and others are reported as having had to decline some orders.

THE NYLIC.

The New York Life Insurance Company has established an organization known as The Nylic, embodying an absolutely new and unique method of compensation, by which men of integrity, ability, and energy, with or without experience, can make life insurance their business, and secure a definite income continous throughout life.

Applications are invited by the undersigned for general and special agencies and management of territory from experienced Life Insurance men, as well as from those wishing to acquire training and experience.

R HOPE ATKINSON, Agency Director, MONTREAL.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $25,592,003 78

The Metropolitan has $150,000 in Dominion of Canada registered stock on deposit with the Canadian Government, for the protection of Policy its holders in Canada.

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy
All ages from 1 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of Insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Millers' & Manuf'rs Ins. Co

Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
AS. GOLDIE, Pres. J. L. SPINK, Vice-Pres
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life

ASSURANCE COMPANY

HEAD OFFICE, ... WATERLOO, ONT

INSOLVENCY LAW.

Providing a suitable law were adopted, it would certainly be better to have a general insolvency law applicable to the whole country, than to have local laws, differing widely in the different provinces. It would be worth while making an effort to frame an efficient insolvency law, even if for no other reason than to attain uniformity in matters of this nature throughout the Dominion. * * * Manitoba has better laws than many other divisions of the Dominion in regard to insolvency, and so far as this province is concerned there has not been so much dissatisfaction with the law as there was a few years ago. The efforts made through provincial laws to abolish preferences, though not entirely satisfactory, have materially improved the situation so far as the province is concerned. With some further amendments, the local laws could be made very satisfactory. By dividing up claims and bringing suit for small amounts, through the county courts, we have seen that preferences can still be established by law in Manitoba. This could no doubt be easily remedied. The local laws relating to chattel mortgages are also unsatisfactory. A chattel mortgage which permits one creditor to obtain a priority over another can be worked to establish a fraudulent preference.

Winnipeg merchants have extended their business into the territories and also to a considerable extent into British Columbia, and on this account many of our local houses are interested in insolvency legislation beyond the borders of Manitoba. In the Territories there are some unreasonable features in the matter of exemptions, and the law in Manitoba is not blameless in this direction also, though the exemption laws in Manitoba and the Territories also have been mainly directed toward rendering the farmer independent of his creditors. In this they have succeeded to a very liberal extent. In British Columbia there are also some objectionable features in the way of exemptions, as well as the possibility of establishing some preferences which are not always considered reasonable.—*Commercial.*

COST OF THE 1900 EXPOSITION.

Some interesting figures are just at hand as to the estimated cost of the great fair to be held in Paris in 1900. The financial details are said to be completed. In total the figures show a probable expenditure of about $100,000,000. It is interesting to note the details of the proposed expenditure of this vast sum. The buildings, of course, absorb the far greater portion of it. The cost of the two palaces in the Champs Elysees will be at least $4,300,000; those in the Champ de Mars will cost $5,750,000; the two on the Esplanade des Invalides, $1,000,000, and those on the Quay something like half a million. The new bridges to be constructed across the Seine, of which the Pont d'Alexandre Troisieme will be by far the most magnificent, will absorb something over a million dollars. The mechanical and electrical service will use up nearly $1,500,000; to the circular railroad will be appropriated $300,000; to the illuminations and lighting, about $200,000, while the fountains and the decorations of the gardens will have devoted to them no less than $300,000. Fetes and exhibitions will cost another million dollars, while music alone will have allotted to it $200,000. The jury will divide a similar sum. This will leave a reserve fund of something like $1,250,000.—*Shipping List.*

STOCKS IN NEW YORK.

The latest New York circular of Henry Clewes & Co., in noting the still further decline of transactions in shares during last week, says that the purely speculative stocks are neglected, "owing to the prevailing disposition to avoid risky ventures." The words we have quoted indicate something of a novelty, to be sure, on the New York Stock Exchange. But the circular goes on to explain that the reaction lately experienced makes the most sanguine persons sober and timid. "All great and sudden rises are largely stimulated by the feebler and less experienced operators," says Messrs. Clewes & Co., "Their confidence rises in proportion as prices advance; and when the more prudent have realized at a profit and the whole weight of the market rests on these lighter supports, they rush from the extreme of sanguine expectation to that of utter disappointment and distrust; and, worse still, their means are dispersed, and they are no longer a buying factor in the market. It is some years since so many of this class of operators were on the market as during the recent rise; they were the main element in the advance; and their absence or inability now constitute a main cause of the prevailing stagnancy. No matter how cheap stocks may be at the present range of values; nor how large the earnings of the railroads; nor how encouraging the condition and general outlook of business interests; nor how much political dangers may have abated—all this amounts to little so long as the market lacks the vanguard of the mass of sanguine minor operators who always take the lead in starting booms." The New Year is likely, in their opinion, to witness a revival of speculative buying.

WHEN POSSIBLE, GIVE THE OTHER FELLOW A WIDE BERTH.

A man who walks about a steamer's bridge day after day and night after night, without once seriously and carefully working out a few collision problems in his mind, is the person most likely to fall into a glaring error when the opportunity presents itself. What is to be said for those disastrous collisions which take place during a fine clear day, or when, at night, with the stars shining brightly, the lights of an approaching steamer can be seen even before her hull has actually cleared the horizon? As a rule they happen when the bridge is in charge of young and not well experienced officers, who, however smart they may be in carrying out general duties, too often fall into the mistake of following the rule of the road too absolutely. "If I see a steamer's masthead and red light just a little on my port bow, and find that she is approaching me on a nearly parallel line, I know that she will pass me to port, and consequently I am all right." So far, yes. But does he remember that in such circumstances ships may pass each other at distances much too close for a safe high speed in the open sea? What happens if, on getting within a short distance of each other, one ship takes a yaw in her steering, and to such an extent as to accidentally show her green light? The officer may suddenly conclude that it is owing to a designed change of course, and there being, as he thinks, no time now to lose, he orders his own helm a-starboard! The most successful officers are those who determine to give other vessels a good wide berth. If commanders advised such circumspection more often than they do in "night orders" there would be fewer inexcusable collisions.—*Nautical Magazine.*

—The Chief of the Halifax Fire Department has been testing all the hose in the fire department of that city. So far about 6,000 feet has been tested, and out of this amount 350 feet was found in bad condition. Out of 400 feet of hose which was purchased in 1884, 350 feet was found to stand the test of a pressure of 150 pounds to the square inch. This lot of hose has been in use for thirteen years.

—Two Profound Problems.—"Why is it that the man with the squeaky shoes always comes late?" "I don't know. Why is it that the man who comes in late always wears squeaky shoes?"

RATES AND THE CONFLAGRATION HAZARD.

In view of the strong pressure for lower premiums, which is being brought to bear on all rate-making organizations, it is interesting to note that the conservative spirit which pervades the Boston Board of Fire Underwriters has recently led them to turn down by a large majority a proposition to make a flat reduction in rates of 10 per cent.

A glance at the record of that city for the sixteen years ending December 31, 1896, shows that the aggregate premiums have been $40,642,089, and losses paid by companies $21,935,666, which, with an expense ratio estimated at 35 per cent., would leave a profit of 11 per cent.

For the past ten years the record is even less favorable, the premiums for this term showing $28,561,671, and the losses $16,934,088, or a profit of 6 per cent.

An examination of the details of these figures shows that fourteen of the sixteen years covered were years of exceptional profit, the loss ratio ranging from 22 to 55 per cent., with an average of about 38 per cent. The other two years were the conflagration years, so called, in which the loss ratio amounted to 168 per cent., and 139 per cent., respectively, destroying the otherwise good record, and leaving only a fair profit for the whole period covered.

The recent great fires in London and Melbourne emphasize the fact that conflagrations are liable to occur at any time in large cities, and all rate-making organizations should load their rates sufficiently to provide for this hazard.—*Insurance Press.*

THE FREE PASS PROBLEM.

The free pass problem continues unsolved. At the meeting of Joint Traffic Association presidents this week the special committee on passenger agreement reported that it had failed to agree upon any plan for the restriction of the pass list. The committee acknowledged that the only way to stop pass abuses was the absolute cutting off of that privilege, but it was suggested that the companies continue on the same lines as provided by the old trunk line pass agreement, which required all applications to be endorsed by the chief officials of the road. It was decided to continue the committee, and the pass question was referred back to it for future consideration and report. As already remarked in these columns, the ideal way of conducting the railway business is undoubtedly to require cash for all transportation, but realization of that ideal seems yet to be remote.—*Railway Age.*

—"Anybody who feels inclined to believe that the trade of the eastern and western shores of this province are not now drawing their supplies via Halifax, should make a visit to the I.C.R. wharves at 'Deep Water,' Halifax, Nova Scotia," said a flour jobber with whom I had a chat about business last Friday or Saturday, no matter which. "Fifteen vessels loading flour at the Government wharves in one day, that's what I saw last week," said he; "and it is no uncommon thing to see a half a dozen small craft taking in this class of cargo at the same time." Halifax flour merchants have good reason to feel satisfied with their volume of trade, since the present freight arrangement on the I.C.R. went into effect. They have more than doubled their shipments to outports via Halifax, and they are all of the opinion that within a very few months it will be more exceptional than ever, to hear of a cargo of Canadian flour being bought in Boston for a Nova Scotia port.—*Maritime Merchant.*

—"As you never work, Slowboy, I can't understand why you take such an interest in trade reports." "Well, when other men are prosperous I find it easier to borrow money from them."—*Chicago Record.*

PUBLIC NOTICE

Is hereby given that all persons who take out ordinary participating Policies in the

Canada Life Assurance Company

before 31st December, 1897, will at the next Division of Profits, receive

Three Years' Profits

being one year's additional bonus over those policies issued in 1898. Enquiry should be made without delay from LOCAL AGENTS by intending assurers.

DECISIONS IN COMMERCIAL LAW.

City of Toronto v. Toronto Railway Co. By the Supreme Court Amendment Act of 1889 an appeal lies to the court from the judgment of any court of last resort created under Provincial legislation to adjudicate concerning the assessment of property for provincial or municipal purposes in cases where the person or persons presiding over such court is or are appointed by provincial or municipal authority. Held by the Supreme Court of Canada that the persons presiding over the court appealed from (that is, a board of county judges) were appointed by federal authority, and the case was not within the amendment of 1889. The court, therefore, had no jurisdiction to hear the appeal; and it was quashed, with costs.

Holwell v. Township of Wilmot.—The transfer by the defaulting treasurer of a municipality to the bankers of the municipality of the accepted cheque of a third person, for the amount due by him to the municipality, cannot be impeached under the Assignments and Preferences Act, the duty to make good his wrong being sufficient to protect the transaction. The cheque was sent by the treasurer in a letter to the bankers, and this letter was received by the bankers in the afternoon; but the amount was not credited to the municipality in the bank books till next morning, and before this was done, an assignment for the benefit of creditors had been made by the treasurer. The Court of Appeal held that the property passed as soon as the cheque reached the bankers, and that the assignment was not a revocation of the transfer.

Macdonald v. City of Toronto.—Action by Ernest Albert Macdonald against the corporation of the city of Toronto and Robert J. Fleming, for a declaration that a certain contract between the defendants, and the appointment of the defendant Fleming as assessment commissioner for the city of Toronto, pursuant thereto, were illegal and void, and for an injunction restraining the corporation from further employing Fleming under the appointment, and from paying over to him any of the funds of the corporation for his services as assessment commissioner, upon the ground that his appointment to that office was procured by corrupt and illegal means, whilst he held the office of mayor of the city of Toronto, and by an unlawful scheme, contrivance, and conspiracy. At the close of the trial it was admitted that the plaintiff had failed to prove these grounds of his attack, but it was argued a trustee could not profit by his trust, and therefore he could not rightly hold office. Meredith, J., decided that the defendant Fleming had, in the manner provided by the Municipal Act, ceased to be mayor before being duly appointed assessment commissioner. After he had vacated the office of mayor the council would have been within its legal rights in appointing some other person to the office of assessment commissioner, as is its right, at any time, to remove him from it. The Judge was unable to consider that the defendant Fleming was disqualified for the office, because (as he found as facts) he desired the office, and endeavored to obtain a salary of $5,000 a year, and was offered and accepted the office at $4,000 a year, before vacating his office of mayor. A man is not to be disqualified always because he has once been a member of the council; the line must be drawn somewhere, and in my judgment can be rightly drawn only at the time of appointment to and acceptance of the office.

Mercantile Summary.

TENDERS for $24,000 worth of County of Middlesex debentures are to be opened this week. This money is to be applied to the reduction of the county debt.

THE Guelph and Ontario Investment and Savings Society, of Guelph, has declared a dividend of 4 per cent. for the half year payable on and after 3rd of January.

THE New York Board of Trade and Transportation has appointed a committee of fifteen members to arrange for the annual celebration of the board to take place some time in January.

THE steamer "Rotterdam" of the Holland-America steamship line will serve as a pattern for two new steamers to be built by Harlan & Wolff, Belfast, Ireland. The steamers will ply between New York and Rotterdam.

WORD from Montreal states that the Canadian Pacific Railway has reduced its freight rates from 28 cents to 20 cents per one hundred pounds from Fort William to Montreal and other points east on its system.

UP to the 1st December the grain receipts from the American and Canadian North-west at the port of Buffalo on Lake Erie amounted to the enormous quantity of two hundred and forty millions of bushels. This, we believe, is unprecedented in volume.

ACCORDING to the Edmonton *Bulletin*, five coal mines are being worked at Egg Lake Creek, north of Sturgeon river this winter. Coal is loaded on sleighs at the pit mouth at $1 a ton. Last winter the price was 75c., but with the improved times the price of coal has risen.

WORD comes from Portage la Prairie that the section of land about four miles north, known as the McLaren farm, and owned by Alloway & Champion, has been sold by the firm's manager, A. G. Halstead, to Dr. Cowan. The consideration was the Doctor's cheque for $14,000.

THE property of the Bresse shoe factory, insolvent, was sold last week for the benefit of creditors The stock, valued at $19,168, brought 65 cents on the dollar, and the book debts, amounting to $6,200, brought 36 cents on the dollar. Total amount realized $14,692.

THE first steamer of the direct line between New York and India, the "Sahara," took on Sunday last, as part of her miscellaneous cargo, a large consignment of American-made steel rails. They were shipped by the Maryland Steel Rail Company, and their destination is Calcutta. The "Sahara" also goes to Bombay.

THE quantity of wheat received at the elevators along the line of the Canadian Pacific Railway in Manitoba and the North-West Territories up to the end of November reached 9,580,950 bushels, as compared with 6,447,750 bushels for the same period of 1896. The receipts for the month of November were 1,684,500 bushels.

RECEIPTS of wheat at Duluth for the twelve months ended with 1st December, have been about 35,000,000 bushels as compared with 58,000,000 bushels last year. Shipments from January 1st to the close of navigation, it is expected, will be about 36,000,000 bushels, as compared with close upon 51,000,000 bushels in 1896.

WE find it stated in the Vancouver *News-Advertiser* of the 30th ultimo, that sixty debentures of Geo. Cassady & Co, Limited Liability, were on the 29th sold by the sheriff in connection with the suit of the B. C. Land and Investment Agency *v.* The Bank of Montreal. The shares bore a face value of $500 each, and realized at the sale $15,000.

THE Brantford *Courier* of Monday last states that the Canadian General Electric Co. has issued a writ against the Street Railway Co., of Brantford for $230,000 on an old construction account, and judgment has been secured for the amount and placed in the sheriff's hands for execution. "This will pretty heavily paralyze the Street Railway Co., and leaves little room for Mr. Easton to get his damages."

ON Friday of last week was made known the result of voting in Sherbrooke, Que., on the by-law providing for the purchase of the city water system and plant from the Sherbrooke Gas & Water Co., amount $125,000; by-law 179, to spend $35,000 towards erecting a new bridge to replace the old "Aylmer" bridge, and to grant an extension of time to the Sherbrooke Street Railway Company line. They were all carried by large majorities.

THE Royal Hotel Company of Hamilton, Limited, is incorporated to buy and hold the real and personal estate necessary for and to carry on a hotel business, with a total capital stock of $100,000. The parties to the company are Walter Dowsler Beardmore and George Wathen Beardmore, of Toronto, merchants, and James Clark McKeand, accountant; James Turnbull, banker, and John Jackson Scott, barrister-at-law, all of Hamilton.

AMERICAN papers are calling for subsidies to American ocean steamers. United States manufacturers say that, in competing for work and material in South and Central America, they are badly handicapped by the lack of transportation facilities. England and Germany have steamship lines to ports in South and Central America, which make weekly sailings, and this certainty of transportation gives English and German manufacturers a great advantage over the American. To fill a recent contract in South America one company was obliged to ship material to England, and there have it reshipped to a South American port.

IT will be recalled that something more than a year ago what was considered a cause of action arose between the John D. Park & Sons Company. of Cincinnati and the National Wholesale Druggists' Association. The Messrs. Parks deemed themselves aggrieved and boycotted and threatened suit. This suit has now been brought, for in Philadelphia on Nov. 24, a declaration for damages in the sum of -500,000 was filed in the Court of Common Pleas by Parks' attorneys. This is one of the cases in which service was had on Oct. 5, 1896, when the N.W.D.A. was assembled in convention at the Hotel Walton in Philadelphia. The declaration, or complaint, names thirty-three defendants. The suit was not sooner brought because the attorneys wanted the injunction case settled first.

A. A. LAFERRIERE & Co., dealing in hardware, etc., at Berthierville, Que., have assigned, and are offering 50 per cent. in cash. Mr. Laferriere was formerly of the firm of Laferriere & Tellier, who failed in 1893.——F. Cardinal, general merchant, St. Stanislas de Kostka, Que., who has been for four years doing business under cover of his wife's name, again proves unsuccessful, and has assigned.——A demand of assignment has been made upon Gauthier & Vervais, hotel keepers, St. Laurent.——M. Lepage & Fils, a general store concern of limited calibre at St. Adelphe, Que., have made an assignment of their estate.——P. Gelmas, of St. Alexis des Monts, Que., lately insolvent, has made a proposition to pay 25 cents on liabilities of about $2,000.

The GURNEY FOUNDRY CO., Limited
TORONTO.
The GURNEY-MASSEY CO., Limited
MONTREAL

Mercantile Summary.

The British Mortgage Loan Co. has declared its 39th dividend at the rate of three per cent. half yearly.

The city of St. John, N.B., advertises for tenders for the purchase of $125,000 worth of debentures.

The generating works of the People's Heat and Gas Company at Halifax have been burned. Loss, $50,000 to $75,000; fully insured.

Before the end of the year get rid of the postal card reminder from The Monetary Times that you have put up over your desk until a more convenient season. Not by tearing it up—no, no; but by buying a postal order for the amount due.

The Eastern Trust Co., Halifax, has been appointed trustee of the estate of R. E. Sweet, merchant, Country Harbor, Guysboro. Kinsman Sweet was the assignee, but the assignment having been attacked by one of the creditors, the Eastern Trust Co. have been appointed pending a settlement of the suit.

According to the Vancouver *World* of December 1st, the British American Corporation, represented by the Hon. C. H. Mackintosh, has purchased for cash the control of the famous Josie mine at Rossland. Three hundred and sixty thousand shares were transferred at thirty cents a share, or at the rate of $210,000 for the property. Mr. Mackintosh is in negotiation for more of the stock.

Letters patent have been issued in Ontario incorporating Edward W. Rathbun, Frederick S. Rathbun, and Edward W. Rathbun, manufacturers; Richard Rayburn, miller, and Bunella Rathbun, all of Deseronto, and Cornelius Arthur Masten, of Toronto, under the name of the Deseronto Milling Company, Limited, to carry on a general milling business, and to buy, sell and deal in general merchandise, with a total capital stock of five thousand five hundred dollars.

In Montreal, on Saturday night last, the outgoing directors of the Dominion Commercial Travellers' Association tendered a complimentary banquet to their president, Hon. J. D. Rolland, on the completion of his first year of office, as a mark of their esteem and as a recognition of his constant courtesy and goodfellowship. Several of the ex-presidents of the body were also present. The chair and vice-chair were occupied respectively by Lt.-Col. Fred. Massey and Mr. J. T. LeSueur.

Later advices have come from Pittsburg as to the consolidation of wire-making interests into a huge wire trust. The original statement of Friday last was that the organization would include, under a capitalization of $50,000,000, every wire, wire rod, and wire nail plant in the United States, and besides these, two blast furnaces, one of which has its own ore supply. Three steel plants also to be included in the deal. Monday's despatch announces the confirmation of the main features above given by Pierpont, Morgan & Co., of New York, who are behind the transaction. Details are meanwhile being arranged. The story on Wall Street is that Charles Coster, of the firm of J. P. Morgan & Co., is the prime mover in the proposed consolidation.

Oftener than is pleasant, the publisher of a trade paper receives this sort of left-handed compliment from traders: "Your paper is valuable, but we have no time to read it," which is much the same thing as if a carpenter should say: "This is a valuable chisel, but I have no time to use it." The workman who lets his tool-chest run down is very apt to let his business run down also. For what purpose, asks the *American Grocer*, is any tradesman in business? Primarily to make money—to get a living. Very good. How is this to be done? In these days of hard competition, by following the best methods. What are the best methods? These we have from the trade paper. "No time to read the trade paper" is like saysaying, "No time to sell goods."

FOR SALE.

Drug Business in Brockville.

The undersigned will receive tenders for the business of Allan Turner & Co

The stock is about as follows:—Drugs and Medicines, $7,000; plant and fittings, $1,300; total, $8,300.

Mr. Turner having accepted a position with an American house as their representative in Canada, has decided to sell the business as a going concern, with the good-will and connections of fifty-four years.

Tenders at a rate on the dollar will be received up to the 15th day of December next, at 12 o'clock noon.

The purchaser can then make arrangements to take stock and arrange with the landlord as to tenancy. Apply on the premises or to

W. H. BROUSE,
No. 2 Manning Arcade, Toronto.

Notice

Is hereby given that an application will be made to the Parliament of Canada at the next Session thereof on behalf of the Board of Trade of the City of Toronto, for an Act to amend the Acts relating to the Gratuity Fund of the said Board of Trade for the carrying on of the said Fund by a different method of assessment, or providing for the issuing of paid-up certificates to the members of the Gratuity Fund with a reduction of the annual dues, payable to the Board of Trade by crediting interest on such certificates towards the annual dues, or by the winding up of the said Fund, and a distribution of the same among the members thereof, or by such other manner as may be determined upon.

Dated this seventh day of December, A.D., 1897.

W. H. BEATTY,
Solicitor for the Board of Trade

PROVINCE OF NEW BRUNSWICK

Mercantile Summary.

O. MATTE, of Quebec, a young man who began in the grocery business two years ago, with the assistance of his father, has made a voluntary assignment, and shows liabilities of $4,600, of which $3,200 is due to his father.——F. V. Juneau, also a grocer in a small way, in the same city, has assigned.

A MAJORITY of the directors of the Verity Plow Company decide in favor of remaining in Brantford, providing they can come to terms with the corporation. The Plow company want $15,000 for their old buildings, exemption from taxes, and free water, an 8-inch main being necessary for the new works. The building they will erect is to cost not less than $40,000.

THE Ottawa *Journal* learns that a prominent contractor of Arnprior, Mr. James Fowler, has been awarded the contract for the building of the Pembroke Southern Railway from Pembroke to Golden Lake, a distance of about forty miles. It is understood that the contract figure is in the neighborhood of $200,000. Surveyors will be sent out immediately to make the final survey. The road will probably be in running order by the middle of July.

THE dry goods and millinery business of W. H. Beasley & Co. was started in 1871 at Clinton, and after the long period since intervening it is now in the hands of an assignee for the second time. The firm's first failure was in March, 1886, when they owed $5,000, which was settled for $4,200.——An assignment has been made by Ernest Rutherford, dealer in electrical supplies in Peterboro. He owes $2,500, and has practically nothing with which to pay this sum—a poor showing for two years' business.

BOTH Andrew and Miles McCarron had been in business in Wallaceburg, and failed. After acting as clerks there for some time, they opened a grocery store under the style of McCarron Bros. During the past two years they have found business dull in groceries, and have now assigned.——Another assignment is that of W. D. Mutch, a small custom tailor, at Woodville. —— About three weeks ago, we noted the difficulties of D. M. Smith, general storekeeper, at Beaverton. This week we hear that he has arranged a settlement with creditors, who obligingly wrote off 60 per cent. of their claims.

ANTHONY GILLIS, a general dealer of Middle Melford, N.S., (a place on the Straits of Canso, ambitious to become the port from which a fast line of steamers shall sail to make a short Atlantic passage to Europe, and which lately changed its name to Terminal City), has assigned. Mr. Gillis was formerly a school teacher, and has only done a small business for a few years—DeWolfe, Son & Co., an old established firm of carriage makers in Halifax, N.S., have assigned, making preferences to the amount of about $21,000; other liabilities are about $5,000, and assets nominally $32,000.

RESPECTING the story published a fortnight ago in the Rossland *Record* and copied into several other papers that a "deal had been consummated" for the sale of the Heinze smelter at Trail, and the tramway between Rossland and Trail, to the Gooderhams, of Toronto, for $2,000,000, the sale was said to include the smelter, the C. & W., and the Trail-Robson branch, and all rights, privileges, grants and franchisess held by Mr. Heinze in the Kootenays. Upon enquiry at the office of the Gooderham & Worts Co. yesterday, we were informed by Mr. T. G. Blackstock that there was no truth in the story.

H. R. BOYCE, dealer in clothing at St. Marys, called a meeting of creditors in Hamilton last week, as we have already stated. The offer he then made was refused, and, unless it is increased, the business will probably be wound up. A compromise at 50 per cent. has been made by E. Bristow, grocer at Arthur. He owes about $800. Being inclined to do too much business for his small capital has got him into trouble.
